As from 1 December 1989 Items 3-49 may be used only by practitioners on the Vocational Register. These items replace the time-tiered items (now Items 52-72) which are now available for use solely by other medical practitioners. The remaining general practitioner attendance items (Items 73-80) are available to both vocationally registered and other practitioners.

MEDICARE BENEFITS SCHEDULE BOOK
AMENDMENTS - 1 DECEMBER 1989

1. The attached pages incorporate amendments for insertion into Section 2 "Medicare Benefits Schedule - General Medical Services" (1 August 1988 edition). The pages (grey edging) are identified by the date 1 December 1989 appearing in the bottom left hand corner of each page. The amendments apply to services rendered on and after that date.

2. The amendments relate to (i) the introduction of new content based general practitioner items following agreement between the Government and the Royal Australian College of General Practitioners (RACGP); and (ii) amendments to other sections of the Schedule as part of the ongoing review of the Schedule in line with developments in medical practice. These latter amendments, which involve mainly the urology, thoracic and nuclear medicine parts of the Schedule, have been made in consultation with the relevant professional groups.

3. The fees for the new content based general practitioner items have been structured in accordance with relative value units established by the RACGP. The fees for the time-tiered attendance items (that is, those items for use by other than vocationally registered general practitioners) have been maintained at the 1 September 1989 levels with the exception of Items 1 - brief consultation and 55 - institutions (now Items 52 and 66) where the fees were reduced to \$10.00 to bring them into line with Level A consultations under the new arrangement (that is, Items 3 and 14). However, the Government agreed not to similarly reduce the fees for Items 34 - Hospital and 46 - Nursing Home (now Items 76 and 79) because of the resultant fee anomaly whereby the total amount for seeing three patients would be less than that for seeing two.

4. New items and items where the fee or description has been amended are identified by one or more of the following symbols appearing in the margin adjacent to the item number concerned:-

- | | | |
|-----|--------------------------------|---|
| (a) | New Service | † |
| (b) | Description of service amended | ‡ |
| (c) | Fees amended | + |
| (d) | Item number changed | * |

5. Determinations made by the Minister since the last amendment to the Medicare Benefits Schedule have also been included with these changes. These relate to (i) Assisted Reproductive Technologies (Item 9065) which came into operation on 1 August 1989 (fee not subject to 1 September 1989 fee adjustment) (ii) Computerised Perimetry (Items 9459-9461) which are effective from 1 September 1989; and (iii) Laser Therapy (Items 9462-9475), introducing new conditions in respect of port-wine stains which are retrospective to 1 February 1989.

The attached pages should be inserted in the current (1 August 1988) edition of the Medicare Benefits Schedule book in place of the following pages:-

NEW GENERAL PRACTITIONER CONSULTATION ITEMS - "VOCATIONAL REGISTER OF GENERAL PRACTITIONERS"

INTRODUCTION

6. Twelve new items have been introduced into the Medicare Benefits Schedule book (Items 3-49) which relate specifically to attendances rendered by medical practitioners who are listed on the Vocational Register of General Practitioners maintained by the Health Insurance Commission.

7. Only medical practitioners on the Vocational Register are eligible to itemise the new content-based items (Items 3-49). These items substitute for the time-tiered items (now Items 52-72) which are now available for use solely by other medical practitioners. The remaining items relating to unreferral patients in Part 1 (Items 73-80) are available to both vocationally registered and other practitioners.

ELIGIBILITY

8. The criteria for registration as a vocationally registered general practitioner is certification from either the Royal Australian College of General Practitioners (RACGP), or a Vocational Registration Eligibility Committee (VREC) or the Vocational Registration Appeals Committee (VRAC), that the practitioner's medical practice is predominantly general practice, and that the practitioner has appropriate training and experience in general practice.

9. The VRAC will hear appeals from medical practitioners who are refused certification by either the RACGP or a VREC.

10. The regulations establishing the VRECS and the VRAC require these committees to have regard to the eligibility criteria published by the RACGP and to consider each case on its merits. At the time of printing these notes these committees were not functioning. The criteria used by these committees will be a matter for the committees to determine.

11. The criteria which the RACGP will use in certifying a practitioner's eligibility are summarised below.

12. From 1 January 1995 the only training and experience which the RACGP will regard as appropriate for eligibility will be the attainment of Fellowship of the RACGP or an equivalent post-graduate qualification in general practice.

13. However, in the interim, to avoid disadvantaging medical practitioners already in practice, the RACGP has indicated that for the purposes of such certification it will accept other training and experience as follows:-

The medical practitioner is in practice which is predominantly general practice, and

- is a Fellow or a Member of the RACGP; or
- has attained a 'Certificate of Satisfactory Completion of Training' awarded under the Family Medicine Program conducted by the RACGP; or
- has been in general practice (as defined) for at least five years; or
- has passed the RACGP examination in addition to a year of hospital training, post intern prior to the end of 1989; or
- has experience and training approved by the RACGP, equivalent to the above categories; or
- has a qualification or certification acceptable to the RACGP from

another country, for example, Canada, UK, USA, NZ.

14. In assessing whether a practitioner's medical practice is predominantly general practice, the RACGP will consider only services eligible for Medicare benefits. To qualify, 50% of this clinical time or services claimed against Medicare must be in general practice as defined, with a minimum of 2 sessions per week. The RACGP will have regard to whether the practitioner provides a comprehensive primary medical service, including treating a wide range of patients and conditions using a variety of accepted medical skills and techniques, providing services away from the practitioner's surgery on request, for example, home visits and making appropriate provision for the practitioner's patients to have access to after hours medical care.

15. All enquiries concerning eligibility for registration should be directed to the RACGP at 43 Lower Fort Street, Sydney, NSW, 2000, or to the VREC in your area c/- PO Box 9848, (CAPITAL CITY AND POST CODE).

HOW TO APPLY FOR REGISTRATION

16. To be listed on the register, application on the approved form must be made to the Health Insurance Commission following issue by the RACGP or a VREC or the VRAC of certification of eligibility. A copy of the certification of eligibility should be forwarded to the Health Insurance Commission with the approved form (signed by the practitioner) when the practitioner decides to register; or application will be made to the Health Insurance Commission direct by the RACGP or VREC where authorised on the application for eligibility. The application form will accompany the certification.

17. The Commission's address for the purpose of submission of applications for registration as a vocationally registered general practitioner is:

Manager, Eligibility and Benefits
Health Insurance Commission
GPO Box 9822
(CAPITAL CITY AND POST CODE)

18. Continued vocational registration is dependent upon involvement in appropriate Continuing Medical Education (CME) and Quality Assurance (QA) programs approved by the RACGP.

19. All enquiries regarding the QA and CME requirements should be directed to the RACGP at 43 Lower Fort Street, Sydney, NSW, 2000.

REMOVAL FROM VOCATIONAL REGISTER

20. A medical practitioner may request the General Manager of the Health Insurance Commission to remove his/her name from the Vocational Register of General Practitioners at any time.

21. Provision also exists for removal of a medical practitioner from the Vocational Register where the RACGP is no longer satisfied that the practitioner should remain on the Register. Examples of reasons for which a practitioner might be removed are:

- the practitioner's medical practice is no longer predominantly general practice;
- the RACGP's minimum requirements for involvement in continuing Medical Education and Quality Assurance programs have not been met by the practitioner;
- where the RACGP is no longer satisfied that the practitioner has appropriate training and experience in general practice (e.g. if certification was made on the basis of false information).

22. Appeals against removal may be made to the VRAC:

DESCRIPTOR EVALUATION

23. It is proposed that a Descriptor Utilisation Review Committee be established to review the use of the new content based consultation items. Proposals for this Committee will be developed by a working party between the Government, the RACGP and the AMA and discussed extensively with the profession. It is intended that descriptor utilisation review will be carried out by the profession independently of the Health Insurance Commission, the RACGP and the AMA.

SCHEDULE ITEMS FOR VOCATIONALLY REGISTERED GENERAL PRACTITIONERS

24. Four new categories of general practitioner attendance items have been incorporated into the Medicare Benefits Schedule as from 1 December 1989. The new categories are based largely on the tasks undertaken by the practitioner during the attendance on the patient rather than simply on the time spent with the patient.

25. The new attendance items have, at this stage, been confined to surgery consultations, home visits and consultations at institutions (as defined at paragraph 1.9.1. of Part 1 explanatory notes) and apply only to attendances by vocationally registered general practitioners. The attendances have been divided into four categories relating to the level of complexity, namely:

- (i) Level A - (10 relative value units)
- (ii) Level B - (21 relative value units)
- (iii) Level C - (38 relative value units)
- (iv) Level D - (56 relative value units)

(15 additional relative value units will apply to home visits)

26. To assist medical practitioners in selecting the appropriate item number for Medicare benefit purposes the following notes and examples in respect of the various levels are given. The fact that a particular case is used as an example does not mean that such cases would always be claimed at the level used in the example. Other modifying circumstances might prevail and each case must be treated on its merits.

LEVEL A - (Items 3, 4, 14)

27. Professional attendance for an obvious problem characterised by the straightforward nature of the task that requires a short patient history and, if required, limited examination and management.

28. These items are for the obvious and straightforward cases and the practitioner's records would reflect this. In this context "limited examination" means examination of the affected part if required, and "management" the action taken.

Example: Triple Antigen or Tetanus Immunisation

LEVEL B - (Items 23, 24, 26)

29. Professional attendance involving taking a selective history, examination of the patient with implementation of a management plan in relation to one or more problems, OR a professional attendance of less than 20 minutes duration involving components of an attendance of the type otherwise covered by Items 36, 37, 39, 44, 47 or 49.

30. The descriptions of these items introduce the words "selective history" and "implementation of a management plan in relation to one or more problems". In this context a "selective history" means a history relating to a specific problem or condition; and "implementation of a management plan" includes formulation of the decision or plan of management and any

immediate action necessary such as advising or counselling the patient, ordering tests, or referring the patient to a specialist medical practitioner or other allied health professional.

31. The essential difference between Level A and Level B relates not to time but to complexity.

Example: Otitis media presenting as earache

LEVEL C - (Items 36, 37, 39)

32. Professional attendance involving taking a detailed history, an examination of multiple systems, arranging any necessary investigations and implementing a management plan in relation to one or more problems, and lasting at least 20 minutes, OR a professional attendance of less than 40 minutes duration involving components of an attendance of the type otherwise covered by Items 44, 47 or 49.

33. Further levels of complexity are implied in these items by the introduction of "taking a detailed history" and "examination of multiple systems". A physical attendance of at least 20 minutes is necessary to qualify for a Level C attendance.

34. The words following "OR" in the items for Levels B and C allow for the situation where an attendance involves some components of a more complex level but the time taken is less than specified in the higher level. Benefit is claimable at the appropriate lower level, e.g.; if an attendance involved a detailed history and examination of multiple systems, arranging investigations and implementing a management plan, but the time taken was less than 20 minutes, it would constitute a Level B attendance.

Example: Essential hypertension presenting as headache

LEVEL D - (Items 44, 47, 49)

35. Professional attendance involving taking an exhaustive history, a comprehensive examination of multiple systems, arranging any necessary investigations and implementing a management plan in relation to one or more complex problems, and lasting at least 40 minutes, OR a professional attendance of at least 40 minutes duration for implementation of a management plan.

36. These items cover the difficult problems where the diagnosis is elusive and highly complex, requiring consideration of several possible differential diagnoses, and the making of decisions about the most appropriate investigations and the order in which they should be performed. These items also cover cases which need prolonged discussion. Physical attendance of at least 40 minutes is necessary to qualify for a Level D attendance.

Examples: Migraine with peripheral neurological signs

Depression presenting as insomnia or headaches

Complex psychological or family relationship problems

GENERAL

Counselling or Advice to Patients or Relatives

37. For Items 23 to 49 implementation of a management plan includes counselling services.

38. The new Schedule items include advice to patients and/or relatives during the course of an attendance. The advising of relatives at a later time does not extend the time of attendance.

Recording Clinical Notes

39. In relation to the time taken in recording appropriate details of the service, only clinical details recorded at the time of the attendance count towards the time of consultation. It does not include information added at a later time, such as reports of investigations.

Other Services at the Time of Attendance

40. Where, during the course of a single attendance by a vocationally registered general practitioner, both a consultation and another medical service are rendered, Medicare benefits are generally payable for both the consultation and the other service. Exceptions are in respect to medical services which form part of the normal consultative process, or services which include a component for the associated consultation (see paragraph L.3 of the General Explanatory Notes for further details).

After Hours Services

41. There are no differential Schedule fees for medical services rendered after hours, except in relation to the item for emergencies i.e. Item 80 (previously Item 70). However, use of this emergency after hours item is restricted to situations as outlined in paragraph 1.3-Part 1 explanatory notes. Item numbers relating to the old after hours arrangements have now been deleted. It should also be noted that as a result of the deletion of the after hours items, the description of Item 29 (now Item 74) has been amended so that the item covers hospital visits on two or more patients. Old Item 31 (previously three or more patients) has been deleted.

Locum-Tenens

42. Where a vocationally registered general practitioner engages, either as an assistant or as a locum tenens, a medical practitioner who is not enrolled on the vocational register, Medicare benefits in respect of attendances rendered by the latter are attracted under Items 52-72 and not under Items 3-49.

Renumbering of Part 1 Services

43. A major portion of Part 1 of the Schedule has been renumbered. To assist medical practitioners in locating the renumbered items, a conversion list is included at the end of these notes.

New Items

The fees and benefits for new items other than attendance items (see item/fee/benefit list at page 41 for Part 1 items) are set out below -

DEFINITION OF ELIGIBLE PERSON

18. Paragraph B.1.1 of the General Explanatory Notes should be replaced by the following paragraph -

"B1.1 An "eligible person" means a lawfully permanent Australian resident, whose stay in Australia is not subject to any limitation as to time, but does not include a foreign diplomat or family. A person covered by a reciprocal health care agreement is also eligible for Medicare".

EMERGENCY AFTER-HOURS ATTENDANCE

19. Item 70 should only be itemised in the following instances -

- the attendance is at other than the practitioner's usual consulting rooms;
- the consultation is initiated by or on behalf of the patient in the same unbroken after-hours period;
- the patient's medical condition must require immediate treatment; and
- if more than one patient is seen on the one visit, Item 70 can be used but only in respect of the first patient;

Where the patient is seen at a public hospital the following additional provisions would apply:-

- the first or only patient is a private in-patient; or
- the first or only patient is seen in the Out-patient or Casualty Department and the hospital does not provide at that time a medical Out-patient or Casualty service.

Where any of the above conditions do not apply the normal Schedule items should be itemised.

GENERAL

20. The increase in fees generally also included provision for the amounts specified in the description of Items 2951 and 2953 to be similarly increased. THE REFERENCE IN ITEM 2951 "for which the fee exceeds \$152.00 but does not exceed \$270.00 or at a series or a combination of operations where the fee for at least one of the operations exceeds \$152.00 but where the fee for the series or combination of operations does not exceed \$270.00" SHOULD BE AMENDED TO READ "for which the fee exceeds \$160.00 but does not exceed \$285.00" and "where the fee for at least one of the operations exceeds \$160.00 but where the fee for the series or combination of operations does not exceed \$285.00". THE REFERENCE IN ITEM 2953 "exceeds \$270.00" should be amended to read "exceeds \$285.00" provided that the fee for at least one of the operations exceeds \$160.00". THE REFERENCE IN ITEM 2957 to a Schedule fee of \$375.00 SHOULD BE AMENDED TO READ \$395.00.

21. The amounts mentioned in certain items which have a 'derived fee' should also be amended as follows:-

Page 88	Item 2455 - substitute	'\$102.00'	for	'\$92.00'
Page 96	Item 2732 - substitute	'\$18.80'	for	'\$18.00'
Page 97	Item 2782 - substitute	'\$20.00'	for	'\$19.20'
	Item 2798 - substitute	'\$12.00'	for	'\$11.40'

	Item 2871 - substitute	'\$11.80'	for	'\$11.20')
	Item 2877 - substitute	'\$12.00'	for	'\$11.40')
	Item 2881 - substitute	'\$14.20'	for	'\$13.60')
	Item 2885 - substitute	'\$30.00'	for	'\$28.50')
Page 106	Item 2889 - substitute	'\$15.60'	for	'\$14.80')

Item 2893 - substitute '\$13.60' for '\$13.00')

SPECIAL ARRANGEMENTS - TRANSITIONAL PERIOD

22. Where an item refers to a service in which treatment continues over a period of time in excess of one day and the treatment commenced before 1 September 1989 and continues beyond that date, the general rule is that the 1 August 1988 level of fees and benefits would apply.

23. However, in the case of the relevant obstetric items a special rule will apply in that the fee and benefit will depend on the date of the actual confinement. If the confinement takes place before 1 September 1989, fees and benefits at 1 August 1988 level will apply. If the confinement takes place on or after 1 September 1989 fees and Medicare benefits at the new (1 September 1989) level will apply.

**MEDICARE BENEFITS SCHEDULE BOOK
REPLACEMENT PAGES - 1 FEBRUARY 1989**

1. Attached is a set of replacement pages incorporating the amendments for insertion into Section 2 "Medicare Benefits Schedule - General Medical Services" (1 August 1988 edition). The replacement pages (blue edging) are identified by the date 1 February 1989 appearing in the bottom left hand corner of each page. The amendments will apply to services rendered on and after that date.

SUMMARY OF CHANGES

2. The major changes relate to urological services and are the result of an extensive review, on a cost neutral basis as far as Medicare benefit outlays are concerned, carried out in conjunction with the Australian and New Zealand Association of Urological Surgeons (ANZAUS) and the Australian Medical Association, following a request by ANZAUS.

3. Items covering percutaneous nephrostomy/nephrolithotomy (PCN) procedures have been introduced by means of Ministerial Determination (Items 9441 - 9449). An ongoing review to assess the effect of extracorporeal shock wave lithotripsy on the performance of percutaneous procedures for stone removal is being conducted and introduction by Determination will facilitate the implementation of any consequent amendments.

4. The new item for percutaneous nephrostomy covers the procedure whether performed by a urologist or a radiologist. The related Medicare Benefits Advisory Committee (MBAC) recommendations under Item 3004 will be rescinded with the introduction of the new items.

5. A number of changes have also been made to gynaecological services following discussions with the medical profession. These changes result from the resolution of a number of matters which were outstanding when the 1 August 1988 amendments were introduced.

6. Other minor adjustments, including consequential changes to general surgical services following the review of urology services, corrections and clarification of items have also been included with these amendments. Items affected by the changes are summarised in the following paragraphs and are further identified by one or more of the following symbols appearing in the margin adjacent to the item number concerned:-

- (a) New services †
- (b) Description of service amended ‡
- (c) Fees amended +
- (d) Anaesthetic units changed @

MEDICARE BENEFITS SCHEDULE BOOK
REPLACEMENT PAGES - 1 SEPTEMBER 1989

1. Attached is a set of replacement pages incorporating amendments for insertion into Section 2 "Medicare Benefits Schedule - General Medical Services" (1 August 1988 edition). The replacement pages (green edging) are identified by the date 1 September 1989 appearing in the bottom left hand corner of each page. The amendments apply to services rendered on and after that date.

SUMMARY OF CHANGES

2. An across-the-board five percent increase to apply generally to Schedule fees and Medicare rebates (excluding pathology. A new pathology table becomes operative from 1 August 1989) from 1 September 1989.
3. A major restructuring of nuclear medicine services (Part 11) undertaken in consultation with the Australian and New Zealand Association of Physicians in Nuclear Medicine and the Australian Medical Association. The revised Schedule fees for nuclear medicine investigations incorporate the costs of radiopharmaceuticals. Accordingly, from 1 September 1989 the reimbursement of radiopharmaceutical costs, currently payable under Item 8850, will be terminated. See also paragraph 17 in relation to region or organ not otherwise covered.
4. A revision of gynaecological oncology surgery items in consultation with the Australian Society of Gynaecological Oncologists, the Royal Australian College of Obstetricians and Gynaecologists and the Australian Medical Association. In addition new items have been introduced in respect of therapeutic hysteroscopies and endometrial biopsies.
5. An increase to the Schedule fees for certain radiological services to cover the cost of low-osmolar contrast media.
6. The transfer of a number of services presently covered by Ministerial determinations under Section 3C of the Health Insurance Act. A review of the incidence of these services indicated that they should be incorporated in the Schedule.
7. Other minor amendments to correct or clarify existing item descriptions and to incorporate a change proposed by the Medicare Benefits Advisory Committee.
8. The item/fee/benefit lists appearing at the end of each Part in Section 2 of this book have been up-dated to reflect the Schedule fee and Medicare benefit levels operating from 1 September 1989 (incorporating the 5% across-the-board Schedule fee increase) and are included amongst the replacement pages.
9. Items affected by the changes (with the exception of items affected by general fee adjustments) are summarised in the following paragraphs and are further identified by one or more of the following symbols appearing in the margin adjacent to the item number concerned:-

FOREWORD

COMMONWEALTH DEPARTMENT OF COMMUNITY SERVICES AND HEALTH

This Book provides information on the arrangements, which operate under the Health Insurance Act 1973 (as amended) for the payment of Medicare benefits for professional services rendered by registered medical practitioners. It is divided into four basic sections, as follows:

Section	Content
1	Outline of Medicare Benefits Arrangements and General Explanatory Notes.
2	Schedule of General Medical Services by Part and Division with Specific Explanatory Notes at the beginning of each Part.
2A	Schedule of Pathology Services and Outline of Pathology Service Arrangements.
3A	Index - General Medical Services
3B	Index - Pathology Services
3C	Pathology Abbreviations
4	Addresses of State Offices of the Commonwealth Department of Community Services and Health and State Offices of the Health Insurance Commission

To Find an Item

Turn to the Index at Section 3. Services are listed alphabetically with item number. Each Part/Section is colour coded for ease of reference.

To Find a Note

Turn to Section Divider of the appropriate Part, where paragraph numbers are listed. If the symbol • appears next to an item within the Schedule, it indicates that there is a Note referring to that item in that Part.

To Find a Schedule Fee/Benefit

Lists showing the item number, Schedule fee and the two levels of Medicare benefit (85% and 75%) are located at the end of each Part.

Patients should be made aware that the Schedule fee is the fee on which Medicare benefits are based but is not necessarily the same fee as will be charged by the medical practitioner.

The Book has been structured to group professional services according to their general nature, while some have been further grouped into divisions according to the particular nature of the services concerned. For example, Part 10 covering operations has been divided into thirteen divisions corresponding generally to the usual classifications of surgical procedures. Certain divisions contain sections under sub-headings, e.g., vascular surgery operations on the prostate, etc, which allow for suitable grouping of specific services (see the Table of Contents at the front of each Part).

The professional services have been expressed in general terms, even though the name of one or more physicians or surgeons may have become linked, by usage, with a particular procedure. For example, 'Bassini's operation' is not listed as such in the Schedule but is covered by 'repair of inguinal hernia' in Items 4222/4227.

GENERAL EXPLANATORY NOTES

AA. SUMMARY OF CHANGES INCLUDED IN THIS EDITION

AA.1 MBS Book Format Changes

AA.1.1 The Medicare Benefits Review (Layton) Committee made recommendations regarding the format and structure of the Medicare Benefits Schedule book. Following a study of these, and advice from a consultant who undertook a survey of a random selection of medical practitioners, a number of recommendations have been incorporated into this edition of the book. The major changes include an expanded table of contents; a revision and restructure of the 'notes for guidance' (notes relating to specific items are now located at the beginning of each Part and the fees and benefits at the end of each Part); and the adoption of a new colour coding arrangement. Further refinements to the presentation of the book are proposed for future editions.

AA.2 Additions, Deletions, Fee Changes, etc.

AA.2.1 Also incorporated into this edition of the book are a number of amendments which become effective from 1 August 1988. These changes arose from the following:-

- (i) the Government's announcement of a 5.4% increase in Schedule fees for general practitioner attendances and a 4.0% increase in Schedule fees for all other services with the exception of pathology (see special note at front);
- (ii) recommendations by the Medicare Benefits Advisory Committee;
- (iii) measures adopted by the Minister for Community Services and Health following consultation between professional groups and the Commonwealth; and
- (iv) specific decisions by the Minister.

AA.2.2 These changes are summarised in the following paragraphs and are identified in the Schedule in Section 2 of this book by one or more of the following symbols appearing in the margin:-

(a) New services	†
(b) Description of service amended	‡
(c) Fees amended (in addition to the overall fee adjustment)	+
(d) Anaesthetic units changed	@

Obstetric Services

AA.2.3 The note and the beginning of Part 2 has been amended so that Items 194, 196, 198 and 201 now relate to vaginal deliveries only. Deliveries by Caesarean section will attract Medicare benefits under Items 204, 205 or 210.

AA.2.4 The descriptions of Items 201 and 210 have been amended to clarify the position in relation to the transfer/referral of a patient from one practitioner to another.

AA.2.5 A change has been made to the description of Items 362, 363, 365 and 383 to facilitate payment of benefits where a medical practitioner is called in by nursing staff to perform one of these procedures. The Schedule fees for these items have been increased also and now cover any associated attendance.

AA.2.6 Two new items have been introduced into Part 9 for the purpose of assistance rendered in association with deliveries involving Caesarean section.

AA.2.7 An amendment has been made to the regulations to stipulate that Items 210, 362, 363, 365 and 383 are to be regarded as operations for the purposes of Section 15 (Multiple Operations) and Section 16 (Assistance at Operations) of the Health Insurance Act.

Investigations of Vascular Disease (Items 795-802 and 990-999)

AA.2.8 These items relate to examinations performed in the investigation of vascular disease. The fees include components for interpretation of the results and provision of the report which must be performed by a medical practitioner - see paragraph AA.2.18 below.

Warts

AA.2.9 Benefits for removal of warts in hospital by any method (other than by chemical means) under an anaesthetic are attracted under new Item 3347. Certain conditions need to be satisfied before benefits will be paid. These are spelt out in the description of the item.

Colposcopically Directed CO2 Laser

AA.2.10 Three new Items (6303, 6304 and 6305) have been introduced and the description of Item 6302 has been amended to provide benefits for treatment of intraepithelial neoplasia by laser therapy.

Radiation Oncology

AA.2.11 The descriptions and fees of Items 2887, 2889, 2891 and 2893, relating to radiation oncology treatment using linear accelerator and cobalt units have been restructured.

AA.2.12 It should be noted that the restrictions on the locations at which planning services (associated with radiation oncology) can be performed have been lifted - see also paragraph 8A.2.1 and 8A.2.2.

New Items

AA.2.13 The following is a list of new items introduced into the Schedule:-

280	798	802	992	2955	4630	7338
795	799	804	993	2957	6303	8072

Deleted Items

AA.2.14 The following items have been deleted:-

2865	2895
2867	2897

Amended Descriptions

AA.2.15 The descriptions of the following items have been amended:-

201	210	362	362	365	2863	2891	6508
204	247	363	363	383	2887	2893	
205	248	365	363	2861	2889	6302	

Amended Schedule Fees

AA.2.16 The fees for the following items have been adjusted:-

362	365	803	878	2863
363	383	877	2861	2980

Ministerial Determinations

AA.2.17 A number of services which previously attracted benefits under the non-specific items included in the Schedule (e.g. 3004) have now been included in the Schedule via Ministerial Determination (under Section 3C of the Health Insurance Act). Details of these services are listed at the beginning of Section 2 of this book (pages 26 to 30 refer).

Reports - Diagnostic Investigations

AA.2.18 The Health Insurance Regulations have been amended to provide that a reference in Part 6 or Part 8 to a report is to be taken to mean a report by a medical practitioner.

AA.3 Special Arrangements - Transitional Period

AA.3.1 Where an item refers to a service in which treatment continues over a period of time in excess of one day and the treatment commenced before 1 August 1988 and continues beyond that date, the general rule is that the 1 August 1987 level of fees and benefits would apply.

AA.3.2 However, in the case of the relevant obstetric items a special rule will apply in that the fee and benefit will depend on the date of the actual confinement. If the confinement takes place before 1 August 1988, fees and benefits at 1 August 1987 levels will apply. If the confinement takes place on or after 1 August 1988, fees and Medicare benefits at the new 1 August 1988 level will apply.

A. OUTLINE OF THE MEDICARE BENEFITS ARRANGEMENTS

A.1 Medicare

A.1.1 The Australian Medicare Program, which came into operation on 1 February 1984, provides access to medical and hospital services for all Australian residents and certain categories of visitors to Australia. Legislation covering the major elements of the Program is contained in the Health Insurance Act 1973 (as amended).

A.1.2 With regard to medical expenses, the basic aim of the Medicare program is to provide:-

- automatic entitlement to benefits in respect of "out of hospital" medical expenses equal to 85% of the Medicare Benefits Schedule fee, with a maximum payment of \$20 by the patient for any one service where the Schedule fee is charged. Hospital in-patients (other than Medicare hospital patients) are eligible for benefits equal to a flat 75% of the Schedule fee, that is, there is no limit to the maximum amount payable by the patient. Patients may insure with private health insurance organisations for the gap between the medicare benefits and the schedule fee for hospital in-patient services; and
- access without direct charge to public hospital accommodation and to in-patient and out-patient treatment by doctors appointed by the hospital.

A.1.3 The Health Insurance Commission is responsible for the operation of Medicare and Medicare benefits based on the services and fees contained in this book will be paid only by the Commission (commonly known as Medicare). For details of locations of Medicare offices, see Section 4.

A.1.4 Where an eligible person incurs medical expenses in respect of a professional service Medicare will pay benefits for that service as outlined in the following paragraphs.

A.2 Provider Numbers

A.2.1 When a medical practitioner registers with a State or Territory Medical Board, the Commonwealth Department of Community Services and Health is notified, and allots a five-digit number to the medical practitioner (unless the practitioner already has a number, from a previous registration). The practitioner is then included on the Central Register of Medical Practitioners (CROMP).

A.2.2 CROMP thus covers *all* medical practitioners, including those in full-time salaried practice. When a practitioner, including a salaried practitioner exercising a right of private practice, commences in private practice from any address, a provider number unique to that address is created by adding a sixth digit and a check letter to the five-digit stem. Additional address-specific provider numbers are created as the practitioner practises from other addresses.

A.2.3 Payment of Medicare benefits is facilitated when the provider number is pre-printed on stationery used in billing. It is preferable to have provider numbers allocated to all locations before commencement of practice; to do this, contact the CROMP section at the nearest State Office of the Department of Community Services and Health.

B. PATIENT ELIGIBILITY FOR MEDICARE

B.1 Eligible Persons

B.1.1 An "eligible person" means all permanent Australian residents, any other person who has approval to remain in Australia for more than six months (with the exception of foreign diplomats and their families, and staff of diplomatic missions), and those persons covered by reciprocal health care agreements.

B.1.2 The Health Insurance Act gives the Minister discretionary powers to either include or exclude certain persons or categories of persons for eligibility purposes under the Medicare arrangements.

B.1.3 Eligible persons must enrol with Medicare before benefits can be paid.

B.2 Medicare Cards

B.2.1 Eligible persons will be issued with a uniquely numbered Medicare card. These cards may be issued on an individual or family basis. Up to six persons may be listed on the one Medicare card, and up to twelve persons may be listed under the one Medicare card number.

B.3 Medical Expenses Incurred Overseas

B.3.1 Medicare benefits are generally payable for medical expenses incurred for medical services rendered outside Australia to "permanent Australian residents". In these circumstances a medical service rendered by a person authorised to practise as a medical practitioner under the law of the place where the medical service was rendered, will rank for benefit as if that medical service had been rendered in Australia by a medical practitioner.

B.3.2 Medicare does not cover hospital expenses or the cost of medical evacuation incurred outside Australia. It is recommended that Australian residents travelling overseas take out private traveller's or health insurance which offers adequate coverage for the countries to be visited. (See also Reciprocal Health Care Agreements).

B.4 Visitors to Australia

B.4.1 Medicare benefits are generally not payable to persons visiting Australia for six months or less, although the Minister has power to extend eligibility to certain categories of short term visitors. People visiting Australia specifically for medical or hospital treatment are not eligible for Medicare benefits. (See also Reciprocal Health Care Agreements).

B.4.2 Visitors to Australia who are entitled under a law to stay for more than six months are eligible for Medicare benefits from the date of their arrival. Those who were originally entitled under a law to stay for six months or less but who are granted an extension under a law which makes the total approved stay more than six months will be entitled to Medicare benefits from the date the extension is granted.

B.4.3 All eligible visitors must enrol with Medicare to receive benefits. This can be done when lodging the first claim.

B.5 Reciprocal Health Care Agreements

B.5.1 From 1 July 1986, visitors from countries with which Australia has signed reciprocal health care agreements (currently the United Kingdom and New Zealand) are eligible for benefits under the Medicare program for the first six months they are in Australia. Likewise, Australians visiting these countries will be entitled to health care under the particular country's public health scheme.

B.5.2 Health care provided under these agreements includes treatment of immediate medical necessity, that is, treatment for any episode of ill-health (or accident) which requires prompt medical attention. Persons who require hospital in-patient treatment and who seek cover under a reciprocal agreement shall be entitled to admission to public hospitals as public patients only. The agreements do not include pre-arranged or elective treatment, or treatment as a private in-patient of a public or private hospital.

C. SERVICES ATTRACTING MEDICARE BENEFITS

C.1 Professional Services

C.1.1 Professional services which attract Medicare benefits include medical services rendered by or on behalf of a medical practitioner. Medical services which may be rendered "on behalf of" a medical practitioner include services where a portion of the service is performed by a technician employed by or, in accordance with accepted medical practice, acts under the supervision of the medical practitioner.

C.1.2 The health insurance regulations specify that the following medical services will attract benefits only if they have been physically performed by a medical practitioner on not more than one patient on the one occasion (i.e. two or more patients can not be attended simultaneously although patients may be seen consecutively). The requirement of "physical performance" is

met whether or not assistance is provided in the performance of the service according to accepted medical standards:

- (a) All Part 1 (Professional Attendances) items,
- (b) All Part 2 (Obstetrics) items (except 290),
- (c) All Part 3 (Anaesthetics) items,
- (d) All Part 4 (Regional or Field Nerve Block) items,
- (e) All Part 5 (Assistance in Administration of an Anaesthetic) items,

C.1.3 For the family group therapy and group psychotherapy services covered by Items 170, 171, 172, 887, 888 and 889, benefits are payable only if the services have been conducted by the medical practitioner himself.

C.1.4 Medicare benefits are not payable for these group items or any of the items listed in (a)-(h) above when the service is rendered by a medical practitioner employed by the proprietor of a hospital other than when the practitioner is exercising his or her right of private practice or is performing a medical service outside the hospital. For example, benefits are not attracted when a hospital intern or registrar performs a service at the request of a staff specialist or visiting medical officer.

C.2 Services Rendered "On Behalf Of" Medical Practitioners

C.2.1 Medical services not included in the above list (i.e. the items in Parts 7A, 8, 8A, 9A and 11 of the Schedule together with those items in Part 6 not specified above) continue to attract Medicare benefits if the service is rendered by:-

- (i) a medical practitioner;
- (ii) a person employed by a medical practitioner; or
- (iii) a person employed by a hospital or other institution when acting under the supervision of a medical practitioner in accordance with accepted medical practice.

C.2.2 Benefits are not payable for these services when a medical practitioner refers patients to self-employed paramedical personnel, such as radiographers, audiologists or other technicians, who either bill the patient or the practitioner requesting the service.

D. SERVICES WHICH DO NOT ATTRACT MEDICARE BENEFITS

D.1 Services Not Attracting Benefits

D.1.1 Medicare benefits are not payable for telephone consultations, for the issue of repeat prescriptions when the patient is not in attendance, and for group attendances (other than group attendances covered by Items 170, 171, 172, 887, 888 and 889) such as group counselling, health education and weight reduction or fitness classes.

D.1.2 Certain other services, such as manipulations performed by physiotherapists, do not qualify for Medicare benefit even though they may be done on the advice of a medical practitioner.

D.2 Where Medicare Benefits are not Payable

D.2.1 Medicare benefits are not payable in respect of a professional service in the following circumstances -

- (i) where the medical expenses for the service are paid or payable to a recognised (public) hospital;

- (ii) where the doctor who rendered the service was acting on behalf of an organisation prescribed for the purposes of Section 17 of the Health Insurance Act;
- (iii) where the service was rendered on the premises of an organisation prescribed for the purposes of Section 17;
- (iv) where the medical expenses for the service are wholly payable by way of compensation or damages under a State or Commonwealth or Territorial law or under a legal claim. However, where medical expenses are only partly recoverable in such cases, an appropriate portion of Medicare benefit is payable;
- (v) where the service is a medical examination for the purposes of - life insurance, superannuation or provident account scheme, or admission to membership of a friendly society;
- (vi) where the service was rendered in the course of the carrying out of a mass immunisation.

D.2.2 Unless the Minister otherwise directs, Medicare benefit is not payable in respect of a professional service where:-

- (a) the service has been rendered by or on behalf of, or under an arrangement with, the Commonwealth, a State or a local governing body or an authority established by a law of the Commonwealth, a law of a State or a law of an internal Territory;
 - (b) the medical expenses were incurred by the employer of the person to whom the service was rendered;
 - (c) the person to whom that service was rendered was employed in an industrial undertaking and that service was rendered to him for purposes connected with the operation of that undertaking;
- or
- (d) the service was a health screening service (see below).

D.2.3 The legislation empowers the Minister to make regulations to preclude the payment of Medicare benefits for professional services rendered in prescribed circumstances. Such regulations, however, may only be made in accordance with a recommendation made by the Medicare Benefits Advisory Committee.

D.2.4 Regulations are currently in force to preclude the payment of Medicare benefits for professional services rendered in association with the following:-

- injection of human chorionic gonadotrophin (HCG) in the management of obesity;
- chelation therapy; and
- hyperbaric oxygen therapy in the treatment of multiple sclerosis.

D.3 Health Screening Services

D.3.1 Unless the Minister otherwise directs Medicare benefits are not payable for health screening services.

D.3.2 A health screening service is defined as a medical examination or test that is not reasonably required for the management of the medical condition of the patient. Services covered by this proscription include such items as - multiphasic health screening; testing of fitness to undergo physical training programs, vocational activities or weight reduction programs; compulsory examinations and tests to obtain a flying, commercial driving or other licence, entrance to schools and other educational facilities, for travel requirements and for the purposes of legal proceedings; compulsory examinations to determine eligibility for social security pensions and allowances; compulsory examinations for admission to aged persons' accommodation and pathology tests associated with orthomolecular medicine.

D.3.3 Ministerial directions have been issued in respect of the following categories of health screening services that enable Medicare benefits to be payable:-

- a medical examination or a test on a symptomless patient by that patient's own medical practitioner in the course of normal medical practice, to ensure the patient receives any medical advice or treatment necessary to maintain his/her state of health. In such cases benefits would be payable for the attendance and such tests which would be considered reasonably necessary according to the circumstances of the patient such as age, physical condition, past personal and family history. Examples would be Papanicolaou test in a woman, blood lipid estimation in an overweight person, a chest X-ray where one has not been recently performed. However, it would not be accepted that a routine check up would necessarily be accompanied by an extensive battery of diagnostic investigations.

- a pathology service requested by the National Heart Foundation of Australia, Risk Evaluation Service.
- medical examinations for reason of age or medical condition, for drivers to obtain or renew a licence to drive a private motor vehicle.
- medical examinations to obtain a certificate of hearing disability required for sales tax exemption for a television decoding device.
- a medical examination provided to an unemployed person at the request of a person to whom the unemployed person has applied for employment.
- a medical examination of, and/or the collection of blood for testing from, persons occupationally exposed to sexual transmission of disease where the purpose of such an examination or collection is the collection of specimens for testing in accordance with conditions determined by the health authority of the State or Territory in which the service is performed, (one examination/collection per person per week). Benefits are not attracted in respect of pathology tests resulting from such examination/collection.

D.4 Services Rendered to a Doctor's Dependants, Partner, or Partner's Dependants

D.4.1 Generally, Medicare benefits are not payable in respect of professional services rendered by a medical practitioner to dependants or partners or a partner's dependants. There can be no medical expense for which Medicare benefits will apply unless a legally enforceable debt is incurred. In such a case, the matter should be referred to the Health Insurance Commission for assessment.

D.5 Workers' Compensation, Third Party Insurance, Damages, etc.

D.5.1 Where the medical expenses for a professional service are wholly covered by way of compensation or damages under a State or Commonwealth or Territorial law, Medicare benefit is not payable in respect of that service.

D.5.2 Where the medical expenses for a service to a person are only partly covered by such compensation etc., Medicare benefits may be paid in respect of that portion of the expense for which the person was not compensated.

D.5.3 Where a settlement has been made and the Minister (or delegate) considers that the settlement has had or should have had regard to any medical expenses incurred or likely to be incurred, the Minister (or delegate) may determine that the whole or a specified part of the settlement relates to medical expenses.

D.5.4 Where a claim is made for Medicare benefits and it appears to the Minister (or delegate) that the service may be subject to a claim for compensation or damages, the Minister (or delegate) may direct that no benefit be paid but that there be a provisional payment made of an amount equal to whatever part of the benefit is considered appropriate. If the claimant subsequently receives compensation or damages payment in respect of the medical expenses, he/she will be required to refund all or part of the provisional payment made.

E. SERVICES NOT LISTED IN THE SCHEDULE (See also paragraph L.2.1)

E.1 Services not Listed in Schedule

E.1.1 Instances may arise where a particular medical service rendered by a medical practitioner is not listed in the Schedule or in the index to the Schedule. To enable Medicare benefits to be paid in respect of professional services rendered which are not covered by specific items in the Schedule, seven non-specific items are included in the Medicare Benefits Schedule i.e., Item Nos. 486, 558, 2294, 2295, 2804, 3004 and 8850.

E.1.2 It is realised that the Schedule fees listed for these items will generally be regarded as inadequate for the services which may be claimed under these items. However, it is intended that an appropriate Schedule fee for each service itemised under the "non specific" items will be determined by the Medicare Benefits Advisory Committee under Section 11 of the Health Insurance Act. For an explanation of the provisions of Section 11 see paragraph F.2.

E.1.3 To facilitate the Committee's consideration of such cases, medical practitioners are requested to provide as much information as possible in respect of the particular service. Cases of this nature should be referred to the local office of the Health Insurance Commission for transmission to the Medicare Benefits Advisory Committee for consideration.

E.1.4 Practitioners must not use other item numbers on their accounts in respect of procedures that are not listed in the Schedule.

E.2 Service Differs from that Described in Schedule Item

E.2.1 From time to time practitioners discover that services which they are carrying out do not fit precisely within the definitions of items contained in the Schedule. It is emphasised that under these circumstances practitioners should not incorrectly describe the service they have performed, for example by choosing the item number which most nearly fits the service.

E.2.2 The procedures to be followed in these circumstances are outlined in paragraph E.1 above. Enquiries concerning services not listed or on matters of interpretation should be directed to the appropriate office of the Health Insurance Commission. Postal addresses are on the last page of this Book. Telephone enquiries should be directed to the numbers below; these numbers are reserved for enquiries concerning the Schedule:

E.3 Ministerial Determinations

E.3.1 Determinations under the provisions of Section 3C of the Health Insurance Act have been made by the Minister in respect of a number of professional services which are not listed in the Medicare Benefits Schedule. Section 3C of the Act empowers the Minister to determine the Schedule fee for such services. A list of the Services for which a fee has been so determined is located at the front of the Schedule of General Medical Services.

F. SCHEDULE FEES AND MEDICARE BENEFITS

F.1 Schedule Fees and Medicare Benefits

F.1.1 Medicare benefits are based on fees determined for each medical service, with uniform fees for each service in each State. The fee is referred to in these notes as the "Schedule fee".

F.1.2 Lists showing the Item number, Schedule fee and Medicare benefit levels for the medical services contained in each Part of the Schedule are located immediately following the respective Part as set out in Section 2 to this book. Where appropriate, the calculated benefit has been rounded to the nearest higher 5 cents. However, in no circumstances will the benefit payable for any service exceed the amount of the fee actually charged for that service.

There are presently two levels of Medicare benefits payable, that is :-

(i) for medical services rendered in hospitals or approved day hospital facilities to private in-patients the level of Medicare benefit is 75% of the Schedule fee for each item with no maximum patient gap. The Health Insurance Regulations provide that medical practitioners must indicate on their accounts, etc, where a medical service is rendered to a private in-patient in a hospital or approved day hospital facility. This requirement will be met by placing the word "in-patient" immediately preceding the description of each service or, alternately, where an item number is used, by placing an asterisk "*" directly after the item number for each service.

(ii) for a non in-patient medical service, the Medicare benefit rebate is 85% of the Schedule fee or the Schedule fee less \$20 whichever is the greater, with a maximum patient contribution of \$150 per year.

F.1.3 Public hospital treatment is available without direct charge to public patients.

F.1.4 A medical service rendered to a patient on the day of admission to, or day of discharge from hospital, but prior to admission or subsequent to discharge, will attract benefits at the 85% level not 75%.

F.1.5 The 75% benefit level applies to all services rendered to private in-patients in hospitals even though portion of the service (eg. aftercare) may be rendered outside the hospital. With

regard to the comprehensive obstetric items (ie. 194, 196, 198, 201, 204 and 205) benefits would be attracted at the 75% level where the confinement takes place in hospital.

F.1.6 It should be noted that the Health Insurance Act makes provision for private medical insurance to cover the "patient gap" for services rendered to private in-patients in hospital or approved day hospital facilities.

F.1.7 Where it can be established that payments of \$150 have been made for a patient during a financial year in respect of the difference between the Medicare benefit and the Schedule fee, benefits will be paid for expenses incurred for that patient for professional services rendered during the rest of the financial year up to 100% of the Schedule fee. This does not apply to the assignment of benefit arrangements.

F.2 Service of Unusual Length or Complexity

F.2.1 The fee for any item listed in the Schedule is that which is regarded as being reasonable on average for that service having regard to usual and reasonable variations in the time involved in performing the service on different occasions and to reasonable ranges of complexity and technical difficulty encountered. Section 11 of the Health Insurance Act provides that the medical practitioner or the patient may apply to the Health Insurance Commission for higher benefits by the fixation of a higher fee, where a medical practitioner considers that special consideration is warranted because of the "unusual length or complexity" of the service in the particular case. The term "unusual length or complexity" in this context refers to instances where these factors significantly exceed those usually encountered for the service listed in the Schedule.

F.2.2 Any such application for a higher fee under Section 11 of the Health Insurance Act should be made to the Health Insurance Commission and should be supported by a statement by the medical practitioner indicating in detail those unusual features which are the basis for the claim for a higher fee. The doctor rendering the service should advise the patient to forward this statement with the claim form and account to the relevant Medicare office. Where the doctor direct-bills the Health Insurance Commission, his statement should be attached to the assignment form.

F.2.3 To reduce delays and to facilitate consideration of such an application, it is essential that medical practitioners give precise details of those unusual features of length of time, complexity and technical difficulty which might warrant approval of a higher fee. The statement should include:

- the time taken;
- the factors which caused the undue length of time taken;
- special difficulties or complexities encountered beyond those which would normally be expected in the procedure;
- other significant factors, such as the general condition of the patient, anaesthetic problems and need for resuscitation.

F.2.4 Generally, such applications are referred for consideration by the Medicare Benefits Advisory Committee which may determine the payment of a higher benefit by approval of a fee higher than the Schedule fee in the particular case. In reporting on such applications, the Committee may state the principles it followed in fixing the amount of any increased fee and benefit for the service which was the subject of the application.

F.2.5 Subsequent applications to which the principles determined by the Committee can be applied, may be dealt with by the Health Insurance Commission in accordance with those principles, without further reference to the Committee.

F.2.6 Where the Health Insurance Commission notifies a person of a decision based on the application of principles determined by the Committee, that person may, within one month after receipt of notification of the Health Insurance Commission's decision in the matter of an increased fee, appeal to the Minister to have the decision reviewed.

F.2.7 The Minister will forward the appeal to the Medicare Benefits Advisory Committee for consideration and recommendation. The Minister shall, in accordance with the recommendation of the Committee, either allow or dismiss the appeal and direct the Health Insurance Commission to give effect to the recommendation of the Committee. The Minister will also notify the appellant in writing of the decision regarding the appeal.

G. RECOGNITION AS A SPECIALIST OR CONSULTANT PHYSICIAN

G.1 Recognition Method

G.1.1 A medical practitioner who, having made formal application and paid the prescribed fee, and who -

- is registered as a specialist under State or Territory law; or
- holds a fellowship of a specified specialist College; or
- is considered eligible for recognition as a specialist or consultant physician by a Specialist Recognition Advisory Committee;

may be recognised by the Minister as a specialist or consultant physician for the purposes of the Health Insurance Act.

G.1.2 There is provision for appeal to a Specialist Recognition Appeal Committee by medical practitioners who have not been recommended for recognition as specialists or consultant physicians by an Advisory Committee.

G.1.3 Where a medical practitioner has been recognised as a specialist or consultant physician for the purposes of the Health Insurance Act, Medicare benefits are payable at the appropriate higher rate in respect of certain services rendered by him or her in the practice of the specialty in which he or she is so recognised, provided (other than in the case of services by specialist anaesthetists or radiologists - see paragraph H.4.2) the patient has been referred in accordance with paragraphs H.1 to H.4.

G.1.4 All enquiries concerning the recognition of specialists and consultant physicians should be directed to State Manager, Commonwealth Department of Community Services and Health. (The addresses of State Offices of the Department are contained in Section 4A).

H. REFERRAL OF PATIENTS TO SPECIALISTS OR CONSULTANT PHYSICIANS

H.1 Purpose of Referrals

H.1.1 For the purpose of payment of Medicare benefits at the higher rate, referrals are required to be made as follows:-

- (a) to a recognised consultant physician - by another medical practitioner;
- (b) to a recognised specialist -
 - (i) by another medical practitioner; or
 - (ii) by a registered dental practitioner, where the referral arises out of a dental service; or
 - (iii) by a registered optometrist or a registered optician where the specialist is an ophthalmologist.

H.1.2 Benefits are only payable at the consultant physician rate if the referral is made by a medical practitioner. Where a dentist refers a patient to a consultant physician benefits are payable at the specialist referred rate only.

H.2 Notification of Referral

H.2.1 The particulars required to be communicated in a referral are as follows :-

- patient's name;
- the referring practitioner's name;
- the address of the referring practitioner's place of practice or the practitioner's provider number in respect of that address; and
- date on which the referral is made.

H.2.2 These particulars may be provided in one of two ways -

- (i) by the Notice of Referral form; or
- (ii) by an informal written referral.

H.2.3 As with Notice of Referrals, informal written referrals will be valid for 12 months from the date of the specialist's or consultant's first service (or for any lesser period specified by the referring practitioner).

H.2.4 To cover the situation indicated below (para H.3 refers) where where the informal written referral may be attached to the specialist's or consultant's accounts, receipts or assignment

forms, consideration could be given to separating clinical details from referral particulars indicated above (to preserve the patient's confidentiality).

H.3 Details to be Shown on Accounts, Receipts, etc.

H.3.1 Except in an emergency situation or where the original written referral has been lost, stolen or destroyed, referral particulars required to be shown on (or attached to) accounts, receipts or assignment forms (ie, for billing purposes) are as shown in para 1 above.

H.3.2 These requirements may be met in one of four ways -

- (i) by attaching the notice of referral;
- (ii) where the Notice of Referral was previously attached for billing purposes - by showing the name of the referring practitioner and the Notice of Referral number;
- (iii) by attaching an informal written referral (or a copy) - having regard to patient's confidentiality where clinical notes are provided (see para above);
- (iv) by extracting these particulars from (i) to (iii) above and either writing them on accounts, etc, or on a separate attached note.

H.3.3 In emergency situations (where referral was not practicable) the following particular is required for billing purposes :-

- "special circumstances - emergency".

H.3.4 Where the written referral has been declared by the patient to be either lost, stolen or destroyed, the following particulars are required for billing purposes :-

- name of the referring practitioner;
- the words "special circumstances - lost referral";
- the address of the referring practitioner's place of practice or the practitioner's provider number in respect of that address (if either of these are known to the specialist or consultant).

H.4 When a Letter/Notice of Referral is Required

H.4.1 Except as described in the following paragraph, a Letter or Notice of referral must have been issued by the referring doctor, dental practitioner or optometrist/optician in respect of all services provided by specialists and consultant physicians in order that patients might be eligible for Medicare benefits at the higher rate. Unless such a letter has been provided, the referral requirements will be regarded as not having been satisfied and benefits will be paid at the unreferral rate.

H.4.2 A Letter or Notice of referral is not required in the case of specialist radiologist (except in the case of Items 2734 and 2736 - see paragraph 8.1) or anaesthetist services (including Item 85 - Pre-operative examination of a patient in preparation for the administration of an anaesthetic). The higher rate of benefits in these cases is payable provided the services are rendered by a specialist radiologist or anaesthetist. However, for benefits to be payable at the specialist rate for consultations by specialist anaesthetists (other than for a pre-operative examination) a Letter or Notice of referral is required (see paragraph 3.1.12).

H.4.3 Medicare benefit is attracted for an attendance on a patient where the attendance is solely for the purpose of providing a Letter or Notice of referral. However, if a medical practitioner issues a Letter or Notice of referral without an attendance on the patient, no benefit is payable in respect of the issuing of the referral.

H.4.4 It should be noted that where a general practitioner acts as a locum-tenens for a specialist or consultant physician, or where a specialist acts as a locum-tenens for a consultant physician, Medicare benefit is only payable at the level appropriate for the particular locum-tenens, eg, general practitioner level for a general practitioner locum-tenens and specialist level for a referred service rendered by a specialist.

H.5 Single Course of Treatment

H.5.1 The Items in the Medicare Benefits Schedule relating to attendances by specialists and consultant physicians refer to attendances in a single course of treatment. A single course of treatment is defined as follows :-

"A single course of treatment involves an initial attendance by a specialist or consultant physician and the continuing management/treatment up to the stage where the patient is referred back to the care of the referring practitioner. It also includes any subsequent review of the patient's condition by the

specialist/consultant physician that may be necessary; such a review may be initiated by either the referring practitioner or the specialist/consultant physician. However, presentation of an unrelated illness, requiring the referral of the patient to the specialist's/consultant physician's care, would initiate a new course of treatment in which case a new referral would be required.

If the referring practitioner:

- (a) deems it necessary for the patient's condition to be reviewed; and
- (b) the patient is seen by the specialist/consultant physician outside the currency of the last referral; and
- (c) the patient was last seen by the specialist/consultant physician more than nine months earlier

the attendance would initiate a new course of treatment."

I. BILLING PROCEDURES

I.1 Itemised Accounts

I.1.1 Where the doctor bills the patient for medical services rendered, the patient needs a properly itemised account and receipt or combined account/receipt to enable a claim to be made for Medicare benefits.

I.1.2 Under the provisions of the Health Insurance Act and Regulations, Medicare benefits are not payable in respect of a professional service unless there is recorded on the account setting out the fee for the service or on the receipt for the fee in respect of the service, the following particulars:-

- (i) Patient's name;
- (ii) The date on which the professional service was rendered;
- (iii) A description of the professional service sufficient to identify the item that relates to that service;
- (iv) The name and practice address or provider number of the practitioner who actually rendered the service; (where the practitioner has more than one practice location recorded with the Department of Community Services and Health, the provider number used should be that which is applicable to the practice location at or from which the service was given);
Note - For accounts or receipts issued in respect of radiology and radiotherapy services, CT and nuclear medicine - i.e. services listed in Parts 7A, 8, 8A, 9A or 11 of the Schedule - the name and address or provider number of the practitioner who actually rendered the service need not be included;
- (v) The name and practice address or provider number of the practitioner claiming or receiving payment of benefits, or assignment of benefit, is to be shown:-
 - for services in Parts 1-6, Section 2A - Pathology (Division 9), and Parts 9 and 10 - where the person claiming payment is NOT the person who rendered the service;
 - for services in Parts 7A, 8, 8A, 9A and 11 - for every service;
- (vi) If the service was a Specified Simple Basic Pathology Test (listed in Section 2A - Pathology, Division 9 of the Schedule) that was determined necessary by a practitioner who is another member of the same group medical practice, the surname and initials of that other practitioner must be included;
- (vii) Where a practitioner has attended the patient on more than one occasion on the same day and on each occasion rendered a professional service to which an item in Part 1 of the Medicare Benefits Schedule relates (i.e. professional attendances), the time at which each such attendance commenced;
- (viii) Where the professional service was rendered by a consultant physician or a specialist in the practice of his/her speciality to a patient who has been referred:- (a) the name of the referring medical practitioner; and (b) the date of the referral;
- (ix) If the information required to be recorded on accounts, receipts or assignment of benefit forms is included by an employee of the practitioner, the practitioner claiming

payment for the service bears responsibility for the accuracy and completeness of the information.

I.1.3 Practitioners should note that payment of claims could be delayed or disallowed where it is not possible from account details to clearly identify the service as one which qualifies for Medicare benefits, or the practitioner as a registered medical practitioner at the address the service was rendered. Practitioners are therefore encouraged to provide as much detail as possible on their accounts, including Medicare Benefits Schedule item number and provider number.

I.2 Claiming of Benefits

I.2.1 The patient, upon receipt of a doctor's account, has two courses open for paying the account and receiving benefits.

I.3 Paid Accounts

I.3.1 The patient may pay the account and subsequently present the account, supporting receipt and a covering Medicare claim form to Medicare for assessment and payment of Medicare benefit.

I.4 Unpaid Accounts

I.4.1 Where the patient has not paid the account, the unpaid account may be presented to Medicare with a Medicare claim form. In this case Medicare will forward to the claimant a benefit cheque made payable to the doctor.

I.4.2 It will be the patient's responsibility to forward the cheque to the doctor and make arrangements for payment of the balance of the account if any. "Pay doctor cheques" involving Medicare benefits cannot be sent direct to medical practitioners or to patients at a doctor's address (even if requested by the patient to do so). Pay doctor cheques will be forwarded to the patient's normal address.

I.4.3 When issuing a receipt to a patient in respect of an account that is being paid wholly or in part by a Medicare "pay doctor cheque" the medical practitioner should indicate on the receipt that a "Medicare" cheque for \$..... was involved in the payment of the account.

I.5 Assignment of Benefits

I.5.1 Under the Health Insurance Act an Assignment of Benefit (direct-billing) facility for professional services is available to all persons in Australia who are eligible for benefit under the Medicare program. This facility is NOT confined to pensioners or people in special need. If a medical practitioner direct-bills, he undertakes to accept the relevant Medicare benefit as full payment for the service. Additional charges for that service (irrespective of the purpose or title of the charge) cannot be raised against the patient.

I.6 Direct-Billing on Medicare

I.6.1 The administration of the direct-billing arrangements under Medicare as well as the payment of Medicare benefits on patient claims is the responsibility of the Health Insurance Commission. Medical practitioners have been provided with more detailed information by Medicare and any enquiries in regard to these matters should therefore be directed to the Commission's Medicare offices or enquiry points.

I.6.2 Under Medicare any medical practitioner can accept assignment of benefit and direct-bill for any eligible person.

I.6.3 As stated above, when a doctor direct-bills he/she undertakes to accept the relevant Medicare benefits as full payment for the service. He/she therefore must not raise any additional charge against the patient in respect of that service to cover the patient gap, administrative cost or any other cost.

I.7 Medicare Cards

I.7.1 An eligible person who applies to enrol for Medicare benefits (using a Medicare Enrolment Application) will be issued with a Medicare Card which shows the Medicare Card number and the applicant's first given name, initial of second given name, and surname. An application may be made to enrol a family under the one Medicare number and up to 6 persons can be listed on the one card.

I.7.2 Medicare cards issued to visitors to Australia will show the period for which each person on the card is eligible for Medicare benefits.

I.7.3 The Medicare Card plays an important part in direct billing because it not only confirms the patients' eligibility for Medicare benefits, but can be used to imprint the patient details (including Medicare number) on the basic direct-billing forms. A special Medicare imprinter has been developed for the purpose and is available free of charge, on request, from Medicare.

I.7.4 The patient details can of course be entered on the direct-bill forms by hand, but the use of a card to imprint patient details assists practitioners and ensures accuracy of information. The latter is essential to ensure that the processing of a claim by Medicare is expedited.

I.7.5 Because of the role that the Medicare number plays in direct-billing and the fact that the number does not change for a patient unless, for example, a family regroups, or a family member applies for an individual card, practitioners who direct-bill may care to record patient's Medicare number on the patient's records in the event that a patient presents without the card.

I.8 Assignment of Benefits Arrangements

I.8.1 The Health Insurance Commission has responsibility for administering Medicare including the assignment of benefits arrangements. Under these arrangements:-

- Practitioners may direct-bill for all persons eligible for Medicare benefits.
- The patient's Medicare number must be quoted on all direct-bill forms for that patient.
- The basic forms provided are loose leaf to enable the patient details to be imprinted from the Medicare Card.
- The forms include information required by Regulations under Section 19(6) of the Health Insurance Act.
- The doctor must cause the particulars relating to the professional service to be set out on the assignment form before the patient signs the form and cause the patient to receive a copy of the form as soon as practicable after the patient signs it.
- Where a patient is unable to sign the assignment form the signature of the patient's parent, guardian or other responsible person (other than the doctor, doctor's staff, hospital proprietor, hospital staff, nursing home proprietor or nursing home staff) is acceptable. The reason the patient is unable to sign should also be stated. In the absence of a "responsible person" the patient signature section should be left blank and in the section headed 'Practitioner's Use' or on the back of the assignment form, an explanation should be given as to why the patient was unable to sign (e.g. unconscious, injured hand etc.) and this note should be signed or initialled by the doctor. If in the opinion of the practitioner the reason is of such a "sensitive" nature that revealing it would constitute an unacceptable breach of patient confidentiality or unduly embarrass or distress the recipient of the patient's copy of the assignment of benefits form, a concessional reason "due to medical condition" to signify that such a situation exists may be substituted for the actual reason. However, this should not be used routinely and in most cases it is expected that the reason given will be more specific.

I.9 Assignment of Benefit Forms

I.9.1 To meet varying requirements the following types of stationery are available from Medicare. Note that these forms are approved forms under the Health Insurance Act, and no other forms can be used to assign benefits without the approval of the Health Insurance Commission.

- (a) *Form DB2.* This form is used to assign benefits for services other than requested pathology. It is loose leaf for imprinting and comprises a throw away cover sheet (after imprinting), a Medicare copy, a Patient copy and a Practitioner copy. This form can also be used as an "offer to assign" when a request for pathology services is sent to an approved pathology practitioner and the patient does not need to attend the laboratory.
- (b) *Form DB4.* Is a continuous stationery version of Form DB2, and has been designed for use on most office accounting machines.
- (c) *Form DB3.* Is used to assign benefits for pathology tests rendered by approved pathology practitioners. It is loose leaf to enable imprinting of patient details from the Medicare Card and is similar in most respects to Form DB2, except for content variations. The form may contain a mixture of "requested" or "self determined" pathology but no other services.

- (d) *Form DB5*. This is a continuous stationery form for pathology which can be used on most office machines. It cannot be used to assign benefits and must therefore be accompanied by an "offer to assign" (Form DB2) or assignment (Form DB3) or other form approved by the Health Insurance Commission for that purpose.

I.10 The Medicare Card Number

I.10.1 This number must be quoted on direct-bill forms. If the patient presents without a card but the number is contained on patient records then of course it can be transcribed on the direct bill form. Alternatively, the patient could call back with the card. However, if the number is not available, then the assignment of benefit facility cannot be used.

I.10.2 Where a patient presents without a Medicare Card (and a card number is not recorded on patient records) and indicates that he/she has been issued with a card but does not know the details, the practitioner may contact a Medicare telephone enquiry number to obtain the number.

I.11 The Claim for Assigned Benefits (Form DB1, DB1H)

I.11.1 Practitioners who accept assigned benefits must claim on Medicare using either Claim for Assigned Benefits form DB1 or DB1H. The DB1H form should be used where services are rendered to private in-patients of a hospital or an approved day hospital facility. Both forms have been designed to enable benefit for a claim to be directed to a practitioner other than the one who rendered the services. The new facility is intended for use in situations such as where a short term locum is acting on behalf of the principal doctor and setting the locum up with a provider number and pay-group link for the principal doctors practice is impractical. Practitioners should note that this facility cannot be used to generate payments to or through a person who does not have a provider number.

I.11.2 Each claim form must be accompanied by the assignment forms to which the claim relates.

I.11.3 The DB1 and DB1H are also loose leaf to enable imprinting of practitioner details using the special Medicare imprinter. For this purpose, practitioner cards, showing the practitioner's name, practice address and provider number are available from Medicare on request.

I.12 Direct-Bill Stationery

I.12.1 Medical Practitioners, Approved Dentists and Participating Optometrists wishing to direct-bill may obtain direct-bill stationery by contacting any Medicare office. Information on the completion of the forms and direct-bill procedures are provided with the forms. Information on direct-billing is available from any Medicare office.

I.13 Time Limits Applicable to Lodgement of Claims for Medicare Benefits

I.13.1 A time limit of six months applies to the lodgement of claims with Medicare under the direct-billing (assignment of benefits) arrangements. This means that Medicare benefits are not payable for any service where the service was rendered more than six months earlier than the date the claim was lodged with Medicare. It should be noted that these arrangements are quite different from those relating to claims lodged by patients with Medicare.

I.13.2 For claims lodged by patients with Medicare a time limit of two years (from the date of service to the date of lodgement of claim) will apply.

I.13.3 A provision exists under both arrangements whereby in certain circumstances (e.g. hardship cases, third party workers' compensation cases), the Minister may waive the time limits. Special forms for this purpose are available, if required, from the processing centre to which you direct your assigned claims.

J. PENALTIES AND LIABILITIES

J.1 Penalties

J.1.1 Penalties of up to \$10,000 or imprisonment for up to five years, or both, may be imposed on any person who makes a statement (either orally or in writing) or who issues or presents a document that is false or misleading in a material particular and which is capable of being used in connection with a claim for benefits. In addition, any practitioner who is found guilty of such offences by a court (on or after 22 February 1986) shall be subject to examination by a

Medicare Participation Review Committee and may be counselled or reprimanded or may have services wholly or partially disqualified from the Medicare benefit arrangements.

J.1.2 A penalty of up to \$1000 or imprisonment for up to three months, or both, may be imposed on any person who obtains a patient's signature on a direct-billing form without the necessary details having been entered on the form before signature or who fails to cause a patient to be given a copy of the completed form.

J.2 Provision of Excessive Services

J.2.1 Medicare benefits are only payable in respect of professional services listed in the Schedule to the Health Insurance Act and then, only when those services are reasonably necessary for the adequate medical care of the patient concerned.

J.2.2 It is recognised that medical practitioners will sometimes be called upon to provide services which cannot be considered as being medically necessary. Accounts for these services should not be itemised as attracting Medicare benefits. The fee charged for such services is a private matter between the practitioner and the patient.

J.2.3 The Health Insurance Commission has a computerised monitoring program which records the types and number of services attracting Medicare benefits provided by every practitioner. A doctor whose practice pattern demonstrates a higher than usual servicing rate when compared with his/her professional colleagues, is visited by a medical adviser from the Commission who will discuss this servicing pattern with the practitioner. Where it appears that excessive medical services may have been rendered, the adviser will warn the practitioner that failure to reduce Medicare servicing could result in the practitioner having to explain the need for each service to a Medical Services Committee of Inquiry.

J.2.4 If a Medical Services Committee of Inquiry is satisfied that excessive services have been provided it may make one or more of the following recommendations to the Minister:-

- that the practitioner be reprimanded;
- that the practitioner be counselled;
- that the practitioner reimburse the Commonwealth an amount equal to the Medicare benefits paid in respect of services identified as excessive.

It should be noted that under the provisions of the Act:-

- a practitioner can be required to reimburse the Commonwealth for part of Medicare benefits paid, when a practitioner has been paid benefit for a particular service he/she has claimed to have rendered and a Committee is of the opinion that a less costly service would have been satisfactory eg. a long consultation claimed and paid for in lieu of a standard consultation.

J.2.5 The Act also provides for the Minister's decision on the recommendation to be reviewed by the Medical Services Review Tribunal which is established under the Health Insurance Act for this specific purpose.

J.2.6 Where a determination becomes effective, the Act provides for the details of the determination to be tabled in Parliament and to be published in the Commonwealth of Australia Gazette.

K. PROVISION FOR REVIEW AND INQUIRY

K.1 Medical Services Committees of Inquiry (MSCI)

K.1.1 MSCIs were established as a means of controlling the provision of excessive services by practitioners for which Medicare benefits have been paid or are payable.

K.1.2 MSCIs may inquire and report on references from the Minister concerning the rendering of excessive medical services. (see paragraph J.2 above)

K.1.3 Excessive services are defined in the Act as being 'services in respect of which Medicare benefits have become or may become payable, that are not reasonably necessary, for the adequate medical care of the patient concerned'.

K.1.4 MSCIs consist of five members all of whom are medical practitioners.

K.2 Medical Services Review Tribunal (MSRT)

K.2.1 The functions of the Tribunal are to consider requests for review of Ministerial Determinations made under section 106 of the Health Insurance Act (ie. Determinations arising out of recommendations of Medical Services Committees of Inquiry).

K.2.2 MSRT may affirm, set aside or vary these Determinations.

K.2.3 The MSRT's consist of a President, who is or has been the holder of a judicial office and two other members, both of whom are required to be medical practitioners.

K.3 Medicare Benefits Advisory Committee (MBAC)

K.3.1 This Committee is established under the provisions of Section 66 of the Health Insurance Act. Membership of the Committee consists of representatives of the medical profession and the Commonwealth Government. There are eight members on the Committee, of which at least five must be medical practitioners.

K.3.2 The primary function of the Committee is to consider claims made under Section 11 of the Health Insurance Act for higher Schedule fees and benefits for medical services considered to be of undue length and complexity (see paragraphs F.2.1 to F.2.7). It also considers benefits for services not listed in the Medicare Benefits Schedule (see paragraph E.1).

K.4 Medicare Participation Review Committee (MPRC)

K.4.1 The Medicare Participation Review Committees determine what administrative action should be taken against a practitioner who has been successfully prosecuted for medifraud.

K.4.2 The Committees have a discretionary range of options from taking no further administrative action against the practitioner to counselling and reprimand and full or partial disqualification from participating in the Medicare benefit arrangements for up to five years.

L. PRINCIPLES OF INTERPRETATION

L.1 Principles of Interpretation

L.1.1 Each professional service listed in the Schedule is a complete medical service in itself. However, it may also form part of a more comprehensive service covered by another item, in which case the benefit provided for the latter service covers the former as well. For example, benefit is not payable for a bronchoscopy (Schedule Item 5605) where a foreign body is removed from the bronchus (Schedule Item 5613) since the bronchoscopy is an integral part of the removal operation.

L.1.2 Where a service is rendered partly by one medical practitioner and partly by another, only the one amount of benefit is payable. This may be instanced by the case in which a radiographic examination is partly completed by one medical practitioner and finalised by another, the only benefit payable being that for the total examination. Another example is where aftercare is carried out by other than the practitioner who performed the operation. The fee for the operation also covers any consequential aftercare and only the one benefit is payable.

L.1.3 Where separate services covered by individual items in the Schedule are rendered by different medical practitioners the individual items apply. For example, if antenatal care is provided by one medical practitioner and the confinement and postnatal care are provided by another medical practitioner, the benefits for the first practitioner's services are payable under Item 190 or 192 while benefits for the latter services are payable under Item 194 or 196. However, where a medical practitioner who has provided antenatal care for a patient finds it necessary to call in a specialist during the confinement, benefit is payable under Item 201 as well as under Item 198.

L.2 Medical Services not Listed in the Medicare Benefits Schedule

L.2.1 There are some services which are not listed in the Schedule because they are regarded as forming part of a consultation or else attract benefits on an attendance basis. Some of these services are identified in the index to this Book, e.g.:-

- Amputation stump, trimming of
- Colostomy, lavage of
- Ear, syringe of
- Hypodermic intramuscular or intravenous injections
- Ileostomy, trimming of
- Proctoscopy
- Resuturing of surgical wounds (excluding repair of burst abdomen)
- Venepuncture and the collection of blood (for forwarding to an Approved Pathology Practitioner)

L.3 Consultation and Procedures Rendered at the One Attendance

L.3.1 Where there are rendered, during the course of a single attendance, a consultation (under Part 1 of the Medicare Benefits Schedule) and another medical service (under any other Part of the Schedule), benefits are payable subject to certain exceptions, for both the consultation and the other service. For example, Medicare benefits are not payable for the consultation in addition to the following items rendered on the same occasion:-

- (i) items with descriptions qualified by the words
 - (a) "Each Attendance...", "At an Attendance" or "Attendance at which," e.g. Items 920, *2861, 2863, 2869, 2871, 2873, 2875, 2877, 2879, 2881, 2883, 2885, 2887, 2889, 2891, 2893, 2926, 2933, 7601, 7605, 7694, 7697, 7701, 7706, 7774, 7777, 7781, 7785;
(* see paragraph 8A.1.2 in relation to radiotherapy);
 - (b) "including all related attendances" Item 198, 362, 363, 365, 383; and
 - (c) "including associated consultation" Items 836, 886, 887, 888, 889, 980, 3004, 3006, 3012, 3016, 3022, 3027, 3033, 4630, 4633, 5229, 5264, 6313, 6835;
- (ii) those items in Part 2 of the Schedule which cover or include a component for antenatal or postnatal care, Items 192, 194, 196, 201, 204, 205, 210;
- (iii) those items in the Schedule which provide separate benefit for special services for the treatment of obstetrical services for the treatment of obstetrical complications, Items 242, 246, 247, 248, 273;
- (iv) those items in the Schedule where the attendance is an integral part of the service, Items 821, 824, 909; and
- (v) all items in Parts 3, 5 and 9 of the Schedule.

L.3.2 Where a service listed in paragraph L.3.1, sub-paragraph (i)(a) is performed in conjunction with a consultation, benefit is payable for either the consultation or the service but not for both. For those services covered by sub-paragraphs (i)(b), (i)(c), (ii), (iii), (iv) and (v) above, benefits are payable only for the procedure specified in the item, that is, benefits are not payable under any item in Part 1 of the Schedule. However, in the case of radiotherapy treatment, benefits are payable for both the radiotherapy and an initial referred consultation.

L.3.3 In cases where the level of benefit for an attendance depends upon consultation time (i.e., attendance by general practitioners and consultant physicians in psychiatry), the time spent in carrying out a procedure, which is covered by another item in the Schedule, must not be included in the consultation time.

L.3.4 Medical practitioners should ensure that a fee for a consultation is charged only when a consultation actually takes place. It is not expected that a consultation fee will be charged on every occasion a procedure is performed.

L.4 Aggregate Items

L.4.1 The Schedule includes a number of items which apply only in conjunction with another specified service listed in the Schedule. These items provide for the application of a fixed loading or factor to the fee and benefit for the service with which they are rendered. Item 2863 - Superficial radiotherapy of two or more fields - is an example.

L.4.2 When these particular procedures are rendered in conjunction, the legislation provides for the procedures to be regarded as one service and for a single patient gap to apply. The Schedule fee for the service will be ascertained in accordance with the particular rules shown in the relevant items. When the appropriate fee has been determined, Medicare benefits applicable may be ascertained by reference to the "Ready Reckoner" located at the end of each Part.

L.4.3 Examples of the services to which this aggregation principle applies are Items

EXPLANATORY NOTES

1.1 Physical Attendance by Practitioner

1.1.1 The physical attendance of the medical practitioner upon the patient is necessary before a "consultation" may be regarded as a professional attendance. In itemising a consultation covered by an item which refers to a period of time (e.g., general practitioner attendances, consultations by consultant psychiatrists) only that time during which a patient is receiving active attention should be counted. Periods such as when a patient is resting between blood pressure readings, waiting for pupils to dilate after the instillation of a mydriatic, or receiving short wave therapy etc., should not be included in the time of the consultation. Similarly, the time taken by a doctor to travel to a patient's home should not be taken into consideration in the determination of the length of the consultation. While the doctor is free to charge a fee for "travelling time" when patients are seen away from the surgery, benefits are payable only in respect of the time a patient is receiving active attention.

1.2 Telephone Consultations, etc.

1.2.1 Telephone consultations, letters of advice by medical practitioners, the issue of repeat prescriptions when the patient is not in attendance, post mortem examinations, the issue of death or cremation certificates, counselling of relatives (Note - Items 890 and 893 are not counselling services), group attendances (other than group attendances covered by Items 170, 171, 172, 887, 888 and 889) such as group counselling, health education, weight reduction or fitness classes do not qualify for benefit.

1.3 "IN HOURS" and "AFTER HOURS" Consultations

1.3.1 An IN HOURS consultation or visit is a reference to an attendance between 8 a.m. and 8 p.m. on a week day not being a public holiday, or between 8 a.m. and 1 p.m. on a Saturday.

1.3.2 An AFTER HOURS consultation or visit is a reference to an attendance on a public holiday, on a Sunday, before 8 a.m. or after 1 p.m. on a Saturday, or at any time other than between 8 a.m. and 8 p.m. on a week day not being a public holiday.

1.4 Time Tiered Consultations

1.4.1 The definitions of "standard", "long" and "prolonged" consultations in the health insurance legislation differ from those which the Australian Medical Association has included in its List. Medical practitioners are requested to ensure that when itemising a "standard", "long" or "prolonged" service on a patient's account the service is identified by reference to the appropriate Medicare Benefits Schedule item number.

1.5 Multiple Attendances

1.5.1 Payment of benefit may be made for each of several attendances on a patient on the same day by the same medical practitioner provided the subsequent attendances are not a continuation of the initial or earlier attendances.

1.5.2 However, there should be a reasonable lapse of time between such attendances before they can be regarded as separate attendances.

1.5.3 Where two or more attendances are made on the one day by the same medical practitioner the time of each attendance should be stated on the account (e.g., 10.30 a.m. and 3.15 p.m.) in order to assist in the assessment of benefits.

1.5.4 In some circumstances a subsequent attendance on the same day does in fact constitute a continuation of an earlier attendance. For example, a preliminary eye examination may be concluded with the instillation of mydriatic drops and then an hour or so later eye refraction is undertaken. These sessions are regarded as being one attendance for benefit purposes. A further example is in the case of skin sensitivity testing.

1.6 Attendance at a Hospital (Items 27, 28, 29, 30, 31)

1.6.1 These items refer to attendances on hospital in-patients. Where medical practitioners have made arrangements with a local hospital to use out-patient facilities to see their private patients, surgery consultation items would apply.

1.7 Professional Attendance on a Nursing-home Type Patient in a Hospital (Items 32, 34)

1.7.1 The Health Insurance Act provides that after 35 days hospitalisation in-patients of public and private hospitals may be reclassified as "nursing-home type" patients. Attendance on in-patients so classified is covered by Item 32 or 34 if more than one in-patient (hospital-type or nursing-home type) is seen. Where the only in-patient seen at the hospital is a nursing-home type patient Item 27 or 28 applies.

1.8 Nursing Home Attendance (Items 41, 42, 45, 46)

1.8.1 These items referring to attendances on patients in nursing homes include attendances on patients in aged persons' accommodation such as hostels attached to or in the grounds of a nursing home.

1.8.2 Where a medical practitioner attends a patient in a self-contained unit, within a nursing home complex, the attendance attracts benefits under the appropriate home visit item.

1.8.3 Where a patient living in a self-contained unit is attended by a medical practitioner within the precincts of the nursing home or hostel the appropriate surgery consultation item applies.

1.8.4 An attendance by a patient living in a self-contained unit at a surgery established by a medical practitioner within a nursing home complex but outside the nursing home or hostel, attracts benefits under the usual surgery consultation items.

1.8.5 If a patient, who is accommodated in the nursing home or hostel, visits a medical practitioner at a surgery established by a medical practitioner within a nursing home complex, but outside the nursing home or hostel, benefits would be attracted under the appropriate nursing home attendance item (i.e., Item 41, 42, 45 or 46).

1.9 Professional Attendances at an Institution (Items 55, 56, 61, 62, 63, 64, 67, 68)

1.9.1 For the purposes of these items an "institution" means a place (not being a hospital, nursing home, aged persons' accommodation attached to a nursing home or aged persons' accommodation situated within a nursing home complex) at which residential accommodation or day care or both such accommodation and such care is made available to:-

- (a) disadvantaged children;
- (b) juvenile offenders;
- (c) aged persons;
- (d) chronically ill psychiatric patients;
- (e) homeless persons;
- (f) unemployed persons;
- (g) persons suffering from alcoholism;
- (h) persons addicted to drugs; or
- (i) physically or mentally handicapped persons.

1.9.2 These items apply where two or more patients are attended in one institution on the one occasion.

1.9.3 Where only one patient is attended in an institution the appropriate "home visit" attendance item is payable (Item 11, 12, 15, 16, 17, 18, 21 or 22).

1.10 Minor Attendance by a Consultant Physician (Items 119 and 131)

1.10.1 The Health Insurance Regulations provide that a minor consultation is regarded as being a consultation in which the assessment of the patient does not require the physical examination of the patient and does not involve a substantial alteration to the patient's treatment. Examples of consultations which could be regarded as being 'minor consultations' are listed below (this is by no means an exhaustive list) :-

- hospital visits where a physical examination does not result, or where only a limited examination is performed;
- hospital visits where a significant alteration to the therapy or overall management plan does not ensue;
- brief consultations or hospital visits not involving subsequent discussions regarding patient's progress with a specialist colleague or the referring practitioner.

1.11 Prolonged Attendance in Treatment of a Critical Condition (Items 160-164)
1.10.2 The conditions to be met before services covered by Items 160-164 attract benefits are -

- (i) the patient must be in imminent danger of death;
- (ii) the patient must be receiving continuous life-saving emergency treatment;
- (iii) the constant presence of the medical practitioner must be necessary for the treatment to be maintained; and
- (iv) the attention rendered in that period must be to the exclusion of all other patients.

1.12 Family Group Therapy (Items 170, 171, 172)

1.12.1 These items refer to family group therapy supervised by medical practitioners other than consultant psychiatrists. Other types of group attendances do not attract benefits. It should be noted that only one fee applies in respect of each group of patients.

EXPLANATORY NOTES

2.1 General

2.1.1 Where the medical practitioner undertakes the antenatal care, confinement and postnatal care, Items 204/205 are appropriate. Items 190, 192 or 194/196 apply only where the medical practitioner has not provided all three services.

2.2 Antenatal Care

2.2.1 The following services where rendered during the antenatal period also attract benefits:-

- (a) Items 242, 246, 247, 248 (when the treatment is given in a hospital or nursing home), 250/258, 267, 273 (but not normally before the 24th week of pregnancy), 278, 280, 290, 295 and 298.
- (b) Medical services covered by Parts 3-10 of the Schedule.
- (c) The initial consultation at which pregnancy is diagnosed.
- (d) The first referred consultation by a specialist obstetrician when called in to advise on the pregnancy.
- (e) Treatment of an intercurrent condition not directly related to the pregnancy.

2.3 Confinement

2.3.1 Benefits for the confinement for which there is a component in Items 194/196, 198, 201 and 204/205 also include the following (where indicated) :-

- surgical and/or intravenous infusion induction of labour
- forceps or vacuum extraction
- breech delivery or management of multiple delivery
- evacuation of products of conception by manual removal
- episiotomy or repair of tears
- any service or services covered by item 295 or 298 when performed at time of confinement but not including any other service or services covered by Division 2 of this Part.

2.3.2 Items 204/205 cover delivery by any means including Caesarean section. If, however, a patient is referred, or her care is transferred to another medical practitioner for the specific purpose of delivery by Caesarean section, whether because of an emergency situation or otherwise, then item 210 would be the appropriate item.

2.3.3 Two items in Part 9 provide benefits for assistance by a medical practitioner at a Caesarean section. The first relates to the instances where the Caesarean section is the only procedure performed, while the second item applies when other operative procedures are performed at the same time. Benefits are not payable under these items where the practitioner rendering the assistance has also itemised for an incomplete confinement under Item 201.

2.3.4 As a rule, 24 weeks would be the period distinguishing a miscarriage from a premature confinement. However, if a live birth has taken place before 24 weeks and the foetus survives for a reasonable period, benefit would be payable under the appropriate confinement item.

2.3.5 Where, during the course of a confinement, a general practitioner hands the patient over to a specialist obstetrician, benefits are payable under Item 201, in addition to Item 198 (i.e., confinement as an independant procedure by a specialist). If, at the time of the confinement but before the general practitioner has undertaken the actual confinement, the specialist is called in for the full management of the confinement, benefits for the general practitioner's services should be assessed under Items 190 or 192 for the antenatal attendances and on a consultation basis for the postnatal attendances.

2.3.6 It should be noted that, where the antenatal care is shared between two or more practitioners, or where during the course of pregnancy it is necessary for a medical practitioner to hand the patient over to another medical practitioner (e.g., because he goes on leave) benefit is payable once only, and the fee charged is a matter between the doctors and the patient.

2.3.7 At a high risk delivery benefits will be payable for the attendance of any medical practitioner (called in by the doctor in charge of the delivery) for the purposes of resuscitation and subsequent supervision of the neonate. Examples of high risk deliveries include cases of

difficult vaginal delivery, caesarean section or the delivery of babies with Rh problems and babies of toxæmic mothers.

2.4 Postnatal Care - Items 194/196, 204/205, 210

2.4.1 The Schedule fees and benefits payable for those items in Part 2 (Obstetrics) of the Schedule which include the words, "confinement and postnatal care for nine days", cover all attendances on the mother and the baby during that period, except in the following circumstances:-

- (i) where the medical services rendered are outside those covered by a consultation, e.g., blood transfusion, etc.;
- (ii) where the condition of the mother and/or baby during the nine day postnatal period is such as to require the services of a consultant (e.g., paediatrician, specialist gynaecologist, etc.);
- (iii) where it is necessary during the postnatal period to treat a condition not directly related to the pregnancy or the confinement or the neonatal condition of the baby; or
- (iv) in the management of premature babies (i.e. babies born prior to the end of the 37th week of pregnancy or where the birth weight of the baby is less than 2500 grams) during the period that close supervision is necessary.

2.4.2 Examinations of apparently normal newborn infants by consultant or specialist paediatricians do not attract Medicare benefits.

2.5 Caesarean Section (Item 210)

2.5.1 Benefits under this item are attracted only where the patient has been specifically referred to a specialist, or her care has been transferred to another medical practitioner, for management of the confinement by means of Caesarean section and the practitioner carrying out the procedure has not rendered the antenatal care. Caesarean sections performed in any other circumstances attract benefits under either Item 204 or Item 205. (see paragraph 2.3.2 above)

2.6 Other Services

2.6.1 Item 242 relates to the treatment of habitual miscarriage by injection of hormones. A case becomes one of habitual miscarriage following two consecutive spontaneous miscarriages or where progesterone deficiency has been proved by hormonal assay of cells obtained from a smear of the lateral vaginal wall.

2.6.2 Items 247 and 248 relate to attendances during the antenatal period for treatment which is regarded as not being part of routine antenatal care. The maximum number of attendances considered reasonable in the course of routine antenatal care have been defined by the National Health and Medical Research Council as follows :-

- (i) initial consultation usually during the first eight weeks of pregnancy, covered under general attendance items;
- (ii) then one attendance each four weeks to the twenty-eighth week;
- (iii) then one attendance each two weeks to the thirty-sixth week;
- (iv) then one attendance each week until delivery.

2.6.3 Item 290 relates to antenatal cardiotocography in the management of high risk pregnancy. Benefits for this service are not attracted when performed during the course of the confinement.

EXPLANATORY NOTES

3.1 General

3.1.1 The Health Insurance Act provides that where an anaesthetic is administered to a patient, the premedication of the patient in preparation for anaesthesia is deemed to form part of the administration of the anaesthetic. The administration of an anaesthetic also includes the pre-operative examination of the patient in preparation for that administration except where such examination entails a separate prior attendance on the patient.

3.1.2 Each medical service likely to be performed under anaesthesia has been assigned a number of anaesthetic units which reflect the skill and responsibility exercised by the anaesthetist plus the average time taken for each service without regard to the type of anaesthetic agent employed.

3.1.3 The Schedule fees for the administration of an anaesthetic in connection with a procedure (when performed by a specialist anaesthetist or by a medical practitioner other than a specialist anaesthetist) have been derived by applying unit values to the number of anaesthetic units assigned to the procedure. Part 3 of the Schedule lists the item numbers and appropriate anaesthetic units. The Schedule fees are included in the 'Item-fee- benefit' list located at the end of each Part. (The appropriate anaesthetic units and item numbers are also shown below each procedure likely to be performed under anaesthesia).

3.1.4 An anaesthetic (other than Items 487, 559 or a dental anaesthetic listed in Division 3 of Part 3) must be administered in connection with another professional service listed in the Schedule (or a prescribed medical service rendered by an approved dentist or dental practitioner) if it is to attract benefit. Special provision exists for services not included in the Schedule (see paragraph 3.3).

3.1.5 Except in special circumstances, benefit is not payable for the administration of an anaesthetic listed in Division 1 or 2 of Part 3 of the Schedule unless the anaesthetic is administered by a medical practitioner other than the medical practitioner who renders the medical service in connection with which the anaesthetic is administered.

3.1.6 Fees and benefits established for anaesthetic services cover all essential components in the administration of the anaesthetic. Separate benefit may be attracted, however, for complementary services such as central venous pressure and direct arterial pressure reading or estimations of respiratory function by complicated techniques (but not simple techniques covered by Item 921). It should be noted that extra benefit is not payable for intravenous infusion or electrocardiographic monitoring, provision for which has been made in the value determined for the anaesthetic units.

3.1.7 The amount of benefit specified for the administration of an anaesthetic is the benefit payable for that service irrespective of whether one or more than one medical practitioner administers it. However, benefit is provided under Part 5 for the services of one assistant anaesthetist (who must not be either the surgeon or assistant surgeon) where the anaesthetic administered by the anaesthetist has an anaesthetic unit value of not less than 21 units.

3.1.8 Before benefit will be paid for the administration of an anaesthetic, or for the services of an assistant anaesthetist, details of the operation, sufficient to identify it with the appropriate item in the Schedule and the name of the medical practitioner who performed the operation must be shown on the anaesthetist's account in addition to the details set out at paragraph I.1.

3.1.9 Where a regional nerve block or field block is administered by a medical practitioner other than the practitioner carrying out the operation, the block is assessed as an anaesthetic item according to the advice in paragraph 3.1.2. When a block is carried out in cases not associated with an operation, such as for intractable pain or during labour, the service falls under Part 4.

3.1.10 When a regional nerve block or field block covered by an item in Part 4 of the Schedule is administered by a medical practitioner in the course of a surgical procedure undertaken by him/her, then such a block will attract benefit under the appropriate item in Part 4.

3.1.11 It is to be noted that where a procedure is carried out with local infiltration or digital block as the means of anaesthesia, that anaesthesia is considered to be part of the procedure and an additional benefit is therefore not payable.

3.1.12 Before an operation is decided on, a surgeon may refer a patient to a specialist anaesthetist for an opinion as to the patient's fitness to undergo anaesthesia. Such an attendance will attract benefit as follows:-

- (i) If, as a result of the consultation, anaesthesia and surgery are proceeded with in the ordinary way, then Item 85 applies;
- (ii) If, as a result of the consultation, surgery is contra-indicated or is postponed for some days or weeks and if the anaesthetist supervises any necessary treatment during the postponement period, such attendances attract benefit either under Item 88, 94, 100 or 103. In such a case, to qualify for the specialist rate of benefit, the patient must present a Letter or Notice of Referral by the referring doctor.

3.1.13 It may happen that the professional service for which the anaesthetic is administered does not itself attract a benefit because it is part of the after-care of an operation. This does not, however, affect the benefit payable for the anaesthetic. Benefit is payable for the anaesthetic administered in connection with such a surgical procedure (or combination of surgical procedures) even though no benefit is payable for the surgical procedure.

3.1.14 The administration of epidural anaesthesia during labour is covered by Item 748 or 751 in Part 4 of the Schedule whether administered by the medical practitioner undertaking the confinement or by another medical practitioner.

3.2 Multiple Anaesthetic Rule

3.2.1 The fee for an anaesthetic administered in connection with two or more operations performed on a patient on the one occasion is calculated by the following rule applied to the anaesthetic items for the individual operations:-

- 100% for the item with the greatest anaesthetic fee
- plus 20% for the item with the next greatest anaesthetic fee
- plus 10% for each other item.

Note:

- (a) Fees so calculated which result in a sum which is not a multiple of 5 cents are to be taken to the next higher multiple of 5 cents.
- (b) Where the anaesthetic items for two or more operations performed on the one occasion have fees which are equal, one of these amounts shall be treated as being greater than the other or others of those amounts.
- (c) The multiple anaesthetic rule also applies to combinations of items in Division 3 of Part 3 (dental anaesthetics) with items in Divisions 1 and 2.

3.2.2 Where fees have been derived by using this formula, calculation of the relevant benefit may be assisted by reference to the Ready Reckoner located at the front of Section 2. The rounding rule set out in Note (a) above applies.

3.3 Administration of an Anaesthetic for a service not listed in the Schedule (Items 486/558).

3.3.1 These are non-specific items for the purpose of permitting payment of benefit for an anaesthetic for a professional service not listed in the Schedule or a service in the Schedule which has not been allotted anaesthetic units.

3.3.2 For the application of these items, see paragraph E.1.

3.4 Anaesthetic Services of Unusual Length

3.4.1 The Medicare Benefits Advisory Committee has formulated principles for the determination of increased Schedule fees in respect of individual anaesthetic services which are of unusual length.

3.4.2 These principles are based solely on the unusual length of time involved in the administration of the anaesthetic, rather than considerations of unusual complexity. Applications for increased fees for anaesthetic services of unusual length will, as a general rule, be finalised by Medicare. However, applications relating to anaesthetic services involving unusual complexity or multiple anaesthetic services of less than 6 hours duration should be forwarded, in the usual manner, to the local Medicare office for consideration.

3.4.3 Details of the principles formulated by the Committee and which also apply to dental anaesthetics are:-

A. Single Anaesthetic Services

- (i) if the time involved in the administration of the anaesthetic in the particular case does not exceed the usual time allowed in the Medicare Benefits Schedule item for the

- service (see Explanatory Note (a)) by more than 2 time units (i.e. 30 minutes) the claim should be disallowed;
- (ii) if the claim satisfies the requirements of (i), the benefit may be determined by dividing the total time involved (see Explanatory Note (b)) into units of 15 minutes and, to the total of these units, adding 4 additional units. Benefit may then be determined by reference to the Schedule item corresponding to the equivalent number of anaesthetic units (see Explanatory Note (c)).
 - (iii) if the claim is in respect of an anaesthetic where the time involved is in excess of six hours, the appropriate units should be assessed on a time basis (see Explanatory Note (d))

B. Multiple Anaesthetic Services

- (i) in relation to prolonged multiple anaesthetic services, where the time involved is six (6) hours or more, all such services are assessed on a time basis (see Explanatory Note (d));
- (ii) claims for prolonged multiple anaesthetic services where the time involved is less than six (6) hours should be referred to the local Medicare office for advice on assessment.

Explanatory Notes

- (a) The usual time allowed in the Schedule item may be determined by deducting 4 anaesthetic units from the total provided under the Item, and multiplying the resultant number of units by 15 to arrive at the time expressed in minutes.
- (b) "Total time involved" is defined as the time in which the anaesthetist is in continuous attendance on the patient and incorporates the supervised period of recovery.
- (c) Where the total anaesthetic units derived from the application of the statement of principles produces an anaesthetic unit value which is not currently covered by an item in the Schedule, the procedure to be followed is to take the Schedule item covering the number of anaesthetic units nearest to but below the anaesthetic unit value derived and then to add the Schedule item covering the number of anaesthetic units necessary to make up the balance. For example, the fee for an anaesthetic unit value of 37 units would be calculated as follows:-

Item 547 (36 units) -	\$395.00
Item 500 (1 unit) -	\$ 11.00
	\$406.00 (Total fee)
- (d) In the case of prolonged anaesthetics of more than six hours duration only the initial six hour period is to be calculated using the 15 minute time units. Any time in excess of the first six hours is to be calculated on the basis that one time unit will be regarded as being 10 minutes rather than 15 minutes.

3.4.4 Where fees have been derived by using this formula, calculation of the relevant benefit may be assisted by reference to the Item-Fee-Benefit List located at the end of Part 3. The rounding rule set out in Note (a) of paragraph 3.2.1 applies.

3.4.5 In respect of dental anaesthetics it should be noted that the increased benefits for prolonged dental anaesthetics are calculated in the same manner as for other prolonged anaesthetics. The increased benefits should be paid under the appropriate general anaesthetic items and not under the dental anaesthetic items.

3.5 Appeals

3.5.1 Appeals against assessments made in accordance with the above principles should be referred through the local Health Insurance Commission office for consideration by the Medicare Benefits Advisory Committee.

PART 3 - ANAESTHETICS

NOTE

(1) Where an anaesthetic is administered to a patient the pre-medication of the patient in preparation for anaesthesia is deemed to form part of the administration of the anaesthetic. The administration of an anaesthetic also includes the pre-operative examination of the patient in preparation for that administration except where such examination entails a separate attendance on the patient.

(2) The amount of benefit specified for the administration of an anaesthetic or for assistance in the administration of an anaesthetic is the amount payable whether that service is rendered by one or more than one medical practitioner.

(3) Fees for anaesthetics administered when two or more operations are performed on a patient, on the one occasion are to be calculated by the following rule applied to the listed anaesthetic items for the individual operations:

100 per cent for the item with the greatest anaesthetic fee; plus 20 per cent for the item with the next greatest anaesthetic fee; plus 10 per cent for each other item.

For convenience in assessing anaesthetic services, Items 82 and 85 have been repeated in this Part.

EXPLANATORY NOTES

4.1 General

4.1.1 A nerve block is interpreted as the anaesthetising of a substantial segment of the body innervated by a large nerve or an area supplied by a smaller nerve where the technique demands expert anatomical knowledge and a high degree of precision. Benefits are not payable for nerve blocks which are not of a major nature.

4.1.2 Digital ring analgesia, local infiltration into tissue surrounding a lesion or paracervical (uterine) analgesia are not eligible for payment of Medicare benefits under Items 748 or 751.

4.1.3 Where an anaesthetic combines a regional nerve block with a general anaesthetic for an operative procedure, benefit will be paid under the anaesthetic item relevant to the operation. Additional benefits are not payable under Part 4.

4.1.4 Those blocks to which the fee and benefit applies are listed in the description for Item 748. So that when a block covered by Item 748 is repeated, other than by 'topping up', benefit is attracted again under Item 748.

4.2 Maintenance of Regional or Field Block (Item 751)

4.2.1 Medicare benefit is attracted under this item only when the service is performed other than by the operating surgeon. This does not preclude benefits for an obstetrician performing an epidural block during labour.

4.2.2 When the service is performed by the surgeon during the post-operative period of an operation it is considered to be part of the normal after-care. In these circumstances benefit is not attracted.

4.3 Introduction of a Narcotic (Item 752)

4.3.1 Benefits are attracted for this procedure irrespective of the stage of the operation at which the narcotic is introduced.

4.4 Epidural Injection for Control of Post-operative Pain (Item 753)

4.4.1 This item provides benefit for the epidural injection of a narcotic or local anaesthetic in the caudal, lumbar or thoracic region administered at the end of an operation for the purpose of controlling pain in the post-operative period.

4.5 Maintenance of Narcotic Analgesia (Item 754)

4.5.1 Performance of this procedure by the operating surgeon is part of the after-care.

EXPLANATORY NOTES

6.1 Ultrasonic Cross-sectional Echography (Items 791 and 793)

6.1.1 Item 791 covers ultrasonic cross-sectional echography where the examination is rendered by a practitioner on his own or partner's patient. Item 793 covers the examination where the patient has been referred to a medical practitioner outside the referring practitioner's practice especially for ultrasound scanning. Doctors itemising Item 793 should indicate the name of the referring practitioner on their accounts. The referral must be in writing and a new referral is necessary in respect of each examination.

6.1.2 As a rule, benefit is payable once only for ultrasonic examination at the one attendance, irrespective of the areas involved. Additional benefits may, however, be payable where examinations of non-contiguous body areas are involved. Such cases should be referred to the Health Insurance Commission.

6.2 Routine Ultrasonic Scanning

6.2.1 Medicare benefits are not attracted for routine ultrasonic screening associated with the termination of pregnancy.

6.3 Investigation of Central Nervous System Evoked Responses (Items 816 and 817)

6.3.1 In the context of these items a study refers to one or more averaged samples of electrical activity recorded from one or more sites in the central nervous system in response to the same stimulus.

6.3.2 Second or subsequent studies refer to either stimulating the point of stimulation (e.g. right eye or left median nerve) with a different stimulus or stimulating another point of stimulation (e.g. left eye or right median nerve):

6.3.3 Items 816 and 817 are not intended to cover bio-feedback techniques.

6.4 Electrocochleography (Item 818)

6.4.1 Electrocochleography is covered by this item while the insertion of electrodes (both ears) attracts benefits under Item 819.

6.5 Haemodialysis (Items 821, 824)

6.5.1 Item 821 covers the supervision in hospital by a medical specialist for the management of dialysis, haemofiltration, haemoperfusion or peritoneal dialysis in the patient who is not stabilised where the total attendance time by the supervising medical specialist exceeds 45 minutes.

6.5.2 Item 824 covers the supervision in hospital by a medical specialist for the management of dialysis, haemofiltration, haemoperfusion or peritoneal dialysis in a stabilised patient, or in the case of an unstabilised patient, where the total attendance time by the supervising medical specialist does not exceed 45 minutes.

6.6 Contact Lenses (Item 851)

6.6.1 Benefits are not attracted under this item unless there is a medical or optical condition which requires the use of contact lenses (as set out in conditions (a) to (j) below) and unless the lenses are prescribed during the attendance. Evaluation and fitting without the issue of a prescription do not qualify under the item.

(a) *myopia greater than 4.0 dioptres (spherical equivalent) in the dominant eye*

This means the minimum power required (in the spectacle plane, 12.0mm from the apex of the cornea), increment to which does not improve the distance visual acuity as measured in the usual way binocularly at 6 metres. It is understood that the power of the correcting contact lens might be less than 4.0 dioptres. (The spherical equivalent is equal to the algebraic sum of the spherical power and half the power of the cylinder);

(b) *manifest hyperopia greater than 5.0 dioptres (spherical equivalent) in the dominant eye*

To meet this condition, the power of the contact lens ordered for correction of distance vision must also be greater than:

plus 5.0 dioptres in the case of a flexible lens

plus 3.5 dioptres in the case of a rigid lens

(spherical equivalents if toric);

- (c) *astigmatism greater than 4.0 dioptres in the dominant eye;*
- (d) *astigmatism greater than 3.0 dioptres and requiring lens for distance correction of plus power plus 3.0 dioptres or greater in one meridian in the dominant eye*

Measurement to be made in the spectacle plane;

- (e) *irregular astigmatism in either eye, confirmed by keratometric observation, with visual acuity less than 6/12 with the best spectacle correction, and this corrected acuity being improved by more than 10% by the use of a contact lens.*

The irregular astigmatism must be due to causes other than the previous use of contact lens;

- (f) *anisometropia greater than 4.0 dioptres (difference between spherical equivalents)*

To meet this condition, there must be an algebraic difference of greater than 4.0 dioptres between the spherical equivalents of the spectacle corrections for the two eyes;

- (g) *when the contact lens is prescribed as part of a telescopic system, for a patient with subnormal corrected visual acuity of not greater than 6/30 in the better eye;*

- (h) *when a wholly or segmentally opaque contact lens is prescribed for the alleviation of dazzle, distortion or diplopia caused by pathological mydriasis, aniridia, coloboma of the iris or pupillary malformation or distortion, whether congenital, traumatic or surgical in origin;*

- (i) *patients who, by reason of their physical deformity, are unable to wear spectacles and in respect of whom a medical practitioner has prescribed, or recommended the prescription of, contact lenses; and*

- (j) *patients in respect of whom a medical practitioner has certified that the patient has an ocular or medical condition (other than a condition referred to in paragraphs (a) to (h) (inclusive)) requiring, for correction, the use of contact lenses.*

6.6.2 Benefits are payable for an initial referred consultation rendered in association with the fitting and prescribing of the lenses.

6.6.3 Subsequent follow-up attendances attract benefits on a consultation basis.

6.7 Refitting of Contact Lenses - Item 852

6.7.1 This item covers the refitting of contact lenses where this becomes necessary within the thirty-six month time limit. A nominal fee only has been set for this item, the intention being that where the service becomes necessary an application will be made under the provisions of Section 11 of the Health Insurance Act and an appropriate fee will be determined by the Medicare Benefits Advisory Committee (see paragraph F.2 for details relating to the lodgement of such claims). Determinations by the Advisory Committee will be made on the basis of a list of conditions drawn up by the Department in consultation with the Royal Australian College of Ophthalmologists.

6.8 Non-determinate Audiometry (Item 862)

6.8.1 This refers to screening audiometry covering those services, one or more, referred to in Items 863-875 when not performed in a sound attenuated environment in accordance with conditions set out in the Standards Association of Australia AS2586-1983.

6.9 Audiology Services (Items 863-878)

6.9.1 See preamble to these items for conditions to be fulfilled in order for benefits to be attracted for these items.

6.10 Twelve-lead Electrocardiography (Item 908)

6.10.1 Benefits are precluded under this item unless a full 12-lead ECG is performed. Examinations involving less than twelve leads are regarded as part of the accompanying consultation. A 12-lead ECG refers to the recordings produced of 12 views of the heart by various combinations of placement of electrodes.

6.11 Twelve-lead Electrocardiography, Tracing Only or Report Only (Item 909)

6.11.1 This item provides a benefit where tracings are referred to a medical practitioner for a report without an attendance on the patient by that practitioner. Where a patient is referred to a consultant for a consultation and takes ECG tracings with him/her, benefits are not attracted for the consultant's interpretation of the tracings.

6.12 Electrocardiographic Monitoring of Ambulatory Patient (Item 915)

6.12.1 This item requires the continuous monitoring of an ambulatory patient for twelve hours or more and the analysis of the recording on a Holter scan system.

6.12.2 This item covers the investigation regardless of the actual time involved in the monitoring. The changing of a tape or batteries is regarded as a continuation of the service and does not constitute a separate service for benefit purposes. Where a recording is analysed and reported on and a decision is made to undertake a further period of monitoring, the second episode would be regarded as a separate service.

6.12.3 The electrocardiographic monitoring of ambulatory patients in other circumstances does not attract a benefit under this item.

6.13 Electrocardiographic Monitoring During Exercise (Item 916)

6.13.1 The requirements for the payment of benefits under this item is the presence of the medical practitioner with the patient for not less than twenty minutes and the premises to be equipped with mechanical respirator and defibrillator.

Note - Items 915 and 916 also includes resting ECG and the recording of other parameters.

6.14 Estimation of Respiratory Function (Item 921)

6.14.1 Medicare benefit is attracted under this item only where a directly recorded tracing is produced while the patient is exhaling into the spirometer. Where a machine produces only a visual numerical display or a digital printout, benefits are not payable.

6.15 Administration of Cytotoxic Agent (Item 932)

6.15.1 Intravenous drip infusion includes injection into tubing of running intravenous drip and administration through a Y connection.

6.16 Collection of Blood (Item 949)

6.16.1 Medicare benefits are payable under Item 949 for collection of blood for autologous transfusions in respect of an impending operation (whether or not the blood is used), or when homologous blood is required in an emergency situation.

6.16.2 Benefits are not payable under Item 949 for collection of blood for long-term storage for possible future autologous transfusion, or for other forms of directed blood donation.

6.17 Puva or UVB Therapy - Items 978, 979

6.17.1 A component for any necessary subsequent consultation has been included in the Schedule fee for these items. However, a consultation on the same day as, but preceding commencement of a course of therapy, would attract benefits.

6.18 Acupuncture (Item 980)

6.18.1 The service of "acupuncture" must be performed by a medical practitioner and itemised under Item 980 to attract benefits. This item covers not only the performance of the acupuncture but includes any consultation on the same occasion and any other attendance on the same day for the condition for which acupuncture was given.

6.18.2 Items in Part 1 of the Schedule should not be itemised for professional attendances when the service "acupuncture" is provided.

6.18.3 For the purpose of payment of Medicare benefits "acupuncture" is interpreted as including treatment by means other than the use of acupuncture needles where the same effect is achieved without puncture, e.g., by application of ultrasound, laser beams, pressure or moxibustion, etc.

Division 2 - Computerised Tomography on a Brain Scanner	2458-2460	88
Item-Fee-Benefit List		89

EXPLANATORY NOTES

7A.1 General

7A.1.1 It will be noted that there are separate items in respect of computerised tomography services, i.e. services performed on a body scanner and those performed on a brain scanner.

7A.2 Scan of more than one area

7A.2.1 Benefits are payable once only even though two or more body areas may be scanned.

7A.3 Plain Study - Contrast Medium Study

7A.3.1 Additional benefits are not payable under an item which covers a plain study only, when performed in association with an item relating to a contrast medium study, as these items also include a plain study.

7A.4 CT Scan of Temporal Bones with Air Study - Item 2406

7A.4.1 This service would be preceded by a CT brain scan on either the same day or the previous day. The brain scan attracts a separate benefit.

7A.5 CT Scan of Spine with Intrathecal Contrast Medium - Item 2419

7A.5.1 The intrathecal injection of contrast medium attracts benefit under Item 2847 or 2848.

7A.6 CT Scan of Extremities - Items 2429-2437

7A.6.1 Benefit for these services is attracted according to the total number of slices irrespective of whether one part or more than one part of the one extremity is scanned or more than one extremity is scanned, eg, even if the left ankle and the right elbow are examined on the one occasion, the number of slices involved would determine the appropriate item.

7A.7 CT Scans of Multiple Regions - Items 2438-2452

7A.7.1 The Schedule provides items to cater for the common combinations of regions. The items relating to the individual regions should not be used when scans of multiple regions are performed.

PART 8 - RADIOLOGY

EXPLANATORY NOTES

8.1 General

8.1.1 The benefits allocated to each item in Part 8 covers the total procedure i.e. the examination, reading and report. Separate benefits are not payable for individual components of the service e.g. preliminary reading.

8.1.2 A "Letter/Notice of Referral" is not required in the case of services contained in Part 8 of the Schedule (except in relation to Items 2734 and 2736) to which higher fees apply when rendered by specialist radiologists.

8.2 Films - exposure of more than one

8.2.1 Where the radiographic examination of a specific area involves the exposure of more than one film, benefits are payable once only, except where special provision is made in the description of the item for the inclusion of all films taken for the purpose of the examination.

8.3 Comparison X-rays - Limbs

8.3.1 Where it is necessary for one or more films of the opposite limb to be taken for comparison purposes, benefits are payable for radiographic examination of one limb only. Comparison views are considered to be part of the examination requested.

8.4 Plain Abdominal Film (Items 2699/2703)

8.4.1 Benefits are not attracted for Items 2699/2703 in association with barium meal examinations or cholecystograms whether provided on the same day or previous day. Benefits are payable for the preliminary plain film in conjunction with barium enema studies.

8.5 Radiography of the Breast (Items 2734 and 2736)

8.5.1 Benefits under these items are attracted only where the patient has been referred in specific circumstances. To facilitate these requirements the Regulations to the Health Insurance Act require the referring medical practitioner to complete a Letter/Notice of Referral (to be personally signed by the medical practitioner) indicating that the patient has been referred for mammography in accordance with the requirements outlined in the description of the items.

PART 8A - RADIOTHERAPY

EXPLANATORY NOTES

8A.1 General

8A.1.1 The level of benefits for radiotherapy depends not only on the number of fields irradiated but also on the frequency of irradiation. In the items related to additional fields, it is to be noted that treatment by rotational therapy is considered to be equivalent to the irradiation of three fields (i.e., irradiation of one field plus two additional fields). For example, each attendance for orthovoltage rotational therapy at the rate of 3 or more treatments per week would attract benefit under Item 2875 plus twice Item 2877.

8A.1.2 Benefits are attracted for an initial referred consultation and radiotherapy treatment where both take place at the same attendance.

8A.2 Planning Services

8A.2.1 Because of problems associated with allocation of item numbers in the current schedule, the provision of items in respect of radiation oncology planning will be continued under the provisions of Section 3C of the Health Insurance Act for the time being. For details of these items please refer to pages 26 to 30, titled "Ministerial Determinations".

8A.2.2 A planning episode involves field setting (ie simulation or localisation) and dosimetry (either using a CT interfacing planning computer or a non-CT interfacing planning computer). One plan only will attract Medicare benefits in a course a treatment. However, where a plan for brachytherapy is undertaken in association with a plan for megavoltage or teletherapy treatment, benefits would be attracted for both services.

8A.2.3 Medicare benefits are also payable, under the appropriate radiology item in Part 8, in respect of verification films (or port films) taken during the course of treatment. Benefits are not, however, payable for a consultation rendered in association with a radiotherapy planning service.

EXPLANATORY NOTES

9.1 General

9.1.1 For an operation (or combination of operations) for which the Schedule fee exceeds \$152.00 but does not exceed \$270.00 benefits for assistance have been based on a fee of \$50.00. Where the Schedule fee for the operation (or combination of operations) exceeds \$270.00 an assistance fee of one-fifth of the Schedule fee has been determined for benefit purposes. In the case of multiple operations, the Schedule fee for at least one of the operations must exceed \$152.00 before benefits are attracted.

9.1.2 Benefit in respect of assistance at an operation is not payable unless the assistance is rendered by a medical practitioner other than the anaesthetist or assistant anaesthetist.

9.1.3 The amount of benefit specified for assistance at an operation is the amount payable whether the assistance is rendered by one or more than one medical practitioner.

PART 10 - OPERATIONS

EXPLANATORY NOTES

10.1 General

10.1.1 Many items in Part 10 of the Schedule are qualified by one of the following phrases:

- "as an independent procedure";
- "not associated with any other item in this Part"; or
- "not covered by a specific item in this Part"

An explanation of each of these phrases is as follows.

10.2 As an Independent Procedure

10.2.1 The inclusion of this phrase in the description of an item precludes payment of benefits when

- (i) a procedure so qualified is associated with another procedure that is performed through the same incision, e.g. removal of a calculus (Item 5968) in the course of an open operation on the bladder for another purpose;
- (ii) such procedure is combined with another in the same body area, e.g. direct examination of larynx (Item 5520) with another operation on the larynx or trachea;
- (iii) the procedure is an integral part of the performance of another procedure, e.g. removal of foreign body (Item 3120/3124) in conjunction with debridement of deep or extensive contaminated wound of soft tissue, including suturing of that wound when performed under general anaesthetic (Item 3041).

10.3 Not Associated with any other item in this Part

10.3.1 "Not associated with any other item in this Part" means that benefit is not attracted for that item when the service is performed on the same occasion as any other Part 10 service.

10.4 Not covered by a Specific Item in this Part

10.4.1 "Not covered by a specific item in this Part" means that this item may be itemised if there is no specific item relating to the service performed in the Schedule, e.g., Items 3739/3745 (Laparotomy involving operation on abdominal viscera, not covered by any other item in this Part). Benefits may be attracted for an item with this qualification as well as benefits for another service during the course of the same operation.

10.5 Multiple Operation Formula

10.5.1 The fees for two or more operations, other than amputations, performed on a patient on the one occasion (except as provided in paragraph 227) are calculated by the following rule:-

- 100% for the item with the greatest Schedule fee
- plus 50% for the item with the next greatest Schedule fee
- plus 25% for each other item.

Note: (a) Fees so calculated which result in a sum which is not a multiple of 5 cents are to be taken to the next higher multiple of 5 cents.

(b) Where two or more operations performed on the one occasion have the same Schedule fees which are equal, one of these amounts shall be treated as being greater than the other or others of those amounts.

10.5.2 Where fees have been derived by using this formula, calculation of the relevant benefit may be assisted by reference to the Item-Fee-Benefit list located at the end of this Part. The rounding rule set out in Note (a) above applies.

10.5.3 This rule does not apply to an operation which is one of two or more operations performed under the one anaesthetic on the same patient if the medical practitioner who performed the first operation did not also perform or assist at the other operation or any of the other operations, or administer the anaesthetic. In such cases the fees specified in the Schedule apply.

10.5.4 Where two medical practitioners operate independently and either performs more than one operation, the method of assessment outlined in paragraph 10.5.1 would apply in respect of the services performed by each medical practitioner. For these purposes the term

"operation" includes all items in Part 10 (other than Division 2 of that Part) and Items 204,205 (when by Caesarean section) 210, 362, 363, 365 and 383 in Part 2.

10.5.5 If the operation comprises a combination of procedures which are commonly performed together and for which a specific combined item is provided in the Schedule, it is regarded as the one item and service in applying the multiple operation rule.

10.6 After-care

10.6.1 As a general rule, the fee specified for each of the operations listed in the Schedule contains a component for the consequential after-care customarily provided, unless otherwise indicated.

10.6.2 After-care is deemed to include all post-operative treatment rendered by medical practitioners and need not necessarily be limited to treatment given by the surgeon or to treatment given by any one medical practitioner.

10.6.3 The amount and duration of after-care consequent on an operation may vary as between patients for the same operation, as well as between different operations which range from minor procedures performed in the medical practitioner's surgery, to major surgery carried out in hospital. As a guide to interpretation, after-care includes all normal post-operative attendances up to the healing of the wound or normal union of a fracture plus the final check or examination, regardless of whether the attendances are at the hospital, rooms, or the patient's home.

10.6.4 Attendances which form part of normal after-care, whether at hospitals, rooms, or at patient's home, should not be shown on the doctor's account. Only those attendances which do not form part of normal after-care, i.e., those services attracting separate Medicare benefits, should be itemised. When additional services are itemised, the doctor should show against those services on the account the words "not normal after-care".

10.6.5 Subject to the approval of the local Medicare office, benefits may be paid for professional services for the treatment of an intercurrent condition or an unusual complication arising from the operation.

10.6.6 Some minor operations are merely stages in the treatment of a particular condition. Attendances subsequent to such operations should not be regarded as after-care but rather as a continuation of the treatment of the original condition and attract benefits. Items to which this policy applies are Items 3371, 3379/3384, 4131, 4633, 4822, 4823, 5162, 5196, 6802, 6818, 6824, 6940, 6942, 6953, 7190 and 7864.

10.6.7 Where a patient has been operated on in a recognised hospital as a hospital patient (as defined in Section 3(i) of the Health Insurance Act), post-operative attendances by a private medical practitioner at a place other than the hospital, attract Medicare benefits on an attendance basis.

10.6.8 When a surgeon delegates after-care to a local doctor, Medicare benefit may be apportioned on the basis of 75% for the operation and 25% for the after-care. Where the benefit is apportioned between two or more medical practitioners, no more than 100% of the benefit for the procedure will be paid.

10.6.9 In respect of fractures, where the after-care is delegated to a doctor at a place other than the place where the initial reduction is carried out, benefit may be apportioned on a 50:50 basis rather than on the 75:25 basis suggested for surgical operations.

10.6.10 Where the reduction of a fracture (Items 7505 - 7847) is carried out by hospital staff in the out-patient or casualty department of a recognised hospital and the patient is then referred to a private practitioner for supervision of the after-care, Medicare benefits are payable for the after-care treatment on an attendance basis.

10.6.11 However, these arrangements do not over-ride the provisions of Items 7828, 7834 or 7839, which normally apply where the initial or subsequent attempts at reducing a fracture are not successful.

10.6.12 The following table shows the period which has been adopted as reasonable for the after-care of fractures:-

10.7 After-care where patient is referred to an Intensive Care Unit

10.7.1 Benefits are payable for post-operative attendances by an intensivist in an intensive care unit provided that the intensivist or the surgeon, who referred the surgical patient to the unit, supplies a brief explanation (to be submitted with the medical account covering the patient's treatment in the intensive care unit) of the intercurrent condition or the unusual complication on account of which the post-operative care was not regarded as normal after-care.

10.7.2 Routine admissions to an intensive care unit after major surgery do not attract additional benefits in the absence of significant complications.

10.8 Drill Biopsy (Item 3148)

10.8.1 Needle aspiration biopsy attracts benefit on an attendance basis and not under this item.

10.9 Lipectomy, Wedge Excision - Two or More Excisions (Item 3308)

10.11.1 Serial curettage excision as opposed to simple curettage refers to the technique where the margin having been defined, the lesion is carefully excised by a skin curette using a series of dissections and cauterisations so that all extensions and infiltrations of the lesion are removed.

10.12 Subcutaneous Mastectomy (Item 3700)

10.12.1 When, after completing a subcutaneous mastectomy a prosthesis is inserted, benefits are payable for the latter procedure under Item 8531, the multiple operation formula applying.

10.13 Laparotomy and Other Procedures (Item 3722)

10.13.1 This item covers several operations on abdominal viscera not dissimilar in time and complexity. Where more than one of the procedures are performed during the one operation, each procedure may be itemised according to the multiple operation formula.

10.14 Laparotomy involving Division of Peritoneal Adhesions (Item 3726)

10.14.1 Although the division of peritoneal adhesions carries the restriction "where no other listed intra-abdominal procedure is performed", benefits on the multiple operation basis will be attracted under Item 3726 when itemised in association with another intra-abdominal operation where:-

- (i) extensive peritoneal adhesions are encountered;
- (ii) the division of the adhesions is not related solely to the course of the principal procedure (e.g. removal of a retro-caecal appendix or a closely adherent gall-bladder would not qualify);
- (iii) the additional time required is in excess of 45 minutes; and
- (iv) the surgeon provides sufficient details on his account to indicate that the requirements of sub-paragraphs (i)(ii) and (iii) have been met.

10.15 Gastrectomy, Radical Sub-total (Item 3937)

10.15.1 The item differs from total radical Gastrectomy (Item 3938) in that a small part of the stomach is left behind. It involves resection of the greater omentum and posterior abdominal wall lymph nodes with or without splenectomy.

10.16 Anti-reflux Operations (Items 4241-4245)

10.16.1 These items cover various operations for reflux oesophagitis. Where the only procedure performed is the simple closure of a diaphragmatic hiatus benefit would be attracted

under Items 3739/3745 (Laparotomy involving operation on abdominal viscera, not covered by any other item in this Part).

10.17 Meatoplasty (Item 5070)

10.17.1 When this procedure is associated with Item 5078, 5091, 5095, 5098 or 5100 the multiple operation rule applies.

10.18 Reconstruction of Auditory Canal (Item 5074)

10.18.1 When associated with Item 5095, 5098 or 5100 the multiple operation rule applies.

10.19 Larynx, direct examination (Item 5520)

10.19.1 Benefit is not attracted under this item when an anaesthetist examines the larynx during the course of administration of a general anaesthetic.

10.20 Microlaryngoscopy (Item 5538)

10.20.1 This item covers the removal of papillomata, in children, by mechanical means, e.g. cup forceps. Item 5539 refers to the removal by laser beams.

10.23 Colposcopic Examination (Item 6415)

10.23.1 It should be noted that colposcopic examination (screening) of women during the course of a consultation does not attract Medicare benefits under Item 6415 except in the following circumstances:- (i) where the patient has had an abnormal cervical smear; (ii) where there is a history of ingestion of oestrogen by the patient's mother during her pregnancy; or (iii) where the patient has been referred by another medical practitioner because of suspicious signs of genital cancer.

10.24 Dilatation of Cervix under General Anaesthesia (Item 6446)

10.25 Curettage of Uterus under General Anaesthesia (Items 6460/6464)

10.25.1 Benefits are payable under these items only when the procedures are performed under general anaesthesia. Uterine scraping or biopsy using small curettes (e.g., Sharman's or Zeppelin's) and requiring minimal dilatation of the cervix, not necessitating a general anaesthesia, does not attract benefits under these items but would be paid on an attendance basis.

10.26 Colposcopy (Item 6438)

10.26.1 Curettage of the uterus is not an essential part of this procedure. If performed, benefits are attracted under Item 6464 according to the multiple operation formula.

10.28 Refractive Keratoplasty (Item 6833)

10.28.1 The description of this item refers to two sets of calculations, one performed some time prior to the operation, the other during the course of the operation. Both of these measurements are included in the Schedule fee and benefit for Item 6833.

10.29 Vitrectomy (Items 6861-6864)

10.29.1 In relation to vitreous surgery the following items would be regarded as intraocular operations and should not be used in combination with Items 6861-6864:

6728	6742	6832	6858	6873	6938
6730	6744	6848	6859	6881	
6736	6747	6852	6865	6885	
6740	6828	6857	6871	6894	

10.30 Readjustment of adjustable sutures (Item 6929)

10.30.1 This item refers to the occasion when readjustment has to be made to the sutures to vary the angle of deviation of the eye. It does not cover the mere tightening of the loosely tied sutures without repositioning.

10.31 Intrathoracic Operation on Heart, Lungs, etc. (Item 6999)

10.31.1 This item covers the operation for patent ductus arteriosus.

10.32 Measurement of Intracardiac Conduction Times (Item 7001)

10.35.1 The fee for this item includes routine post-operative care. Associated radiological services attract benefits under the appropriate item in Part 8.

10.36 Bone Grafts Following a Fracture

10.36.1 Where a fracture is treated by bone graft, the relevant bone graft item in Division 11 only applies. Additional benefits are not payable for the fracture item.

10.37 Treatment of Fractures (Items 7505-7847)

10.37.1 The fee allocated to each fracture item covers the treatment of a simple and uncomplicated fracture. In cases where the fracture treatment is more involved, aggregate items apply in determining the fee for the service. For example :-

- Simple and Uncomplicated Fractures Requiring Open Operation - Items 7802/7803
- Simple and Uncomplicated Fractures Requiring Internal Fixation - Items 7808/7809
- Compound Fractures Requiring Open Operation - Items 7815/7817
- Complicated Fractures Requiring Open Operation - Items 7821/7823

10.38 Series of Reductions of a Fracture

10.38.1 Items 7828-7839 apply to the reduction of a fracture where more than one reduction is necessary to achieve union of the bone. The level of benefits allocated under these items applies whether the series of reductions is performed by the one practitioner or more than one practitioner.

10.39 Fracture of Mandible or Maxilla (Item 7719-7728)

10.39.1 If both mandible and maxilla are fractured benefit would be attracted under this item twice with the multiple operation formula applying.

10.39.2 There are two maxillae in the skull and for the purposes of these items the mandible is regarded as comprising two bones. Hence a bilateral fracture of the mandible would be

assessed as, say Item 7722x1 1/2; two maxillae and one side of the mandible as Item 7722x1 3/4.

10.39.3 Splinting in Item 7722 refers to cap splints, arch bars, silver (cast metal) or acrylic splints.

10.39.4 Item 7728 may be associated with Item 7722 or Item 7725. Item 7722 would not be expected to be combined with Item 7725.

10.39.5 Open reduction and internal fixation (Item 7809) may be applied in association with Item 7722, 7725 or 7728.

10.40 Joint Arthroplasty, total replacement of hip (Item 8069)

10.40.1 This item is intended to include all variations of the operation involving total hip replacement, e.g. osteotomy, bone graft to the neck of the femur, tenotomy etc. Additional benefits are not attracted for these procedures. Where bone graft to the acetabulum is involved, application should be made under Section 11 (see paragraph F.2).

10.41 Joint Replacement, Revision Operation (Item 8070)

10.41.1 This Item 8070 covers the total joint replacement revision operation with removal of the old prosthesis and replacement with a new one.

10.42 Local Skin Flap - Definition

10.42.1 A local skin flap is an area of skin and subcutaneous tissue designed to be elevated from the skin adjoining a defect needing closure. The flap remains partially attached by its pedicle and is moved into the defect by rotation, advancement or transposition, or a combination of these manoeuvres. A secondary defect will be created which may be closed by direct suture, skin grafting or sometimes a further local skin flap. This latter procedure will also attract benefit if closed by graft or flap repair but not when closed by direct suture.

10.42.2 By definition, direct wound closure (e.g. by suture) does not constitute skin flap repair. Similarly angled, curved or trapdoor incisions which are used for exposure and which are sutured back in the same position relative to the adjacent tissues are not skin flap repairs. Undermining of the edges of a wound prior to suturing is considered a normal part of wound closure and is not considered a skin flap repair.

10.42.3 A "Z" plasty is a particular type of transposition flap repair. Although 2 flaps are created, rebate will be paid on the basis of Item 8480 or 8484 once only.

10.42.4 Common Items where local skin flap repair is payable include:

3041	3276	7815	8470
3219/3220	3295	7817	8472
3221/3222	3301	7821	8474
3233/3237	3314	7823	8522
3247/3253	3320	8298	8524
3261/3265	3477	8462	8588
3271	6044	8466	

Note: This list is not all-inclusive and there are circumstances where other services might involve flap repair.

10.42.5 Items where a local flap repair should not be payable in addition are:

3046-3101	3223-3226	8530	8608
3104	3306-3311	8542	8612
3173-3183	3597	8551	8622-8652
3194-3217	8528	8594-8600	

10.43 Augmentation Mammoplasty (Item 8530)

10.43.1 Medicare benefit is generally not attracted under this item unless the asymmetry in breast size is greater than 10%. Augmentation of a second breast some time after an initial augmentation of one side would not attract benefits. Benefits are not payable for augmentation mammoplasty in association with reduction mammoplasty (Item 8528) for correction of breast ptosis.

10.43.2 Where bilateral mammoplasty is indicated because of disease, trauma or congenital malformation (other than covered under Item 8531), details of such cases including, where possible, colour photographs (frontal and lateral) taken before treatment, should be submitted to the local Medicare office for forwarding to the Medicare Benefits Advisory Committee for consideration. The photographs should be forwarded in a sealed envelope marked "Medical - In Confidence". Where it is not possible to supply photographs taken before treatment, certification from a Commonwealth Medical Officer will suffice.

10.44 Breast Reconstruction, Myocutaneous Flap (Item 8532)

10.44.1 When a prosthesis is inserted in conjunction with this operation, benefit would be attracted under Item 8531, the multiple operation rule applying. Benefits would also be payable for nipple reconstruction (Item 8538) when performed.

10.44.2 When a rectus abdominus flap is used, secondary repair of the muscle defect by an external oblique muscle flap would be covered under Item 8449. However, where the repair is by Teflon or similar mesh, Item 4262 should be itemised.

10.45 Nipple and/or areola reconstruction (Item 8538)

10.45.1 This item involves the taking of tissue from, for example, the other breast, the ear lobe and the inside of the upper thigh with or without local flap.

10.46 Meloplasty for Correction of Facial Asymmetry (Item 8551)

10.46.1 Benefits are payable under this item for unilateral face-lift operations performed to correct soft tissue abnormalities of the face due to causes other than the ageing process.

10.46.2 Occasionally bilateral face-lift might be indicated for conditions such as drooping from the angles of the mouth and deep pitting of the skin due to acne scars. Details of such cases including, where possible, colour photographs of the condition taken before treatment, should be submitted to the local Medicare office for forwarding to the Medicare Benefits Advisory Committee for consideration. The photographs should be forwarded in a sealed envelope marked "Medical - in Confidence".

10.47 Reduction of Eyelids (Items 8548, 8585)

10.47.1 Where a reduction is performed for a medical condition of one eyelid, it may be necessary to undertake a similar compensating procedure on the other eyelid to restore symmetry. The latter operation would also attract benefits. Where there is doubt as to whether benefits would be payable, advice should be sought from the local Medicare office.

10.48 Osteotomy of Jaw (Items 8658 - 8668)

10.48.1 The fee and benefit for these items include the various forms of internal or dental fixation, jaw immobilisation, the transposition of nerves and vessels and bone grafts taken from the same site. Bone grafts taken from a separate site, e.g. iliac crest, would attract additional benefit under Item 8001 in accordance with the multiple operation rule. The items cover a post-operative period of twelve weeks.

10.48.2 It should be noted that the "Rules of Interpretation of the Schedule" provide that for the purposes of these items (i.e., Items 8658 - 8668) a reference to maxilla includes the zygoma.

10.49 Genioplasty (Items 8670 and 8672)

10.49.1 Genioplasty attracts benefit once only although a section is made on both sides of the symphysis of the mandible.

PART 11 - NUCLEAR MEDICINE

EXPLANATORY NOTES

11.1 General

11.1.1 There is a differential fee structure for items covering nuclear medicine depending on whether or not the service is performed at a computerised installation.

11.1.2 The "C" Schedule fee applies only where the service covered by the item is performed in a nuclear medicine installation with computerised processing facilities.

11.1.3 The "NC" Schedule fee applies where the service covered by the item is performed in a nuclear medicine installation without computerised processing facilities.

11.1.4 It is not required that the computer be actually used in the performance of a particular scan in order that the service will attract the fee and benefit appropriate for a computerised installation.

11.1.5 Many items in Part 11 contain more than one service. If two or more services within the one item are rendered, full benefits are attracted for each service.

11.1.6 Benefits for a nuclear scanning service cover the preliminary examination of the patient, estimation of dosage, supervision of the administration of the dose and the performance of the scan, and compilation of the final report. Additional benefits will only be attracted for specialist physician or consultant physician attendances under Part 1 of the Schedule where there is a request for a full medical examination accompanied by a Letter/Notice of Referral.

11.2 Radiopharmaceuticals

11.2.1 Benefits are payable for the cost of radiopharmaceuticals associated with nuclear scans. Details are available from the Health Insurance Commission.

NOTE

(This note should be read in conjunction with paragraphs 11.1.1 to 11.1.6 of Section 1 of this Book - Notes for General Guidance of Medical Practitioners)

(1) Benefits for a nuclear scanning service cover the preliminary examination of the patient, estimation of dosage, supervision of the administration of the dose and the performance of the scan, and compilation of the final report. Additional benefits will only be attracted for a specialist physician or consultant physician attendance under Part 1 of the Schedule where there is a request for a full medical examination accompanied by a Letter/Notice of Referral.

(2) The "C" Schedule fee in this Part applies only where the service covered by the item is performed in a nuclear medicine installation with computerised processing facilities.

(3) The "NC" Schedule fee in this Part applies where the service covered by the item is performed in a nuclear medicine installation without computerised processing facilities.

PAA FOREWORD

PAA.1 Introduction

PAA.1.1 The following pages relating to pathology services bring together the necessary information on pathology services as they relate to the Medicare arrangements. However, these should be read in conjunction with the General Notes relating to the Medicare arrangements, see Section 1 of this Book.

PAA.2 Revised schedule

PAA.2.1 This 1 August 1989 Pathology Services Table is based broadly on the November 1988 Table with modifications to reflect some of the concerns raised by the profession and has been developed with considerable input from the profession. While it simplifies the existing Table, taking into account advances in technology which have occurred since the last major restructuring in 1977, it also eases some of the restrictions contained in the 1988 Table.

PA. PATHOLOGY SERVICES IN RELATION TO MEDICARE BENEFITS

PA.1 Basic requirements

PA.1.1 The basic requirements which need to be satisfied for Medicare benefits are set out below.

PA.1.2 **Determination of Necessity of Service.** The treating practitioner must determine that the pathology service is necessary.

PA.1.3 Service must either be requested or determined necessary for a patient who the Approved Pathology Practitioner is treating.

The service may only be provided -

- in response to a request from the treating practitioner or from another Approved Pathology Practitioner and the request must be in writing (or, if oral, confirmed in writing within fourteen days), or
- if determined to be necessary by an Approved Pathology Practitioner who is treating the patient.

PA.1.4 Rendering of Service

(i) The service has to be provided by or on behalf of an Approved Pathology Practitioner.

(ii) The service has to be provided in a pathology laboratory accredited for that kind of service.

(iii) The proprietor of the laboratory where the service is performed must be an Approved Pathology Authority.

(iv) The Approved Pathology Practitioner providing the service must either be the proprietor of the laboratory or party to an agreement, either by way of contract of employment or otherwise, with the proprietor of the laboratory in which the service is provided.

PA.2 Exceptions to basic requirements

PA.2.1 Prescribed Pathology Services

A prescribed pathology service is a service included in Division 9 of the Pathology Schedule. Division 9 contains 11 services which may be performed by a medical practitioner in his or her own surgery on his or her own patients.

Additionally, benefit is payable only where the service is determined as being necessary by the medical practitioner rendering the service, or is in response to a request by a member of a group of practitioners to which that practitioner belongs. (See para. PO.2 for the definition of a "group of practitioners".)

PA.2.2 Services Where Request Not Required

A written request is not required for -

(i) a prescribed pathology service rendered by or on behalf of a medical practitioner upon his or her own patients.

(ii) a pathologist-determinable service. A pathologist-determinable service is a pathology service determined to be necessary by an Approved Pathology Practitioner in respect of a person who is the patient of that Approved Pathology Practitioner and which is rendered by or on behalf of that Approved Pathology Practitioner.

Details concerning the requirements in respect of request forms and confirmation forms are at paragraphs PC.1 to PC.3 Further information on additional pathology tests not covered by a request is provided at paragraph PB.3.

PA.3 Circumstances whereby Medicare benefits are not attracted

PA.3.1 Medicare Benefits not Payable in Respect of Services Rendered by Disqualified Practitioner

Medicare benefits are not payable for pathology services if at the time the service is rendered, the person, by or on whose behalf the service is rendered, is a person in relation to whom a determination was in force in relation to that class of services. That is, where an Approved Pathology Practitioner has breached an undertaking, and a determination has been made that Medicare benefits should not be paid during a specified period (of up to five years) in respect of specified pathology services rendered by the practitioner.

Note: An Approved Pathology Practitioner may be disqualified for reasons other than a breach of undertaking.

PA.3.2 Medicare Benefits not Payable for Certain Pathology Tests

Certain tests of public health significance do not qualify for payment of Medicare benefits. Examples of services in this category are:

- examination by animal inoculation;
- Guthrie test for phenylketonuria; neonatal screening for hypothyroidism (T4 estimation);
- identification of M Tuberculosis by bio-chemical tests or sub-culture;
- treponema pallidum immobilisation test; or
- pathology tests carried out on specimens collected from persons occupationally exposed to sexual transmission of disease where the purpose of the collection of specimens is for testing in accordance with conditions determined by the health authority of the State or Territory in which the service is performed.

In addition to the above, certain other tests do not qualify for payment of Medicare benefits. These include:

- cytotoxic food testing;
- pathology services performed for the purposes of tissue audit;
- pathology services performed for the purposes of control estimation, repeat tests (eg, for confirmation of earlier tests, etc);
- preparation of autogenous vaccines;
- tissue banking and preparation procedures; or
- pathology services which are performed routinely in association with the termination of pregnancy without there being any indication for the necessity of the services. However, benefits would be payable for the following pathology tests:

Items 1163-1164 - haemoglobin estimation;

Items 1187-1188 - blood grouping ABO and Rh (D antigen);

PB REQUESTS

PB.1 Responsibilities of treating/requesting practitioners

PB.1.1 Form of Request

A treating practitioner may request a pathology service either orally or in writing but oral requests must be confirmed in writing within fourteen days from the day when the oral request was made.

Pathology request forms and combined pathology request/offer to assign forms which are prepared by the pathologists and distributed to requesting practitioners must be approved by the Health Insurance Commission (see paragraph PB.2.1). Written pathology requests from treating practitioners that are not on a form prepared and distributed by a pathologist do not need to be approved; however, all written requests for pathology services should contain the following particulars:-

- the individual pathology services, or recognised groups of pathology tests to be rendered (see Section PQ of these notes for the list of acceptable terms and abbreviations). The description must be sufficient to enable the item in which the service is specified to be identified. This should be in the practitioner's own handwriting.
- the requesting practitioner's signature and date of request.
- the surname, initials of given names, practice address and provider number of the requesting practitioner.
- the patient's name and address.
- details of the hospital status of the patient, as follows (for benefit rate assessment). That is, whether the patient was or will be, at the time of the service or when the specimen is obtained:
 - a. a private patient in a private hospital, or approved day hospital facility,
 - b. a private patient in a recognised hospital,
 - c. a hospital patient in a recognised hospital,
 - d. an outpatient of a recognised hospital.

A pathology request can be directed to an Approved Pathology Practitioner or an Approved Pathology Authority. If the request is directed to an Approved Pathology Authority, the form must show the full name and address of the Approved Pathology Authority. If the request is directed to an Approved Pathology Practitioner, the form must show the surname, initials or given names and place of practice of the Approved Pathology Practitioner to whom the request is addressed.

PB.1.2 Offence Not to Confirm the Oral Request

A requesting practitioner who, without reasonable excuse, does not confirm in writing an oral request within fourteen days of making the oral request is guilty of an offence under the Health Insurance Act 1973 punishable, upon conviction, by a fine not exceeding \$1000.

PB.2 Responsibilities of Approved Pathology Practitioners

PB.2.1 Form of Request

There is no official "request in writing" form, and the requesting practitioner's own stationery, or pre-printed forms supplied by Approved Pathology Practitioners/Authorities are acceptable, provided there are no check lists or "tick-a-box" lists of individual tests or groups of pathology services on the forms. However, pre-printed request forms issued by Approved Pathology Practitioners/Authorities for use by requesting practitioners must be approved by the Health Insurance Commission.

When they are submitted for approval, they should be accompanied by other information or documentation such as that contained in notes for guidance, cover sheets, etc., provided to requesting practitioners.

PB.2.2 Offence to Provide Unapproved Request Forms

An Approved Pathology Practitioner or Approved Pathology Authority who, without reasonable excuse, provides (directly or indirectly) to practitioners request forms which are not approved by the Health Insurance Commission, is guilty of an offence under the Health Insurance Act 1973 punishable, upon conviction, by a fine not exceeding \$1000.

PB.2.3 Request to Approved Pathology Authority

It is acceptable for a request to be made to an Approved Pathology Authority who is the proprietor or one of the proprietors of a laboratory in lieu of making the request to the Approved Pathology Practitioner who renders the service or on whose behalf the service is rendered.

PB.2.4 Holding, Retention, Recording and Production of Request Forms

Approved Pathology Practitioners must hold a request in writing for all services requested by any other practitioner before billing patients.

An Approved Pathology Practitioner is required to retain written request/confirmation of requests for pathology services for 18 months from the day when the service was rendered. This also applies to requests which an Approved Pathology Practitioner receives of which only some tests are referred on to another Approved Pathology Practitioner (the first Approved Pathology Practitioner would retain the request for 18 months). If all tests were referred on, the second pathologist would retain the original request, if the original request was passed on in preference to being re-requested by the first Approved Pathology Practitioner.

If the written request or written confirmation has been recorded on film or other magnetic medium approved by the Minister for Community Services and Health, for the purposes of storage and subsequent retrieval, the record so made shall be deemed to be a retention of the request or confirmation. The production or reproduction of such a record shall be deemed to be a production of the written request or written confirmation.

An Approved Pathology Practitioner is required to produce, on request from an officer of the Health Insurance Commission, no later than the end of the day following the request from the officer, a written request or written confirmation retained pursuant to the above paragraphs. The officer is authorised to make and retain copies of or take and retain extracts from written requests or written confirmations.

PB.2.5 Offences in Relation to Retaining and Producing Request Forms

The following offences are punishable upon conviction by a fine not exceeding \$1000:

- an Approved Pathology Practitioner who, without reasonable excuse, does not keep request forms for 18 months;

- an Approved Pathology Practitioner who, without reasonable excuse, does not produce a request form to an officer of the Health Insurance Commission before the end of the day following the day of the officer's request.

PB.2.6 Referral From An Approved Pathology Practitioner To Another Approved Pathology Practitioner

Where an Approved Pathology Practitioner refers some or all services requested to another Approved Pathology Practitioner not associated with the same Approved Pathology Authority the following apply:

(a) where all the services are referred, he should forward the initial request to the second Approved Pathology Practitioner;

(b) where some of the services which are listed in different items in the Schedule are referred, he/she must issue his/her own request in writing, which would show in addition to the particulars listed in paragraph PB.1.1 above:

(i) name of the original requesting practitioner;
and

(ii) date of initial request.

Notes:

- The patient should be billed by each Approved Pathology Practitioner only for those services rendered by or on his/her behalf.
- Photocopies of requests are not acceptable.

Where a number of pathology services (for example drug or hormone estimations) are listed in the one item of the Schedule, Medicare benefits are payable only when all the services are rendered by or on behalf of one Approved Pathology Practitioner. (see paragraph PX.1, Rule 5.)

PB.2.7 Offence Not To Confirm An Oral Request

- An Approved Pathology Practitioner who, without reasonable excuse, does not confirm in writing an oral request to another Approved Pathology Practitioner within fourteen days of making the oral request is guilty of an offence under the Health Insurance Act 1973 punishable, upon conviction, by a fine not exceeding \$1000.

PB.3 Pathology tests not covered by request

An Approved Pathology Practitioner, who has been requested to perform one or more pathology services, may consider it necessary, in the interest of the patient, that additional tests to those requested be carried out. The Approved Pathology Practitioner must discuss this need with the requesting practitioner, and if the requesting practitioner determines that additional tests are necessary, the Approved Pathology Practitioner must arrange with the requesting practitioner to forward an amended or second request for those services. The account will then be issued in the ordinary way and the additional services will attract benefits at the "SP" rate where the Approved Pathology Practitioner is a recognised specialist pathologist.

PC DETAILS REQUIRED ON ACCOUNTS, RECEIPTS OR ASSIGNMENT FORMS

PC.1 General

Medicare benefit is not payable in respect of a pathology service unless specified details are provided, by the practitioner rendering the service, on his or her account, receipt or assignment form.

PC.2 Approved Pathology Practitioner

In addition to holding a request in writing from the treating medical or dental practitioner or from another Approved Pathology Practitioner the following additional details must be recorded on the account, receipt or assignment form of the Approved Pathology Practitioner providing the service.

- the surname and initials of the Approved Pathology Practitioner who performed the service and either his/her practice address or the provider number for the address
- the name of the person to whom the service was rendered
- the date on which the service was rendered
- the name of the requesting practitioner
- the date on which the request was made
- the requesting practitioner's provider number
- a description of the pathology service in words which are derived from the item description in the Schedule and are of sufficient detail to identify the specific test in the Schedule that was rendered. In lieu of such a full description, the list of abbreviations at paragraphs PQ.4 and PQ.5 are an acceptable alternative.
- where the treating practitioner determines or provides a pathology service on his/her own patient, the account must be endorsed "sd".

PC.3 Prescribed Pathology Services

For Prescribed Pathology Services (that is, pathology items in Division 9) the medical practitioner who renders the service must ensure his or her account, receipt or assignment form includes his or her name, address or provider number, the date of the service, and a description to clearly identify the service in the Schedule that was rendered.

If the service was determined necessary by another medical practitioner who is a member of the same group practice as the practitioner who rendered the service, the name of the requesting practitioner, sufficient to identify the practitioner from other practitioners in the same group practice with the same surname, must also be included together with the date on which the request was made.

PD INBUILT MULTIPLE SERVICES RULE

PD.1 Description of rule

PD.1.1 The term "Inbuilt Multiple Services Rule" describes the arrangement whereby benefits for certain pathology tests are restricted depending on the number of services performed during a single patient episode. Patient episode is defined in para. PO.4 of these notes.

PD.2 Exemption

PD.2.1 Exemption may be sought to the inbuilt multiple services rule under section 4B(3) of the Health Insurance Act 1973 in the case of seriously ill patients whose condition requires a series of pathology investigations at various times throughout any one day, provided that these services constitute distinct and separate collections and performances, involving substantial additional expense for the Approved Pathology Practitioner. An exemption may be sought by the initiating practitioner endorsing the request with the notation "S4B3" and the Approved Pathology Practitioner performing the pathology tests endorsing his account or assignment of benefits form similarly and by indicating the time the services were performed. Approval is not automatic. Further information may be requested of the practitioner to justify the claim for exemption under "S4B3".

PD.3 Tests repeated

PD.3.1 Tests which are required to be repeated over a number of days or weeks and would otherwise be subject to restriction, must be supported by individual requests for each patient episode. Prothrombin time estimation is the only exemption from this requirement. Requests for repeat prothrombin time estimations must include the approximate frequency of testing required and the time period over which the tests are necessary. The requesting practitioner must also notate "S4B3" on the pathology request form and the Approved Pathology Practitioner must notate "S4B3" on the account or assignment of benefits form.

PE SCHEDULE FEES

PE.1 SP/OP Schedule fee levels

PE.1.1 Items in Divisions 1 to 8 of the Pathology Services Schedule have fees set at SP and OP levels. At present, OP levels are set at 75% of the SP level.

PE.2 SP Schedule fees

PE.2.1 SP Schedule fees are payable for pathology services performed:

- by or on behalf of an Approved Pathology Practitioner who is a recognized specialist pathologist; and
- in private practice.

PE.2.2 Accordingly SP Schedule fees are not payable for pathology services rendered by an Approved Pathology Practitioner, being a specialist pathologist:

- when requested for a privately referred out-patient of a recognized hospital;
- when requested for a private in-patient in a recognized hospital; or where
 - (i) any pathology equipment of a recognized hospital, or a laboratory included in a prescribed class of laboratories, is used, or
 - (ii) any member of the staff of a recognized hospital, or a laboratory included in a prescribed class of laboratories, participates in the course of that member's employment with that hospital or laboratory.

PE.3 OP Schedule fees

PE.3.1 OP Schedule fees are payable in all other circumstances where:-

- the service was performed by an Approved Pathology Practitioner who is not a recognized specialist pathologist; or

- the service was performed by an Approved Pathology Practitioner who is a recognized specialist pathologist but all the conditions of paragraph PE.2 were not met.

PE.4 Hospital, Government etc Laboratories

PE.4.1. The following laboratories have been prescribed for the purposes of payment of Medicare benefits as outlined in paragraphs PE.2.2 and PE.3.1.

- laboratories operated by the Commonwealth (these include Commonwealth health laboratories operated by the Department of Community Services and Health as well as the laboratories operated by other Departments, eg the Departments of Defence and Veterans' Affairs conduct laboratories from which pathology services are provided);

- laboratories operated by a State Government or authority of a State. Laboratories operated or associated with recognised hospitals are also included;

- laboratories operated by the Northern Territory and the Australian Capital Territory Community and Health Service; and

- laboratories operated by:

University of NSW
University of Sydney
University of New England
Monash University
University of Melbourne
University of Queensland
University of Adelaide
University of Western Australia
University of Tasmania
Australian National University

PF ASSIGNMENT OF MEDICARE BENEFITS

PF.1 In addition to the general arrangements relating to the assignment of benefits as outlined at paragraph I.5 of the "General Explanatory Notes" in the Medicare Benefits Schedule Book it should be noted that, where the treating practitioner requests pathology services but the patient does not physically attend the Approved Pathology Practitioner, the patient may complete an assignment voucher at the time of the visit to the requesting doctor offering to assign benefits for the Approved Pathology Practitioner's services.

PF.2 If a practitioner requests an Approved Pathology Practitioner to perform a necessary pathology service, that Approved Pathology Practitioner must perform the service himself/herself or have it performed on his/her behalf in order to be eligible to receive benefits by way of assignment. If, however, the first Approved Pathology Practitioner arranges for the service to be rendered by a second Approved Pathology Practitioner with the same Approved Pathology Authority, the second Approved Pathology Practitioner and not the first, is eligible to receive an assignment of the Medicare benefit for the service in question.

PG.1 Need for accreditation

PG.1.1 A pathology service will not attract Medicare benefits unless that service was provided in a pathology laboratory accredited for that kind of service. Details of the administration of the pathology laboratory accreditation arrangements are set out below.

PG.2 Applying for accreditation

PG.2.1 To become an Approved Pathology Laboratory it is necessary to lodge a completed application form with the Commonwealth Department of Community Services and Health, PO Box 658, Woden ACT 2606 and pay the prescribed fee of \$200. It is also required that application for inspection be made to an approved inspection agency. The National Association of Testing Authorities (NATA) has been chosen to act on the Commonwealth's behalf as the primary inspection agency. The Royal Australian College of General Practitioners (RACGP) has also been appointed to inspect laboratories in Category 5 (general practitioner) in Victoria only.

PG.3 Effective period of accreditation

PG.3.1 Accreditation takes effect from the date of approval by the Minister for Community Services and Health. Provisional accreditation may be given pending full accreditation. An application and fee are required annually.

PG.4 State schemes

PG.4.1 Both NSW and Victoria are currently in the process of implementing State accreditation schemes. Once these schemes are operational the Commonwealth will accept State accreditation as the basis for Commonwealth accreditation. Subsequently, the Commonwealth fee will drop to \$50 in NSW and Victoria.

PG.5 Assessment of applications for accreditation

PG.5.1 The Principles of Accreditation are used to assess applications for accreditation. These take into consideration staffing, supervision, premises, etc.

PG.6 Refusal of accreditation and right of review

PG.6.1 An applicant who has been notified of the intention to refuse accreditation may, within 28 days of being notified, provide further information to the Minister which may be taken into consideration prior to a final decision being made.

PG.6.2 Applicants refused accreditation or any person affected by the decision have the right to appeal to the Administrative Appeals Tribunal.

PG.7 National Pathology Accreditation Advisory Council (NPAAC)

PG.7.1 NPAAC was established in 1979. Its functions are to assist in the introduction and maintenance of uniform standards of practice in pathology services throughout Australia and to initiate and co-ordinate educational programs in relation to pathology practice. The agencies used to inspect laboratories on the Commonwealth's behalf are required to conduct inspections using the standards set down by NPAAC.

PG.8 Change of Address/Location

PG.8.1 Laboratories are accredited for the particular location given on the application form. Where a laboratory is relocated to other premises, any previously issued approvals for that Accredited Pathology Laboratory lapse. Medicare benefits are not payable for any pathology

services performed at the new location until a new application has been approved by the Minister for Community Services and Health. Paragraph PG.2.1 sets out the method for applying for accreditation.

PG.9 Change of Ownership of a Laboratory

PG.9.1 Part of the assessment of an application for an Accredited Pathology Laboratory relates to the Approved Pathology Authority status. Where the ownership, or some other material change occurs affecting the laboratory, the Minister for Community Services and Health must be provided with those changed details. Medicare benefits will not be payable for any pathology services performed on any premises other than those premises for which approval has been given.

PH APPROVED PATHOLOGY PRACTITIONERS

PH.1 Introduction

A pathology service will not attract Medicare benefits unless that service was provided by or on behalf of an Approved Pathology Practitioner. (Approved Pathology Practitioners must be registered medical practitioners.) Set out below is information which relates to Approved Pathology Practitioner requirements.

PH.2 Applying for acceptance of the Approved Pathology Practitioner undertaking

To apply for acceptance of an Approved Pathology Practitioner Undertaking, it is necessary to send:-

- (i) a completed application for acceptance of an Approved Pathology Practitioner Undertaking;
- (ii) a signed Approved Pathology Practitioner Undertaking; and
- (iii) a cheque for \$100

to the Pathology Registration Co-ordinator, Health Insurance Commission, PO Box 9822 (in your capital city). An application form, undertaking and associated literature is available from the Pathology Registration Co-ordinator.

PH.3 Undertakings

PH.3.1 Consideration of Undertakings - the Minister is unable to accept an undertaking from a person in respect of whom there is a determination in force that the person has breached the undertaking, or from a person who, if the undertaking were accepted, would be likely to carry on the business of a prescribed person or would enable a person to avoid the financial consequences of the disqualification (or likely disqualification) of that prescribed person. A 'prescribed person' includes, inter alia, fully or partially disqualified persons (or persons likely to be so disqualified).

Similarly an undertaking cannot be accepted unless the Minister is satisfied that the person giving such undertaking is a fit and proper person to be an Approved Pathology Practitioner.

When an undertaking has been given, the Minister may require the person giving the undertaking to provide additional information within a fixed period of time and if the person does not comply the Minister may refuse to accept the undertaking.

PH.3.2 Refusal of Undertaking and Rights of Review

Where the Minister refuses to accept an undertaking, for any of the reasons shown above, he must notify the person of the decision. The notification must include advice of a right of

internal review of the decision and a right of further appeal to the Administrative Appeals Tribunal if the internal review upholds the original decision to refuse the undertaking.

PH.3.3 Effective Period of Undertaking

(i) Date of Effect - the earliest day from which the Minister or delegate can accept an undertaking is the day the undertaking is signed. The day the undertaking is signed is to be the day it is actually signed and must not be backdated.

(ii) Period of Effect - in determining the period of effect of the undertaking the Minister shall, unless he considers that special circumstances exist, determine that the period of effect shall be twelve months from the day on which the undertaking comes into force. There is a requirement for the Minister to notify persons giving undertakings of the period of time for which the undertaking is to have effect, and the notice is to advise persons whose interests are affected by the decision of appeal to the Administrative Appeals Tribunal against the Minister's decision.

(iii) Renewals - when an undertaking is given and accepted by the minister while a former undertaking is current, the former undertaking ceases to be in force. When an undertaking is given while a former undertaking is current and the date on which the former undertaking was to expire passes without the Minister giving notice to accept or reject the new undertaking, the former undertaking remains in force until the Minister gives such notification.

(iv) Cessation of Undertaking - the undertaking ceases to be in force if it is terminated, if the Minister revokes acceptance of the undertaking, or if the period of effect for the undertaking expires - whichever event first occurs.

An Approved Pathology Practitioner may terminate an undertaking at any time provided that the practitioner gives at least 30 days notice of the termination of the undertaking.

PH.4 Obligations and responsibilities of Approved Pathology Practitioners

The requirements of the legislation and the undertaking impose a number of obligations and responsibilities on Approved Pathology Practitioners and the Minister. The more complex of these not already dealt with are considered in paragraphs PJ, PK and PL dealing with Breaches of Undertakings, Excessive Pathology Services, and Personal Supervision.

PI APPROVED PATHOLOGY AUTHORITIES

PI.1 Introduction

A pathology service will not attract Medicare benefits unless the proprietor of the laboratory in which the pathology service was performed is an Approved Pathology Authority. Following is information which relates to Approved Pathology Authority requirements.

PI.2 Applying for acceptance of an Approved Pathology Authority undertaking

PI.2.1 To apply for acceptance of an Approved Pathology Authority Undertaking, it is necessary to send:-

- (i) a completed application for acceptance of an Approved Pathology Authority Undertaking;
- (ii) a signed Approved Pathology Authority Undertaking; and
- (iii) a cheque for \$100

to the Pathology Registration Co-ordinator, Health Insurance Commission, PO Box 9822 (in your capital city). An application form, undertaking and associated literature is available from the Pathology Registration Co-ordinator.

PI.2.2 The application and the undertakings should be completed by the proprietor of the laboratory/ies and where the proprietor is not a natural person (e.g. company or partnership), an authorised representative/s should complete the forms. This proprietor can be:-

- (i) a natural person;
- (ii) partners (natural persons and/or companies) in a partnership;
- (iii) a body corporate (i.e. a company); or
- (iv) a government authority (e.g. a public hospital)

PI.3 Undertakings

Consideration of Undertakings - the Minister is unable to accept undertakings from a person in respect of whom there is a determination in force that the person has breached the undertaking, or from a person who, if the undertaking were accepted, would be likely to carry on the business of a prescribed person or would enable a person to avoid the financial consequences of the disqualification (or likely disqualification) of that prescribed person. A 'prescribed person' includes, inter alia, fully or partially disqualified persons (or persons likely to be so disqualified).

Similarly an undertaking cannot be accepted unless the Minister is satisfied that the person giving such undertaking is a fit and proper person to be an Approved Pathology Authority.

When an undertaking has been given the Minister may require the person giving the undertaking to provide additional information within a specified period of time and if the person does not comply the Minister may refuse to accept the undertaking.

PI.3.2. Refusal of Undertaking and Rights of Review -

where the Minister refuses to accept an undertaking, he must notify the person of the decision. The notification must include advice of a right of internal review of the decision and a right of further appeal to the Administrative Appeals Tribunal if the internal review upholds the original decision to refuse the undertaking.

PI.3.3. Effective Period of Undertaking

(i) Date of Effect - the earliest day from which the Minister or delegate can accept an undertaking is the day the undertaking is signed. The day the undertaking is signed is to be the day it is actually signed and must not be backdated.

(ii) Period of Effect - in determining the period of effect of the undertaking the Minister shall, unless he or she considers that special circumstances exist, determine that the period of effect shall be twelve months from the day on which the undertaking comes into force. There is a requirement for the Minister to notify persons giving undertakings of the period of time for which the undertaking is to have effect, and the notice is to advise persons whose interests are affected by the decision of their rights of appeal to the Administrative Appeals Tribunal against the Minister's decision.

(iii) Renewals - when an undertaking is given and accepted by the minister while a former undertaking is current, the new undertaking does not take effect until the former undertaking ceases to be in force. When an undertaking is given while a former undertaking is current and the date on which the former undertaking is current and the date on which the former undertaking was to expire passes without the Minister giving notice to accept or reject the new undertaking, the former undertaking remains in force until the Minister gives such notification.

(iv) Cessation of Undertaking - the undertaking ceases to be in force if it is terminated, if the Minister revokes acceptance of the undertaking, or if the period of effect for the undertaking expires - whichever event first occurs.

An Approved Pathology Authority may terminate an undertaking at any time provided that the person gives at least 30 days notice of the termination of the undertaking.

PI.4 Obligations and responsibilities of Approved Pathology Authorities

The requirements of the legislation and the undertaking impose a number of obligations and responsibilities on Approved Pathology Authorities and the Minister. The more complex of these not already dealt with are considered in paragraphs PJ and PK dealing with Breaches of Undertakings and Excessive Pathology Services.

PJ BREACHES OF UNDERTAKINGS

PJ.1 Notice required

PJ.1.1 Where the Minister has reasonable grounds for believing that an Approved Pathology Practitioner or an Approved Pathology Authority has breached the undertaking, the Minister is required to give notice in writing to the person explaining the grounds for that belief and inviting the person to put a submission to the Minister to show cause why no further action should be taken in the matter.

PJ.2 Decisions by Minister

PJ.2.1 Where a person provides a submission, the Minister may decide to take no further action against the person. Alternatively the Minister may refer the matter to a Medicare Participation Review Committee, notifying the grounds for believing that the undertaking has been breached. If after 28 days no submission has been received from the person, the Minister must refer that matter to the Committee.

PJ.3 Appeals

PJ.3.1 The Minister is empowered to suspend an undertaking where notice has been given to a Medicare Participation Review Committee of its possible breach, pending the outcome of the Committee's proceedings. The Minister must give notice in writing to the person who provided the undertaking of the determination to suspend it, and the notice shall inform the person of a right of appeal against the determination to the Administrative Appeals Tribunal. The Minister may also publish a notice of a determination in the Commonwealth Gazette. Rights of appeal to the Administrative Appeals Tribunal also exist in respect of any determination made by a Medicare Participation Review Committee.

PK INITIATION OF EXCESSIVE PATHOLOGY SERVICES

PK.1 Notice required

PK.1.1 Where the Minister has reasonable grounds for believing that a person, of a specified class of persons, has initiated, or caused or permitted the initiation of excessive pathology services the Minister is required to give notice in writing to the person explaining the grounds for the belief and inviting the person to put a submission to the Minister to show cause why no further action should be taken in the matter.

PK.2 Classes of persons

PK.2.1 The classes of persons are:

- the practitioner who initiated the services;
- the employer of the practitioner who caused or permitted the practitioner to initiate the services; or
- an officer of the body corporate employing the practitioner who caused or permitted the practitioner to initiate the services.

PK.3 Decisions by Minister

PK.3.1 Where a person provides a submission, the Minister may decide to take no further action against the person. Alternatively, the Minister may refer the matter to a Medicare Participation Review Committee, notifying the grounds for believing that excessive pathology services have been initiated. If after 28 days no submission has been received from the person, the Minister must refer the matter to the Committee. The Minister must give to the person notice in writing of the decision.

PK.4 Appeals

PK.4.1 Unlike the procedures relating to breaches of undertaking there is no power given to the Minister to determine a penalty. The Minister's role is either deciding to take no further action or referring the matter to a Medicare Participation Review Committee. Accordingly, there are no rights of appeal to the Administrative Appeals Tribunal applicable to the above procedures. However, rights of appeal to the Administrative Appeals Tribunal exist in respect of any determination made by a Medicare Participation Review Committee.

PL PERSONAL SUPERVISION

PL.1 Introduction

PL.1.1 The Health Insurance Act 1973 provides that the form of undertaking to be given by an Approved Pathology Practitioner may make provision for pathology services carried out under the personal supervision of the Approved Pathology Practitioner.

PL.2 Extract from undertaking

PL.2.1 The following is an extract from the Approved Pathology Practitioner undertaking:

"PART 1 - PERSONAL SUPERVISION

1 Subject to clause 2, I undertake that where a service is rendered on my behalf, I will accept personal responsibility for the rendering of that service under the following conditions of personal supervision -

- a) Where a service is rendered on my behalf, I must usually be physically available in the laboratory during the rendering of that service.
- b) I may be absent from the laboratory for brief periods where the absence is due to illness or other personal exigency, or involves activities which, in accordance with normal and accepted practice, relate to the provision of services by that laboratory. If such an absence occurs, and it does not exceed 7 consecutive days, then I will be regarded as continuing to personally supervise the rendering of services.
- c) Where I am absent from the laboratory for more than 7 consecutive days, I must arrange for another approved pathology practitioner to personally supervise the rendering

of services in the laboratory which would otherwise be rendered by me or on my behalf. Where such an arrangement is made, then I will be regarded as continuing to personally supervise the rendering of services.

d) For the purposes of the Health Insurance Act 1973, services will not be regarded as being rendered by me or on my behalf during any absence, for any reason, which occurs after I have already been absent for a total of 14 working days in any month that services are rendered.

e) If a service is being rendered on my behalf outside the normal hours of operation of the laboratory, I must be able to be contacted at the time that the service is being rendered by the person who is rendering the service. If required, I must be able to personally attend at the laboratory during the rendering of the service.

f) If a service is being rendered on my behalf by a person who is not-

- i) a medical practitioner;
- ii) a scientist; or
- iii) a person having special qualifications or skills relevant to the service being rendered;

and no person in the above groups is physically present in the laboratory, then I must be physically present in the laboratory and closely supervise the rendering of the service.

g) I accept responsibility for taking all reasonable steps to ensure that in regard to services rendered by me or on my behalf.

- i) all persons who render services are adequately trained;
- ii) all services which are to be rendered in the laboratory are allocated to persons with appropriate qualifications and experience to render the services;
- iii) the methods and procedures in operation in the laboratory for the purposes of rendering services are in accordance with proper and correct practices;
- iv) for services rendered, proper quality control methods are established and reviewed to ensure their reliability and effectiveness; and
- v) results of services and tests rendered are accurately recorded and reported.

2) Where services are to be rendered on my behalf in a laboratory:

a) where the Minister has declared, by notice in writing, that the laboratory is located in an isolated area (as defined in the principles for the approval of premises as an accredited pathology laboratory), and the Minister is satisfied that the service could not reasonably be rendered in another laboratory; or

b) which is in category 3 or 4 of the categories of accreditation;

I undertake to take all reasonable measures to ensure that the service is rendered under the supervision of the person designated in the category of accreditation of that laboratory to supervise the rendering of the service.

3) I understand that, in relation to a laboratory which is specified in clause 2(b), the provisions of clause 2 will only apply for a period of 36 months after the commencement of section 23DB of the Health Insurance Act 1973 (1 August 1987), and that after that time the provisions of clause 1 will apply to me."

PL3.1 Part 1 of the APP Undertaking outlines the requirements for the personal supervision by an APP where a pathology service is rendered by another person on behalf of the APP. It should be noted that "on behalf of" does not relieve an APP of professional responsibility for the service or from being personally involved in the supervision of services in the laboratory.

PL3.2 The only exemptions from the full requirement for personal supervision of services are for the permitted absences in clause 1 in the specific circumstances declared by the Minister (clause 2(a)) and for services provided in category 3 and 4 laboratories (clause 2(b)).

PL3.3 The question of longer term acceptability for Medicare benefits of medically unsupervised branch laboratories is being examined and interested parties will be advised of any decisions in relation to this issue.

PM DETERMINATION OF FEES FOR SERVICES OF UNUSUAL LENGTH OR COMPLEXITY

PM.1 Introduction

PM.1.1 The fee for any item listed in the Schedule is that which is regarded as being reasonable on average for that service having regard to usual and reasonable variations in the time involved in performing the service on different occasions and to reasonable ranges of complexity and technical difficulty encountered. Section 11 of the Health Insurance Act 1973 provides that the practitioner or the patient may apply to the Health Insurance Commission for higher benefits by the fixation of a higher fee, where the person rendering the professional service considers that special consideration is warranted because of the "unusual length or complexity" of the service in the particular case. The term "unusual length or complexity" in this context refers to instances where these factors significantly exceed those usually encountered for the service listed in the Schedule.

PM.2 How to apply

PM.2.1 Any such application for a higher fee for any listed item in the Schedule under Section 11 of the Health Insurance Act 1973 should be made to the Health Insurance Commission and should be supported by a statement by the Approved Pathology Practitioner indicating in detail those unusual features which are the basis for the claim for a higher fee. The practitioner rendering the service should advise the patient to forward this statement with the claim form and account to the relevant Medicare office. Where the practitioner direct-bills the Health Insurance Commission, his/her statement should be attached to the assignment form.

PM.3 Statement by practitioner

PM.3.1 To reduce delays and to facilitate consideration of such an application, it is essential that practitioners give precise details of those unusual features of length of time, complexity and technical difficulty which might warrant approval of a higher fee. The statement should include:

- the time taken;
- the factors which caused the undue length of time taken;
- special difficulties or complexities encountered beyond those which would normally be expected in the procedure;
- other significant factors.

PM.4 Referral to Medicare Benefits Advisory Committee

PM.4.1 Generally, such applications are referred for consideration by the Medicare Benefits Advisory Committee which may recommend the payment of a higher benefit. The Committee

states the principles to be followed by the Health Insurance Commission in fixing the amount of any increased fee for the service which was the subject of the application.

PM.4.2 Subsequent claims for increased fee to which the principles determined by the Committee can be applied, may be dealt with by the Health Insurance Commission in accordance with those principles, without further reference to the Committee.

PM.5 Appeals

PM.5.1 Where the Health Insurance Commission notifies a person of a decision, either, (a) that it has formed the opinion that the professional service is not of unusual length or complexity, or, (b) fixing an increased fee based on the application of principles determined by the Committee, that person may, within one month after receipt of notification of the Health Insurance Commission's decision in the matter of an increased fee, appeal to the Minister to have the decision reviewed.

PM.5.2 The Minister will refer the appeal to the Medicare Benefits Advisory Committee for consideration. The Committee will recommend to the Minister whether the appeal should be allowed or dismissed and, if the appeal is to be allowed, determine the amount of the increased fee. If the Committee thinks fit it can formulate principles followed by the Committee in fixing that increased fee.

PN CHANGES TO THE PATHOLOGY SERVICES TABLE

PN.1 Recent Amendments to the Legislation

PN.1.1 The recent amendments to the Health Insurance Act 1973 allow the Minister for Community Services and Health to determine an appropriate Pathology Services Table which is then prescribed by Regulation. This is a similar mechanism which is in place, and has been in place for many years, in respect of the general medical services table.

PN.1.2 The amended Section 4A of the Health Insurance Act 1973 allows the Minister for Community Services and Health to vary by Regulation the Pathology Services Table by:

- omitting an item or rule of interpretation from the Table;
- inserting an item or rule of interpretation into the Table;
- substituting another amount for an amount set out in the Table; or
- prescribing a new Table

PO DEFINITIONS

PO.1 Excessive pathology service

- means a pathology service for which Medicare benefit has become or may become payable and which is not reasonably necessary for the adequate medical or dental care of the patient concerned.

PO.2 Group of Practitioners

- means

(i) a practitioner conducting a medical practice or a dental practice together with another practitioner, or other practitioners, participating (whether as employees or otherwise) in the provision of professional services as part of that practice; or

(ii) two or more practitioners conducting a medical practice or a dental practice as partners; or

(iii) those partners together with any other practitioner who participate (whether as an employee or otherwise) in the provision of professional services as part of that practice.

PO.3 Initiate

- in relation to a pathology service means to make the decision by reason of which the service is rendered.

PO.4 Patient episode

- is defined, for those items where the fee and benefit are related to the number of services performed in relation to the one patient episode, as covering:-
 - services requested by a medical or dental practitioner on the one calendar day although they may be rendered by an Approved Pathology Practitioner on the one day or over a number of days; or
 - the need for the items is determined on the one calendar day and rendered on that day or over a number of days.

PO.5 Personal supervision

- means that an Approved Pathology Practitioner will, to the fullest extent possible, be responsible for exercising an acceptable level of control over the rendering of pathology services. See paragraphs PL.1 to PL.3 for a full description of the responsibilities involved in personal supervision.

PO.6 Prescribed Pathology Service

- is a service included in Division 9 and may be performed by a medical or dental practitioner in his own surgery.

PO.7 Specialist pathologist

- means a medical practitioner recognised for the purposes of the Health Insurance Act 1973 as a specialist in pathology (see paragraph G.1 of the "General Notes" in the Medicare Benefits Schedule Book). The principal specialty of pathology includes a number of sectional specialties. Accordingly, a medical practitioner who is recognised as a specialist in a sectional specialty of pathology is recognised as a specialist pathologist for this purpose.

PQ ABBREVIATIONS, GROUPS OF TESTS, INDEX

PQ.1 Abbreviations

PQ.1.1 As stated at paragraph PC.2 of this Outline, details that must be recorded on accounts, receipts or assignment forms of an Approved Pathology Practitioner/Authority include a description of the pathology service that is either of sufficient detail to identify the specific service rendered. The lists of abbreviations at paragraphs PQ.4 and PQ.5 are provided to allow users to identify and refer to particular pathology services, or particular groups of pathology services, more accurately and conveniently.

PQ.1.2 The above requirements are mandatory for billing purposes but treating practitioners requesting pathology services are encouraged to use the approved abbreviations. In this regard treating practitioners should note that:

- pathology services cannot be self determined by a rendering pathologist responding to a request. This places the onus for medical necessity on the treating practitioner who, in normal circumstances would, if he or she was unclear in deciding the appropriate test for a clinical situation, consult a pathologist for assistance.
- Approved Pathology Practitioners / Authorities undertake not to issue accounts etc unless the pathology service was rendered in response to an unambiguous request.

PQ.2 Tests not listed

PQ.2.1 Tests which are not listed in the Pathology Services Schedule do not attract Medicare benefits. As explained at paragraph PN.2.1 of the Explanatory Notes' changes to the Pathology

Services Schedule can only be made by the Minister for Community Services and Health. See paragraph PN.2.2 regarding application for inclusion of new items in the Pathology Services Schedule.

PQ.3 Audit of claims

PQ.3.1 The Health Insurance Commission will undertake routine audit of claims for pathology benefits against requested services to ensure compliance with the provisions of the Health Insurance Act 1973.

PQ.4 Groups of tests

PQ.4.1 For the purposes of recording a description of the pathology service on accounts etc, an Approved Pathology Practitioner /Authority may use group abbreviations or group descriptions for the following specified groups of tests. These groups consist of two or more tests within the same item.

PQ.4.2 Treating practitioners are encouraged to use these group abbreviations or group descriptions where appropriate.

PQ.4.3 Test profiles, or groups of tests, which are not specified below do not attract Medicare benefits. Tests requested individually may attract Medicare benefits.

COMMONWEALTH DEPARTMENT OF HEALTH
SECTION 2A

PATHOLOGY SERVICES SCHEDULE

The Explanatory Notes in Section 2A of the Medicare Benefits Schedule Book (issued on 1 August 1986) foreshadowed further changes to the pathology benefits arrangements. These changes are to apply from 1 August 1987.

The following information, which should be read in conjunction with the Explanatory Notes of 1 August 1986, is mainly provided for the guidance of practitioners who request pathology services. It is intended that a full replacement set of Explanatory Notes will be available for use by all practitioners by 1 November 1987.

Basically, on and from 1 August 1987, for a pathology service to attract a Medicare benefit -

- it must be determined to be necessary by the treating practitioner and must be rendered in a laboratory accredited for that service
- it must be rendered by or on behalf of and under the personal supervision of an Approved Pathology Practitioner (APP) as specified in the APP undertaking
- the owner of the laboratory (the Approved Pathology Authority - APA) must abide by the conditions specified in the APA undertaking

Services in Division 9 of the Pathology Services Schedule will continue to be restricted to practitioners who are not Approved Pathology Practitioners. These services will not be subject to Commonwealth accreditation requirements.

The APP and APA arrangements are administered by the Health Insurance Commission (see Section 4 for addresses and telephone numbers of State Headquarters).

The laboratory accreditation arrangements are administered by the Commonwealth Department of Health.

Pathologist-Determinable Services

Under the new arrangements tests that may be self determined by an Approved Pathology Practitioner will be restricted to a list agreed with the Royal College of Pathologists of Australasia.

The agreed list is as below. Column 1 of the list identifies the item requested by the treating practitioner. Column 2 identifies the items that may be determined to be necessary by the APP as a consequence of the results obtained following the rendering of the tests specified in Column 1. Column 3 identifies the limitations that apply in respect of Columns 1 and 2. Pathologist-determinable (formerly self determined) services must be identified on accounts, receipts and assignment of benefit forms by the initials "pd" or "sd" and will attract Medicare benefits at the "OP" rate.

Practitioners may request that pathology tests be carried out by sending a letter to the APA or individual APP or by the use of an approved pathology request form made available by the APA or APP. Pathology request forms require the prior approval of the Health Insurance Commission.

Listed below is information which must appear on the request:

COMMONWEALTH DEPARTMENT OF HEALTH
SECTION 2A

**PATHOLOGY SERVICES SCHEDULE
REPLACEMENT PAGES — 1 AUGUST 1986**

NOTE: The attached Schedule pages relate to pathology services and replace those presently contained in Part 7 of Section 2. Schedule pages relating to pathology services will in future be known as Section 2A and should be located at the back of the existing Section 2. The following explanatory notes replace those at paragraphs 204 to 239 of the 'Notes for Guidance' located in the front of the Medicare Benefits Schedule Book but should be read in conjunction with the general notes relating to the Medicare arrangements.

1. A number of changes to the arrangements relating to pathology services have been implemented following an extensive review of the existing pathology arrangements and are designed to meet the concerns expressed by the Joint Parliamentary Committee of Public Accounts on Pathology Fraud and Overservicing. The new arrangements, which include a separate Schedule to the Health Insurance Act for pathology services, the deletion of the eighteen "HP" items and a reduction in the fees for the corresponding "SP" and "OP" items, are explained in the following paragraphs.
2. The revised arrangements make provision for a revamped 'Approved Pathology Provider' scheme, a new scheme for undertakings by 'Approved Pathology Authorities', provision for the accreditation of pathology laboratories, a separate Schedule of pathology services ("pathology services table"), and a new committee to oversee changes within the new pathology Schedule (the Pathology Services Advisory Committee). More information on these matters is furnished in the following paragraphs.

Medicare Benefits in Relation to Pathology Services See also paragraphs 54-66)

3. The following requirements need to be satisfied for Medicare benefits to be attracted:
 - (a) the treating practitioner must determine that the pathology service is necessary;
 - (b) the service has to be provided by or on behalf of an approved pathology practitioner (who must be a medical practitioner);
 - (c) the proprietor of the laboratory where the service is performed must be an approved pathology authority;
 - (d) the service is to be provided in a pathology laboratory accredited for that kind of service;
 - (e) the approved pathology practitioner providing the service must either be the proprietor of the laboratory or party to an agreement, either by way of contract of employment or otherwise, with the proprietor under which the service is provided;
 - (f) the service may only be provided in response to a request from the treating practitioner or from another approved pathology practitioner, and the request must be made in writing (or, if oral, confirmed in writing within fourteen days). A request is not required for a pathologist-determinable service or for a prescribed pathology service rendered by or on behalf of a medical practitioner (not being an approved pathology practitioner) and the medical practitioner by or on whose behalf the service is rendered is either the treating practitioner or one of a group of medical practitioners of which the treating practitioner is a member and who requested the service to be rendered.
4. A pathologist-determinable service is a self determined test which has been determined by the Minister for Health, following consultation with the Royal College of Pathologists of Australasia. Such tests will attract Medicare benefits at the other pathology (OP) rate and must be clearly identified on accounts as having been self determined.

5. A prescribed pathology service is a service included in Division 9 of the Pathology Schedule (Section 2A in this book). Division 9 contains 13 services which may be performed by a medical practitioner in his or her own surgery. For Medicare benefit purposes they may only be performed by a practitioner who is not an approved pathology practitioner.

Treating Practitioner Must Determine that Pathology Service is Necessary

6. The service must be determined to be necessary by the treating practitioner or, in the case of a pathologist-determinable service rendered by or on behalf of an approved pathology practitioner, was determined to be necessary by that approved pathology practitioner.

Approved Pathology Practitioners to Carry Out Pathology Services or to Supervise Pathology Services Personally

7. For pathology services to be rendered on behalf of an approved pathology practitioner the services must be rendered under the personal supervision of the approved pathology practitioner.

8. Personal supervision by approved pathology practitioners means that they have to exercise a reasonable level of personal control over the rendering of the services and they have personal responsibility for the proper performance of the services.

9. Whilst it is recognised that approved pathology practitioners do not personally render all pathology services, there is an obligation on approved pathology practitioners to bear responsibility for those services which others provide on their behalf. In practice, personal supervision means that an approved pathology practitioner must, to the fullest extent possible, be responsible for exercising an acceptable level of control over the proper rendering of pathology services performed. The approved pathology practitioner is directly accountable for the quality of the services performed and the methods used in rendering tests. A nexus will be established as between the approved pathology practitioner/approved pathology authority undertakings and the accreditation standards to ensure that the appropriate levels of supervision are adequate. For example, it will be necessary to ensure that an adequate level of supervision exists to cover such matters as:

- (i) compliance with accreditation requirements;
- (ii) the proper performance of pathology tests;
- (iii) the choice and correct application of test procedures;
- (iv) the application of proper procedures for quality control; and
- (v) the issuing and recording of the test results.

Outline of Approved Pathology Practitioner Scheme

10. To become an approved pathology practitioner it is necessary to make an application in accordance with the approval form, sign the approval and undertaking and pay a fee of \$100. Applications are restricted to medical practitioners and to those medical laboratory scientists who, before 1 August 1977, were rendering pathology services at the request of medical practitioners and who were accepted as approved pathology practitioners under the former arrangements.

11. Applications and forms of undertaking are available from the State Headquarters office of the Health Insurance Commission in each State capital city. Completed applications, the signed undertaking and the fee should be forwarded to the nearest office of the Health Insurance Commission.

12. The Minister is unable to accept undertakings from a person in respect of whom there is a determination in force that the person has breached the undertaking, or from a person who, if the undertaking were accepted, would be likely to carry on the business of a prescribed person or would enable a person to avoid the financial consequences of the disqualification (or likely disqualification) of that prescribed person. A 'prescribed person' includes, inter alia, fully or partially disqualified persons (or persons likely to be so disqualified).

13. Similarly an undertaking will not be accepted if the Minister is satisfied that the person giving such undertaking is not a fit and proper person to be an approved pathology practitioner. Factors which must be taken into account in determining if a person is a fit and proper person to be an approved pathology practitioner include:-

- the person's qualifications and experience,
- whether the person is a relevant person (which includes persons convicted of relevant offences, persons given notice by the Minister to show cause why action for breach of undertaking should not be taken),
- the terms of any determination made by a Medicare Participation Review Committee in respect of
 - (a) the commission by a practitioner of a relevant offence;
 - (b) breach of an undertaking by an approved pathology practitioner or approved pathology authority;
 - (c) initiation of excessive pathology services.

Additional Information

14. When an undertaking has been given the Minister may require the person giving the undertaking to provide additional information within a fixed period of time, and if the person does not comply the Minister may refuse to accept the undertaking and must notify the person of the decision. The Minister's advice is to include notification of a right of internal review of the decision and a right of appeal to the Administrative Appeals Tribunal. There is also a requirement for the Minister to notify persons giving undertakings of the period of time for which the undertaking is to have effect, and the notice is to advise persons whose interests are affected by the decision of their rights of appeal to the Administrative Appeals Tribunal against the Minister's decision.

Date of Effect of Undertaking

15. The day when an undertaking accepted by a Minister comes into effect is to be the day of acceptance by the Minister or such earlier day specified by the Minister (not being a day earlier than the day on which the undertaking was signed) in notifying the person of acceptance.

Cessation of Undertaking

16. The undertaking ceases to be in force if it is terminated, if the Minister revokes acceptance of the undertaking, if the person giving the undertaking was a medical practitioner at the time of its acceptance and the person ceases to be a medical practitioner, or if the period of effect for the undertaking expires — whichever event first occurs.

17. An approved pathology practitioner may terminate an undertaking at any time provided that the practitioner gives at least 30 days notice of the termination of the undertaking.

Repayment of Fee

18. The fee shall be repaid to a person giving an undertaking as an approved pathology practitioner if the undertaking is not accepted.

Outline of Approved Pathology Authority Scheme

19. Applications to become an approved pathology authority should be submitted in the same manner as for approved pathology practitioners. A fee of \$100 also applies in respect of applications for approved pathology authority status. An approved pathology authority undertaking may be given by or on behalf of a person (including a State, the Northern Territory or a public authority).

20. The particulars to be required for an application by a body corporate may include — as prescribed by determination — particulars of the directors, shareholders and officers of the body corporate.

21. Before accepting the undertaking the Minister must be satisfied that the person giving the undertaking is a fit and proper person to be an approved pathology authority, and in making that decision the Minister has to have regard to similar

criteria to those for approved pathology practitioners but, in addition, where the person giving the undertaking is a body corporate — whether any officer of a body corporate or any person in a position to control the body corporate is or has been associated with a relevant person, or is or has been in a position to control the operations of a body corporate that is/has been an approved pathology authority and is a relevant person.

Additional Information

22. When an undertaking has been given the Minister may require the person giving the undertaking to provide additional information within a fixed period of time, and if the person does not comply the Minister may refuse to accept the undertaking and must notify the person of the decision. The notice is to include notification of a right of internal review of the decision and a right of appeal to the Administrative Appeals Tribunal. There is also a requirement for the Minister to notify persons giving undertakings of the period of time for which the undertaking is to have effect, and the notice is to advise persons whose interests are affected by the decision of their rights of appeal to the Administrative Appeals Tribunal against the Minister's decision.

Date of Effect of Undertaking

23. The day when an undertaking accepted by a Minister comes into effect is to be the day of acceptance by the Minister or such earlier day specified by the Minister (not being a day earlier than the day on which the undertaking was signed) in notifying the person of acceptance.

Cessation of Undertaking

24. The undertaking ceases to be in force if it is terminated, if the Minister revokes acceptance of the undertaking, or if the period of effect for the undertaking expires — whichever event first occurs.

25. An approved pathology authority may terminate an undertaking at any time provided that the authority gives at least 30 days notice of the termination of the undertaking.

Repayment of Fee

26. The fee shall be repaid to a person giving an undertaking, as an approved pathology authority if the undertaking is not accepted

Accredited Pathology Laboratories

27. Under the revised arrangements the Minister may approve premises as an accredited pathology laboratory for pathology services of the kind specified in the approval.

28. New South Wales and Victoria are the only two States which have legislation to implement a programme for the accreditation of pathology laboratories. The Commonwealth will accept laboratory accreditation in these two States for the purpose of paying Medicare benefits. However, automatic acceptance will depend on States continuing to adopt National Pathology Accreditation Advisory Council's guidelines as the minimum standard.

29. The Commonwealth Government operates laboratory accreditation arrangements for those States/Territories which do not have accreditation legislation in place. The Chief Commonwealth Medical Officer of the Department of Health is empowered to accredit laboratories in accordance with the guidelines approved by the National Pathology Accreditation Advisory Council.

30. The National Association of Testing Authorities (NATA) in conjunction with the Royal College of Pathologists of Australasia is the testing authority. Applications for accreditation should be made to NATA in all States/Territories except New South Wales and Victoria (see below for addresses). For the latter States, application should be made to the Pathology Accreditation Board in the State in which the laboratory is located (Pathology Services Accreditation Board, Box 4790, GPO Melbourne VIC 3000

and Pathology Laboratories Accreditation Board, Po Box K110, Haymarket, Sydney NSW 2000). If located in more than one State, the application should be made to the NATA office in the State in which the principal laboratory is located.

31. Since it would not be possible for all laboratories seeking accreditation to be inspected before the accreditation provisions come into force, a system of provisional accreditation has been provided. Applications for provisional accreditation should be forwarded to the Chief Commonwealth Medical Officer, Commonwealth Department of Health, PO Box 100, Woden ACT 2606. Application forms are available from any Regional Office of the Department of Health. One of the conditions for approval of provisional accreditation is that an application for full accreditation has already been made. Provisional accreditation may be withdrawn if full accreditation has not been obtained within a period of two years following the date provisional accreditation is granted.

Request Forms and Confirmation Forms

32. An approved pathology practitioner is required to retain written request/confirmation of requests for pathology services for 18 months from the day when the service was rendered. This also applies to requests which an approved pathology practitioner receives and refers on to another approved pathology practitioner (the first approved pathology practitioner would retain the request for 18 months).

33. If the written request or written confirmation has been recorded on film or other magnetic medium approved by the Minister for Health, for the purposes of storage and subsequent retrieval, the record so made shall be deemed to be a retention of the request or confirmation. The production or reproduction of such a record shall be deemed to be a production of the written request or written confirmation.

34. An approved pathology practitioner is required to produce, on request from an officer of the Health Insurance Commission, no later than the end of the day following the request from the officer, a written request or written confirmation retained pursuant to paragraphs 32 and 33 above. The officer is authorised to make and retain copies of or take and retain extracts from written requests or written confirmations.

35. A practitioner or an approved pathology practitioner who makes an oral request to an approved pathology practitioner is obliged to confirm the request in writing within fourteen days from the day when the request is made.

36. It is acceptable for a request to be made to an approved pathology authority who is the proprietor or one of the proprietors of a laboratory in lieu of making the request to the approved pathology practitioner who renders the service or on whose behalf the service is rendered.

37. Approved pathology practitioners must hold a request in writing for all services requested by any other practitioner before billing patients. This includes requests from partners and other members of a group practice. Requests in writing are not

required for pathologist-determinable tests or for items listed in Division 9. The request in writing must show:

- (i) in the requesting practitioner's own handwriting — the individual pathology services, or recognised groups of pathology tests of particular organ or physiological function to be rendered (see Section 3 C for list of acceptable terms and abbreviations);
- (ii) the requesting practitioner's signature;
- (iii) the name and address of the requesting practitioner;
- (iv) the name and address of the patient;
- (v) the date the pathology services were determined to be necessary;
- (vi) whether, at the time the request was made, the patient was an out-patient of a recognised hospital, a hospital patient in a recognised hospital, a private patient in a recognised hospital or a private patient in a private hospital; and
- (vii) the name and address of the approved pathology practitioner requested to perform the pathology services

38. There is no official "request in writing" form, and the doctor's own stationery, or pre-printed forms supplied by approved pathology practitioners are acceptable (provided there are no check lists or "tick-a-box" lists of individual or groups of pathology services on the forms. However, request forms issued by pathology laboratories for use by referring doctors must be approved by the Health Insurance Commission. Oral requests must be confirmed by a request in writing before an account is issued. A request in writing is required within a partnership or group practice for services in Division 1-8.

39. Where an approved pathology practitioner refers some or all services requested to another approved pathology practitioner the following applies:

- (a) where all the services are referred, he should forward the initial request to the second approved pathology practitioner;
- (b) where some of the services are referred, he should issue his own request in writing, which would show in addition to the particulars listed in paragraph 37 above:
 - (i) name of the original requesting practitioner; and
 - (ii) date of initial request.

NOTE: The patient should be billed by each approved pathology practitioner only for those services rendered by or on their behalf.

Offences in Relation to Request Forms and Confirmation Forms

40. The following offences are, except for the last mentioned offence, punishable upon conviction by a fine not exceeding \$1000. The penalty for the last offence is a fine not exceeding \$1000:-

- an approved pathology practitioner who, without reasonable excuse, does not keep request forms for 18 months;
- an approved pathology practitioner who, without reasonable excuse, does not produce a request form to an officer of the Health Insurance Commission before the end of the day following the day of the officer's request;
- an approved pathology practitioner who, without reasonable excuse, does not confirm in writing an oral request to another approved pathology practitioner within fourteen days of making the oral request;
- a practitioner who, without reasonable excuse, does not confirm in writing an oral request within fourteen days of making the oral request;
- an approved pathology practitioner or approved pathology authority who, without reasonable excuse, provides request forms to practitioners which are not in accordance with the form approved by the Health Insurance Commission.

Pathology Services Advisory Committee

41. The Pathology Services Advisory Committee is responsible for considering and for making recommendations to the Minister for Health on variations to the pathology services table or substituting a new table. Proposed variations and substitutions may be referred to the Committee by the Minister or the Committee may act on its own

initiative. The Minister may make determinations varying the table or substituting a new table but only in accordance with the Committee's recommendation.

42. The Pathology Services Advisory Committee replaces the Medicare Benefits Advisory Committee as the body advising the Minister for Health on proposed variations to the pathology services table.

43. The Health Insurance Commission is responsible for fixing a fee in respect of a pathology service which is of unusual length or complexity, in accordance with principles provided to the Commission by the Pathology Services Advisory Committee. Where principles have not been formulated the Commission must refer cases to the Committee for consideration and recommendation and, if the fee is to be increased, for formulation of the principles to be followed.

44. Appeals against a decision of the Commission may be made to the Minister. The Minister is required to refer an appeal to the Pathology Services Advisory Committee for consideration and recommendation.

Procedures Associated with Breaches of Undertakings by Approved Pathology Practitioners and Approved Pathology Authorities

45. Where the Minister has reasonable grounds for believing that an approved pathology practitioner or an approved pathology authority has breached the undertaking the Minister is required to give notice in writing to the person explaining the grounds for that belief and inviting the person to put a submission to the Minister to show cause why no further action should be taken in the matter.

46. After the submission has been received, the Minister may decide to take no further action against the person. Alternatively, he may refer the matter to a Medicare Participation Review Committee, notifying the grounds for believing that the undertaking has been breached. If after 28 days no submission has been received from the person, the Minister must refer the matter to the Committee.

47. The Minister is empowered to suspend an undertaking where notice has been given to a Medicare Participation Review Committee of its possible breach, pending the outcome of the Committee's proceedings. The Minister must give notice in writing to the person who provided the undertaking of the determination to suspend it, and the notice shall inform the person of a right of appeal against the determination to the Administrative Appeals Tribunal. The Minister may also publish a notice of a determination in the *Commonwealth Gazette*.

Procedures Associated with Initiation of Excessive Pathology Services

(Note: Matters relating to initiation of excessive pathology services are no longer referred to Medical Services Committees of Inquiry)

48. Basically, the Minister must follow the same procedures in relation to the initiation of excessive pathology services as apply to breaches of undertakings, i.e. notice must be given to the person to show cause why no further action should be taken then, where applicable, referral of the matter to the Medicare Participation Review Committee.

49. A major difference in relation to excessive pathology services procedures is that the Minister may notify any one of three classes of persons of the grounds for believing that the person had been instrumental in initiating excessive pathology services. These classes of persons are:

- the practitioner who initiated the services;
- the employer of the practitioner who caused or permitted the practitioner to initiate the services; or
- an officer of the body corporate employing the practitioner who caused or permitted the practitioner to initiate the services.

50. The other essential difference is that no rights of appeal to the Administrative Appeals Tribunal are applicable to these procedures.

Review of Minister's Decisions

51. A person may seek the Minister's reconsideration of a refusal to accept an undertaking as an approved pathology practitioner or approved pathology authority.
52. The Minister may affirm the decision to refuse to accept the undertaking, or to accept the undertaking for a specified period of up to 12 months from the day when the undertaking comes into force. The Minister must notify his decision in writing to the person concerned and include in the notice a statement of the person's right to appeal the Minister's decision under the Administrative Appeals Tribunal Act 1975.
53. Other decisions of the Minister against which a person has a right of appeal to the Administrative Appeals Tribunal are as follows:
- a decision approving or refusing to approve premises as an accredited pathology laboratory;
 - a decision either affirming the Minister's refusal to accept an undertaking or varying the period for which the undertaking is accepted;
 - a decision about the period for which an undertaking is to have effect; and
 - a decision by the Minister to suspend an undertaking.

Conditions Relating to Medicare Benefits

54. For the purposes of assessing Medicare benefits for an item listed in the pathology services Schedule which is requested or determined to be necessary the following rules apply:
- (1) Divisions 1-8 are applicable only where the service is performed by an approved pathology practitioner in a pathology laboratory accredited for that kind of service. Approved pathology practitioners are required to exercise personal supervision over pathology services which are rendered on their behalf (see paragraphs 7-9).
 - (2) Division 9 is applicable only where the service is performed by a medical practitioner who is not an approved pathology practitioner. Benefit is payable in respect of a pathology item in Division 9 only where the service is determined as being necessary by the medical practitioner rendering the service, or is rendered in response to a request by a member of a group of practitioners to which that practitioner belongs (providing the member making the request was not himself an approved pathology practitioner).
 - (3) The 'SP' Schedule fees in Divisions 1-8 apply where:
 - (a) the service was performed by or on behalf of an approved pathology practitioner who is recognised as a specialist pathologist for the purposes of the Health Insurance Act (see paragraph 56);
 - (b) the approved pathology practitioner (or approved pathology authority) has a request in writing (which conforms to the requirements of the regulations under the Health Insurance Act — see paragraphs 37 to 38) from the treating medical or dental practitioner or another approved pathology practitioner;
 - (c) the person in respect of whom the service was rendered was not at the time of the request a private in-patient or in receipt of an out-patient service at a recognised hospital; and
 - (d) recognised hospital or Government (including university and Government authority) laboratory facilities and/or staff were not used in the performance of the pathology service (see paragraph 61).
 - (4) The 'OP' Schedule fee in Divisions 1-8 applies in other circumstances, namely:
 - (a) the service was performed by an approved pathology practitioner who is not a recognised specialist pathologist; or
 - (b) the service was performed by an approved pathology practitioner who is a recognised specialist pathologist but all the conditions of rule (3) above were not met.
 - (5) Benefit is not payable in respect of a pathology item in Divisions 1-8 unless the approved pathology practitioner or the approved pathology authority:
 - (a) has a request in writing from the treating medical or dental practitioner or from another approved pathology practitioner for the services requested and

records on the account, receipt or direct-billing assignment form the following additional details:

- (i) the name of the requesting practitioner;
 - (ii) the date on which the request was made; and
 - (iii) where the provider is an approved pathology authority, the surname and initials of the approved pathology practitioner who performed the service;
or —
- (b) in respect of pathologist-determinable services, determined that the service was necessary if an approved pathology practitioner and records the date the service was determined as being necessary on the account, receipt or direct-billing assignment form. In practice this requirement would be met by a notation "SD".
- (6) (a) in respect of a pathology item in Division 9, the medical practitioner who renders the service must ensure his account, receipt or direct-billing assignment form includes his name, address, provider number, the date of the service, the relevant item number and/or a brief description to clearly identify the service; and
- (b) if the service was determined necessary by another medical practitioner who is a member of the same group practice as the practitioner who rendered the service, the surname and initials of the requesting practitioner must also be included.

Recognised Specialist Pathologists

55. To be eligible for Medicare benefits at the specialist pathologist (SP) rate (see paragraph 54(3)) recognised specialist pathologists must become approved pathology practitioners.

56. A recognised specialist in pathology means a medical practitioner recognised for the purposes of the Health Insurance Act as a specialist in pathology (see paragraphs 315 to 320 of the "General Notes" in the front of this Book). The principal specialty of pathology includes a number of sectional specialties. Accordingly, a medical practitioner who is recognised as a specialist in a sectional specialty of pathology is recognised as a specialist pathologist for this purpose.

Pathology Tests not Covered by Request

57. An approved pathology practitioner who has been requested to perform one or more pathology services may deem it necessary in the interest of the patient to carry out additional tests to those requested. This situation may be handled in two ways:

- (a) The approved pathology practitioner may arrange with the referring practitioner to forward an amended or a second request. The account will then be issued in the ordinary way and the additional services will attract full benefits at the "SP" rate where the approved pathology practitioner is a recognised specialist pathologist
- (b) in respect of pathologist-determinable services he/she may determine that the services were necessary. In this case the account or receipt for the requested services should observe the requirements of paragraph 54(5)(a). The account or receipt for the additional services will indicate that he/she determined the services were necessary and show the date the determination was made (see paragraph 54(5)(b)). The latter services attract benefit at the "OP" rate.

Patient Episode — Definition

58. For those items where the fee and benefit are related to the number of services performed in relation to the one patient episode, a patient episode is defined as covering:

- (a) services requested by a medical or dental practitioner on the one calendar day although they may be rendered by an approved pathology practitioner on one day or over a number of days; or
- (b) the need for the items is determined on the one calendar day and rendered on that day or over a number of days.

Inbuilt Multiple Services Rule

59. Exemption may be sought to the inbuilt multiple services rule under Section 4B(3) of the Health Insurance Act in the case of seriously ill patients whose condition requires a series of pathology investigations at various times throughout the day, provided that these services constitute distinct and separate collections and performances, involving substantial additional expense for the approved pathology practitioner. An exemption may be sought by the initiating practitioner endorsing the request with the notation "S4B3" and the approved pathology practitioner performing the pathology tests endorsing his account similarly and by indicating the time the services were performed. Alternatively, an exemption may be sought by the approved pathology practitioner approaching the nearest office of the Health Insurance Commission. If exemption is granted, the approved pathology practitioner will have to endorse his accounts that "the exemption was approved byon.....". Approval is not automatic. The practitioner may be asked to verify that the patient was seriously ill, that the special tests were necessary, that they were requested and substantial additional expenses were incurred. Exemptions would not normally apply in the instance of tests provided in a recognised (public) hospital nor in respect of tests listed under procedural services (Items 1504-1517). A typical case for exemption would be where a pathology practitioner is required to make special visits at intervals to a hospital to collect specimens from a critically ill person.

60. The above provision also applies in regard to the requirement that tests requested to be performed at intervals over a period of days or weeks should be supported by separate individual request forms each time they are rendered. An example is regular prothrombin time estimations. The initial request and rendering practitioner's account should be endorsed similarly to that outlined in paragraph 59.

61. The following laboratories have been prescribed for the purposes of payment of Medicare benefits as outlined in paragraph 55(3)(d):

- (a) laboratories operated by the Commonwealth (these include Commonwealth health laboratories operated by the Department of Health as well as the laboratories operated by other Departments eg the Departments of Defence and Veterans' Affairs conduct laboratories from which pathology services are provided);
- (b) laboratories operated by a State Government or authority of a State. (Laboratories operated or associated with recognised hospitals are also included);
- (c) laboratories operated by the Northern Territory and the Australian Capital Territory Health Authority; and
- (d) laboratories operated by the following universities:
 - University of N.S.W
 - University of Sydney
 - University of New England
 - Monash University
 - University of Melbourne
 - University of Queensland
 - University of Adelaide
 - University of Western Australia
 - University of Tasmania
 - Australian National University

Assignment of Medicare Benefits

62. In addition to the general arrangements relating to the assignment of benefits as outlined at paragraph 67 of the "General Notes" it should be noted that, where the treating practitioner requests pathology services but the patient does not physically attend the approved pathology practitioner, the patient may complete an assignment voucher at the time of the requesting doctor's visit offering to assign benefits for the approved pathology practitioner's services.

63. Where a pathology service is rendered by or on behalf of an approved pathology practitioner who is acting in relation to the service on behalf of another person, the

pathology service shall be deemed not to have been rendered on behalf of that other person. In other words if a practitioner requests an approved pathology practitioner to perform a necessary pathology service, that approved pathology practitioner must perform the service himself/herself or have it performed on his/her behalf in order to be eligible to receive benefits by way of assignment. If, however, the first approved pathology practitioner arranges for the service to be rendered by a second approved pathology practitioner who is not under his supervision, the second approved pathology practitioner and not the first, is eligible to receive an assignment of the Medicare benefit for the service in question.

Medicare Benefit not Payable in Respect of Services Rendered by Disqualified Practitioners

64. Medicare benefits are not payable for pathology services if at the time the service is rendered, the person, by or on whose behalf the service is rendered, is a person in relation to whom a determination was in force in relation to that service in which an approved pathology practitioner has breached an undertaking, that Medicare benefits are not payable for a specified period up to 5 years in respect of certain pathology services rendered by the practitioner.

Medicare Benefits not Payable for Certain Pathology Tests

65. Certain tests of public health significance do not qualify for payment of Medicare benefits. Examples of services in this category are:

- culture of viruses;
- estimation of chlorinated hydrocarbons (Dieldrin);
- examination of animal inoculation;
- Guthrie test for phenylketonuria;
- neonatal screening for hypothyroidism (T4 estimation);
- identification of M Tuberculosis by bio-chemical tests or sub-culture; or
- treponema pallidum immobilisation test (TPIT or TIT)

66. In addition to the above, certain other tests do not qualify for payment of Medicare benefits. These include:

- cytotoxic food testing;
- pathology services performed for the purposes of tissue audit;
- pathology services performed for the purposes of control estimation, repeat tests or duplication of tests (eg, for confirmation of earlier tests, etc);
- pathology services which are performed routinely in association with the termination of pregnancy without there being any indication for the necessity of the services. However, benefits would be payable for the following pathology tests in all instances:
 - Items 1006/1007 — haemoglobin estimation;
 - Items 1080/1081 — blood grouping ABO and Rh (D antigen);
 - Items 1121/1122 — examination of serum for Rh and/or other blood group antibodies.

Definitions

67. Excessive pathology service — means a service for which Medicare benefits are payable but which is not reasonably necessary for the adequate medical or dental care of the patient.

68. Initiate — in relation to a pathology service means to make the decision which instigates the rendering of the service.

69. Pathologist-determinable service — is a self determined test requiring a decision by an approved pathology practitioner (but not by another person on behalf of an approved pathology practitioner) and is restricted to those tests determined by the Minister for Health. Such tests attract the "OP" Schedule fee and should be clearly indicated on accounts as having been self determined.

70. Personal supervision — means that an approved pathology practitioner will, to the fullest extent, be responsible for exercising an acceptable level of control over the rendering of pathology services (see paragraphs 7-9).

71. Prescribed pathology service — is a service included in Division 9 and may be performed by a medical or dental practitioner in his own surgery. They may only be performed by a practitioner who is not an approved pathology practitioner.

Interpretations

Haematology

Blood Grouping (Items 1080/1081 and 1089/1090)

72. Repeat blood grouping may be performed each time cross-matching of fresh units of blood for transfusion is carried out. This is an internal quality control measure and should not attract benefits on each occasion. Benefits are payable for blood grouping once only during any period of hospitalisation.

Compatibility Testing (Items 1111-1116)

73. If further blood is requested after the initial compatibility testing and a separate attendance is involved, benefits are again attracted under Items 1111-1112 for one or two units of blood.

Quantitative Estimation of Any Substance by Reagent Strip with Reflectance Meter (Items 1296, 1297)

74. These items cover tests performed by instruments such as the Ame's 'SERALYZER'. It is a condition for the payment of benefit that the patient or specimen must have been referred to an approved pathology practitioner who is not a member of the same group of practitioners as the referring practitioner.

Estimation by Any Method of specified Biochemical Substances (Items 1301-1311)

75. Benefits are not attracted under these items for estimations carried out by means of reagent strips with or without reflectance meters.

Estimation of Glycosylated Haemoglobin (Items 1313/1314)

76. Glycosylated haemoglobin estimation (HbA1 or HbA1c) has a role in the management of problem diabetes. It is not intended that the items should be used in the diagnosis of diabetes or in the routine assessment of the controlled diabetic.

Cultural Examination (Items 1612-1620)

77. In these items the words "where processed independently" indicate that material from each site must be treated separately for culture then individually identified and reported on.

Blood Culture (Items 1633/1634)

78. The usual practice is to take one set of cultures every 2-3 hours for a total of 3-4 sets. One set consists of aerobic or anaerobic or both media. Benefits under the items are attracted for each set to a maximum of three sets.

Urine Culture (Items 1673/1674)

79. Testing for inhibitory substances in urine is included in the items covering urine culture. Items 1732/1733 do not apply in addition to these items.

RAST Tests (Items 1903/1904, 1905/1906)

80. It should be noted that benefits for RAST tests are restricted to a maximum of four allergens.

Cytological Examination of Smears (Items 2081/2082)

81. Benefit is not payable under these items for cytological examination of nasal smears which is covered by Items 1545/1546.

Estimation of beta-HCG (Items 2272/2273)

82. Estimation of beta-HCG in serum or urine as a diagnostic test for pregnancy, attracts benefit under Items 2272/2273 not under Items 1345/1346 or 1452/1453.

NOTE:

(i) The estimation of any substance specified in any item in this Division performed on a multichannel analyser system must be itemised under Items 1301-1311

(ii) Items 1301-1311 refer to estimations performed by any means, i.e. on a multichannel analyser system or by any other method. If, in the one episode, some tests are performed on a multichannel analyser and some by other methods, the total number of tests undertaken, irrespective of method, is the relevant factor in allotting the appropriate item.

‡
+ Quantitative estimation of any substance BY REAGENT STRIP WITH REFLECTANCE METER (not associated with Items 1301 to 1311) by or on behalf of an approved pathology practitioner where the patient is referred by a medical practitioner for the estimation and where the referring medical practitioner is not a member of a group of practitioners of which the first-mentioned practitioner is a member

DIVISION 9—13 SPECIFIED SIMPLE BASIC PATHOLOGY TESTS

INTRODUCTION

The following items cover the 13 specified simple basic pathology tests a practitioner may perform in respect of patients of his own practice, including patients of his partners or other members of a group, if the practitioner is not an approved pathology provider. The Schedule fees in most cases correspond to the "O.P." rates in the preceding eight Divisions, except that the items of haemoglobin estimation, determinations of erythrocyte sedimentation rate and microscopical examination of urine concentrate do not require referral by another medical practitioner for the services to be eligible for Medicare benefits, and the Schedule fees for the items are based on lower relative value units. The items below for the basic blood tests are differently structured in respect of multiple tests to the corresponding items in Division 1

Haemoglobin estimation and/or haematocrit and/or erythrocyte count; leucocyte count; erythrocyte sedimentation rate; examination of blood film and/or differential leucocyte count—
