**This book provides information on the arrangements for the payment of Medicare benefits for professional services rendered by registered medical practitioners and approved dental practitioners (oral surgeons). These arrangements operate under the Health Insurance Act 1973 (as amended). However, at the time of printing, the relevant legislation giving authority for the changes included in this edition of the book may still be subject to the approval of Executive Council and the usual Parliamentary scrutiny. This book is not a legal document, and, in cases of discrepancy, the legislation will be the source document for payment of Medicare benefits.**

### Schedules of Services

Each professional service contained in the book has been allocated a unique item number, which may be found by reference to the alphabetical listing of services in the relevant index. (For services not listed in the Schedule or services which do not attract Medicare benefits see paragraphs 11 and 13 of the General Explanatory Notes)

Located with the item number and description for each service is the Schedule fee and Medicare benefit, together with a reference to an explanatory note relating to the item if applicable. In the case of services which have an associated anaesthetic, the appropriate anaesthetic item number and the number of "basic" and "time" units (indicated by "B" and "T"), are also shown, e.g. (Anaes. 17709 = 3B + 6T).

Where an operation qualifies for the payment of benefits for an assistant, the relevant items are identified by the inclusion of the word "Assist." in the item description. Medicare benefits are not payable for surgical assistance associated with procedures which have not been so identified.

In some cases two levels of fees are applied to the same service in General Medical Services, with each level of fee being allocated a separate item number. The item identified by the letter "S" applies in the case where the procedure has been rendered by a recognised specialist in the practice of his or her specialty and the patient has been referred. The item identified by the letter "G" applies in any other circumstance.

Higher rates of benefits are also provided for consultations by a recognised consultant physician where the patient has been referred by another medical practitioner or an approved dental practitioner (oral surgeons). For conditions of referral see paragraph 6 of the General Explanatory Notes.

Differential fees and benefits also apply to services listed in Category 5 (Diagnostic Imaging Services). The conditions relating to these services are set out in the Category 5 notes.

### Structure of Schedule of Services

The book has been structured to group professional services according to their general nature, while some have been further organised into sub-groups according to the particular nature of the services concerned. For example, Group T8 covering surgical operations has been divided into fifteen sub-groups corresponding generally to the usual classification of surgical procedures. Certain sub-groups are further classified to allow for suitable grouping of specific services, eg. varicose veins, operations on the prostate (see list of contents at the beginning of each Category).

### Explanatory Notes

Explanatory notes relating to the Medicare benefit arrangements and notes that have general application to services are located at the beginning of the book, while notes relating to specific items are located at the beginning of each Category. While there may be a reference following the description of an item to specific notes relating to that item, there may also be general notes relating to each Group of items.

### **Schedule Interpretations**

The day-to-day administration and payment of benefits under the Medicare arrangements is the responsibility of the Health Insurance Commission. Inquiries concerning matters of interpretation of Schedule items should be directed to the Commission and not to the Department of Health and Family Services. The following telephone numbers have been reserved by the Health Insurance Commission exclusively for inquiries relating to the Schedule:

NSW - 02 97942864  
VIC - 03 92843661  
QLD - 07 33607215  
SA - 08 82018629

WA - 09 2638000  
TAS - 03 62321400  
ACT - 02 62306362  
NT - use South Australia number

### **Changes to Provider Details**

It is important that the Health Insurance Commission be notified promptly of changes to practice addresses to ensure correct provider details for each practice location. Addresses of the Commission are listed at paragraph 2.9 of the General Explanatory Notes of this book. (See also paragraph 2.2 of the General Explanatory Notes).

### **Distribution of the Medicare Benefits Schedule Book**

It is also important to notify the Department of Health and Family Services of changes to mailing details to ensure receipt of the Medicare Benefits Schedule book and up-dates. Enquiries regarding distribution of the book and notification of changes of details should be directed to the Central Office of the Department, Fax (02) 6289 4996 or Freecall 1800 020103. Addresses of the State Offices of the Department are listed below. Please note that matters of interpretation of the Schedule should be directed to the Health Insurance Commission (see above).

### **Future Editions of the Medicare Benefits Schedule Book**

The Department welcomes any suggestions for improvements on the layout of the Medicare Benefits Schedule book from individual practitioners. Any suggestions should be forwarded to:- The Director, Financial and Schedule Review Section, Medicare Benefits Branch, GPO Box 9848, Canberra ACT 2601.

## SUMMARY OF CHANGES INCLUDED IN THIS EDITION

### General Fee Increase

Schedule fees have been increased by 1.7% for all items of service, other than attendance items in Groups A1, A2, A6 and A7 of Category . Category 6, pathology services, have had a 1.7% targeted increase. The items targeted have been agreed to by both professional bodies.

The Schedule fees for items in Group A1 (general practitioner attendances) increase by 0.85% from 1 November 1997, with no increase in fees for Group A2 (other unreferral attendances), Group A6 (group therapy) and Group A7 (acupuncture).

### Increase in Maximum Gap Payment

The maximum patient gap between the Schedule fee and the benefits payable for out-of-hospital services increases to \$50.10 as at 1 November 1997. The 85% benefit level will apply for all fees up to \$334.00, after which, benefits are calculated at the Schedule fee less \$50.10.

### Review of General Medical Services

The main changes involve the following services/areas of the Schedule:-

- Professional attendances (unsociable hours and home visits)
- Contact lens consultations
- Perfusion services (administration of cardioplegia, prolonged whole body perfusion)
- Urology (prostatectomy)

### Medicare Benefits Advisory Committee - Repeal of Sections 11 and 12 of the Health Insurance Act

Following the repeal of Sections 11 and 12 of the Health Insurance Act from 19 June 1997, there is now no provision to consider claims for services considered to be of "unusual length or complexity" or to provide Medicare benefits for services not specifically listed in the Medicare Benefits Schedule (MBS).

The decision to remove the legislative power to increase the MBS fees for services of unusual length or complexity was made to strengthen the principle that Medicare fees are regarded as being reasonable, on average. This 'swings and roundabouts' principle recognises that fees listed in the MBS have regard to usual and reasonable variations in the time involved in performing the service on different occasions and to reasonable ranges of complexity and technical difficulty involved.

The repeal of Sections 11 and 12 also complements the Government's policy decision to strengthen the evidence base of the MBS to promote appropriate introduction, diffusion and use of scientifically proven and needed technologies/procedures, to diminish the use of technologies and procedures not proven to be safe and effective for the intended application, and thus improve quality and cost effectiveness of care and maximise health gain for a given level of health care expenditure. This will be facilitated through the establishment of the Medicare Services Advisory Committee. The process for referral to this Committee has yet to be finalised.

As a consequence of the above decisions, benefits will now apply only in respect of services listed in the MBS. Providers of services not listed in the MBS are advised, as a first step, to seek the support of their relevant craft group, with a view to submitting proposals for the inclusion of new services to the Department through the Australian Medical Association.

### Ministerial Determinations under Section 3C of the Health Insurance Act

The following items were introduced into the Medicare Benefits Schedule from 19 June 1997 via Section 3C of the Health Insurance Act. These services have now been transferred to the Health Insurance Regulations effective from 1 November 1997.

10816	11222	11225	12207	14120	14122	14124	14126	14128	14130	14132	15600	17800
17805	17810	18119	30214	32210	32501	42783	42786	42789	42792	45019	45020	45528
45585	45588	50125										

A number of these items (see below) contain a requirement that it must be demonstrated that there is a clinical need for the service before Medicare benefits are payable. Claims for benefits in respect of these services should be accompanied by appropriate clinical and/or photographic evidence sufficient to enable the Health Insurance Commission to determine the eligibility of the service for benefits. Guidelines pertaining to the use of these items are contained in the specific explanatory notes preceding the relevant Category, with a reference to the relevant note located with the item description.

Items 11222, 11225 - Computerised perimetry, 3 or more examinations in a 12 month period

Item 12207 - Investigation of sleep apnoea, 4 or more investigations in a 12 month period

Items 14120-14132 - Laser photocoagulation of vascular lesions/birthmarks, 7 or more sessions in a 12 month period

Item 30214 - Treatment of telangiectases or starburst vessels, 7 or more sessions in a 12 month period

Item 32501 - Injection of varicose veins, 7 or more treatments in a 12 month period

Item 42783, 42786, 42789, 42792 - Laser surgery to eyes, additional treatments in a 2 year period

Items 45019, 45020 - Full face chemical peel

Item 45228 - Bilateral augmentation mammoplasty

Item 45585 - Liposuction, other than for post-traumatic pseudolipoma (Item 45584)

Item 45588 - Bilateral meloplasty

Item 50125 - Injection into joint, 26 or more treatments in a 12 month period

Other services introduced include stereotactic radiosurgery (Item 15600), prolonged anaesthetics (Items 17800, 17805, 17810 and 18119) and replacement of gracilis neosphincter pacemaker (Item 32210).

#### **Emergency Attendances During "Unsociable" Hours**

New items have been introduced to provide for after-hours emergency attendances during the hours of 11pm to 7am on any day of the week (Items 601, 602, 697 and 698).

Items 1, 2, 97 and 98 have been amended to cater for after-hours emergency attendances provided outside of these hours. Increased fees and benefits apply to these services.

#### **Home Visits by Non-Specialists**

As announced in the 1997-98 Budget, changes have been made to the arrangements for payment of Medicare benefits for home visits by non-specialist practitioners, i.e. Items 4, 24, 37, 47, 58, 59, 60 and 65.

From 1 November 1997, Medicare benefits for home visits by non-specialists will be paid on the same basis as benefits for non-specialist consultations at all other non-surgery locations (e.g. hospitals, nursing homes), i.e. the loading for the inconvenience and extra costs associated with visiting patients away from the surgery will be reduced where two or more patients are consulted at the same location.

#### **Consultant Psychiatric Attendances (Item 319)**

Item 319, which was introduced on 1 January 1997 to cater for intensive long-term treatment, has been revised with effect from 1 November 1997. Reference to sexual or physical abuse has been removed from the criteria under which this item applies and the description now reflects the fact that the Global Assessment of Functioning Scale is not relevant to children. While the criterion that patients had a history of failed related psychiatric treatment has been removed from the description, the revised Notes for Guidance now specify that "...it is generally expected that other appropriate psychiatric treatment has been used for a suitable period and the patient has shown little or no response to such treatment".

#### **Prolonged Anaesthesia (see also paragraph 6.3 and 6.4 of Category 3 Explanatory Notes)**

New items have been introduced to cover prolonged administration of anaesthesia in connection with a medical service (Items 17800, 17805, 17810) and a dental service (Item 18119).

Anaesthetic services provided in connection with a medical service must exceed the normal time allocated in the Schedule by the following times to qualify as a prolonged anaesthetic:-

- for procedures up to 3 hours (12 anaesthetic time units) - by more than 1 hour
- for procedures normally taking more than 3 hours and up to 6 hours (13 to 24 anaesthetic time units) - by more than 1 hour and 30 minutes
- for procedures exceeding 6 hours duration (25 or more anaesthetic time units) - by more than 2 hours

Additional benefits are payable under Items 17800, 17805 and 17810 to cover the time component of prolonged anaesthesia and should be identified separately from the item covering the administration of the anaesthetic. The derived fee for these items provides for an amount of \$14.20 for each time unit in excess of normal anaesthesia time.

Normal anaesthesia time is derived in the usual way. Time units are allocated on the basis of 1 unit per 15 minutes (or part thereof) for services up to 6 hours, and 1 unit for each 10 minutes (or part thereof) for services in excess of 6 hours.

For multiple procedures, the multiple anaesthetic rule should be applied to time units only in deriving normal anaesthetic time.

Item 18119 applies in relation to the administration of an anaesthetic in connection with a dental procedure where the time for the operation exceeds 3 hours. Where the anaesthetic service is prolonged, Item 18119 should be itemised in lieu of the item which would otherwise be used for the administration of the anaesthetic.

#### **Abandoned Surgery/Anaesthetic (Items 30001/17970)**

Two new items have been introduced to cover the situation where surgery has been commenced but is then discontinued for medical reasons or for other reasons which are beyond the surgeon's control (e.g. equipment failure). Claims for benefits for the surgical procedure (Item 30001) and the related anaesthetic (Item 17970) should be submitted to Medicare for approval of benefits and should include full details of the circumstances of the operation, including details of the surgery which had been proposed and the reasons for the operation being discontinued.

#### **Removal of Skin Lesions (Items 31210 to 31355)**

The fees for the items covering excision of skin lesions have been adjusted with effect from 1 November 1997 following consultation with the profession.

## 1. OUTLINE OF SCHEME

### 1.1 Medicare

1.1.1 The Australian Medicare Program provides access to medical and hospital services for all Australian residents and certain categories of visitors to Australia. Legislation covering the major elements of the Program is contained in the Health Insurance Act 1973 (as amended).

1.1.2 With regard to medical expenses, the basic aim of the Medicare program is to provide:-

- automatic entitlement to benefits in respect of professional services (other than professional services to which the following dot point applies) equal to 85% of the Medicare Benefits Schedule fee, with a maximum payment of \$50.10 (indexed annually) by the patient for any one service where the Schedule fee is charged;
- for professional services rendered while hospital treatment (i.e., accommodation and nursing care) is provided to a patient who has been admitted to a hospital or day hospital facility (other than Medicare hospital patients), a flat rate of benefit of 75% of the Schedule fee, that is, there is no limit to the maximum amount of gap between the benefit and the Schedule fee; and
- access without direct charge to public hospital accommodation and to treatment by doctors appointed by the hospital.

Patients may insure with private health insurance organisations for the gap between the 75% Medicare benefit and the Schedule fee or for amounts in excess of the Schedule fee where the patient's practitioner has a contract with the patient's health fund. For out-of-hospital services the maximum amount of 'gap' (i.e. the difference between the Medicare rebate and the Schedule fee) payable by a family group or an individual in any one calendar year is \$276.80 (indexed annually from 1 January). A family group includes a spouse and dependent children under 16 years of age or dependent students under the age of 25.

1.1.3 The Health Insurance Commission is responsible for the operation of Medicare and Medicare benefits based on the services and fees contained in this book will be paid only by the Commission (commonly known as Medicare). For details of locations of Medicare offices, see paragraph 2.9 below.

1.1.4 Where an eligible person incurs medical expenses in respect of a professional service Medicare will pay benefits for that service as outlined in these notes. The definition of professional service as contained in the Health Insurance Act provides that such a service must be "clinically relevant". A clinically relevant service means a service rendered by a medical or dental practitioner or an optometrist that is generally accepted in the medical, dental or optometrical profession (as the case may be) as being necessary for the appropriate treatment of the patient to whom it is rendered.

1.1.5 It is recognised that medical practitioners will sometimes be called upon to provide services which cannot be considered as being medically necessary. Accounts for these services should not be itemised as attracting Medicare benefits. The fee charged for such services is a private matter between the practitioner and the patient.

## 2. PROVIDER ELIGIBILITY

### 2.1 Access to Medicare Benefits

2.1.1 Amendments to the Health Insurance Act 1973 which came into force in December 1996 provide that from that date, medical practitioners have to meet minimum proficiency requirements before any services they provide can attract a Medicare benefit. To be eligible to provide a medical service which can attract a Medicare benefit, or to provide services for or on behalf of another practitioner, one of the following conditions must apply:-

- the person was a medical practitioner prior to 1 November 1996 (this does not include an intern or Australian Medical Council candidate who has not completed a required period of supervised training, a person without the legal right to be in Australia on 1 November 1996, or a person acting as a medical practitioner on a temporary visa); or
- the person is a recognised specialist, consultant physician or general practitioner; or
- the person is in an approved specialist or general practice training placement or an approved rural locum placement and providing services in such a placement; or
- the person is a temporary resident doctor with a determination under Section 3J of the Health Insurance Act 1973, while working in accord with that determination (Note: New Zealand citizens entering Australia do so under a special temporary entry visa and are regarded as temporary resident doctors).

2.1.2 Any practitioner who does not satisfy these requirements is not a Medical Practitioner for Medicare purposes and Medicare benefits cannot be paid for their services. This does not affect the practitioners ability to prescribe, refer, order diagnostic tests etc.

2.1.3 It is an offence under Section 19CC of the Health Insurance Act 1973 to provide a service without first informing a patient where a Medicare benefit is not payable for that service.

## **2.2 Provider Numbers**

2.2.1 When an eligible medical practitioner wishes to have Medicare benefits payable for his/her services and/or, for Medicare purposes, wishes to raise valid

- referrals for specialist services; or
- requests for pathology or diagnostic imaging services,

the practitioner can apply in writing to the Health Insurance Commission for a Medicare provider number for the sites from which medical services/referrals/requests will be provided.

2.2.2 Medicare Provider Numbers are allocated to practitioners to provide an easy method of identifying the place from which a service is provided. Health Insurance Regulations provide that, for Medicare purposes, a valid account/receipt must contain the practitioners' name and either:-

- the address of the place from which the service was provided; OR
- the provider number for the place from which the service was provided.

2.2.3 The provider number comprises a stem number which is up to 6 characters followed by a number/alpha denoting the practice location followed by an alpha character which is a check character.

2.2.4 Medical registration information is validated by medical registration authorities to ensure appropriate processing of Medicare claims.

2.2.5 Pay group arrangements are available which allow Medicare benefit cheques, which would normally be payable to a medical practitioner, to be made payable to a third party. Information about pay group links is contained in the provider number application form and is available from the Health Insurance Commission. Existing pay group arrangements can be terminated by a written request from the practitioner, however, the Health Insurance Commission will routinely inform the payee of such a termination.

2.2.6 Medicare provider number information is released in accord with the secrecy provisions of the Health Insurance Act 1973 (Section 130) to authorised external organisations including Private Health Insurance Funds, the Department of Veterans' Affairs and the Department of Health and Family Services.

## **2.3 Locum Tenens**

2.3.1 Where a locum tenens is to provide services at a practice location for more than 2 weeks or will return to the practice on a regular basis for short periods, the locum should apply for a provider number for that location. If the locum is to provide services at a practice for less than 2 weeks, the locum can use an existing provider number. This arrangement DOES NOT apply where:-

- the practitioner is an RACGP or specialist trainee with a provider number issued for an approved training placement; or
- the practitioner is associated with an approved rural placement under Section 3GA of the Health Insurance Act 1973; or
- the practitioner has access to Medicare benefits as a result of the issue of a determination under Section 3J of the Health Insurance Act 1973 which only gives the practitioner access to Medicare benefits at specific practice locations; or
- the locum is to provide services at a practice which is participating in the Better Practice Program as the use of a provider number not specifically allocated for the practice will affect payments to the practice under the Better Practice Program.

2.3.2 Locums can direct Medicare payments to the principal of the practice by either arranging a pay group link and/or by nominating the principal as the payee on direct bill stationery.

## **2.4 Approved Placement for Rural Locations (Section 3GA Approvals)**

2.4.1 There are two categories of medical practitioner for whose services Medicare benefits are not payable. They are medical practitioners:-

- subject to the 10 year moratorium; and
- first registering on or after 1 November 1996 who are not eligible for recognition as either a general practitioner or specialist.

2.4.2 Arrangements exist to enable medical practitioners (otherwise ineligible to access Medicare) to do rural locum work through a structure that provides adequate supervision, quality assurance and backup arrangements while allowing Medicare billing from an approved practice placement site.

2.4.3 Further information on approved placements for rural locums is available from the Department of Health and Family Services on (02) 6289 3614.

## **2.5 Overseas Trained Doctors and the Ten Year Moratorium**

2.5.1 Section 19AB of the Health Insurance Act 1973 provides that services provided by overseas trained doctors (including New Zealand doctors) and overseas doctors trained in Australia will not attract Medicare benefits for a period of 10 years from the time they become registered as a medical practitioner with a State or Territory medical board. These measures do not apply to doctors who:-

- before 1 January 1997, registered with a State or Territory medical board (not including a person on a temporary resident visa) provided that they retained the continuous legal right to remain in Australia; or
- made an application to the Australian Medical Council (AMC) which was received before 1 January 1997,

to undertake examinations, successful completion of which would ordinarily enable the person to become a medical practitioner (and was eligible to lodge an application with the AMC); or

- is a temporary resident doctor (including New Zealand doctors) with a determination under Section 3J of the Health Insurance Act 1973 while working in accord with that determination.

2.5.2 The Minister can grant an exemption to these requirements and can impose conditions on any exemption provided. Requests for exemption from the moratorium should be directed to the Department of Health and Family Services on (02) 6289 3630 or (02) 6289 8127.

## **2.6 Temporary Resident Doctors (TRD) and Occupational Trainees (OT)**

2.6.1 To be allocated a Medicare provider number a TRD/OT must be supported by their employer and be able to demonstrate that there is a need to have Medicare benefits payable for their services, refer or request specialist services for Medicare purposes and/or provide prescriptions under the Pharmaceutical Benefits Scheme. The following documentation is required with an application for a Medicare provider number:-

- Australian medical registration papers; and
- a copy of personal details in a passport and all Australian visas and entry stamps; and
- a letter from the employer stating the reason why a Medicare provider number and/or prescriber number is required; and
- a copy of the employment contract.

2.6.2 Those TRD/OT deemed eligible for a Medicare provider number by the issue of a Section 3J determination by the Minister's delegate will need to provide their name and address, as well as their Medicare provider number on all bills for services they have rendered where a Medicare benefit is to be claimed.

2.6.3 The issue of a 3J determination is not automatic and is not backdated. Medicare benefits cannot be paid for services rendered by a TRD/OT until a 3J determination has been issued. Delegations for the issue of 3J determinations are held by the Department of Health and Family Services and as a result, applications received by the Health Insurance Commission will be forwarded to the Department for approval. Applicants for 3J determinations should apply to the Health Insurance Commission.

2.6.4 TRD/OT are usually granted conditional medical registration. Use of a Medicare provider number outside of the conditions imposed through their visa and medical registration will make the TRD/OT liable to action by the Department of Immigration and Multicultural Affairs and the State or Territory medical board.

2.6.5 Information about applying for a Medicare provider number can be obtained by telephone on 132 150 (local call charge) or by contacting the Provider Liaison Section of the Health Insurance Commission in your State.

## **2.7 Use of Provider Numbers and Closure of Practice Locations**

2.7.1 Use of an incorrect Medicare provider number may be a breach of Health Insurance Regulations which require that an account/receipt lodged with a claim for Medicare benefits must contain the practitioner's name and either:-

- the address of the place from which the service was provided; OR
- the provider number for the place from which the service was provided.

2.7.2 It is important that the Health Insurance Commission be notified promptly where a practitioner ceases to practice from a location. Failure to notify closure can lead to misdirection of Medicare cheques and other information from the Health Insurance Commission.

## **2.8 Better Practice Program**

2.8.1 Practitioners who work at practices participating in the Better Practice Program are reminded about the importance of having a provider number linked to that practice. Under the Better Practice Program, only services rendered by a practitioner with a provider number linked to the practice location will be taken into account when determining the practice's payment. Medicare and the Department of Veterans' Affairs data is used to identify consultations linked to provider numbers. Even practitioners working for limited periods at the practice should have a provider number allocated for that period.

**3. PATIENT ELIGIBILITY FOR MEDICARE****3.1 Eligible Persons**

3.1.1 An "eligible person" means a person who resides legally in Australia and whose stay in Australia is not subject to any limitation as to time, but does not include a foreign diplomat or family (except where eligibility is expressly granted to such persons by the terms of a reciprocal health care agreement). A person covered by a reciprocal health care agreement is eligible for Medicare for services of immediate medical necessity.

3.1.2 The Health Insurance Act gives the Minister discretionary powers to either include or exclude certain persons or categories of persons for eligibility purposes under the Medicare arrangements.

3.1.3 Eligible persons must enrol with Medicare before benefits can be paid.

**3.2 Medicare Cards**

3.2.1 An eligible person who applies to enrol for Medicare benefits (using a Medicare Enrolment/Amendment Application) will be issued with a uniquely numbered Medicare Card which shows the Medicare Card number, the patient identifier number (reference number), the applicant's first given name, initial of second given name, surname, and an effective "valid to" date. These cards may be issued on an individual or family basis. Up to five persons may be listed on the one Medicare card, and up to nine persons may be listed under the one Medicare card number.

3.2.2 Medicare cards issued with the word "VISITOR" and a date means that at the time the card was issued, Medicare eligibility was restricted. These cards are issued to persons including visitors who have been determined to be eligible and eligible persons awaiting permanent resident status.

3.2.3 Special Medicare cards are issued to persons accessing Medicare under a Reciprocal Health Care Agreement. These cards differ in colour to the usual Medicare card, are endorsed "Reciprocal Health Care" and include a "Valid to" date.

**3.3 Health Care Expenses Incurred Overseas**

3.3.1 Medicare does NOT cover medical or hospital expenses or the cost of medical evacuation incurred outside Australia. It is recommended that Australian residents travelling overseas take out private traveller's or health insurance which offers adequate coverage for the countries to be visited. (See also Reciprocal Health Care Agreements.)

**3.4 Visitors to Australia and Temporary Residents**

3.4.1 Medicare benefits are generally not payable to visitors to Australia or temporary residents, although the Minister has power to extend eligibility to such persons in exceptional circumstances. People visiting Australia specifically for medical or hospital treatment are not eligible for Medicare benefits. (See also Reciprocal Health Care Agreements.)

3.4.2 All eligible visitors must enrol with Medicare to receive benefits. A practitioner can determine the eligibility period for visitors by checking the "valid to" date at the bottom right hand corner of the card.

**3.5 Reciprocal Health Care Agreements**

3.5.1 Visitors from countries with which Australia has Reciprocal Health Care Agreements are eligible for benefits for immediately necessary medical care under the Medicare Program. Likewise, Australians visiting these countries are entitled to health care under their public health schemes. Agreements are currently in place with New Zealand, the United Kingdom, the Netherlands, Sweden, Finland, Italy and Malta. Visitors are eligible for benefits for the duration of their stay, except in the case of Italy and Malta, where benefits are for six months only. With the exception of New Zealand, the Agreements provide diplomats and their families with full Medicare cover for the term of their stay, which is not restricted to immediately necessary treatment.

3.5.2 The Agreements provide for immediately necessary medical treatment only, that is, treatment for any episode of ill-health which requires prompt medical attention. Persons who require hospital treatment, and who seek cover under a reciprocal agreement, shall be entitled to admission to public hospitals as public patients only. The agreements do not include pre-arranged or elective treatment, or treatment as a private patient in a public or private hospital.

### **3.6 Workers' Compensation, Third Party Insurance, Damages, etc.**

3.6.1 From 1 February 1996, Medicare benefits are payable for medical expenses for professional services that are wholly covered by workers compensation or damages under a Commonwealth or State or Territory law.

3.6.2 The only exception to this is where a person has entered into a *reimbursement arrangement* with a compensation insurer. In such cases, a Medicare benefit is not payable. (A *reimbursement arrangement* is an agreement between a compensation claimant and the insurer stating that the medical expenses of the person will be paid by the insurer as and when they arise.)

3.6.3 The practitioner has the option to either bulk-bill Medicare or give the patient a private account as would normally occur with any other consultation.

3.6.4 There are arrangements in place to recover any Medicare benefits paid as a result of the injury once a settlement or judgement is made on the compensation claim. The recovery is done between the insurer or compensation payer, the compensable person and the Health Insurance Commission. These recovery arrangements do not impact on practitioners.

## **4. GENERAL PRACTICE**

### **4.1 General Practice Items**

4.1.1 Some of the items in the Medicare Benefits Schedule are only available to General Practitioners. For the purposes of the Medicare Benefits Schedule a General Practitioner is a medical practitioner who is:-

- Vocationally Registered under section 3F of the Health Insurance Act (see 4.3 below); or
- a holder of the Fellowship of the Royal Australian College of General Practitioners (FRACGP) who participates in, and meets the requirements for, quality assurance and continuing medical education as defined in the RACGP Quality Assurance and Continuing Education Programme; or
- undertaking an approved placement in general practice as part of a training program for general practice leading to the award of the FRACGP, or undertaking an approved placement in general practice as part of some other training program recognised by the RACGP as being of an equivalent standard.

### **4.2 Fellows of the RACGP and Trainees in General Practice**

4.2.1 A medical practitioner who is seeking recognition as a general practitioner, as a Fellow of the RACGP or as a general practice trainee should apply to the Manager, Health Benefits, Health Insurance Commission, at any of the Commission addresses listed in paragraph 2.9.

### **4.3 Vocational Registration of General Practitioners**

#### ***Recognition Method***

4.3.1 The criteria for registration as a vocationally registered general practitioner are certification from either:-

- the Royal Australian College of General Practitioners (RACGP); or
- a General Practice Recognition Eligibility Committee (GPREC); or
- the General Practice Recognition Appeal Committee (GPRAC),

that the practitioner's medical practice is or will be within 28 days predominantly general practice, and

- that the RACGP or the Eligibility Committee certifies that the practitioner is a Fellow of the RACGP; and
- the RACGP certifies that the practitioner meets its minimum requirements for taking part in continuing medical education and quality assurance programs.

4.3.2 The GPRAC will hear appeals from medical practitioners who are refused certification by either the RACGP or a GPREC.

4.3.3 The only training and experience which the RACGP regards as appropriate for eligibility will be the attainment of Fellowship of the RACGP.

4.3.4 In assessing whether a practitioner's medical practice is predominately general practice, the RACGP and GPRECs/GPRAC will consider only services eligible for Medicare benefits. To qualify, 50% of this clinical time and services claimed against Medicare must be in general practice as defined. The RACGP and GPRECs/GPRAC will have regard to whether the practitioner provides a comprehensive primary medical service, including treating a wide range of patients and conditions using a variety of accepted medical skills and techniques, providing services away from the practitioner's surgery on request, for example, home visits and making appropriate provision for the practitioner's patients to have access to after hours medical care.

4.3.5 All enquiries concerning eligibility for registration should be directed to the RACGP at 52 Parramatta Road, Forest Lodge, NSW, 2037, or to the GPREC, Health Insurance Commission, PO Box 1001, Tuggeranong, ACT 2901.

#### ***How to Apply for Registration***

4.3.6 To be listed on the register, application on the approved form must be made to the RACGP or a GPREC for certification of eligibility. The RACGP or the GPREC will notify the Health Insurance Commission of the eligibility status of the practitioner for inclusion on the VR register.

4.3.7 The RACGP and GPREC address for the purpose of submission of applications for registration as a vocationally registered general practitioner are:

The Secretary-General  
The Royal Australian College of General Practitioners  
52 Parramatta Road  
FOREST LODGE NSW 2037

Secretary  
General Practice Recognition Eligibility Committee  
Health Insurance Commission  
PO Box 1001  
TUGGERANONG ACT 2901

4.3.8 Continued vocational registration is dependent upon involvement in appropriate Continuing Medical Education (CME) and Quality Assurance (QA) programs approved by the RACGP, and the practitioner continuing to be predominantly in general practice.

4.3.9 All enquiries regarding the QA and CME requirements should be directed to the RACGP at 52 Parramatta Road, Forest Lodge, NSW, 2037.

#### ***Removal from Vocational Register***

4.3.10 A medical practitioner may at any time request the Managing Director of the Health Insurance Commission to remove his/her name from the Vocational Register of General Practitioners.

4.3.11 Provision also exists for removal of a medical practitioner from the Vocational Register where the RACGP or a GPREC is no longer satisfied that the practitioner should remain on the Register. Examples of reasons for which a practitioner might be removed are:-

- the practitioner's medical practice is no longer predominantly general practice;
- the RACGP's minimum requirements for involvement in continuing Medical Education and Quality Assurance programs have not been met by the practitioner.

4.3.12 Appeals against removal may be made to the GPRAC, at the Health Insurance Commission, PO Box 1001, Tuggeranong, ACT, 2901.

4.3.13 Practitioners removed from the register for any reason must make a formal application to re-enter the register.

## **5. RECOGNITION AS A SPECIALIST OR CONSULTANT PHYSICIAN**

### **5.1 Recognition Method**

5.1.1 A medical practitioner who, having made formal application and paid the prescribed fee, and who:-

- is registered as a specialist under State or Territory law; or
- holds a fellowship of a specified specialist College; or
- is considered eligible for recognition as a specialist or consultant physician by a Specialist Recognition Advisory Committee;

may be recognised by the Minister as a specialist or consultant physician for the purposes of the Health Insurance Act.

5.1.2 A medical practitioner who:-

- is training towards a fellowship of a specified specialist College; or
- is considered eligible for recognition as a specialist or consultant physician trainee by a Specialist Recognition Advisory Committee;

should apply to the Manager, Health Benefits, Health Insurance Commission, at any of the Commission addresses listed in paragraph 2.9, to be recognised as a specialist or consultant physician trainee.

5.1.3 There is provision for appeal to a Specialist Recognition Appeal Committee by medical practitioners who have not been recommended for recognition as specialists or consultant physicians or specialist or consultant physician trainees by an Advisory Committee.

5.1.4 Where a medical practitioner has been recognised as a specialist or consultant physician for the purposes of the Health Insurance Act, Medicare benefits are payable at the appropriate higher rate in respect of certain services rendered by the practitioner in the practice of the recognised specialty, provided (other than in the case of examination by specialist anaesthetists in preparation for anaesthesia - see paragraph 6.3.1) the patient has been referred in accordance with paragraph 6.

5.1.5 All enquiries concerning the recognition of specialists and consultant physicians or specialist or consultant physician trainees should be directed to the Provider Liaison Section, Health Insurance Commission, PO Box 9822 in your State capital city. ACT and NT enquiries should be directed to NSW. Telephone enquiries can be directed to 132150 for the cost of a local call.

### **5.2 Emergency Medicine**

5.2.1 For these purposes the following will determine when a practitioner is acting within the speciality of emergency medicine:-

Where the patient is treated by the medical practitioner within 30 minutes of presentation, and that patient is:

- (a) at risk of serious morbidity or mortality requiring urgent assessment and resuscitation; or
- (b) suffering from suspected acute organ or system failure; or
- (c) suffering from an illness or injury where the viability or function of a body part or organ is acutely threatened; or

- (d) suffering from a drug overdose, toxic substance or toxin effect; or
- (e) experiencing severe psychiatric disturbance whereby the health of the patient or other people is at immediate risk; or
- (f) suffering acute severe pain where the viability or function of a body part or organ is suspected to be acutely threatened; or
- (g) suffering acute significant haemorrhage requiring urgent assessment and treatment; and
- (h) treated in, or via, a bona fide emergency department in a hospital.

5.2.2 Benefits are not payable where such services are rendered in the accident and emergency departments or outpatient departments of public hospitals.

## **6. REFERRAL OF PATIENTS TO SPECIALISTS OR CONSULTANT PHYSICIANS**

### **6.1 Purpose**

6.1.1 For certain services provided by specialists and consultant physicians the Medicare benefit payable is dependent on acceptable evidence that the service has been provided following referral from another practitioner.

6.1.2 A reference to a referral in this Section does not refer to written requests made for pathology services or diagnostic imaging services.

### **6.2 What is a Referral**

6.2.1 A "referral" is a request to a specialist or a consultant physician for investigation, opinion, treatment and/or management of a condition or problem of a patient or for the performance of a specific examination(s) or test(s).

6.2.2 Subject to the exceptions in paragraph 6.2.3 below, for a valid "referral" to take place:-

- (i) the referring practitioner must have turned his or her mind to the patient's need for referral and communicate relevant information about the patient to the specialist or consultant physician (but this does not necessarily mean an attendance on the occasion of the referral);
- (ii) the instrument of referral must be in writing by way of a letter or note to a specialist or to a consultant physician and must be signed and dated by the referring practitioner; and
- (iii) the specialist or consultant physician to whom the patient is referred must have received the instrument of referral on or prior to the occasion of the professional service to which the referral relates.

6.2.3 The exceptions to the requirements in paragraph 6.2.2 are that:-

- (a) sub-paragraphs (i), (ii) and (iii) do not apply to:
  - an examination of a patient by a specialist anaesthetist in preparation for the administration of an anaesthetic (Item 17603);
- (b) sub-paragraphs (ii) and (iii) do not apply to:
  - a referral generated within a hospital, in respect of a privately admitted patient for a service within that hospital, where the hospital records provide evidence of a referral (including the referring practitioner's signature); or
  - an emergency situation where the referring practitioner or the specialist or the consultant physician was of the opinion that the service be rendered as quickly as possible; and
- (c) sub-paragraph (iii) does not apply to:
  - instances where a written referral was completed by a referring practitioner but was lost, stolen or destroyed.

**NOTE:** *"For these purposes an emergency is a situation where the patient is treated by the medical practitioner within thirty minutes of presentation, and that patient is:-*

- (a) *at risk of serious morbidity or mortality requiring urgent assessment and resuscitation; or*
- (b) *suffering from suspected acute organ or system failure; or*
- (c) *suffering from an illness or injury where the viability or function of a body part or organ is acutely threatened; or*
- (d) *suffering from drug overdose, toxic substance or toxin effect; or*
- (e) *experiencing severe psychiatric disturbance whereby the health of the patient or other people is at immediate risk;*  
*or*
- (f) *suffering acute severe pain where the viability or function of a body part or organ is suspected to be acutely threatened; or*
- (g) *suffering acute significant haemorrhage requiring urgent assessment and treatment."*

### **6.3 Examination by Specialist Anaesthetists**

6.3.1 A referral letter or note is not required in the case of Item 17603 - Examination of a patient in preparation for the administration of an anaesthetic. The specialist rate of benefit is payable provided the service is rendered by a specialist anaesthetist. However, for benefits to be payable at the specialist rate for consultations by specialist anaesthetists (other than for a pre-operative examination) a referral is required.

### **6.4 Who can Refer**

6.4.1 Referrals are to be made as follows:-

- (a) to a recognised consultant physician -

- (i) by another medical practitioner; or
- (ii) by an approved dental practitioner (oral surgeon), where the referral arises out of a dental service;
- (b) to a recognised specialist -
  - (i) by another medical practitioner; or
  - (ii) by a registered dental practitioner, where the referral arises out of a dental service; or
  - (iii) by a registered optometrist where the specialist is an ophthalmologist.

6.4.2 The general practitioner is regarded as the primary source of referrals. Cross referrals between specialists and/or consultant physicians should usually occur in consultation with the patient's general practitioner.

## 6.5 Billing

### *Routine Referrals*

6.5.1 In addition to the usual information required to be shown on accounts, receipts or assignment forms (see paragraph 7 of these notes), specialists and consultant physicians must show the following details (unless there are special circumstances as indicated in paragraph 6.5.2):-

- name and either practice address or provider number of the referring practitioner;
- date of referral; and
- period of referral (where other than for 12 months) expressed in months, e.g. "3", "6" or "18" months, or "indefinitely" should be shown.

### *Special Circumstances*

6.5.2 (i) Lost, stolen or destroyed referrals.

If a referral has been made but the letter or note of referral has been lost, stolen or destroyed, benefits will be payable at the referred rate if the account, receipt or the assignment form shows the name of the referring medical practitioner, the practice address or provider number of the referring practitioner (if either of these are known to the consultant physician or specialist) and the words 'Lost referral'. This provision only applies to the initial attendance. For subsequent attendances to attract Medicare benefits at the referred rate a duplicate or replacement letter of referral must be obtained by the specialist or the consultant physician.

(ii) Emergency situations - (see note at paragraph 6.2.3 for definition of an emergency situation).

If the referral occurred in an emergency situation, benefit will be payable at the referred rate if the account, receipt or assignment form is endorsed 'Emergency referral'. This provision only applies to the initial attendance. For subsequent attendances to attract Medicare benefits at the referred rate the specialist/consultant physician must obtain a letter of referral.

(iii) Hospital referrals.

• Private Patients - Where a referral is generated within a hospital in respect of a privately admitted patient for a service within that hospital, benefits will be payable at the referred rate if the account, receipt or assignment form is endorsed 'Referral within (name of hospital)' and the patient's hospital records show evidence of the referral (including the referring practitioner's signature). However, in other instances where a medical practitioner within a hospital is involved in referring a patient (eg to a specialist or a consultant physician in private rooms) the normal referral arrangements apply, including the requirement for a referral letter or note and its retention by the specialist or the consultant physician billing for the service.

• Medicare Hospital Patients - Under the Commonwealth/State Medicare Agreements, hospitals are obliged to provide aftercare services to Medicare hospital patients wherever possible. Where a patient admitted as a public patient is treated by a specialist or consultant physician and on discharge is referred to that same specialist or consultant physician for follow-up or aftercare in private practice because the hospital is unable to meet its responsibilities under the Medicare Agreements, a referral letter or note from a medical practitioner at the hospital is required. In such circumstances, the relevant subsequent attendance item should be claimed.

### *Direct Billing*

6.5.3 Direct billing assignment forms should show the same information as detailed above. However, faster processing of the claim will be facilitated where the provider number (rather than the practice address) of the referring practitioner is shown.

## 6.6 Period for which Referral is Valid

### *Specialist Referrals*

6.6.1 Where a referral originates from a specialist or a consultant physician, the referral is valid for 3 months, except where the referred patient is an in-patient. For in-patients, the referral is valid for 3 months or the duration of the admission whichever is the longer.

6.6.2 As it is expected that the patient's general practitioner will be kept informed of the patient's progress, a referral from a specialist or a consultant physician must include the name of the patient's general practitioners and/or practice. Where a patient is unable or unwilling to nominate a general practitioner or practice this must be stated in the referral.

### *Referrals by other Practitioners*

6.6.3 Where the referral originates from a practitioner other than those listed in 6.6.1, the referral is valid for a period of 12

months, unless the referring practitioner indicates that the referral is for a period more or less than 12 months (eg. 3, 6 or 18 months or valid indefinitely). Referrals for longer than 12 months should only be used where the patient's clinical condition requires continuing care and management of a specialist or a consultant physician for a specific condition or specific conditions.

6.6.4 The referral is valid for the period specified in the referral which is taken to be the date of the specialist's or consultant physician's first service.

### **6.7 Definition of a Single Course of Treatment**

6.7.1 A single course of treatment involves an initial attendance by a specialist or consultant physician and the continuing management/treatment up to the stage where the patient is referred back to the care of the referring practitioner. It also includes any subsequent review of the patient's condition by the specialist or the consultant physician that may be necessary. Such a review may be initiated by either the referring practitioner or the specialist/consultant physician.

6.7.2 The presentation of an unrelated illness, requiring the referral of the patient to the specialist's or the consultant physician's care would initiate a new course of treatment in which case a new referral would be required.

6.7.3 The receipt by a specialist or consultant physician of a new referral following the expiration of a previous referral for the same condition(s) does not necessarily indicate the commencement of a new course of treatment involving the itemisation of an initial consultation. In the continuing management/treatment situation the new referral is to facilitate the payment of benefits at the specialist or the consultant physician referred rates rather than the unreferred rates.

6.7.4 However, where the referring practitioner:-

- (a) deems it necessary for the patient's condition to be reviewed; and
- (b) the patient is seen by the specialist or the consultant physician outside the currency of the last referral; and
- (c) the patient was last seen by the specialist or the consultant physician more than 9 months earlier

the attendance following the new referral initiates a new course of treatment for which Medicare benefit would be payable at the initial consultation rates.

### **6.8 Retention of Referral Letters**

6.8.1 The prima facie evidence that a valid referral exists is the provision of the referral particulars on the specialist's or the consultant physician's account.

6.8.2 A specialist or a consultant physician is required to retain the instrument of referral (and a hospital is required to retain the patient's hospital records which show evidence of a referral) for 18 months from the date when the service was rendered.

6.8.3 A specialist or a consultant physician is required, if requested by the Managing Director of the Health Insurance Commission, to produce to a Medical Adviser, who is an officer of the Commission, the instrument of referral within seven days after the request is received. Where the referral originates in an emergency situation or in a hospital, the specialist or consultant physician is required to produce such information as is in his or her possession or control relating to whether the patient was so treated.

### **6.9 Attendance for Issuing of a Referral**

6.9.1 Medicare benefit is attracted for an attendance on a patient even where the attendance is solely for the purpose of issuing a referral letter or note. However, if a medical practitioner issues a referral without an attendance on the patient, no benefit is payable for any charge raised for issuing the referral.

### **6.10 Locum-tenens Arrangements**

6.10.1 It should be noted that where a non-specialist medical practitioner acts as a locum-tenens for a specialist or consultant physician, or where a specialist acts as a locum-tenens for a consultant physician, Medicare benefit is only payable at the level appropriate for the particular locum-tenens, eg. general practitioner level for a general practitioner locum-tenens and specialist level for a referred service rendered by a specialist locum tenens.

6.10.2 Medicare benefits are not payable where a practitioner not eligible to provide services attracting Medicare benefits acts as a locum-tenens for any practitioner who is eligible to provide services attracting Medicare benefits.

6.10.3 Fresh referrals are not required for locum-tenens acting according to accepted medical practice for the principal of a practice i.e. referrals to the latter are accepted as applying to the former and benefit is not payable at the initial attendance rate for an attendance by a locum-tenens if the principal has already performed an initial attendance in respect of the particular instrument of referral.

### **6.11 Self Referral**

6.11.1 Medical practitioners may refer themselves to consultant physicians and specialists and Medicare benefits are payable at referred rates.

### **6.12 Referrals by Dentists or Optometrists**

6.12.1 For Medicare benefit purposes, a referral may be made to:-

- (i) a recognised specialist:
  - (a) by a registered dental practitioner, where the referral arises out of a dental service; or
  - (b) by a registered optometrist where the specialist is an ophthalmologist; or

(ii) a consultant physician, by an approved dental practitioner (oral surgeon), where the referral arises out of a dental service.

6.12.2 In any other circumstances (i.e. a referral to a consultant physician by a dentist, other than an approved oral surgeon, or an optometrist, or a referral by an optometrist to a specialist other than a specialist ophthalmologist), it is not a valid referral. Any resulting consultant physician or specialist attendances will attract Medicare benefits at unreferral rates.

6.12.3 Registered dentists and registered optometrists may refer themselves to specialists in accordance with the criteria above, and Medicare benefits are payable at the levels which apply to their referred patients.

## 7. BILLING PROCEDURES

### 7.1 Itemised Accounts

7.1.1 Where the doctor bills the patient for medical services rendered, the patient needs a properly itemised account/receipt to enable a claim to be made for Medicare benefits.

7.1.2 Under the provisions of the Health Insurance Act and Regulations, Medicare benefits are not payable in respect of a professional service unless there is recorded on the account setting out the fee for the service or on the receipt for the fee in respect of the service, the following particulars:-

- (i) patient's name;
- (ii) the date on which the professional service was rendered;
- (iii) a description of the professional service sufficient to identify the item that relates to that service, including an indication where the service is rendered to a person while hospital treatment (i.e., accommodation and nursing care) is provided in a hospital or day hospital facility (other than a Medicare hospital patient), that is, the words 'admitted patient' immediately preceding the description of the service or an asterisk '\*' directly after an item number where used;
- (iv) the name and practice address or name and provider number of the practitioner who actually rendered the service; (where the practitioner has more than one practice location recorded with the Health Insurance Commission, the provider number used should be that which is applicable to the practice location at or from which the service was given);
- (v) the name and practice address or name and provider number of the practitioner claiming or receiving payment of benefits, or assignment of benefit:-
  - for services in Groups A1 to A10, D1, T1, T4 to T9 of the General Medical Services, Groups O1 to O7 (Oral and Maxillo Facial services), and Group P9 of Pathology - where the person claiming payment is NOT the person who rendered the service;
  - for services in Groups D2, T2, T3, I2, I3, and I5 - for every service;
- (vi) if the service was a Specified Simple Basic Pathology Test (listed in Category 6 - Pathology, Group P9 of the Schedule) that was determined necessary by a practitioner who is another member of the same group medical practice, the surname and initials of that other practitioner;
- (vii) where a practitioner has attended the patient on more than one occasion on the same day and on each occasion rendered a professional service to which an item in Category 1 of the Medicare Benefits Schedule relates (i.e. professional attendances), the time at which each such attendance commenced; and
- (viii) where the professional service was rendered by a consultant physician or a specialist in the practice of his/her speciality to a patient who has been referred:- (a) the name of the referring medical practitioner; (b) the address of the place of practice or provider number in respect of that place of practice; (c) the date of the referral; and (d) the period of referral (where other than for 12 months) expressed in months, e.g. "3", "6" or "18" months, or "indefinitely".

(NOTE: If the information required to be recorded on accounts, receipts or assignment of benefit forms is included by an employee of the practitioner, the practitioner claiming payment for the service bears responsibility for the accuracy and completeness of the information).

7.1.3 Practitioners should note that payment of claims could be delayed or disallowed where it is not possible from account details to clearly identify the service as one which qualifies for Medicare benefits, or the practitioner as a registered medical practitioner at the address the service was rendered. Practitioners are therefore encouraged to provide as much detail as possible on their accounts, including Medicare Benefits Schedule item number and provider number.

### 7.2 Pre-admission, Post-discharge and Outpatient Services

7.2.1 Practitioners are required to identify all outpatient, pre-admission and post-discharge services on their accounts, receipts, direct billed claims and pathology or diagnostic imaging requests. It is not necessary to specify the type of service, merely that it was an outpatient or pre-admission or post-discharge service.

7.2.2 The following services should be identified:-

*Pre-admission services*- A service provided in the month prior to a patient's planned admission to hospital (either public or private) or day surgery facility that relates to that admission. This does not include the consultation at which it is decided to admit the patient to hospital.

*Post-discharge services*- A service provided in the month following a patient's discharge from hospital (either public or private), or day surgery facility that relates to that person's hospital /day surgery treatment.

*Outpatient type services*- A service provided to a patient who was referred or redirected for treatment after presenting at an emergency or outpatient clinic of a public hospital, and a service provided at a public hospital on a non-admitted patient basis.

*Pathology or diagnostic imaging services*- Request made as part of the above services.

7.2.3 The following identification methods should be used:-

*Patient account/receipt* - an "A" immediately following the item number/item description.

*Direct-billed claim* - lodge the claim under the DB1C claim form provided by the Health Insurance Commission.

*Diagnostic imaging request* - an "A" immediately following the item number/item description.

*Pathology request* - an "A" immediately following the item number/item description or tick the box on the request form.

### **7.3 Claiming of Benefits**

7.3.1 The patient, upon receipt of a doctor's account, has two courses open for paying the account and receiving benefits.

### **7.4 Paid Accounts**

7.4.1 The patient may pay the account and subsequently present the receipt at a Medicare customer service centre for assessment and payment of the Medicare benefit in cash.

7.4.2 In these circumstances, where a claimant personally attends a customer service centre, the claimant is not required to complete a Medicare Patient Claim Form (PC1).

7.4.3 In circumstances where the claimant is seeking a cheque payment of the Medicare benefit or is arranging for an agent to receive the Medicare benefit on the claimant's behalf, completion of a Medicare Patient Claim Form (PC1) is still required.

### **7.5 Unpaid Accounts**

7.5.1 Where the patient has not paid the account, the unpaid account may be presented to Medicare with a Medicare claim form. In this case Medicare will forward to the claimant a benefit cheque made payable to the doctor.

7.5.2 It will be the patient's responsibility to forward the cheque to the doctor and make arrangements for payment of the balance of the account if any. "Pay doctor" cheques involving Medicare benefits, by law, must not be sent direct to medical practitioners or to patients at a doctor's address (even if requested by the claimant to do so). "Pay doctor" cheques are required to be forwarded to the claimant's last known address.

7.5.3 When issuing a receipt to a patient in respect of an account that is being paid wholly or in part by a Medicare "pay doctor" cheque the medical practitioner should indicate on the receipt that a "Medicare" cheque for \$..... was involved in the payment of the account.

### **7.6 Assignment of Benefit (Direct-Billing) Arrangements**

7.6.1 Under the Health Insurance Act an Assignment of Benefit (direct-billing) facility for professional services is available to all persons in Australia who are eligible for benefit under the Medicare program. This facility is NOT confined to pensioners or people in special need. If a medical practitioner direct-bills, he/she undertakes to accept the relevant Medicare benefit as full payment for the service. Additional charges for that service (irrespective of the purpose or title of the charge) cannot be raised against the patient. Under these arrangements:-

- the patient's Medicare number must be quoted on all direct-bill assignment forms for that patient;
- the assignment forms provided are loose leaf to enable the patient details to be imprinted from the Medicare Card;
- the forms include information required by Regulations under Section 19(6) of the Health Insurance Act;
- the doctor must cause the particulars relating to the professional service to be set out on the assignment form, before the patient signs the form and cause the patient to receive a copy of the form as soon as practicable after the patient signs it;
- where a patient is unable to sign the assignment form, the signature of the patient's parent, guardian or other responsible person (other than the doctor, doctor's staff, hospital proprietor, hospital staff, nursing home proprietor or nursing home staff) is acceptable. The reason the patient is unable to sign should also be stated. In the absence of a "responsible person" the patient signature section should be left blank and in the section headed 'Practitioner's Use', an explanation should be given as to why the patient was unable to sign (e.g. unconscious, injured hand etc.) and this note should be signed or initialled by the doctor. If in the opinion of the practitioner the reason is of such a "sensitive" nature that revealing it would constitute an unacceptable breach of patient confidentiality or unduly embarrass or distress the recipient of the patient's copy of the assignment of benefits form, a concessional reason "due to medical condition" to signify that such a situation exists may be substituted for the actual reason. However, this should not be used routinely and in most cases it is expected that the reason given will be more specific.

### **7.7 Use of Medicare Cards in Direct Billing**

7.7.1 The Medicare card plays an important part in direct billing as it can be used to imprint the patient details (including Medicare number) on the assignment forms. A special Medicare imprinter is used for this purpose and is available free of charge,

on request, from Medicare.

7.7.2 The patient details can, of course, be entered on the assignment forms by hand, but the use of a card to imprint patient details assists practitioners and ensures accuracy of information. The latter is essential to ensure that the processing of a claim by Medicare is expedited.

7.7.3 The Medicare card number must be quoted on assignment forms. If the number is not available, then the direct-billing facility should not be used. To do so would incur a risk that the patient may not be eligible and Medicare benefits not payable.

7.7.4 Where a patient presents without a Medicare card and indicates that he/she has been issued with a card but does not know the details, the practitioner may contact a Medicare telephone enquiry number to obtain the number.

7.7.5 It is important for the practitioner to check the eligibility of patients to Medicare benefits by reference to the card, as enrollees have entitlement limited to the date shown on the card and some enrollees, e.g. certain visitors to Australia, have restricted access to Medicare (see paragraphs 3.4 and 3.5).

## **7.8 Assignment of Benefit Forms**

7.8.1 To meet varying requirements the following types of stationery are available from Medicare. Note that these are approved forms under the Health Insurance Act, and no other forms can be used to assign benefits without the approval of the Health Insurance Commission.

- (1) Form DB2-GP. This form is designed for the use of optical scanning equipment and is used to assign benefits for General Practitioner Services other than requested pathology, specialist and optometrical services. It is loose leaf for imprinting and comprises a throw away cover sheet (after imprinting), a Medicare copy, a Practitioner copy and a Patient copy. There are 4 pre-printed items with provision for two other items. The form can also be used as an "offer to assign" when a request for pathology services is sent to an approved pathology practitioner and the patient does not attend the laboratory.
- (2) Form DB2-OP. This form is designed for the use of optical scanning equipment and is used to assign benefits for optometrical services. It is loose leaf to enable imprinting of patient details from the Medicare card and is similar in most respects to Form DB2-GP, except for content variations. This form may not be used as an offer to assign pathology services.
- (3) Form DB2-OT. This form is designed for the use of optical scanning equipment and is used to assign benefits for all specialist services. It is loose leaf to enable imprinting of patient details from the Medicare card and is similar in most respects to Form DB2-GP, except for content variations. There are no pre-printed items on this form.
- (4) Form DB3. This is used to assign or offer to assign benefits for pathology tests rendered by approved pathology practitioners. It is loose leaf to enable imprinting of patient details from the Medicare card and is similar in most respects to Form DB2, except for content variations. The form may not be used for services other than pathology.
- (5) Form DB4. This is a continuous stationery version of the DB2, and has been designed for use on most office accounting machines.
- (6) Form DB5. This is a continuous stationery form for pathology services which can be used on most office machines. It cannot be used to assign benefits and must therefore be accompanied by an offer to assign (Form DB2, DB3 or DB4) or other form approved by the Health Insurance Commission for that purpose.

## **7.9 The Claim for Assigned Benefits (Form DB1, DB1H)**

7.9.1 Practitioners who accept assigned benefits must claim from Medicare using either Claim for Assigned Benefits form DB1 or DB1H. The DB1H form should be used where services are rendered to persons while hospital treatment is provided in a hospital or day hospital facility (other than Medicare hospital patients). Both forms have been designed to enable benefit for a claim to be directed to a practitioner other than the one who rendered the services. The facility is intended for use in situations such as where a short term locum is acting on behalf of the principal doctor and setting the locum up with a provider number and pay-group link for the principal doctor's practice is impractical. Practitioners should note that this facility cannot be used to generate payments to or through a person who does not have a provider number.

7.9.2 Each claim form must be accompanied by the assignment forms to which the claim relates.

7.9.3 The DB1 and DB1H are also loose leaf to enable imprinting of practitioner details using the special Medicare imprinter. For this purpose, practitioner cards, showing the practitioner's name, practice address and provider number are available from Medicare on request.

## **7.10 Direct-Bill Stationery**

- 7.10.1 Medical practitioners wishing to direct-bill may obtain information on direct-bill stationery by telephoning 132150.
- Form DB6A. This form is used to order stocks of forms DB3, DB4 and DB5 and where a practitioner uses these forms, DB1 and DB1H. These forms are available from Medicare.
  - Form DB6B. This form is used to re-order kits for optical scanning stationery which comprise DB2's (GP, OP and OT), DB1's pre addressed envelopes and an instruction sheet for the use of direct-bill scanning stationery. The scanning stationery is only available in kit form. This form is supplied with the kit and is returned directly to the printer. Medicare is unable to provide information on the status of these orders.

## **7.11 Time Limits Applicable to Lodgement of Claims for Assigned Benefits**

7.11.1 A time limit of six months applies to the lodgement of claims with Medicare under the direct-billing (assignment of benefits) arrangements. This means that Medicare benefits are not payable for any service where the service was rendered more than six months earlier than the date the claim was lodged with Medicare.

7.11.2 Provision exists whereby in certain circumstances (e.g. hardship cases, third party workers' compensation cases), the Minister may waive the time limits. Special forms for this purpose are available, if required, from the processing centre to which assigned claims are directed.

## **8. PROVISION FOR REVIEW OF INDIVIDUAL DOCTORS, INDIVIDUAL CLAIMS AND SCHEDULE SERVICES**

### **Doctors**

#### **8.1 Professional Services Review Committees (PSRC)**

8.1.1 Professional Services Review Committees may be established to examine the conduct of a practitioner in connection with the rendering or initiating of services to ascertain if the practitioner has engaged in inappropriate practice for the purposes of Medicare.

8.1.2 Section 82 of the Health Insurance Act defines inappropriate practice as conduct that is such that a Professional Services Review Committee could reasonably conclude would be unacceptable to the general body of the members of the specialty in which the practitioner was practising when he or she rendered or initiated the services. For these purposes, general medical practice is taken to be a specialty.

8.1.3 A Professional Services Review Committee will normally consist of three medically qualified members of whom two must belong to the same specialty as the practitioner whose conduct is the subject of review. If considered desirable, however, an additional two members may be appointed to a Committee to give it a wider range of clinical expertise.

8.1.4 The decision to establish a Professional Services Review Committee will be made by the independent Director of Professional Services Review after receiving a referral for the review of a practitioner's conduct from the Health Insurance Commission.

8.1.5 Having regard to the case presented by the Health Insurance Commission, the Director has the power to dismiss a referral, to set up a Professional Services Review Committee or to enter into a written arrangement with the practitioner under which the practitioner agrees to partial disqualification from Medicare.

#### **8.2 Professional Services Review Tribunal (PSRT)**

8.2.1 The functions of the Tribunal are to consider requests for a review of determinations made under Section 106T of the Health Insurance Act in respect of findings by a Professional Services Review Committee that a practitioner has engaged in inappropriate practice.

8.2.2 The PSRT may affirm, set aside or vary a determination.

8.2.3 The PSRT consists of a President, who is or has been the holder of a judicial office, and two other members, both of whom are required to be medical practitioners.

#### **8.3 Medicare Participation Review Committee (MPRC)**

8.3.1 The Medicare Participation Review Committees determine what administrative action should be taken against a practitioner who has been successfully prosecuted for medifraud.

8.3.2 The Committees have a discretionary range of options from taking no further administrative action against the practitioner to counselling and reprimand and full or partial disqualification from participating in the Medicare benefit arrangements for up to five years.

### **Schedule Services**

#### **8.4 Medicare Benefits Advisory Committee (MBAC)**

8.4.1 This Committee is established under the provisions of Section 66 of the Health Insurance Act. Membership of the Committee consists of representatives of the medical profession and the Commonwealth Government. There are eight members on the Committee, five of whom must be medical practitioners.

8.4.2 The functions of the Committee are to consider references to it by the Minister under Sections 19A and 3C of the Health Insurance Act relating to whether Medicare benefits should be payable for a particular procedure or treatment.

#### **8.5 Medicare Benefits Consultative Committee (MBCC)**

8.5.1 The MBCC is an informal advisory committee established by agreement between the Minister and the Australian Medical Association. The Committee consists of representatives of the Department, the Health Insurance Commission, the Australian Medical Association and relevant craft groups of the medical profession.

8.5.2 The major function undertaken by the Committee is the review of particular services or groups of services within the

Medicare Benefits Schedule, including consideration of appropriate fee levels.

#### **8.6 Medicare Services Advisory Committee (MSAC)**

8.6.1 A Medicare Services Advisory Committee will be established to advise the Minister on the strength of evidence relating to the safety, efficacy and cost effectiveness of new medical services and technologies before they are considered for inclusion in the Medicare Benefits Schedule.

8.6.2 Once established, the Committee is expected to oversee the assessment functions relating to unlisted services previously undertaken by the Medicare Benefits Advisory Committee and the Medicare Benefits Consultative Committee.

8.6.3 The membership of the Committee has not yet been determined.

#### **8.7 Pathology Services Table Committee (PSTC)**

8.7.1 This informal Committee is established under Section 136 of the National Health Act 1953. It consists of five representatives from the interested professions and five from the Commonwealth.

8.7.2 The Committee's primary role is to advise the Minister on the need for changes to the structure and content of the Pathology Services Table including the level of fees.

### **9. PENALTIES AND LIABILITIES**

#### **9.1 Penalties**

9.1.1 Penalties of up to \$10,000 or imprisonment for up to five years, or both, may be imposed on any person who makes a statement (either orally or in writing) or who issues or presents a document that is false or misleading in a material particular and which is capable of being used in connection with a claim for benefits. In addition, any practitioner who is found guilty of such offences by a court (on or after 22 February 1986) shall be subject to examination by a Medicare Participation Review Committee and may be counselled or reprimanded or may have services wholly or partially disqualified from the Medicare benefit arrangements.

9.1.2 A penalty of up to \$1000 or imprisonment for up to three months, or both, may be imposed on any person who obtains a patient's signature on a direct-billing form without the necessary details having been entered on the form before signature or who fails to cause a patient to be given a copy of the completed form.

# GENERAL NOTES FOR GUIDANCE OF USERS

## 10. SCHEDULE FEES AND MEDICARE BENEFITS

### 10.1 Schedule Fees and Medicare Benefits

10.1.1 Medicare benefits are based on fees determined for each medical service, with uniform fees for each service in each State. The fee is referred to in these notes as the "Schedule fee". The fee for any item listed in the Schedule is that which is regarded as being reasonable on average for that service having regard to usual and reasonable variations in the time involved in performing the service on different occasions and to reasonable ranges of complexity and technical difficulty encountered. In some cases two levels of fees are applied to the same service in General Medical Services, with each level of fee being allocated a separate item number. The item identified by the letter "S" applies in the case where the procedure has been rendered by a recognised specialist in the practice of his or her speciality and the patient has been referred. The item identified by the letter "G" applies in any other circumstances.

10.1.2 As a general rule Schedule fees are adjusted on an annual basis. The current Schedule fees came into operation on 1 November 1997.

10.1.3 The Schedule fee and Medicare benefit levels for the medical services contained in the Schedule are located with the item descriptions. Where appropriate, the calculated benefit has been rounded to the nearest higher 5 cents. However, in no circumstances will the benefit payable for any service exceed the amount of the fee actually charged for that service.

There are presently two levels of Medicare benefit payable, that is :-

- (i) for professional services rendered while hospital treatment (i.e., accommodation and nursing care) is provided to a patient who has been admitted to a hospital or day hospital facility (other than Medicare hospital patients), the level of Medicare benefit is 75% of the Schedule fee for each item with no maximum patient gap between the Medicare benefit and the Schedule fee. The Health Insurance Regulations provide that medical practitioners must indicate on their accounts, etc, where a medical service is rendered in these circumstances. This requirement will be met by placing the word "admitted patient" immediately preceding the description of each service or, alternatively, where an item number is used, by placing an asterisk "\*" directly after the item number for each service.
- (ii) for all other professional services, the Medicare benefit is 85% of the Schedule fee, or the Schedule fee less \$50.10 (indexed annually) whichever is the greater.

10.1.4 Public hospital treatment is available without direct charge to public patients.

10.1.5 A medical service rendered to a patient on the day of admission to, or day of discharge from hospital, but prior to admission or subsequent to discharge, will attract benefits at the 85% level not 75%. This also applies to a pathology service rendered to a patient prior to admission. Attendances on patients at a hospital (other than patients covered by paragraph 10.1.3 (i) above) attract benefits at the 85% level.

10.1.6 The 75% benefit level applies even though a portion of the service (eg. aftercare) may be rendered outside the hospital. With regard to obstetric items, benefits would be attracted at the 75% level where the confinement takes place in hospital.

10.1.7 Pathology tests performed after discharge from hospital on bodily specimens taken during hospitalisation also attract the 75% level of benefits.

10.1.8 It should be noted that the Health Insurance Act makes provision for private medical insurance to cover the "patient gap" (i.e., the difference between the Medicare rebate and the Schedule fee) for services attracting benefits at the 75% level. Patients may insure with private health insurance organisations for the gap between the 75% Medicare benefit and the Schedule fee or for amounts in excess of the Schedule fee where the patient's practitioner has a contract with the patient's health fund.

10.1.9 Where it can be established that payments of \$276.80 (indexed annually from 1 January) have been made by a family group or an individual during a calendar year in respect of the difference between the Medicare benefit and the Schedule fee for out-of-hospital services, benefits will be paid for expenses incurred for professional services rendered during the rest of that year up to 100% of the Schedule fee.

## 11. SERVICES NOT LISTED IN THE SCHEDULE

### 11.1 Services not Listed in Schedule

11.1.1 Benefits are not generally payable for services not listed in the Schedule. However, there are some procedural services which are not specifically listed because they are regarded as forming part of a consultation or else attract benefits on an attendance basis. Such services would include intramuscular injections, aspiration needle biopsy, treatment of solar keratoses and closed reduction of toe fracture. Further services for which benefits are payable on a consultation basis are identified in the indexes to this book.

11.1.2 Enquiries concerning services not listed or on matters of interpretation should be directed to the appropriate office of the Health Insurance Commission. Postal addresses are listed in paragraph 2.9 of these notes. Telephone enquiries should be directed to the numbers below; which are reserved for enquiries concerning the Schedule:

NSW - 02 95612212  
VIC - 03 92843661

QLD - 07 33607215  
SA & NT - 08 82018629

## **11.2 Ministerial Determinations**

11.2.1 Section 3C of the Health Insurance Act empowers the Minister to determine an item and Schedule fee (for the purposes of the Medicare benefits arrangements) for a service not included in the health insurance legislation. This arrangement is particularly useful in facilitating payment of benefits for newly developed techniques where close monitoring is desirable and where quick remedial action may become necessary. Services which have been so determined by the Minister are located in their relevant Groups in the Schedule but are identified by the notation "(Ministerial Determination)".

## **12. SERVICES ATTRACTING MEDICARE BENEFITS**

### **12.1 Professional Services**

12.1.1 Professional services which attract Medicare benefits include medical services rendered by or on behalf of a medical practitioner. Medical services which may be rendered "on behalf of" a medical practitioner include services where a portion of the service is performed by a technician employed by or, in accordance with accepted medical practice, acting under the supervision of the medical practitioner.

12.1.2 The health insurance regulations specify that the following medical services will attract benefits only if they have been personally performed by a medical practitioner on not more than one patient on the one occasion (i.e. two or more patients cannot be attended simultaneously although patients may be seen consecutively), other than an attendance on a person in the course of a group session (i.e. Items 170-172). The requirement of "personal performance" is met whether or not assistance is provided in the performance of the service according to accepted medical standards:-

- (a) All Category 1 (Professional Attendances) items (except 170-172 and 342-346);
- (b) Each of the following items in Group D1 (Miscellaneous Diagnostic):- 11012, 11015, 11018, 11021, 11212, 11304, 11500, 11600, 11601, 11627, 11701, 11712, 11921, 12000, 12003;
- (c) All Group T1 (Miscellaneous Therapeutic) items (except 13020, 13025, 13200-13206, 13212-13221, 13750-13760, 13915-13948, 14050 and 14053);
- (d) All Group T3 (Therapeutic Nuclear Medicine) items;
- (e) All Group T4 (Obstetrics) items (except 16514);
- (f) All Group T5 (Assistance in Administration of an Anaesthetic) items;
- (g) All Group T6 (Anaesthetics) items;
- (h) All Group T7 (Regional or Field Nerve Block) items;
- (i) All Group T8 (Operations) items;
- (j) All Group T9 (Assistance at Operations) items.

12.1.3 For the group psychotherapy and family group therapy services covered by Items 170, 171, 172, 342, 344 and 346, benefits are payable only if the services have been conducted personally by the medical practitioner.

12.1.4 Medicare benefits are not payable for these group items or any of the items listed in (a)-(j) above when the service is rendered by a medical practitioner employed by the proprietor of a hospital, not being a private hospital, other than when the practitioner is exercising his or her right of private practice or is performing a medical service outside the hospital. For example, benefits are not attracted when a hospital intern or registrar performs a service at the request of a staff specialist or visiting medical officer.

### **12.2 Services Rendered "On Behalf Of" Medical Practitioners**

12.2.1 Medical services not included in the above list (i.e. the items in Categories 5 and 6 of the Schedule together with those items in Categories 2 and 3 not specified above) continue to attract Medicare benefits if the service is rendered by:-

- (i) a medical practitioner;
- (ii) a person, other than a medical practitioner, who is employed by a medical practitioner or, in accordance with accepted medical practice, acts under the supervision of a medical practitioner.

12.2.2 In order that a service rendered by an employee or under the supervision of a medical practitioner can attract a Medicare rebate, the service must be billed in the name of the practitioner who must accept full responsibility for the service. The Health Insurance Commission would need to be satisfied with the employment and supervision arrangements. In this regard, while the supervising medical practitioner need not be present for the entire service, he or she must have a direct involvement in at least part of the service. Although the supervision requirements would vary depending on the test or examination being performed, they would, as a general rule, be satisfied where the medical practitioner has:-

- (i) established consistent quality assurance procedures for the data acquisition; and

(ii) personally analysed the data and written the report.

12.2.3 Benefits are not payable for these services when a medical practitioner refers patients to self-employed paramedical personnel, such as radiographers and audiologists, who either bill the patient or the practitioner requesting the service.

## **13. SERVICES WHICH DO NOT ATTRACT MEDICARE BENEFITS**

### **13.1 Services Not Attracting Benefits**

13.1.1 Medicare benefits are not payable for telephone consultations, for the issue of repeat prescriptions when the patient is not in attendance, and for group attendances (other than group attendances covered by Items 170, 171, 172, 342, 344 and 346) such as counselling, health education, weight reduction or fitness.

13.1.2 There are other services which are not regarded as being 'medical services' for the purposes of the payment of Medicare benefits. Services performed for cosmetic reasons, such as face lifts, eye-lid reduction, hair transplants (except in certain circumstances), etc do not attract benefits. Certain other services such as manipulations performed by physiotherapists do not qualify for Medicare benefit even though they may be done on the advice of a medical practitioner.

13.1.3 Medicare benefits are not payable for the performance of euthanasia, including any service directly related to the procedure. However, services rendered for counselling/assessment in relation to euthanasia would attract benefits.

### **13.2 Where Medicare Benefits are not Payable**

13.2.1 Medicare benefits are not payable in respect of a professional service in the following circumstances:-

- (a) where the medical expenses for the service are paid or payable to a recognised (public) hospital;
- (b) where the medical expenses for the service are wholly payable by way of compensation or damages under a State or Commonwealth or Territorial law or under a legal claim. However, where medical expenses are only partly recoverable in such cases, an appropriate portion of Medicare benefit is payable;
- (c) where the service is a medical examination for the purposes of - life insurance, superannuation or provident account scheme, or admission to membership of a friendly society;
- (d) where the service was rendered in the course of the carrying out of mass immunisation.

13.2.2 Unless the Minister otherwise directs, Medicare benefit is not payable in respect of a professional service where:-

- (a) the service has been rendered by or on behalf of, or under an arrangement with, the Commonwealth, a State or a local governing body or an authority established by a law of the Commonwealth, a law of a State or a law of an internal Territory;
- (b) the medical expenses were incurred by the employer of the person to whom the service was rendered;
- (c) the person to whom that service was rendered was employed in an industrial undertaking and that service was rendered to him/her for purposes connected with the operation of that undertaking; or
- (d) the service was a health screening service (see para 13.3 below).

13.2.3 The legislation empowers the Minister to make regulations to preclude the payment of Medicare benefits for professional services rendered in prescribed circumstances. Such regulations, however, may only be made in accordance with a recommendation made by the Medicare Benefits Advisory Committee (other than pathology services).

13.2.4 Regulations are currently in force to preclude the payment of Medicare benefits in the following circumstances:-

- (a) professional services rendered in relation to the provision of chelation therapy (that is to say the intravenous administration of ethylenediamine tetra-acetic acid or any of its salts) otherwise than for the treatment of heavy-metal poisoning;
- (b) professional services rendered in association with the injection of human chorionic gonadotrophin in the management of obesity;
- (c) professional services rendered in relation to the use of hyperbaric oxygen therapy in the treatment of multiple sclerosis;
- (d) professional services rendered for the purpose of, or in relation to, the removal of tattoos; and
- (e) professional services rendered for the purposes of, or in relation to:-
  - (i) the transplantation of a thoracic or abdominal organ, other than a kidney, or of a part of an organ of that kind; or
  - (ii) the transplantation of a kidney in conjunction with the transplantation of a thoracic or other abdominal organ, or part of an organ of that kind;if the services are rendered to an admitted patient of a hospital;
- (f) professional services rendered for the purposes of, or in relation to, the removal from a cadaver of kidneys for transplantation.

### **13.3 Health Screening Services**

13.3.1 Unless the Minister otherwise directs Medicare benefits are not payable for health screening services.

13.3.2 A health screening service is defined as a medical examination or test that is not reasonably required for the management of the medical condition of the patient. Services covered by this proscription include such items as - multiphasic health screening; mammography screening (except as provided for in Items 59300/59303); testing of fitness to undergo physical training programs,

vocational activities or weight reduction programs; compulsory examinations and tests to obtain a flying, commercial driving or other licence, entrance to schools and other educational facilities, for travel requirements and for the purposes of legal proceedings; compulsory examinations for admission to aged persons' accommodation and pathology services associated with clinical ecology.

13.3.3 Ministerial directions have been issued in respect of the following categories of health screening services that enable Medicare benefits to be payable for:-

- a medical examination or a test on a symptomless patient by that patient's own medical practitioner in the course of normal medical practice, to ensure the patient receives any medical advice or treatment necessary to maintain his/her state of health. In such cases benefits would be payable for the attendance and such tests which would be considered reasonably necessary according to the circumstances of the patient such as age, physical condition, past personal and family history. Examples would be Papanicolaou test in a woman (see para. 13.3.4), blood lipid estimation where a person has a family history of lipid disorder. However, it would not be accepted that a routine check up would necessarily be accompanied by an extensive battery of diagnostic investigations;
- a pathology service requested by the National Heart Foundation of Australia, Risk Evaluation Service;
- medical examinations for reason of age or medical condition, for drivers to obtain or renew a licence to drive a private motor vehicle;
- medical examinations to obtain a certificate of hearing disability required for sales tax exemption for a television decoding device;
- a medical or optometrical examination provided to a person who is an unemployed person for the purposes of the Social Security Act 1947, at the request of a person to whom the unemployed person has applied for employment;
- a medical examination of, and/or the collection of blood for testing from, persons occupationally exposed to sexual transmission of disease where the purpose of such an examination or collection is the collection of specimens for testing in accordance with conditions determined by the health authority of the State or Territory in which the service is performed, (1 examination/collection per person per week). Benefits are not attracted in respect of pathology tests resulting from such examination/collection;
- a medical examination to adopt or foster children;
- a medical examination which is required to claim eligibility for certain Social Security benefits or allowances.

13.3.4 The agreed National Policy on screening for the Prevention of Cervical Cancer, as endorsed by the Royal Australian College of General Practitioners, the Royal Australian College of Obstetricians and Gynaecologists, the Royal College of Pathologists of Australasia, the Australian Cancer Society and the National Health and Medical Research Council, is as follows:-

- an examination interval of 2 years for women who have no symptoms or history suggestive of abnormal cervical cytology, commencing between the ages of 18 to 20 years, or 1 or 2 years after first sexual intercourse, whichever is later;
- cessation of cervical smears at 70 years for women who have had 2 normal results within the last 5 years. Women over 70 who have never been examined, or who request a cervical smear, should be examined.

Note: As separate items exist for routine examination of cervical smears, treating practitioners are asked to clearly identify on the request form to the pathologist, if the smear has been taken as a routine examination or for the management of a previously detected abnormality (see paragraph PP.2 of Pathology Services Explanatory Notes in Category 6).

#### **13.4 Services Rendered to a Doctor's Dependants, Practice Partner, or Practice Partner's Dependants**

13.4.1 Generally, Medicare benefits are not payable in respect of professional services rendered by a medical practitioner to dependants or partners or a partner's dependants. There can be no medical expense for which Medicare benefits will apply unless a legally enforceable debt is incurred. In such a case, the matter should be referred to the Health Insurance Commission for assessment.

#### **13.5 Workers' Compensation, Third Party Insurance, Damages, etc.**

13.5.1 From 1 February 1996, Medicare benefits are payable for medical expenses for professional services that are wholly covered by workers compensation or damages under a Commonwealth or State or Territory law.

13.5.2 The only exception to this is where a person has entered into a *reimbursement arrangement* with a compensation insurer. In such cases, a Medicare benefit is not payable. (A *reimbursement arrangement* is an agreement between a compensation claimant and the insurer stating that the medical expenses of the person will be paid by the insurer as and when they arise.)

13.5.3 The practitioner has the option to either bulk-bill Medicare or give the patient a private account as would normally occur with any other consultation.

13.5.4 There are arrangements in place to recover any Medicare benefits paid as a result of the injury once a settlement or judgement is made on the compensation claim. The recovery is done between the insurer or compensation payer, the compensable person and the Health Insurance Commission. These recovery arrangements do not impact on practitioners.

## **14. INTERPRETATION OF THE SCHEDULE - GENERAL NOTES**

### **14.1 Principles of Interpretation**

14.1.1 Each professional service listed in the Schedule is a complete medical service in itself. However, it may also form part of a more comprehensive service covered by another item, in which case the benefit provided for the latter service covers the former as well. For example, benefit is not payable for a bronchoscopy (Schedule Item 41889) where a foreign body is removed from the bronchus (Schedule Item 41895) since the bronchoscopy is an integral part of the removal operation.

14.1.2 Where a service is rendered partly by one medical practitioner and partly by another, only the one amount of benefit is payable. This may be instanced by the case in which a radiographic examination is partly completed by one medical practitioner and finalised by another, the only benefit payable being that for the total examination. Another example is where aftercare is carried out by other than the practitioner who performed the operation. The fee for the operation also covers any consequential aftercare and only the one benefit is payable. Where separate services covered by individual items in the Schedule are rendered by different medical practitioners the individual items apply.

### **14.2 Services Attracting Benefits on an Attendance Basis**

14.2.1 There are some services which are not listed in the Schedule because they are regarded as forming part of a consultation or else attract benefits on an attendance basis. These services are identified in the indexes to this book.

### **14.3 Consultation and Procedures Rendered at the One Attendance**

14.3.1 Where there are rendered, during the course of a single attendance, a consultation (under Category 1 of the Medicare Benefits Schedule) and another medical service (under any other Category of the Schedule), benefits are payable subject to certain exceptions, for both the consultation and the other service. Medicare benefits are not payable for the consultation in addition to an item rendered on the same occasion where the item description is qualified by words such as "each attendance", "attendance at which", including associated attendances/consultations", and all items in Group T5, T6 and T9. However, in the case of radiotherapy treatment (Group T2 of Category 3) benefits are payable for both the radiotherapy and an initial referred consultation.

14.3.2 In cases where the level of benefit for an attendance depends upon consultation time (e.g., attendance by consultant physicians in psychiatry), the time spent in carrying out a procedure, which is covered by another item in the Schedule, must not be included in the consultation time.

14.3.3 Medical practitioners should ensure that a fee for a consultation is charged only when a consultation actually takes place. It is not expected that a consultation fee will be charged on every occasion a procedure is performed.

### **14.4 Aggregate Items**

14.4.1 The Schedule includes a number of items which apply only in conjunction with another specified service listed in the Schedule. These items provide for the application of a fixed loading or factor to the fee and benefit for the service with which they are rendered. Item 15003 - Superficial radiotherapy of two or more Fields - is an example.

14.4.2 When these particular procedures are rendered in conjunction, the legislation provides for the procedures to be regarded as one service and for a single patient gap to apply. The Schedule fee for the service will be ascertained in accordance with the particular rules shown in the relevant items.

## CATEGORY 1 - PROFESSIONAL ATTENDANCES

### EXPLANATORY NOTES

#### A.1 Personal Attendance by Practitioner

A.1.1 The personal attendance of the medical practitioner upon the patient is necessary before a "consultation" may be regarded as a professional attendance. In itemising a consultation covered by an item which refers to a period of time, only that time during which a patient is receiving active attention should be counted. Periods such as when a patient is resting between blood pressure readings, waiting for pupils to dilate after the instillation of a mydriatic, or receiving short wave therapy etc., should not be included in the time of the consultation. Similarly, the time taken by a doctor to travel to a patient's home should not be taken into consideration in the determination of the length of the consultation. While the doctor is free to charge a fee for "travelling time" when patients are seen away from the surgery, benefits are payable only in respect of the time a patient is receiving active attention.

#### A.2 Professional Attendances

A.2.1 Professional attendances by medical practitioners cover consultations during which the practitioner evaluates the patient's problem (which may include certain health screening services - see paragraph 13.3 of the General Explanatory Notes) and formulates a management plan, in relation to one or more conditions present in the patient. The service also includes advice to the patient and/or relatives and the recording of appropriate detail of the particular services - (see also paragraphs A.5.6 - A.5.7)

#### A.3 Services Not Attracting Medicare Benefits

A.3.1 Telephone consultations, letters of advice by medical practitioners, the issue of repeat prescriptions when the patient is not in attendance, post mortem examinations, the issue of death or cremation certificates, counselling of relatives (Note - Items 348, 350 and 352 are not counselling services), group attendances (other than group attendances covered by Items 170, 171, 172, 342, 344 and 346) such as group counselling, health education, weight reduction or fitness classes do not qualify for benefit.

#### A.4 Multiple Attendances

A.4.1 Payment of benefit may be made for each of several attendances on a patient on the same day by the same medical practitioner provided the subsequent attendances are not a continuation of the initial or earlier attendances.

A.4.2 However, there should be a reasonable lapse of time between such attendances before they can be regarded as separate attendances.

A.4.3 Where two or more attendances are made on the one day by the same medical practitioner the time of each attendance should be stated on the account (e.g., 10.30 a.m. and 3.15 p.m.) in order to assist in the assessment of benefits.

A.4.4 In some circumstances a subsequent attendance on the same day does in fact constitute a continuation of an earlier attendance. For example, a preliminary eye examination may be concluded with the instillation of a mydriatic and then an hour or so later eye refraction is undertaken. These sessions are regarded as being one attendance for benefit purposes. Further examples are the case of skin sensitivity testing, and the situation where a patient is issued a prescription for a vaccine and subsequently returns to the surgery for the injection.

#### A.5 Attendances by General Practitioners (Items 1-51, 601, 602)

A.5.1 Items 1 to 51 and 601, 602 relate specifically to attendances rendered by medical practitioners who are either:  
· listed on the Vocational Register of General Practitioners maintained by the Health Insurance Commission;  
· holders of the Fellowship of the Royal Australian College of General Practitioners (FRACGP) and who participate in, and meet the requirements for, quality assurance and continuing medical education as defined in the RACGP Quality Assurance and Continuing Education Programme; or  
· undertaking an approved placement in general practice as part of a training program for general practice leading to the award of the FRACGP or recognised by the RACGP as being at an equivalent standard.

Only general practitioners are eligible to itemise these content-based items. (See paragraphs 4.1, 4.2 and 4.3 of the General Explanatory Notes for details of eligibility and registration).

A.5.2 Items 1 to 51 cover four categories of general practitioner attendance based largely on the tasks undertaken by the practitioner during the attendance on the patient rather than simply on the time spent with the patient.

A.5.3 The attendances are divided into four categories relating to the level of complexity, namely:

- (i) Level A - (10 relative value units)
- (ii) Level B - (21 relative value units)
- (iii) Level C - (38 relative value units)
- (iv) Level D - (56 relative value units)

A.5.4 To assist medical practitioners in selecting the appropriate item number for Medicare benefit purposes the following notes and examples in respect of the various levels are given. The fact that a particular case is used as an example does not mean that

such cases would always be claimed at the level used in the example. Other modifying circumstances might prevail and each case must be treated on its merits.

#### LEVEL A

These items are for the obvious and straightforward cases and the practitioner's records would reflect this. In this context 'limited examination' means examination of the affected part if required, and 'management' the action taken.

Example: Triple Antigen or Tetanus Immunisation

#### LEVEL B

The descriptions of these items introduce the words 'selective history' and 'implementation of a management plan in relation to one or more problems'. In this context a 'selective history' means a history relating to a specific problem or condition; and 'implementation of a management plan' includes formulation of the decision or plan of management and any immediate action necessary such as advising or counselling the patient, ordering tests, or referring the patient to a specialist medical practitioner or other allied health professional. The essential difference between Levels A and B relate not to time but to complexity.

Example: Otitis media presenting as earache

#### LEVEL C

Further levels of complexity are implied in these items by the introduction of 'taking a detailed history' and 'examination of multiple systems'. A physical attendance of at least 20 minutes is necessary to qualify for a Level C attendance. The words following 'OR' in the items for Levels B and C allow for the situation where an attendance involves some components of a more complex level but the time taken is less than specified in the higher level. Benefit is claimable at the appropriate lower level, e.g.; if an attendance involved a detailed history and examination of multiple systems, arranging investigations and implementing a management plan, but the time taken was less than 20 minutes, it would constitute a Level B attendance.

Example: Essential hypertension presenting as headache

#### LEVEL D

These items cover the difficult problems where the diagnosis is elusive and highly complex, requiring consideration of several possible differential diagnoses, and the making of decisions about the most appropriate investigations and the order in which they should be performed. These items also cover cases which need prolonged discussion. Physical attendance of at least 40 minutes is necessary to qualify for a Level D attendance.

Examples:           Migraine with peripheral neurological signs  
                          Depression presenting as insomnia or headaches  
                          Complex psychological or family relationship problems

#### ***Counselling or Advice to Patients or Relatives***

A.5.5 For Items 23 to 51 'implementation of a management plan' includes counselling services.

A.5.6 Items 1 to 51 include advice to patients and/or relatives during the course of an attendance. The advising of relatives at a later time does not extend the time of attendance.

#### ***Recording Clinical Notes***

A.5.7 In relation to the time taken in recording appropriate details of the service, only clinical details recorded at the time of the attendance count towards the time of consultation. It does not include information added at a later time, such as reports of investigations.

#### ***Other Services at the Time of Attendance***

A.5.8 Where, during the course of a single attendance by a general practitioner, both a consultation and another medical service are rendered, Medicare benefits are generally payable for both the consultation and the other service. Exceptions are in respect of medical services which form part of the normal consultative process, or services which include a component for the associated consultation (see paragraph 14.3 of the General Explanatory Notes for further details).

#### ***After Hours Services***

A.5.9 There are no differential Schedule fees for medical services rendered after hours, except in relation to the items for emergencies i.e. Items 1, 2, 601, 602. However, use of these emergency after hours items are restricted to situations as outlined in paragraph A.10 below.

#### ***Locum-Tenens***

A.5.10 Where a general practitioner engages, either as an assistant or as a locum tenens, a medical practitioner who is not a general practitioner, Medicare benefits in respect of attendances rendered by the latter are attracted under Items 52-96 and not under Items 1-51.

## **A.6 Professional Attendances at an Institution (Items 13, 25, 38, 48, 81, 83, 84, 86)**

A.6.1 For the purposes of these items an "institution" means a place (not being a hospital, nursing home, aged persons' accommodation attached to a nursing home or aged persons' accommodation situated within a nursing home complex) at which residential accommodation or day care or both such accommodation and such care is made available to:-

- (a) disadvantaged children;
- (b) juvenile offenders;
- (c) aged persons;
- (d) chronically ill psychiatric patients;
- (e) homeless persons;
- (f) unemployed persons;
- (g) persons suffering from alcoholism;
- (h) persons addicted to drugs; or
- (i) physically or mentally handicapped persons.

Note: See also paragraph A.9

## **A.7 Attendances at a Hospital (Items 19, 33, 40, 50, 87, 89, 90, 91)**

A.7.1 These items refer to attendances on patients admitted to a hospital or day hospital facility. Where medical practitioners have made arrangements with a local hospital to routinely use out-patient facilities to see their private patients, surgery consultation items would apply.

Note: See also paragraph A.9

## **A.8 Nursing Home Attendances (Items 20, 35, 43, 51, 92, 93, 95, 96)**

A.8.1 These items refer to attendances on patients in nursing homes but also include attendances on patients in aged persons' accommodation such as hostels attached to or in the grounds of a nursing home.

A.8.2 Where a medical practitioner attends a patient in a self-contained unit, within a nursing home complex, the attendance attracts benefits under the appropriate home visit item.

A.8.3 Where a patient living in a self-contained unit attends a medical practitioner at consulting rooms situated within the precincts of the nursing home or hostel, or at free standing consulting rooms within the nursing home complex, the appropriate surgery consultation item applies.

A.8.4 If a patient who is accommodated in the nursing home or hostel visits a medical practitioner at consulting rooms situated within the nursing home complex, whether free standing or situated within the nursing home or hostel precincts, benefits would be attracted under the appropriate nursing home attendance item.

Note: See also paragraph A.9

## **A.9 Attendances at Hospitals, Nursing Homes and Institutions and Home Visits**

A.9.1 To facilitate assessment of the correct Medicare rebate in respect of a number of patients attended on the one occasion at one of the above locations, it is important that the total number of patients seen be recorded on each individual account, receipt or assignment form. For example, where ten patients were visited (for a brief consultation) in the one nursing home on the one occasion, each account, receipt or assignment form would show "Item 20 - 1 of 10 patients" for a General Practitioner.

## **A.10 Emergency After-Hours Attendances (Items 1, 2, 97, 98, 601, 602, 697, 698)**

A.10.1 Items 1, 2, 97, 98, 601, 602, 697, 698 should only be itemised in the following instances -

- the consultation is initiated by or on behalf of the patient in the same unbroken after-hours period (see para A.10.3);
- the patient's medical condition must require immediate treatment; and
- if more than one patient is seen on the one occasion, Items 1, 2, 97, 98, 601, 602, 697, 698 can be used but only in respect of the first patient.

Where the patient is seen at a public hospital the following additional provisions would apply in relation to Items 1, 97, 601 and 697 -

- the first or only patient is a private in-patient; or
- the first or only patient is seen in the Out-patient or Casualty Department and the hospital does not provide at the time a medical Out-patient or Casualty service.

Where any of the above conditions do not apply the normal Schedule items should be itemised.

A.10.2 Items 2, 98, 602 and 698 are intended to allow benefit for returning to and specially opening up consulting rooms to attend a patient who needs immediate treatment after hours. As the extra benefit is for the inconvenience of actually returning to and opening the surgery it is payable only once on any one occasion - to the first patient seen after opening up. If other patients are seen on the same occasion they are itemised as ordinary surgery attendances. In this respect Items 2, 98, 602 and 698 are the same as Items 1, 97, 601 and 697.

### **Definition of After Hours**

A.10.3 An after hours consultation or visit is a reference to an attendance on a public holiday, on a Sunday, before 8 a.m. or after 1 p.m. on a Saturday, or at any time other than between 8 a.m. and 8 p.m. on a week day not being a public holiday.

A.10.4 Where a practice or clinic routinely conducts its business during hours other than those quoted above, it would be

necessary for the emergency service to be initiated and rendered outside the hours normally observed by that practice or clinic for it to attract a Medicare rebate under Items 1, 2, 97, 98, 601, 602, 697 or 698.

A.10.5 Items 601, 602, 697 and 698 are intended to allow benefit for emergency attendances in the 'unsociable hours', that is, 11pm-7am on any day of the week. Apart from the time restriction, the conditions applying to Items 602 and 698 are the same as those applying to Items 2 and 98.

#### **A.11 Minor Attendance by a Consultant Physician (Items 119, 131)**

A.11.1 The Health Insurance Regulations provide that a minor consultation is regarded as being a consultation in which the assessment of the patient does not require the physical examination of the patient and does not involve a substantial alteration to the patient's treatment. Examples of consultations which could be regarded as being 'minor consultations' are listed below (this is by no means an exhaustive list) :-

- hospital visits where a physical examination does not result, or where only a limited examination is performed;
- hospital visits where a significant alteration to the therapy or overall management plan does not ensue;
- brief consultations or hospital visits not involving subsequent discussions regarding patient's progress with a specialist colleague or the referring practitioner.

#### **A.12 Interview of Person other than a Patient by Consultant Psychiatrist (Items 348, 350, 352)**

A.12.1 Items 348 and 350 refer to investigative interviews of a patient's relatives or close associates to determine whether the particular problem with which the patient presented was focused in the patient or in the interaction between the patient and the person being interviewed. These items do not cover counselling of family or friends of the patient. The term "in the course of initial diagnostic evaluation of the patient" should normally be interpreted as extending for up to one month from the date of the initial consultation. There is no strict limit to the number of interviews or persons interviewed in that period. These items should not be used for interviews concerned with the continuing management of the patient. (see para A.12.2)

A.12.2 Item 352 refers to investigative interviews of a patient's relatives or close associates to focus on a particular clinically relevant problem arising in the continuing management of the patient. This item does not cover counselling of family or friends of the patient. The payment of Medicare benefits under this item is limited to four in any twelve month period.

A.12.3 Benefits are payable for Item 348, 350 or 352 and for a consultation with a patient (Items 300 - 328) on the same day provided that separate attendances are involved.

A.12.4 For Medicare benefit purposes, charges relating to services covered by Items 348, 350 and 352 should be raised against the patient rather than against the person interviewed.

#### **A.13 Prolonged Attendance in Treatment of a Critical Condition (Items 160-164)**

A.13.1 The conditions to be met before services covered by Items 160-164 attract benefits are:-

- (i) the patient must be in imminent danger of death;
- (ii) the constant presence of the medical practitioner must be necessary for the treatment to be maintained; and
- (iii) the attention rendered in that period must be to the exclusion of all other patients.

#### **A.14 Family Group Therapy (Items 170, 171, 172)**

A.14.1 These items refer to family group therapy supervised by medical practitioners other than consultant psychiatrists. Other types of group attendances do not attract benefits. It should be noted that only one fee applies in respect of each group of patients.

#### **A.15 Acupuncture (Item 173)**

A.15.1 The service of "acupuncture" must be performed by a medical practitioner and itemised under Item 173 to attract benefits. This item covers not only the performance of the acupuncture but includes any consultation on the same occasion and any other attendance on the same day for the condition for which acupuncture was given.

A.15.2 Other items in Category 1 of the Schedule should not be itemised for professional attendances when the service "acupuncture" is provided.

A.15.3 For the purpose of payment of Medicare benefits "acupuncture" is interpreted as including treatment by means other than the use of acupuncture needles where the same effect is achieved without puncture, e.g., by application of ultrasound, laser beams, pressure or moxibustion, etc.

#### **A.16 Psychiatric Attendances (Item 319)**

A.16.1 Medicare benefits are attracted under Item 319 only where patients are diagnosed as suffering from:

- severe personality disorder (predominantly from cluster B groupings), or in persons under 18 years of age a severe disruption of personality development; or
- anorexia nervosa; or
- bulimia nervosa; or
- dysthymic disorder; or
- substance-related disorder; or

- somatoform disorder, or
- a pervasive developmental disorder (including autism and Asperger's disorder)

according to the relevant criteria set out in the Diagnostic and Statistical Manual of the American Psychiatric Association - Fourth Edition (DSM-IV).

A.16.2 It is not sufficient for the patient's illness to fall within the diagnostic criteria. It must be evident that a significant level of impairment exists which interferes with the patient's quality of life. For persons 18 years and over, the level of impairment must be within the range 1 to 50 of the Global Assessment of Functioning (GAF) Scale contained in the DSM-IV (ie. the patient is displaying at least "serious" symptoms). The GAF score, incorporating the parameters which have led to the score, should be recorded at the time of commencement of the current course of treatment.

A.16.3 In addition to the above diagnostic criteria and level of functional impairment, it is also expected that other appropriate psychiatric treatment has been used for a suitable period and the patient has shown little or no response to such treatment. It is expected that such treatment would include, but not be limited to: shorter term psychotherapy, less frequent but long term psychotherapy, pharmacological therapy, cognitive behaviour therapy.

A.16.4 It is the responsibility of the psychiatrist to ensure that the patient meets these criteria. The Health Insurance Commission will be closely monitoring the use of Item 319.

A.16.5 When a patient who meets the criteria defined in Item 319 attends a psychiatrist on more than 160 occasions in 12 months such attendances would be covered by Items 310 to 318.

A.16.6 The Royal Australian and New Zealand College of Psychiatrists (RANZCP) has undertaken to establish an appropriate mechanism to enable use of Item 319 by suitably trained psychiatrists. In the interim it is expected that psychiatrists whose usual practice includes long term intensive treatment of patients whose diagnoses meet the criteria defined in the item will be using Item 319.

A.16.7 On the basis of advice from the RANZCP it is expected that it would be generally inappropriate in normal clinical practice for psychiatric treatment performed out of hospital to extend beyond 220 sessions in any 12 month period. In this regard the Health Insurance Commission will be monitoring providers' practice patterns with a view to the referral of possible cases of inappropriate practice to the Director of Professional Services Review.

#### **A.17 Contact Lenses (Items 10801-10809)**

A.17.1 Benefits are paid for consultations concerned with the prescription and fitting of contact lenses only if patients fall into specified categories (ie. patients with certain conditions). The classes of patients eligible for benefits for contact lens consultations are described in Items 10801 to 10809. Benefits are not payable for Item 10809 in circumstances where patients want contact lenses only for:

- reasons of appearance (because they do not want to wear spectacles);
- sporting purposes;
- work purposes; or
- psychological reasons (because they cannot cope with spectacles).

A.17.2 Benefits are payable for an initial referred consultation rendered in association with the fitting and prescribing of the lenses.

A.17.3 Subsequent follow-up attendances attract benefits on a consultation basis.

#### **A.18 Refitting of Contact Lenses (Item 10816)**

A.18.1 This item covers the refitting of contact lenses where this becomes necessary within the thirty-six month time limit where the patient requires a change in contact lens material or basic lens parameters, other than simple power change, because of a structure or functional change in the eye or an allergic response.

## CATEGORY 2 - DIAGNOSTIC PROCEDURES AND INVESTIGATIONS

### EXPLANATORY NOTES

#### MISCELLANEOUS DIAGNOSTIC PROCEDURES AND INVESTIGATIONS

##### **D1.1 Neuromuscular Diagnosis (Item 11012)**

D1.1.1 Based on advice from the Australian Association of Neurologists, Medicare benefits are not payable under Item 11012 for quantitative sensory nerve testing using "Neurometer CPT" diagnostic devices. The advice indicated that the device was still in the evaluation and research stage and did not have widespread clinical application.

##### **D1.2 Investigation of Central Nervous System Evoked Responses (Items 11024 and 11027)**

D1.2.1 In the context of these items a study refers to one or more averaged samples of electrical activity recorded from one or more sites in the central nervous system in response to the same stimulus.

D1.2.2 Second or subsequent studies refer to either stimulating the point of stimulation (e.g. right eye or left median nerve) with a different stimulus or stimulating another point of stimulation (e.g. left eye or right median nerve).

D1.2.3 Items 11024 and 11027 are not intended to cover bio-feedback techniques.

##### **D1.3 Computerised Perimetry (Items 11222 and 11225)**

D1.3.1 These items relate to computerised perimetry (bilateral or unilateral) where a third or subsequent examination becomes necessary in a 12 month period. As indicated in the descriptions, these items apply only where a further examination is indicated in the presence of one of the following conditions:-

- established glaucoma (where surgery is being considered or has been performed) where there has been definite progression of damage over a 12 month period;
- progressive neurologic disease; or
- for the monitoring of systemic drug toxicity, where there is also other disease such as glaucoma or neurologic disease.

D1.3.2 Claims for benefits in respect of Items 11222 and 11225 should be accompanied by clinical details confirming the presence of one of the above conditions. Claims should be lodged with Medicare in the usual manner. Clinical details and/or photographs accompanying the claim should be sealed in an envelope marked "Medical - In Confidence".

##### **D1.4 Electrocochleography (Item 11304)**

D1.4.1 This item refers to electrocochleography with insertion of electrodes through the tympanic membrane.

##### **D1.5 Non-determinate Audiometry (Item 11306)**

D1.5.1 This refers to screening audiometry covering those services, one or more, referred to in Items 11309-11321 when not performed under the conditions set out in paragraph D1.6.1.

##### **D1.6 Audiology Services (Items 11309 - 11321)**

D1.6.1 A medical service specified in Items 11309 to 11321 shall be taken to be a medical service for the purposes of payment of benefits if, and only if, it is rendered:

- (a) in conditions that allow the establishment of determinate thresholds;
- (b) in a sound attenuated environment with background noise conditions that comply with Australian Standard AS 1269-1983 of the Standards Association of Australia, being that Standard as in force or existing on 1 August 1987; and
- (c) using calibrated equipment that complies with Australian Standard AS 2586-1983 of the Standards Association of Australia, being that Standard as in force or existing on 1 August 1987.

##### **D1.7 Respiratory Function Tests (Item 11503)**

D1.7.1 The investigations listed hereunder would attract benefits under Item 11503. This list has been prepared in consultation with the Thoracic Society of Australia and New Zealand.

- (a) Carbon monoxide diffusing capacity by any method
- (b) Absolute lung volumes by any method
- (c) Assessment of arterial carbon dioxide tension or cardiac output - re breathing method
- (d) Assessment of pulmonary distensibility involving measurement of lung volumes and oesophageal pressure
- (e) Measurement of airway or pulmonary resistance by any method
- (f) Measurement of respiratory muscle strength involving the measurement of trans-diaphragmatic or oesophageal pressures
- (g) Assessment of phrenic nerve function involving percutaneous stimulation and measurement of the compound action

- potential of the diaphragm
- (h) Measurement of the resistance of the anterior nares or pharynx
  - (i) Inhalation provocation testing, including pre-provocation spirometry, the construction of a dose response curve, using histamine, cholinergic agents or non-istonic fluids and post-bronchodilator spirometry
  - (j) Exercise testing using incremental workloads with monitoring of ventilatory and cardiac responses at rest, during exercise and recovery on premises equipped with a mechanical ventilator and defibrillator
  - (k) Tests of distribution of ventilation involving inhalation of inert gases
  - (l) Measurement of gas exchange involving simultaneous collection of arterial blood and expired air with measurements of the partial pressures of oxygen and carbon dioxide in gas and blood
  - (m) Multiple inert gas elimination techniques for measuring ventilation perfusion ratios in the lung
  - (n) Continuous monitoring of pulmonary function other than spirometry, tidal breathing and minute ventilation, of at least 6 hours duration
  - (o) Ventilatory and/or occlusion pressure responses to progressive hypercapnia and progressive hypoxia
  - (p) Monitoring pulmonary arterial pressure at rest or during exercise
  - (q) Measurement of the strength of inspiratory and expiratory muscles at multiple lung volumes
  - (r) Measurement of the respiratory muscle endurance/fatigability by any technique
  - (s) Measurement of respiratory muscle strength before and after intravenous injection of placebo and anticholinesterase drugs
  - (t) Simulated altitude test involving exposure to hypoxic gas mixtures and measurement of ventilation, heart rate and oxygen saturation at rest and/or during exercise and observation of the effect of supplemental oxygen
  - (u) Inhalation provocation testing to specific sensitising agents
  - (v) Spirometry performed before and after simple exercise testing undertaken as a provocation test for the investigation of asthma, in premises capable of performing complex lung function tests and equipped with a mechanical ventilator and defibrillator.

#### **D1.8 Investigations of Vascular Disease (Items 11603-11624)**

D1.8.1 These items relate to examinations performed in the investigation of vascular disease. The fees include components for interpretation of the results and provision of the report which must be performed by a medical practitioner.

#### **D1.9 Twelve-lead Electrocardiography (Item 11700)**

D1.9.1 Benefits are precluded under this item unless a full 12-lead ECG is performed. Examinations involving less than twelve leads are regarded as part of the accompanying consultation. A 12-lead ECG refers to the recordings produced of 12 views of the heart by various combinations of placement of electrodes.

#### **D1.10 Twelve-lead Electrocardiography, Report Only (Item 11701)**

D1.10.1 This item provides a benefit where tracings are referred to a medical practitioner for a report without an attendance on the patient by that practitioner. Where a patient is referred to a consultant for a consultation and takes ECG tracings with him/her, benefits are not attracted for the consultant's interpretation of the tracings.

#### **D1.11 Electrocardiographic (ECG) Recording of Ambulatory Patient (Items 11708, 11709)**

D1.11.1 Medicare benefits are not payable for ambulatory blood pressure monitoring (under Item 11708 or 11709 or any other item). Likewise, where blood pressure monitoring and continuous ECG recording are undertaken conjointly on an ambulatory patient for 12 hours or more, benefits are not payable for the blood pressure monitoring or for the continuous ECG recording under Item 11708 or 11709.

D1.11.2 Items 11708 and 11709 require the continuous ECG recording of an ambulatory patient for twelve hours or more. Benefits are only payable under these items if the ECG data is analysed and reported on by a specialist physician or consultant physician.

D1.11.3 The changing of a tape or batteries is regarded as a continuation of the service and does not constitute a separate service for benefit purposes. Where a recording is analysed and reported on and a decision is made to undertake a further period of monitoring, the second episode would be regarded as a separate service.

#### **D1.12 Signal Averaged ECG Recording (Item 11713)**

D1.12.1 Benefits are only payable under this item if the ECG data is analysed and reported on by a specialist physician or a consultant physician.

#### **D1.13 Epicutaneous Patch Testing (Items 12012, 12015 & 12018)**

D1.13.1 A standard epicutaneous patch test battery refers to the European Standard Series or the International Contact Research Group Standard Series.

#### **D1.14 Investigations for Sleep Apnoea (Items 12203 and 12207)**

D1.14.1 A "recognised hospital" as described in Items 12203 and 12207 relates to a public hospital. Accordingly, benefits are not payable for sleep studies performed by a specialist in a private hospital. Benefits are only payable for services performed in

a private hospital when undertaken under the supervision of a consultant physician in the practice of his or her specialty of thoracic medicine.

D1.14.2 In relation to paragraph (d) of these items, generally, the patient should be seen in consultation by the supervising medical practitioner to determine the necessity for the investigation unless the necessity has been clearly established by other means.

D1.14.3 Item 12207 relates to overnight investigation for sleep apnoea where a fourth or subsequent investigation becomes necessary in a twelve month period where all of the following conditions apply:-

- the patient has severe cardio-respiratory failure; **and**
- previous studies have demonstrated failure of continuous positive airway pressure or oxygen; **and**
- the study is for the adjustment and/or testing of the effectiveness of a positive pressure ventilatory support device (other than nasal continuous positive airway pressure)

D1.14.4 Claims for benefits in respect of Item 12207 should be accompanied by clinical details confirming the presence of the above conditions. Claims should be lodged with Medicare in the usual manner. Clinical details accompanying the claim should be sealed in an envelope marked "Medical - In Confidence".

#### **D1.15 Bone Densitometry (Items 12306 to 12321)**

D1.15.1 Item 12321 is intended to allow for bone mineral density measurement following a significant change in therapy - e.g. a change in the class of drugs - rather than for a change in the dosage regimen.

D1.15.2 An examination under any of these items covers the measurement of 2 or more sites, interpretation and provision of a report. 2 or more sites must include the measurement of bone density of the lumbar spine and proximal femur. If technical difficulties preclude measurement at these sites, other sites can be used for the purpose of measurements. The measurement of bone mineral density at both forearms or both heels or in combination is excluded for the purpose of Medicare benefit.

#### *Referrals*

D1.15.3 Bone densitometry services are available on the basis of referral by a medical practitioner to a specialist or consultant physician. However, providers of bone densitometry to whom a patient is referred for management may determine that a bone densitometry service is required in line with the provisions of Items 12306, 12309, 12312, 12315, 12318 and 12321.

D1.15.4 For Items 12306 and 12309 the referral should specify the indication for the test, namely:

- (a) 1 or more fractures occurring after minimal trauma; or
- (b) monitoring of low bone mineral density proven by previous bone densitometry.

D1.15.5 For Item 12312 the referral should specify the indication for the test, namely:

- (a) prolonged glucocorticoid therapy;
- (b) conditions associated with excess glucocorticoid secretion;
- (c) male hypogonadism; or
- (d) female hypogonadism lasting more than 6 months before the age of 45.

D1.15.6 For Item 12315 the referral should specify the indication for the test, namely:

- (a) primary hyperparathyroidism;
- (b) chronic liver disease;
- (c) chronic renal disease;
- (d) proven malabsorptive disorders;
- (e) rheumatoid arthritis; or
- (f) conditions associated with thyroxine excess.

D1.15.7 For Item 12318 the referral should specify the indication for the test, namely:

- (a) prolonged glucocorticoid therapy;
- (b) conditions associated with excess glucocorticoid secretion;
- (c) male hypogonadism;
- (d) female hypogonadism lasting more than 6 months before the age of 45;
- (e) primary hyperparathyroidism;
- (f) chronic liver disease;
- (g) chronic renal disease;
- (h) proven malabsorptive disorders;

- (i) rheumatoid arthritis; or
- (j) conditions associated with thyroxine excess.

### *Definitions*

D1.15.8 Low bone mineral density is present when the bone (organ) mineral density falls more than 1.5 standard deviations below the age matched mean or more than 2.5 standard deviations below the young normal mean at the same site and in the same gender.

D1.15.9 For Items 12312 and 12318

- (a) 'Prolonged glucocorticoid therapy' is defined as the commencement of a dosage of inhaled glucocorticoid equivalent to or greater than 800 micrograms beclomethasone dipropionate or budesonide per day; or
- (b) a supraphysiological glucocorticoid dosage equivalent to or greater than 7.5 mg prednisolone in an adult taken orally per day for a period anticipated to last for at least 4 months.

D1.15.10 For Items 12312 and 12318

- (a) Male hypogonadism is defined as serum testosterone levels below the age matched normal range.
- (b) Female hypogonadism is defined as serum oestrogen levels below the age matched normal range.

D1.15.11 For Items 12315 and 12318

- (a) 'Malabsorptive disorders' - malabsorption of fat is defined as faecal fat estimated at greater than 18 gm per 72 hours on a normal fat diet; or
- (b) bowel disease with presumptive vitamin D malabsorption as indicated by a sub-normal circulating 25-hydroxyvitamin D level.

Bone densitometry (performed by a specialist or consultant physician where the patient is referred by another medical practitioner), **using dual energy X-ray absorptiometry**, for the **measurement** of bone density 12 months following a significant change in therapy for:

- . established low bone mineral density; or
- . the confirmation of a presumptive diagnosis of low bone mineral density made on the basis of 1 or more fractures occurring after minimal trauma.

Measurement of 2 or more sites - **1 service only in a period of 12 consecutive months** - including interpretation and report; not being a service associated with a service to which item 12306, 12309, 12312, 12315 or 12318 applies (Ministerial Determination).

## CATEGORY 3 - THERAPEUTIC PROCEDURES

### EXPLANATORY NOTES

#### MISCELLANEOUS THERAPEUTIC PROCEDURES (Group T1)

##### T1.1 Hyperbaric Oxygen Therapy (Items 13020, 13025, 13030)

T1.1.1 Hyperbaric Oxygen Therapy not covered by these items would attract benefits on an attendance basis.

T1.1.2 For the purposes of these items, a comprehensive hyperbaric medicine facility means a separate hospital area that, on a 24 hour basis:

- (a) is equipped and staffed so that it is capable of providing to a patient:
  - hyperbaric oxygen therapy at a treatment pressure of at least 2.8 atmospheric pressure absolute (180 kilo pascal gauge pressure); and
  - mechanical ventilation and invasive cardiovascular monitoring within a multiplace chamber for the duration of the hyperbaric treatment.
- (b) is supported by:
  - at least one specialist anaesthetist, consultant physician or medical practitioner who holds the Diploma of Diving and Hyperbaric Medicine of the South Pacific Underwater Medicine Society who is rostered and immediately available to the hyperbaric facility during normal working hours;
  - a registered medical practitioner who is present in the hospital and immediately available to the facility at all times when patients are being treated at the hyperbaric facility; and
  - a registered nurse with specific training in hyperbaric patient care to the published standards of the Hyperbaric Technicians and Nurses Association who is present during hyperbaric oxygen therapy.
- (c) has defined admission and discharge policies.

##### T1.2 Haemodialysis (Items 13100, 13103)

T1.2.1 Item 13100 covers the supervision in hospital by a medical specialist for the management of dialysis, haemofiltration, haemoperfusion or peritoneal dialysis in the patient who is not stabilised where the total attendance time by the supervising medical specialist exceeds 45 minutes.

T1.2.2 Item 13103 covers the supervision in hospital by a medical specialist for the management of dialysis, haemofiltration, haemoperfusion or peritoneal dialysis in a stabilised patient, or in the case of an unstabilised patient, where the total attendance time by the supervising medical specialist does not exceed 45 minutes.

##### T1.3 Assisted Reproductive Services (Items 13200 - 13221)

T1.3.1 Medicare benefits are not payable in respect of any other item in the Medicare Benefits Schedule (including Pathology) in lieu of or in conjunction with Items 13200 - 13221. Specifically, Medicare benefits are not payable for Items 13200 - 13221 in association with Item 104, 105, 14203, 14206, 35637, 55040 - 55043, 66405 - 66417 or 73521 - 73529. Items 14203 and 14206 are not payable for artificial insemination.

T1.3.2 A treatment cycle is a series of treatment for the purposes of in vitro fertilisation, gamete intrafallopian transfer or similar procedures and is defined as beginning either on the day on which treatment by superovulatory drugs is commenced or on the first day of the patient's menstrual cycle, and ending not more than 30 days later.

T1.3.3 The date of service in respect of treatment covered by Items 13200, 13203, 13206, 13209 and 13218 is **DEEMED** to be the **FIRST DAY** of the treatment cycle.

T1.3.4 For treatment covered by Items 13200, 13203, 13206 and 13218 the account must be provided by the gynaecologist supervising the treatment cycle.

T1.3.5 Embryology laboratory services covered by Items 13200 and 13206 include egg recovery from aspirated follicular fluid, insemination, monitoring of fertilisation and embryo development, and preparation of gametes or embryos for transfer and freezing. It does not include semen preparation.

T1.3.6 Medicare benefits are not payable for assisted reproductive services rendered in conjunction with surrogacy arrangements where surrogacy is defined as 'an arrangement whereby a woman agrees to become pregnant and to bear a child for another person or persons to whom she will transfer guardianship and custodial rights at or shortly after birth'.

T1.3.7 Items 13200, 13206, 13215 and 13218 do not include services provided in relation to artificial insemination using the husband's or donated sperm.

T1.3.8 Items 13200 and 13203 are linked to the supply of hormones under the Section 100 (National Health Act) arrangements. Providers must notify the Health Insurance Commission of Medicare card numbers of patients using hormones under this program, and hormones are only supplied for patients claiming one of these two items.

##### T1.4 Perfusion (Items 13600-13609)

T1.4.1 Medicare benefits are not payable for the perfusion unless the perfusion is performed by a medical practitioner other than the medical practitioner who renders an associated medical service in Group T8 or the medical practitioner who administers an

anaesthetic listed in Group T6. The service must be performed by a medical practitioner in order to attract Medicare benefits. The 'on behalf of' provisions do not extend to Item 13600, 13603, 13604, 13606 or 13609.

T1.4.2 Item 13604 applies only to whole body perfusion where the time for the procedure extends beyond 6 hours.

### **T1.5 Administration of Blood or Bone Marrow already Collected (Item 13706)**

T1.5.1 Item 13706 is payable for the transfusion of blood, or platelets or white blood cells or bone marrow or gamma globulins. This item is not payable when gamma globulin is administered intramuscularly.

### **T1.6 Collection of Blood (Item 13709)**

T1.6.1 Medicare benefits are payable under Item 13709 for collection of blood for autologous transfusions in respect of an impending operation (whether or not the blood is used), or when homologous blood is required in an emergency situation.

T1.6.2 Benefits are not payable under Item 13709 for collection of blood for long-term storage for possible future autologous transfusion, or for other forms of directed blood donation.

### **T1.7 Intensive Care Units (ICU)**

T1.7.1 'Intensive Care Unit' means a separate hospital area that:

- (a) is equipped and staffed so as to be capable of providing to a patient:
  - (i) mechanical ventilation for a period of several days; and
  - (ii) invasive cardiovascular monitoring; and
- (b) is supported by:
  - (i) at least one specialist or consultant physician in the specialty of intensive care who is immediately available and exclusively rostered to the ICU during normal working hours; and
  - (ii) a registered medical practitioner who is present in the hospital and immediately available to the unit at all times; and
  - (iii) a registered nurse for at least 18 hours in each day; and
- (c) has defined admission and discharge policies.

T1.7.2 For Neonatal Intensive Care Units an 'Intensive Care Unit' means a separate hospital area that:

- (a) is equipped and staffed so as to be capable of providing to a patient, being a newly-born child:
  - (i) mechanical ventilation for a period of several days; and
  - (ii) invasive cardiovascular monitoring; and
- (b) is supported by:
  - (i) at least one consultant physician in the specialty of paediatric medicine, appointed to manage the unit, and who is immediately available and exclusively rostered to the ICU during normal working hours; and
  - (ii) a registered medical practitioner who is present in the hospital and immediately available to the unit at all times; and
  - (iii) a registered nurse for at least 18 hours in each day; and
- (c) has defined admission and discharge policies.

T1.7.3 In respect to T1.7.1(b)(i) above "immediately available" means that the intensivist must be predominantly present in the ICU during normal working hours. Reasonable absences from the ICU would be acceptable to attend conferences, meetings and other commitments which might involve absences of up to 2 hours during the working day.

T1.7.4 Medicare benefits are payable under the 'management' items only once per day irrespective of the number of intensivists involved with the patient on that day. However, benefits are also payable for an attendance by another specialist/consultant physician who is not managing the patient but who has been asked to attend the patient. Where appropriate, accounts should be endorsed to the effect that the consultation was not part of the patient's intensive care management in order to identify which consultations should attract benefits in addition to the intensive care items.

T1.7.5 In respect of Neonatal Intensive Care Units, as defined above, benefits are payable for admissions of babies who meet the following criteria:-

- (i) all babies weighing less than 1000gms;
- (ii) all babies with an endotracheal tube, and for the 24 hours following endotracheal tube removal;
- (iii) all babies requiring Constant Positive Airway Pressure (CPAP) for acute respiratory instability;
- (iv) all babies requiring more than 40% oxygen for more than 4 hours;
- (v) all babies requiring an arterial line for blood gas or pressure monitoring; or
- (vi) all babies having frequent seizures.

T1.7.6 Cases may arise where babies admitted to a Neonatal Intensive Care Unit under the above criteria who, because they no longer satisfy the criteria are ready for discharge, in accordance with accepted discharge policies, but who are physically retained in the Neonatal Intensive Care Unit for other reasons. For benefit purposes such babies must be deemed as being discharged from the Neonatal Intensive Care Unit and not eligible for benefits under items 13870, 13873, 13876, 13879, 13882, 13885 and 13888.

T1.7.7 Likewise, benefits are not payable under items 13870, 13873, 13876, 13879, 13882, 13885 and 13888 in respect of babies not meeting the above criteria, but who, for whatever other reasons, are physically located in a Neonatal Intensive Care Unit.

T1.7.8 Benefits are payable for admissions to an Intensive Care Unit following surgery only where clear clinical justification for post-operative intensive care exists.

### **T1.8 Procedures Associated with Intensive care (Items 13818, 13842, 13857)**

T1.8.1 Item 13818 covers the insertion of a right heart balloon catheter (Swan-Ganz catheter). Benefits are payable under this item only once per day except where a second discrete operation is performed on that day.

T1.8.2 Benefits for monitoring of pressures, up to a maximum of 4 on one day, are payable under Items 11600 and 11601 outside of an ICU and Item 13876 within an ICU.

T1.8.3 If a service covered by Item 13842 is provided outside of an ICU, in association with, for example, an anaesthetic, benefits are payable for Item 13842 in addition to Item 13870 where the services are performed on the same day. Where this occurs, accounts should be endorsed "performed outside of an Intensive Care Unit" against Item 13842.

T1.8.4 Benefits are not payable under Item 13857 where ventilation is initiated in the context of an anaesthetic for surgery even if it is likely that following surgery the patient will be ventilated in an ICU. In such cases the appropriate anaesthetic item/s should be itemised.

T1.8.5 Medicare benefits are not payable for sampling by arterial puncture under Item 13839 in addition to Item 13870 (and 13873) on the same day. Benefits are payable under Item 13842 (Intra-arterial cannulisation) in addition to Item 13870 (and 13873) when performed on the same day.

### **T1.9 Management and Procedures in Intensive Care Unit (Items 13870, 13873, 13876)**

#### ***Items 13870 and 13873***

T1.9.1 Medicare Benefits Schedule fees for Items 13870 and 13873 represent global daily fees covering all attendances by the intensivist in the ICU (and attendances provided by support medical personnel) and all electrocardiographic monitoring, arterial sampling, bladder catheterisation and blood sampling performed on the patient on the one day. If a patient is transferred from one ICU to another it would be necessary for an arrangement to be made between the two ICUs regarding the billing of the patient.

T1.9.2 Items 13870 and 13873 should be itemised on accounts according to each calendar day and not per 24 hour period. For periods when patients are in an ICU for very short periods (say less than 2 hours) with minimal ICU management during that time, a fee should not be raised.

#### ***Item 13876***

T1.9.3 Item 13876 covers the monitoring of pressures in an ICU.

T1.9.4 Benefits are attracted under Item 13876 for monitoring of up to a maximum of four pressures on the one day irrespective of the number of medical practitioners involved in the monitoring of pressures in an ICU.

T1.9.5 Benefits are payable under Items 11600 and 11601 where monitoring occurs outside the ICU by practitioners not associated with the ICU, eg, an anaesthetist in an operating theatre.

### **T1.10 PUVA or UVB Therapy (Items 14050,14053)**

T1.10.1 A component for any necessary subsequent consultation has been included in the Schedule fee for these items. However, the initial consultation preceding commencement of a course of therapy would attract benefits.

### **T1.11 Laser Photocoagulation (Items 14106 - 14132)**

T1.11.1 The Australasian College of Dermatologists has advised that the following ranges (applicable to an average 4 year old child and an adult) should be used as a reference to the treatment areas specified in Items 14106 - 14132:

- Entire forehead	50 -75 cm <sup>2</sup>
- Cheek	55 - 85 cm <sup>2</sup>
- Nose	10 -25 cm <sup>2</sup>
- Chin	10 - 30 cm <sup>2</sup>
- Unilateral midline anterior - posterior neck	60 - 220 cm <sup>2</sup>
- Dorsum of hand	25 - 80 cm <sup>2</sup>
- Forearm	100 - 250 cm <sup>2</sup>
- Upper arm	105 - 320 cm <sup>2</sup>

T1.11.2 Items 14120 to 14132 apply where additional treatments are indicated in a 12 month period. Claims for benefits should be accompanied by full clinical details, including colour photographs taken before and after treatment, to verify the need for additional services. Claims should be lodged with Medicare in the usual manner. Clinical details and/or photographs accompanying the claim should be sealed in an envelope marked "Medical - In Confidence".

## **RADIATION ONCOLOGY (Group T2)**

### **T2.1 General**

T2.1.1 The level of benefits for radiotherapy depends not only on the number of fields irradiated but also on the frequency of irradiation. In the items related to additional fields, it is to be noted that treatment by rotational therapy is considered to be equivalent to the irradiation of three fields (i.e., irradiation of one field plus two additional fields). For example, each attendance

for orthovoltage rotational therapy at the rate of 3 or more treatments per week would attract benefit under Item 15100 plus twice Item 15103.

T2.1.2 Benefits are attracted for an initial referred consultation and radiotherapy treatment where both take place at the same attendance.

## **T2.2 Planning Services (Items 15500 - 15536)**

T2.2.1 A planning episode involves field setting (ie simulation or localisation) and dosimetry (either using a CT interfacing planning computer or a non-CT interfacing planning computer). One plan only will attract Medicare benefits in a course of treatment. However, where a plan for brachytherapy is undertaken in association with a plan for megavoltage or teletherapy treatment, benefits would be attracted for both services.

T2.2.2 Medicare benefits are attracted for an initial referred consultation and computerised planning where both take place at the same attendance. However, benefits are not payable for subsequent consultations rendered in association with therapy or planning services in the same course of treatment. Benefits are also payable, under the appropriate radiology item in Group I3, in respect of verification films (or port films) taken during the course of treatment.

## **OBSTETRICS (Group T4)**

### **T4.1 Antenatal Care (Item 16500)**

T4.1.1 In addition to routine antenatal attendances covered by Item 16500 the following services, where rendered during the antenatal period, attract benefits:-

- (a) Items 16502, 16504, 16505, 16508, 16509 (but not normally before the 24th week of pregnancy), 16511, 16512, 16514 and 16600 to 16636.
- (b) The initial consultation at which pregnancy is diagnosed.
- (c) The first referred consultation by a specialist obstetrician when called in to advise on the pregnancy.
- (d) All other services, excluding those in Category 1 and Group T4 of Category 3 not mentioned above.
- (e) Treatment of an intercurrent condition not directly related to the pregnancy.

T4.1.2 Item 16504 relates to the treatment of habitual miscarriage by injection of hormones. A case becomes one of habitual miscarriage following two consecutive spontaneous miscarriages or where progesterone deficiency has been proved by hormonal assay of cells obtained from a smear of the lateral vaginal wall.

T4.1.3 Item 16514 relates to antenatal cardiotocography in the management of high risk pregnancy. Benefits for this service are not attracted when performed during the course of the labour and delivery.

### **T4.2 Labour and Delivery (Items 16515, 16518, 16519, 16525)**

T4.2.1 Benefits for management of labour and delivery covered by Items 16515, 16518, 16519 and 16525 includes the following (where indicated):-

- surgical and/or intravenous infusion induction of labour
- forceps or vacuum extraction
- breech delivery or management of multiple delivery
- evacuation of products of conception by manual removal (not being an independent procedure)
- episiotomy or repair of tears

T4.2.2 Item 16519 covers delivery by any means including Caesarean section. If, however, a patient is referred, or her care is transferred to another medical practitioner for the specific purpose of delivery by Caesarean section, whether because of an emergency situation or otherwise, then Item 16520 would be the appropriate item.

T4.2.3 In some instances the obstetrician may not be able to be present at all stages of confinement. In these circumstances, Medicare benefits are payable under Item 16519 provided that the doctor attends the patient as soon as possible during the confinement and assumes full responsibility for the mother and baby.

T4.2.4 Two items in Group T9 provide benefits for assistance by a medical practitioner at a Caesarean section. Item 51306 relates to those instances where the Caesarean section is the only procedure performed, while Item 51309 applies when other operative procedures are performed at the same time.

T4.2.5 As a rule, 24 weeks would be the period distinguishing a miscarriage from a premature confinement. However, if a live birth has taken place before 24 weeks and the foetus survives, for a reasonable period, benefit would be payable under the appropriate confinement item.

T4.2.6 Where, during labour, a medical practitioner hands the patient over to another medical practitioner, benefits are payable under Item 16518 for the referring practitioner's services. The second practitioner's services would attract benefits under Item 16515 (i.e., management of vaginal delivery) or Item 16520 (Caesarean section). If another medical practitioner is called in for the management of the labour and delivery, benefits for the referring practitioner's services should be assessed under Item 16500 for the routine antenatal attendances and on a consultation basis for the postnatal attendances, if performed.

T4.2.7 At a high risk delivery benefits will be payable for the attendance of any medical practitioner (called in by the doctor in charge of the delivery) for the purposes of resuscitation and subsequent supervision of the neonate. Examples of high risk deliveries include cases of difficult vaginal delivery, Caesarean section or the delivery of babies with Rh problems and babies of toxæmic mothers.

### **T4.3 Caesarean Section (Item 16520)**

T4.3.1 Benefits under this item are attracted only where the patient has been specifically referred to another medical practitioner for the management of the delivery by Caesarean section and the practitioner carrying out the procedure has not rendered any antenatal care. Caesarean sections performed in any other circumstances attract benefits under Item 16519.

### **T4.4 Post-Partum Care (Items 16564-16573)**

T4.4.1 The Schedule fees and benefits payable for Items 16515, 16519 and 16520, cover all postnatal attendances on the mother and the baby, except in the following circumstances:-

- (i) where the medical services rendered are outside those covered by a consultation, e.g., blood transfusion;
- (ii) where the condition of the mother and/or baby is such as to require the services of another practitioner (e.g., paediatrician, gynaecologist, etc);
- (iii) where the patient is transferred, at arms length, to another medical practitioner for routine post-partum, care (eg mother and/or baby returning from a larger centre to a country town or transferring between hospitals following confinement). In such cases routine postnatal attendances attract benefits on an attendance basis. The transfer of a patient within a group practice would not qualify for benefits under this arrangement except in the case of Items 16515 and 16518. These items cover those occasions when a patient is handed over while in labour from the practitioner who under normal circumstances would have delivered the baby, but because of compelling circumstances decides to transfer the patient to another practitioner for the delivery;
- (iv) where during the postnatal period a condition occurs which requires treatment outside the scope of normal postnatal care;
- (v) in the management of premature babies (i.e. babies born prior to the end of the 37th week of pregnancy or where the birth weight of the baby is less than 2500 grams) during the period that close supervision is necessary.

T4.4.2 Normal postnatal care by a medical practitioner would include:-

- (i) uncomplicated care and check of
  - lochia
  - fundus
  - perineum and vulva/episiotomy site
  - temperature
  - bladder/urination
  - bowels
- (ii) advice and support for establishment of breast feeding
- (iii) psychological assessment and support
- (iv) Rhesus status
- (v) Rubella status and immunisation
- (vi) contraception advice/management

T4.4.3 Examinations of apparently normal newborn infants by consultant or specialist paediatricians do not attract benefits.

T4.4.4 Benefits are only payable under the above items in respect of services provided by the same practitioner on the same day where there is a significant time delay between the delivery and the undertaking of the procedure. To qualify for benefits the patient is required to be transferred to theatre, or be administered general anaesthesia or epidural injection for the performance of the procedure.

T4.4.5 Items 16564, 16567, 16570 and 16573 relate to postnatal complications and should not be itemised in respect of a normal delivery. Utilisation of the items will be closely monitored to ensure appropriate usage.

### **T4.5 Interventional Techniques (16600-16636)**

T4.5.1 For Items 16600 to 16636, 35518 and 35674 there is no component in the Schedule fee for the associated ultrasound. Benefits are attracted for the ultrasound under the appropriate items in Group I1 of the Diagnostic Imaging Services Table. If diagnostic ultrasound is performed on a separate occasion to the procedure, benefits would be payable under the appropriate ultrasound item.

T4.5.2 Item 51312 provides a benefit for assistance by a medical practitioner at interventional techniques covered by Items 16606, 16609, 16612, 16615, 16627 and 16633.

## **ASSISTANCE IN THE ADMINISTRATION OF AN ANAESTHETIC (Group T5)**

### **T5.1 General (Item 17503)**

T5.1.1 A separate benefit is payable under Item 17503 for the services of an assistant anaesthetist in connection with an operation or combination of operations on a patient in imminent danger of death. This benefit is payable only in respect of one assistant anaesthetist who must not be the surgeon or assistant surgeon.

T5.1.2 Situations where imminent danger of death requiring an assistant anaesthetist might arise include: complex airway problems, anaphylaxis or allergic reactions, malignant hyperpyrexia, neonatal and complicated paediatric anaesthesia, massive blood loss and subsequent resuscitation, intra-operative cardiac arrest, critically ill patients from intensive care units, inability to wean critically ill patients from pulmonary bypass.

## ANAESTHETICS (Group T6)

### T6.1 General

T6.1.1 The Health Insurance Act provides that where an anaesthetic is administered to a patient, the premedication of the patient in preparation for anaesthesia is deemed to form part of the administration of the anaesthetic. The administration of an anaesthetic also includes the pre-operative examination of the patient in preparation for that administration except where such examination entails a separate attendance carried out at a place other than an operating theatre or an anaesthetic induction room.

T6.1.2 Each medical service likely to be performed under anaesthesia has been assigned a number of anaesthetic units which reflect the skill and responsibility exercised by the anaesthetist (known as "basic units") plus the average anaesthetic time taken for each service without regard to the type of anaesthetic technique employed (known as "time units").

T6.1.3 Anaesthetic time is taken to commence when the anaesthetist begins to prepare the patient for anaesthesia care in the operating room or an equivalent area, and ends when the anaesthetist is no longer in professional attendance, that is when the patient is safely placed under the supervision of other personnel. "Time" units have been assigned on the basis of 1 unit equals 15 minutes up to and including 6 hours and 1 unit equals 10 minutes for time beyond 6 hours.

T6.1.4 The Schedule fee for the administration of an anaesthetic in connection with a procedure has been derived by applying a unit value to the total number of anaesthetic units assigned to the procedure. Group T6 of the Schedule lists the item numbers and appropriate anaesthetic units, together with Schedule fees and Medicare benefits. The appropriate anaesthetic item number and the number of "basic" and "time" units (indicated by "B" and "T") are shown immediately following the description of each procedure likely to be performed under anaesthesia.

T6.1.5 The pre-anaesthetic examination of a patient and the administration of the anaesthetic (other than Item 17974 or a dental anaesthetic listed in Subgroup 3) must be provided in connection with another clinically relevant professional service (as defined in paragraph 1.1.4 of the General Explanatory Notes) listed in the Schedule (or a prescribed medical service rendered by an approved dental practitioner) if it is to attract benefit.

T6.1.6 Except in special circumstances, benefit is not payable for the administration of an anaesthetic listed in Subgroup 2 unless the anaesthetic is administered by a medical practitioner other than the medical practitioner who renders the medical service in connection with which the anaesthetic is administered.

T6.1.7 Fees and benefits established for anaesthetic services cover all essential components in the administration of the anaesthetic. Separate benefit may be attracted, however, for complementary services such as central venous pressure and direct arterial pressure monitoring or estimations of respiratory function by complicated techniques (but not simple techniques covered by Item 11506). It should be noted that extra benefit is not payable for intravenous infusion or electrocardiographic monitoring, provision for which has been made in the value determined for the anaesthetic units.

T6.1.8 The amount of benefit specified for the administration of an anaesthetic is the benefit payable for that service irrespective of whether one or more than one medical practitioner administers it. However, benefit is provided under Group T5 for the services of one assistant anaesthetist (who must not be either the surgeon or assistant surgeon) where the anaesthetic is administered by the anaesthetist in connection with an operation on a patient in imminent danger of death.

T6.1.9 Before benefit will be paid for the administration of an anaesthetic, or for the services of an assistant anaesthetist, details of the operation, sufficient to identify it with the appropriate item in the Schedule and the name of the medical practitioner who performed the operation must be shown on the anaesthetist's account in addition to the details set out at paragraph 7.1 of the General Explanatory Notes.

T6.1.10 Where a regional nerve block or field nerve block is administered by a medical practitioner other than the practitioner carrying out the operation, the block is assessed as an anaesthetic item according to the advice in paragraph T6.1.2. When a block is carried out in cases not associated with an operation, such as for intractable pain or during labour, the service falls under Group T7.

T6.1.11 When a regional nerve block or field nerve block covered by an item in Group T7 of the Schedule is administered by a medical practitioner in the course of a surgical procedure undertaken by him/her, then such a block will attract benefit under the appropriate item in Group T7.

T6.1.12 It is to be noted that where a procedure is carried out with local infiltration or digital block as the means of anaesthesia, that anaesthesia is considered to be part of the procedure and an additional benefit is therefore not payable.

T6.1.13 Before an operation is decided on, a surgeon may refer a patient to a specialist anaesthetist for an opinion as to the patient's fitness to undergo anaesthesia. Such an attendance will attract benefit as follows:-

- (i) if, as a result of the consultation, anaesthesia and surgery are proceeded with in the ordinary way, then Item 17603 applies;
- (ii) if, as a result of the consultation, surgery is contra-indicated or is postponed for some days or weeks, this consultation, and any subsequent consultation by the anaesthetist during the postponement period, attracts benefits under the appropriate attendance item. In such a case, to qualify for the specialist rate of benefit, the patient must present a letter or note of referral by the referring doctor.

T6.1.14 It may happen that the professional service for which the anaesthetic is administered does not itself attract a benefit because it is part of the after-care of an operation. This does not, however, affect the benefit payable for the anaesthetic. Benefit is payable for the anaesthetic administered in connection with such a surgical procedure (or combination of surgical procedures) even though no benefit is payable for the surgical procedure.

T6.1.15 The administration of epidural anaesthesia during labour is covered by Item 18216 or 18219 in Group T7 of the Schedule whether administered by the medical practitioner undertaking the confinement or by another medical practitioner. Subsequent "top-ups" are covered by Item 18222 or 18225.

## **T6.2 Multiple Anaesthetic Rule**

T6.2.1 The fee for an anaesthetic administered in connection with two or more operations performed on a patient on the one occasion is calculated by the following rule applied to the anaesthetic items for the individual operations:-

- 100% for the item with the greatest anaesthetic fee
- plus 20% for the item with the next greatest anaesthetic fee
- plus 10% for each other item.

- Note:** (a) Fees so calculated which result in a sum which is not a multiple of 5 cents are to be taken to the next higher multiple of 5 cents.
- (b) Where the anaesthetic items for two or more operations performed on the one occasion have fees which are equal, one of these amounts shall be treated as being greater than the other or others of those amounts.
- (c) The multiple anaesthetic rule also applies to combinations of items in Subgroup 3 (dental anaesthetics) with items in Subgroup 2.
- (d) The Schedule fee for benefits purposes is the aggregate of the fees calculated in accordance with the above formula.

## **T6.3 Prolonged Anaesthesia in connection with a Medical Service**

T6.3.1 Anaesthetic services provided in connection with a medical service must exceed the normal time allocated in the Schedule by the following times to qualify as a prolonged anaesthetic:-

- for procedures up to 3 hours (12 anaesthetic time units) - by more than 1 hour
- for procedures normally taking more than 3 hours and up to 6 hours (13 to 24 anaesthetic time units) - by more than 1 hour and 30 minutes
- for procedures exceeding 6 hours duration (25 or more anaesthetic time units) - by more than 2 hours.

T6.3.2 Additional benefits are payable under Items 17800, 17805 and 17810 to cover the time component of prolonged anaesthesia and should be identified separately from the item covering the administration of the anaesthetic. The derived fee for these items provides for an amount of \$14.20 for each time unit in excess of normal anaesthesia time.

T6.3.3 Normal anaesthesia time is derived in the usual way. Time units are allocated on the basis of 1 unit per 15 minutes (or part thereof) for services up to 6 hours, and 1 unit for each 10 minutes (or part thereof) for services in excess of 6 hours.

T6.3.4 For multiple procedures, the multiple anaesthetic rule should be applied to time units only in deriving normal anaesthetic time.

### ***Examples:***

#### Single Anaesthetic Services

- (a) Item for which anaesthetic service claimed - 32108 (5B+9T) - where actual time taken is 3 hours and 30 minutes

Usual time = 2 hours and 15 minutes (9 time units)  
Actual time = 3 hours and 30 minutes (14 time units)

Actual time exceeds usual time by 1 hour and 15 minutes - service qualifies under Item 17800 as follows:-

Additional time = actual time less usual time  
= 14 units less 9 units  
= 5 units

Schedule fee for additional time (Item 17800):  $\$14.20 \times 5 = \$71.00$

- (b) Item for which anaesthetic service claimed - 32748 (8B+16T) - where actual time taken is 6 hours and 25 minutes

Usual time = 4 hours (16 time units)  
Actual time = 6 hours and 25 minutes (24 @15mins + 3 @10mins = 27 time units)

Actual time exceeds usual time by 2 hours and 25 minutes - service qualifies under Item 17805 as follows:-

Additional time = actual time less usual time  
= 27 units less 16 units

= 11 units

Schedule fee for additional time (Item 17805):  $\$14.20 \times 11 = \$156.20$

(c) Item for which anaesthetic service claimed - 39640 (12B+36T) - where actual time taken is 11 hours

Usual time = 8 hours (24@ 15mins + 12@ 10mins = 36 time units)

Actual time = 11 hours (24@15mins + 30@10mins = 54 time units)

Actual time exceeds usual time by 3 hours - service qualifies under Item 17810 as follows:-

Additional time = actual time less usual time

= 54 units less 36 units

= 18 units

Schedule fee for additional time (Item 17810):  $\$14.20 \times 18 = \$255.60$

#### Multiple Anaesthetic Services

Items for which anaesthetic service claimed - 36531(7B+12T), 36600(6B+8T), 30378(7B+7T) - where actual time taken is 6 hours

Usual time is calculated by applying the multiple anaesthetic rule, i.e.

36531 - 12T (180 mins) @ 100% = 180 mins

36600 - 8T (120 mins) @ 20% = 24 mins

30378 - 7T (105 mins) @ 10% = 10.5 mins

Usual time = 3 hours and 35 mins or 15 time units (rounded)

Actual time = 6 hours or 24 time units

Actual time exceeds usual time by 2 hours and 25 minutes - service qualifies under Item 17805 as follows:-

Additional time = actual time less usual time

= 24 units less 15 units

= 9 units

Schedule fee for additional time (Item 17805):  $\$14.20 \times 9 = \$127.80$

#### **T6.4 Prolonged Anaesthesia in connection with a Dental Service**

T6.4.1 Item 18119 applies in relation to the administration of an anaesthetic in connection with a dental procedure where the time for the operation exceeds 3 hours. Where the anaesthetic service is prolonged, Item 18119 should be itemised in lieu of the item which would otherwise be used for the administration of the anaesthetic.

#### **T6.5 Anaesthetic Services Associated with MRI (Item 18013)**

T6.5.1 Benefits under this item are restricted to anaesthetic services administered in association with magnetic resonance imaging (MRI) services carried out using MRI equipment located at recognised (public) hospitals. (Medicare benefits are not payable for MRI services - see Note DIL. in Category 5.)

#### **T6.6 Anaesthetic in connection with Abandoned Surgery (Item 17970)**

T6.6.1 Claims for benefits under Item 17970 should be submitted to Medicare for approval of benefits and should include full details of the circumstances of the operation, including details of the surgery which had been proposed and the reasons for the operation being discontinued.

### **REGIONAL OR FIELD NERVE BLOCKS (Group T7)**

#### **T7.1 General**

T7.1.1 A nerve block is interpreted as the anaesthetising of a substantial segment of the body innervated by a large nerve or an area supplied by a smaller nerve where the technique demands expert anatomical knowledge and a high degree of precision.

T7.1.2 Where an anaesthetic combines a regional nerve block with a general anaesthetic for an operative procedure, benefit will be paid only under the anaesthetic item relevant to the operation as set out in Group T6.

T7.1.3 Where a regional or field nerve block is administered by a medical practitioner other than the practitioner carrying out

the operation, the block attracts benefits under the Group T6 anaesthetic item and not the block item in Group T7.

T7.1.4 Where a regional or field nerve block which is covered by an item in Group T7 is administered by a medical practitioner in the course of a surgical procedure undertaken by that practitioner, then such a block will attract benefit under the appropriate Group T7 item.

T7.1.5 When a block is carried out in cases not associated with an operation, such as for intractable pain or during labour, the service falls under Group T7.

T7.1.6. Digital ring analgesia, local infiltration into tissue surrounding a lesion or paracervical (uterine) analgesia are not eligible for the payment of Medicare benefits under items within Group T7. Where procedures are carried out with local infiltration or digital block as the means of anaesthesia, that anaesthesia is considered to be part of the procedure.

#### **T7.2 Introduction of a Narcotic (Item 18206)**

T7.2.1 Benefits are attracted for this procedure irrespective of the stage of the operation at which the narcotic is introduced.

#### **T7.3 Epidural Injection for Control of Post-operative Pain (Item 18209)**

T7.3.1 This item provides benefit for the epidural injection of a local anaesthetic in the caudal, lumbar or thoracic region administered towards the end of an operation for the purposes of controlling pain in the post-operative period.

#### **T7.4 Regional or Field Nerve Blocks for Post-operative Pain (Items 18210 - 18212)**

T7.4.1 Benefits are payable under Items 18210 to 18212 in addition to the general anaesthetic for the related procedure.

#### **T7.5 Maintenance of Regional or Field Nerve Block (Items 18222, 18225)**

T7.5.1 Medicare benefit is attracted under these items only when the service is performed other than by the operating surgeon. This does not preclude benefits for an obstetrician performing an epidural block during labour.

T7.5.2 When the service is performed by the operating surgeon during the post-operative period of an operation it is considered to be part of the normal aftercare. In these circumstances a Medicare benefit is not attracted.

#### **T7.6 Destruction of Nerve Branch by Neurolytic Agent (18292)**

T7.6.1 This item includes the use of botulinus toxin as a neurolytic agent.

#### **T7.7 Intrathecal or Epidural Injection (Item 18232)**

T7.7.1 Caudal has been deleted from item on the advice of the anaesthetic profession as 'caudal infusion/injection' is covered by 'intrathecal infusion/injection'.

### **SURGICAL OPERATIONS (Group T8)**

#### **T8.1 General**

T8.1.1 Many items in Group T8 of the Schedule are qualified by one of the following phrases:

"as an independent procedure";

"not being a service associated with a service to which another item in this Group applies"; or

"not being a service to which another item in this Group applies"

An explanation of each of these phrases is as follows.

#### **T8.2 As an Independent Procedure**

T8.2.1 The inclusion of this phrase in the description of an item precludes payment of benefits when:-

- (i) a procedure so qualified is associated with another procedure that is performed through the same incision, e.g. nephrostomy (Item 36552) in the course of an open operation on the kidney for another purpose;
- (ii) such procedure is combined with another in the same body area, e.g. direct examination of larynx (Item 41846) with another operation on the larynx or trachea;
- (iii) the procedure is an integral part of the performance of another procedure, e.g. removal of foreign body (Item 30067/30068) in conjunction with debridement of deep or extensive contaminated wound of soft tissue, including suturing of that wound when performed under general anaesthetic (Item 30023).

#### **T8.3 Not Being a Service Associated with a Service to which another Item Applies**

T8.3.1 "Not being a service associated with a service to which another item in this Group applies" means that benefit is not payable for any other item in that Group when it is performed on the same occasion as this item. eg item 39333.

T8.3.2 "Not being a service associated with a service to which Item ..... applies" means that when this item is performed on the same occasion as the reference item no benefit is payable. eg item 39330.

#### **T8.4 Not Being a Service to which another Item in this Group Applies**

T8.4.1 "Not being a service to which another item in this Group applies" means that this item may be itemised if there is no specific item relating to the service performed, e.g. Item 30387 (Laparotomy involving operation on abdominal viscera (including pelvic

viscera), not being a service to which another item in this Group applies). Benefits may be attracted for an item with this qualification as well as benefits for another service during the course of the same operation.

### **T8.5 Multiple Operation Formula**

T8.5.1 The fees for two or more operations, other than amputations, performed on a patient on the one occasion (except as provided in paragraph T8.5.3) are calculated by the following rule:-

- 100% for the item with the greatest Schedule fee
- plus 50% for the item with the next greatest Schedule fee
- plus 25% for each other item.

**Note:**

- (a) Fees so calculated which result in a sum which is not a multiple of 5 cents are to be taken to the next higher multiple of 5 cents.
- (b) Where two or more operations performed on the one occasion have Schedule fees which are equal, one of these amounts shall be treated as being greater than the other or others of those amounts.
- (c) The Schedule fee for benefits purposes is the aggregate of the fees calculated in accordance with the above formula.

(For these purposes the term "operation" includes all items in Group T8 (other than Subgroup 12 of that Group).

T8.5.2 This rule does not apply to an operation which is one of two or more operations performed under the one anaesthetic on the same patient if the medical practitioner who performed the operation did not also perform or assist at the other operation or any of the other operations, or administer the anaesthetic. In such cases the fees specified in the Schedule apply.

T8.5.3 Where two medical practitioners operate independently and either performs more than one operation, the method of assessment outlined in paragraph T8.5.1 would apply in respect of the services performed by each medical practitioner.

T8.5.4 If the operation comprises a combination of procedures which are commonly performed together and for which a specific combined item is provided in the Schedule, it is regarded as the one item and service in applying the multiple operation rule.

T8.5.5 There are a number of items in the Schedule where the description indicates that the item applies only when rendered in association with another procedure. The Schedule fees for such items have therefore been determined on the basis that they would always be subject to the "multiple operation rule".

T8.5.6 Where the need arises for the patient to be returned to the operating theatre on the same day as the original procedure for further surgery due to post-operative complications, which would not be considered as normal aftercare - see paragraph T8.7, such procedures would generally not be subject to the "multiple operation rule". Accounts should be endorsed to the effect that they are separate procedures so that a separate benefit may be paid.

### **T8.6 Procedure Performed with Local Infiltration or Digital Block**

T8.6.1 It is to be noted that where a procedure is carried out with local infiltration or digital block as the means of anaesthesia, that anaesthesia is considered to be part of the procedure and an additional benefit is therefore not payable.

### **T8.7 Aftercare (Post-operative Treatment)**

T8.7.1 Section 3(5) of the Health Insurance Act states that services included in the Schedule (other than attendances) include all professional attendances necessary for the purposes of post-operative treatment of the patient (for the purposes of this book, post-operative treatment is generally referred to as "after-care"). However, it should be noted that in some instances the after-care component has been specifically excluded from the item and this is indicated in the description of the item. In such cases benefits would be payable on an attendance basis where post-operative treatment is necessary. In other cases, where there may be doubt as to whether an item actually does include the after-care, this fact has been reinforced by the inclusion of the words "including after-care" in the description of the item.

T8.7.2 After-care is deemed to include all post-operative treatment rendered by medical practitioners and need not necessarily be limited to treatment given by the surgeon or to treatment given by any one medical practitioner.

T8.7.3 The amount and duration of after-care consequent on an operation may vary between patients for the same operation, as well as between different operations which range from minor procedures performed in the medical practitioner's surgery, to major surgery carried out in hospital. As a guide to interpretation, after-care includes all attendances until recovery from the operation (fracture, dislocation etc.) plus the final check or examination, regardless of whether the attendances are at the hospital, rooms, or the patient's home.

T8.7.4 Attendances which form part of after-care, whether at hospitals, rooms, or at the patient's home, should not be shown on the doctor's account. When additional services are itemised, the doctor should show against those services on the account the words "not normal after-care", with a brief explanation of the reason for the additional services.

T8.7.5 Some minor operations are merely stages in the treatment of a particular condition. Attendances subsequent to such operations should not be regarded as after-care but rather as a continuation of the treatment of the original condition and attract benefits. Items to which this policy applies are Items 30219, 30222/30223, 32500, 34521, 34524, 38406, 38409, 39015, 41626, 41656, 42614, 42644, 42650 and 47912. Likewise, there are a number of services which may be performed during the aftercare period of procedures for pain relief which would also attract benefits. Such services would include all items in Groups T6 and T7 and items 39013, 39100, 39115, 39118, 39121, 39127, 39130, 39133, 39136, 39324 and 39327.

T8.7.6 Where a patient has been operated on in a recognised hospital as a public patient (as defined in Section 3(i) of the Health Insurance Act), post-operative attendances by a private medical practitioner at a place other than the hospital attract Medicare

benefits on an attendance basis, subject to the hospital meeting its responsibilities under the Commonwealth/State Medicare Agreements relating to the provision of aftercare services i.e. to provide appropriate aftercare services wherever possible.

T8.7.7 When a surgeon delegates after-care to a local doctor, Medicare benefit may be apportioned on the basis of 75% for the operation and 25% for the after-care. Where the benefit is apportioned between two or more medical practitioners, no more than 100% of the benefit for the procedure will be paid.

T8.7.8 In respect of fractures, where the after-care is delegated to a doctor at a place other than the place where the initial reduction is carried out, benefit may be apportioned on a 50:50 basis rather than on the 75:25 basis suggested for surgical operations.

T8.7.9 Where the reduction of a fracture is carried out by hospital staff in the out-patient or casualty department of a recognised hospital and the patient is then referred to a private practitioner for supervision of the after-care, Medicare benefits are payable for the after-care treatment on an attendance basis.

T8.7.10 The following table shows the period which has been adopted as reasonable for the after-care of fractures:-

*(Note: This list is a guide only and each case should be judged on individual merits. See paragraphs T8.7.2 to T8.7.4 above.)*

<b>Treatment of fracture of</b>	<b>After-care Period</b>
Terminal phalanx of finger or thumb	6 weeks
Proximal phalanx of finger or thumb	6 "
Middle phalanx of finger	6 "
One or more metacarpals not involving base of first carpometacarpal joint	6 "
First metacarpal involving carpometacarpal joint (Bennett's fracture)	8 "
Carpus (excluding navicular)	6 "
Navicular or carpal scaphoid	3 months
Colles'/Smith/Barton's fracture of wrist	3 "
Distal end of radius or ulna, involving wrist	8 weeks
Radius	8 "
Ulna	8 "
Both shafts of forearm or humerus	3 months
Clavicle or sternum	4 weeks
Scapula	6 "
Pelvis (excluding symphysis pubis) or sacrum	4 months
Symphysis pubis	4 "
Femur	6 "
Fibula or tarsus (excepting os calcis or os talus)	8 weeks
Tibia or patella	4 months
Both shafts of leg, ankle (Potts fracture) with or without dislocation, os calcis (calcaneus) or os talus	4 months
Metatarsals - one or more	6 weeks
Phalanx of toe (other than great toe)	6 "
More than one phalanx of toe (other than great toe)	6 "
Distal phalanx of great toe	8 "
Proximal phalanx of great toe	8 "
Nasal bones, requiring reduction	4 "
Nasal bones, requiring reduction and involving osteotomies	4 "
Maxilla or mandible, unilateral or bilateral, not requiring splinting	6 "
Maxilla or mandible, requiring splinting or wiring of teeth	3 months
Maxilla or mandible, circumosseous fixation of	3 "
Maxilla or mandible, external skeletal fixation of	3 "
Zygoma	6 weeks
Spine (excluding sacrum), transverse process or bone other than vertebral body requiring immobilisation in plaster or traction by skull calipers	3 months
Spine (excluding sacrum), vertebral body, without involvement of cord, requiring immobilisation in plaster or traction by skull calipers	6 "
Spine (excluding sacrum), vertebral body, with involvement of cord	6 "

### **T8.8 Repair of Recent Wound (Items 30023 - 30049)**

T8.8.1 The repair of recent wound referred to in these items must be undertaken by suture, tissue adhesive resin (such as methyl methacrylate) or clips.

T8.8.2 Item 30023 covers debridement of "deep and extensively contaminated" wound. Benefits are not payable under this item for debridement which would be expected to be encountered as part of an operative approach to the treatment of fractures.

## **T8.9 Drill Biopsy (Item 30078)**

T8.9.1 Needle aspiration biopsy attracts benefit on an attendance basis and not under this item.

## **T8.10 Removal of Skin Lesions (Items 31200 - 31355)**

T8.10.1 The excision of warts and seborrheic keratoses attracts benefits on an attendance basis. Pre-malignant lesions are covered by Items 31200 to 31240.

T8.10.2 The excision of suspicious pigmented and other skin lesions for diagnostic purposes attract benefits under Items 31205 to 31240. Only if a further more extensive excision is undertaken should the items covering excision of malignancies be used.

T8.10.3 Items 31200 and 31245 *do not require* specimen to be sent for histological confirmation. Items 31205 to 31240 and 31250 *require* that specimen be sent for histological examination. Items 31255 to 31335 *require* that specimen be sent for histological confirmation of malignancy which *must* be received before itemisation of accounts for Medicare benefits purposes.

T8.10.4 Where histological results are available at the time of issuing accounts, the histological diagnosis will decide the appropriate itemisation. If the histological report shows the lesion to be benign, Items 31205 to 31240 should be used. Malignant tumours are covered by Items 31255 to 31335.

T8.10.5 Item 31295 applies to the treatment of residual or recurrent BCCs or SCCs of the head and neck only, where performed by a specialist, or practitioner other than the practitioner who provided the previous treatment. Where the conditions of the item are not met, Items 31255 to 31290 are available to cover removal of residual or recurrent BCCs or SCCs.

T8.10.6 For the purposes of these items, the tumour/lesion size should be determined by the macroscopic measurement of the surface diameter of the tumour/lesion or, for elliptical tumours/lesions, by the average surface diameter. The relevant size of the lesion relates to that measured in situ before excision. Suture of wound following surgical excision also includes closure by tissue adhesive resin, clips or similar.

T8.10.7 Utilisation of the structure will be closely monitored and audited by the Health Insurance Commission to ensure appropriate usage of items. It will be necessary for practitioners to retain copies of histological reports.

## **T8.11 Lipectomy, Wedge Excision - Two or More Excisions (Item 30171)**

T8.11.1 Multiple lipectomies, e.g., both buttocks and both thighs attract benefits under Item 30171 once only, i.e. the multiple operation rule does not apply. Medicare benefits are not payable in respect of liposuction, except in the circumstances outlined in Item 45584.

## **T8.12 Treatment of Keratoses, Warts etc (Items 30186, 30187, 30189, 30192, 36815)**

T8.12.1 Treatment of keratoses, warts, etc. attract benefits on an attendance basis, with the exception of the treatment of warts in the circumstances outlined in Items 30186, 30187, 30189, 30192 and 36815.

T8.12.2 The treatment of less than 10 premalignant skin lesions by galvanocautery, electrodesiccation or cryocautery also attracts benefits on an attendance basis.

## **T8.13 Cryotherapy and Serial Curettage Excision (Items 30196 - 30203)**

T8.13.1 In Items 30196 and 30197, serial curettage excision, as opposed to simple curettage, refers to the technique where the margin having been defined, the lesion is carefully excised by a skin curette using a series of dissections and cauterisations so that all extensions and infiltrations of the lesion are removed.

T8.13.2 For the purposes of Items 30196 to 30203 (inclusive), the requirement for histopathological proof of malignancy is satisfied where multiple lesions are to be removed from the one anatomical region if a single lesion from that region is histologically tested and proven for malignancy.

## **T8.14 Telangiectases or Starburst Vessels (Items 30213, 30214)**

T8.14.1 These items are restricted to treatment on the head and/or neck. A session of less than 20 minutes duration attracts benefits on an attendance basis.

T8.14.2 Item 30213 is restricted to a maximum of 6 sessions in a 12 month period. Where additional treatments are indicated in that period, Item 30214 should be used. Claims for benefits under Item 30214 should be accompanied by full clinical details, including colour photographs taken before and after treatment, to verify the need for additional services. Claims should be lodged with Medicare in the usual manner. Clinical details and/or photographs accompanying the claim should be sealed in an envelope marked "Medical - In Confidence".

## **T8.15 Subcutaneous Mastectomy (Item 30356)**

T8.15.1 When, after completing a subcutaneous mastectomy a prosthesis is inserted, benefits are payable for the latter procedure under Item 45527, the multiple operation formula applying.

## **T8.16 Laparotomy and Other Procedures (Item 30375)**

T8.16.1 This item covers several operations on abdominal viscera not dissimilar in time and complexity. Where more than one of the procedures are performed during the one operation, each procedure may be itemised according to the multiple operation formula.

**T8.17 Gastrectomy, Sub-total Radical (Item 30523)**

T8.17.1 The item differs from total radical Gastrectomy (Item 30524) in that a small part of the stomach is left behind. It involves resection of the greater omentum and posterior abdominal wall lymph nodes with or without splenectomy.

**T8.18 Anti-reflux Operations (Items 30527-30533)**

T8.18.1 These items cover various operations for reflux oesophagitis. Where the only procedure performed is the simple closure of a diaphragmatic hiatus benefit would be attracted under Item 30387 (Laparotomy involving operation on abdominal viscera, including pelvic viscera, not being a service to which another item in this Group applies).

**T8.19 Varicose veins, Multiple Injections of (Items 32500, 32501)**

T8.19.1 Item 32500 is restricted to a maximum of 6 treatments in a 12 month period. Where additional treatments are necessary in that period, Item 32501 applies. Claims for benefits should be accompanied by full clinical details, including colour photographs taken before and after treatment, to verify the need for additional services. Claims should be lodged with Medicare in the usual manner. Clinical details and/or photographs accompanying the claim should be sealed in an envelope marked "Medical-In Confidence".

**T8.20 Arterial and Venous Patches (Items 33545-33551, 34815)**

T8.20.1 Vascular surgery items have been constructed on the basis that arteriotomy and venotomy wounds are closed by simple suture without the use of a patch.

T8.20.2 Where a patch angioplasty is used to enlarge a narrowed vein, artery or arteriovenous fistula, the correct item would be 34815 or 34518. If the vein is harvested for the patch through a separate incision, Item 33551 would also apply, in accordance with the multiple operation rule.

T8.20.3 If a patch graft is involved in conjunction with an operative procedure included in Items 33500 - 33542, 33803, 33806, 33815, 33833 or 34142, the patch graft would attract benefits under Item 33545 or 33548 in addition to the item for the primary operation (under the multiple operation rule). Where vein is harvested for the patch through a separate incision Item 33551 would also apply.

**T8.21 Colposcopic Examination (Item 35614)**

T8.21.1 It should be noted that colposcopic examination (screening) of women during the course of a consultation does not attract Medicare benefits under Item 35614 except in the following circumstances:- (i) where the patient has had an abnormal cervical smear; (ii) where there is a history of ingestion of oestrogen by the patient's mother during her pregnancy; or (iii) where the patient has been referred by another medical practitioner because of suspicious signs of genital cancer.

**T8.22 Hysteroscopy (Item 35626)**

T8.22.1 Hysteroscopy undertaken in the office/consulting rooms can be claimed under this item where the conditions set out in the description of the item are met.

**T8.23 Curettage of Uterus under GA or Major Nerve Block (Items 35639/35640)**

T8.23.1 Uterine scraping or biopsy using small curettes (e.g. Sharman's or Zeppelin's) and requiring minimal dilatation of the cervix, not necessitating a general anaesthesia, does not attract benefits under these items but would be paid under Item 35620 where malignancy is suspected, or otherwise on an attendance basis.

**T8.24 Neoplastic Changes of the Cervix (Items 35644-35648)**

T8.24.1 The term "previously confirmed intraepithelial neoplastic changes of the cervix" in these items refers to diagnosis made by either cytologic, colposcopic or histologic methods. This may also include persistent human papilloma virus (HPV) changes of the cervix.

**T8.25 Debulking of Uterus (Item 35658)**

T8.25.1 Benefits are payable under Item 35658, using the multiple operation rule, in addition to vaginal hysterectomy.

**T8.26 Radical or Debulking Operation for Ovarian Tumour including Omentectomy (Item 35720)**

T8.26.1 This item refers to the operation for carcinoma of the ovary where the bulk of the tumour and the omentum are removed. Where this procedure is undertaken in association with hysterectomy benefits are payable under both item numbers with the application of the multiple operation formula.

**T8.27 Cardiac Pacemaker Insertion (Items 38253, 38259)**

T8.27.1 The fees for the insertion of a pacemaker (Items 38253 and 38259) cover the testing of cardiac conduction or conduction threshold, etc related to the pacemaker and pacemaker function. Accordingly, additional benefits are not payable for such routine testing under Item 38209 or 38212 (Cardiac electrophysiological studies).

**T8.28 Coronary Artery Bypass (Items 38497 - 38503)**

T8.28.1 The fee for Item 38497 includes the harvesting of vein graft material. Harvesting of internal mammary artery and/or vein graft material is covered in the fees for Items 38500 and 38503. Where harvesting of an artery other than the internal mammary artery is undertaken, benefits are payable under Item 38496 on the multiple operation basis. The procedure of coronary artery bypass grafting using arterial graft is covered by Item 38500 or 38503 irrespective of the origin of the arterial graft.

**T8.29 Re-operation via Median Sternotomy (Item 38640)**

T8.29.1 Medicare benefits are payable for Item 38640 plus the item/s covering the major surgical procedure/s performed at the time of the re-operation, using the multiple operation formula. Benefits are not payable for Item 38640 in association with Item 38656, 38643 or 38647.

**T8.30 Skull Base Surgery (Items 39640 - 39662)**

T8.30.1 The surgical management of lesions involving the skull base (base of anterior, middle and posterior fossae) often requires the skills of several surgeons or a number of surgeons from different surgical specialties working together or in tandem during the operative session. These operations are usually not staged because of the need for definitive closure of the dura, subcutaneous tissues, and skin to avoid serious infections such as osteomyelitis and/or meningitis.

T8.30.2 Items 39640 to 39662 cover the removal of the tumour, which would normally be performed by a neurosurgeon. Other items are available to cover procedures performed as a part of skull base surgery by practitioners in other specialties, such as ENT and plastic and reconstructive surgery.

**T8.31 Intradiscal Injection of Chymopapain (Item 40336)**

T8.31.1 The fee for this item includes routine post-operative care. Associated radiological services attract benefits under the appropriate item in Group I3.

**T8.32 Removal of Ventilating Tube from Ear (Item 41500)**

T8.32.1 Benefits are not payable under Item 41500 for removal of ventilating tube. This service attracts benefits on an attendance basis.

**T8.33 Meatoplasty (Item 41515)**

T8.33.1 When this procedure is associated with Item 41530, 41548, 41557, 41560 or 41563 the multiple operation rule applies.

**T8.34 Reconstruction of Auditory Canal (Item 41524)**

T8.34.1 When associated with Item 41557, 41560 or 41563 the multiple operation rule applies.

**T8.35 Removal of Nasal Polyp or Polypi (Items 41662, 41665/41668)**

T8.35.1 Where such polyps are removed in association with another intranasal procedure, Medicare benefit is paid under Item 41662. However where the associated procedure is of lesser value than Items 41665/41668, benefit for removal of polypi would be paid under Items 41665/41668.

**T8.36 Larynx, Direct Examination (Item 41846)**

T8.36.1 Benefit is not attracted under this item when an anaesthetist examines the larynx during the course of administration of a general anaesthetic.

**T8.37 Microlaryngoscopy (Item 41858)**

T8.37.1 This item covers the removal of "juvenile papillomata" by mechanical means, e.g. cup forceps. Item 41861 refers to the removal by laser surgery.

**T8.38 Refractive Keratoplasty (Item 42671)**

T8.38.1 The description of this item refers to two sets of calculations, one performed some time prior to the operation, the other during the course of the operation. Both of these measurements are included in the Schedule fee and benefit for Item 42671.

**T8.39 Vitrectomy (Items 42719-42731)**

T8.39.1 In relation to vitreous surgery the following items would be regarded as intraocular operations and should not be used in combination with Items 42719-42731:

42551	42554	42557	42560	42563	42566
42569	42698	42701	42702	42703	42704
42707	42716	42734	42743	42746	42761
42764	42767	42857			

T8.39.2 This list of exclusions was developed following consultation with the Royal Australian College of Ophthalmologists.

**T8.40 Laser Trabeculoplasty (Items 42782, 42783)**

T8.40.1 Item 42782 is restricted to a maximum of 4 treatments in a 2 year period. Where additional treatments are necessary in that period Item 42783 should be utilised. Claims for benefits should be accompanied by full clinical details to verify the need for additional services. Claims should be lodged with Medicare in the usual manner. Clinical details and/or photographs accompanying the claim should be sealed in an envelope marked "Medical-In Confidence".

**T8.41 Laser Iridotomy (Items 42785, 42786)**

T8.41 Item 42785 is restricted to a maximum of 2 treatments in a 2 year period. Where additional treatments are necessary in that period Item 42786 should be utilised. Claims for benefits should be accompanied by full clinical details to verify the need for additional services. Claims should be lodged with Medicare in the usual manner. Clinical details and/or photographs accompanying the claim should be sealed in an envelope marked "Medical-In Confidence".

**T8.42 Laser Capsulotomy (Items 42788, 42789)**

T8.42 Item 42788 is restricted to a maximum of 2 treatments in a 2 year period. Where additional treatments are necessary in that period Item 42789 should be utilised. Claims for benefits should be accompanied by full clinical details to verify the need for additional services. Claims should be lodged with Medicare in the usual manner. Clinical details and/or photographs accompanying the claim should be sealed in an envelope marked "Medical-In Confidence".

**T8.43 Laser Vitreolysis or Corticolysis of lens material or Fibrinolysis (Items 42791, 42792)**

T8.43 Item 42791 is restricted to a maximum of 2 treatments in a 2 year period. Where additional treatments are necessary in that period Item 42792 should be utilised. Claims for benefits should be accompanied by full clinical details to verify the need for additional services. Claims should be lodged with Medicare in the usual manner. Clinical details and/or photographs accompanying the claim should be sealed in an envelope marked "Medical-In Confidence".

**T8.44 Division of Suture by Laser (Item 42794, 42797)**

T8.44.1 Benefits under this item are restricted to a maximum of 2 treatments in a 2 year period. There is no provision for additional treatments in that period.

**T8.45 Laser Coagulation of Corneal or Scleral Blood Vessels (Item 42797)**

T8.45.1 Benefits under this item are restricted to 4 treatments in a 2 year period. There is no provision for additional treatments in that period.

T8.45.2 Benefits are not payable under Item 42797 for procedures undertaken for cosmetic purposes (see paragraph 12.1.2 of the General Explanatory Notes).

**T8.46 Readjustment of Adjustable Sutures (Item 42845)**

T8.46.1 This item refers to the occasion when readjustment has to be made to the sutures to vary the angle of deviation of the eye. It does not cover the mere tightening of the loosely tied sutures without repositioning.

**T8.47 Full Face Chemical Peel (Items 45019, 45020)**

T8.47.1 These items relate to full face chemical peel in the circumstances outlined in the item descriptors. Claims for benefits should be accompanied by full clinical details, including colour photographs taken before and after treatment, to confirm that the conditions for payment of benefits have been met. Claims should be lodged with Medicare in the usual manner. Clinical details and/or photographs accompanying the claim should be sealed in an envelope marked "Medical-In Confidence".

**T8.48 Aesthetic Area (Items 45021 - 45026)**

T8.48.1 For the purposes of the above items, one aesthetic area is any of the following of the whole face (considered to be divided into six segments):- forehead; right cheek; left cheek; nose; upper lip; and chin.

**T8.49 Foreign Implant (Item 45051)**

T8.49.1 For Medicare benefits to be payable for this item the intention of the implantation must be either to reconstruct facial or body contours which have been damaged by trauma or disease or to correct a deformity which has been pathologically caused.

**T8.50 Local Skin Flap - Definition**

T8.50.1 A local skin flap is an area of skin and subcutaneous tissue designed to be elevated from the skin adjoining a defect requiring closure. The flap remains partially attached by its pedicle and is moved into the defect by rotation, advancement or transportation, or a combination of these manoeuvres. A benefit is only payable when the flap is required for adequate wound closure. A secondary defect will be created which may be closed by direct suture, skin grafting or sometimes a further local skin flap. This later procedure will also attract benefit if closed by graft or flap repair but not when closed by direct suture.

T8.50.2 By definition, direct wound closure (e.g. by suture) does not constitute skin flap repair. Similarly, angled, curved or trapdoor incisions which are used for exposure and which are sutured back in the same position relative to the adjacent tissues are not skin flap repairs. Undermining of the edges of a wound prior to suturing is considered a normal part of wound closure and is

not considered a skin flap repair.

T8.50.3 A "Z" plasty is a particular type of transposition flap repair. Although 2 flaps are created, benefit will be paid on the basis of Item 45200, 45203 or 45206 once only.

T8.50.4 Items where benefit for local skin flap repair (if indicated as above) is payable, include:

30023, 31200-31340, 30180, 30186, 30269, 45030, 45033, 45036-45045, 45506, 45512, 45626.

Note: This list is not all-inclusive and there are circumstances where other services might involve flap repair.

T8.50.5 The following items are examples of where local flap repair would usually not be payable. If further advice is required the Health Insurance Commission should be contacted.

30026-30049, 30052, 30099-30114, 30165-30177, 45521, 45524, 45563, 45587, 45632-45644, 45659, 45662, 45677-45713.

### **T8.51 Augmentation Mammoplasty (Items 45524, 45527, 45528)**

T8.51.1 Medicare benefit is generally not attracted under Item 45524 unless the asymmetry in breast size is greater than 10%. Augmentation of a second breast some time after an initial augmentation of one side would not attract benefits. Benefits are not payable for augmentation mammoplasty in association with reduction mammoplasty (Item 45521) for correction of breast ptosis.

T8.51.2 Item 45528 applies where bilateral mammoplasty is indicated because of disease, trauma or congenital malformation (other than covered under Item 45524 or 45527). Claims for benefits should be accompanied by full clinical details, including colour photographs (frontal and lateral) taken before and after treatment. Claims should be lodged with Medicare in the usual manner. Clinical details and/or photographs accompanying the claim should be sealed in an envelope marked "Medical-In Confidence".

### **T8.52 Breast Reconstruction, Myocutaneous Flap (Item 45530)**

T8.52.1 When a prosthesis is inserted in conjunction with this operation, benefit would be attracted under Item 45527, the multiple operation rule applying. Benefits would also be payable for nipple reconstruction (Item 45545) when performed.

T8.52.2 When a rectus abdominus flap is used, secondary repair of the muscle defect by an external oblique muscle flap would be covered under Item 45012. However, where the repair is by Teflon or similar mesh, Item 30405 should be itemised.

### **T8.53 Nipple and/or Areola Reconstruction (Item 45545)**

T8.53.1 This item involves the taking of tissue from, for example, the other breast, the ear lobe and the inside of the upper thigh with or without local flap.

### **T8.54 Liposuction (Items 45584, 45585)**

T8.54.1 Medicare benefits for liposuction are generally attracted under Item 45584, that is, for the treatment of post traumatic pseudolipoma. Such trauma must be significant and result in large haematoma and localised swelling. Only on very rare occasions would benefits be payable for bilateral liposuction.

T8.54.2 Where liposuction is indicated for the treatment of conditions such as pathological lipodystrophy of hips, buttocks, thighs and lower legs (excluding knees), gynaecomastia and lymphoedema, Item 45585 applies. Claims for benefits under this item should be accompanied by full clinical details, including full body photographs (anterior/posterior and lateral) taken before and after treatment. Claims should be lodged with Medicare in the usual manner. Clinical details and/or photographs accompanying the claim should be sealed in an envelope marked "Medical-In Confidence".

### **T8.55 Meloplasty for Correction of Facial Asymmetry (Items 45587, 45588)**

T8.55.1 Benefits are payable under Item 45587 for unilateral face-lift operations performed to correct soft tissue abnormalities of the face due to causes other than the ageing process.

T8.55.2 Where bilateral meloplasty is indicated because of disease, trauma or congenital malformation for conditions such as drooping from the angles of the mouth and deep pitting of the skin due to acne scars Item 45588 applies. Claims for benefits under this item should be accompanied by full clinical details, including colour photographs taken before and after treatment. Claims should be lodged with Medicare in the usual manner. Clinical details and/or photographs accompanying the claim should be sealed in an envelope marked "Medical-In Confidence".

### **T8.56 Reduction of Eyelids (Items 45617, 45620)**

T8.56.1 Where a reduction is performed for a medical condition of one eyelid, it may be necessary to undertake a similar compensating procedure on the other eyelid to restore symmetry. The latter operation would also attract benefits. Where there is doubt as to whether benefits would be payable, advice should be sought from a medical adviser of the Health Insurance Commission.

### **T8.57 Vermilionectomy (Item 45669)**

T8.57.1 Item 45669 covers treatment of the entire lip.

### **T8.58 Osteotomy of Jaw (Items 45719 - 45752)**

T8.58.1 The fee and benefit for these items include the various forms of internal or dental fixation, jaw immobilisation, the transposition of nerves and vessels and bone grafts taken from the same site. Bone grafts taken from a separate site, e.g. iliac crest, would attract additional benefit under Item 47726 or 47729 for the harvesting, plus Item 48239 or 48242 for the grafting.

T8.58.2 For the purposes of these items, a reference to maxilla includes the zygoma.

### **T8.59 Genioplasty (Items 45761, 45764)**

T8.59.1 Genioplasty attracts benefit once only although a section is made on both sides of the symphysis of the mandible.

### **T8.60 Reduction of Dislocation or Fracture**

T8.60.1 Closed reduction means treatment of a dislocation or fracture by non-operative reduction, and includes the use of percutaneous fixation or external splintage by cast or splints.

T8.60.2 Open reduction means treatment of a dislocation or fracture by either operative exposure including the use of any internal or external fixation; or non-operative (closed reduction) where intra-medullary or external fixation is used.

T8.60.3 Where the treatment of a fracture requires reduction on more than one occasion to achieve an adequate alignment, benefits are payable for each separate occasion at which reduction is performed under the appropriate item covering the fracture being treated.

T8.60.4 The treatment of fractures/dislocations not specifically covered by an item in Subgroup 15 (Orthopaedic) attracts benefits on an attendance basis.

### **T8.61 Internal Fixation (Items 48678-48690)**

T8.61.1 Benefits under these items are only attracted where internal fixation is carried out in association with spinal fusion covered by Items 48642 to 48675. The multiple rule would apply in each instance.

### **T8.62 Wrist Surgery (Items 49200-49227)**

T8.62.1 For the purposes of these items, the wrist includes both the radiocarpal joint and the midcarpal joint.

### **T8.63 Joint or other Synovial Cavity, Aspiration of, or Injection into (Items 50124, 50125)**

T8.63.1 Item 50124 is restricted to a maximum of 25 treatments in a 12 month period. Where additional treatments are necessary Item 50125 applies. Claims for benefits should be accompanied by full clinical details to verify the need for additional services. Claims should be lodged with Medicare in the usual manner. Clinical details and/or photographs accompanying the claim should be sealed in an envelope marked "Medical-In Confidence".

### **T8.64 Abandoned Surgery (Item 30001)**

T8.64.1 Item 30001 applies where the procedure has been commenced but is then discontinued for medical reasons or for other reasons which are beyond the surgeon's control (e.g. equipment failure). Claims for benefits under this item should be submitted to Medicare for approval of benefits and should include full details of the circumstances of the operation, including details of the surgery which had been proposed and the reasons for the operation being discontinued.

## **ASSISTANCE AT OPERATIONS (Group T9)**

### **T9.1 General**

T9.1.1 Items covering operations which are eligible for benefits for surgical assistance have been identified by the inclusion of the word "Assist." in the item description. Medicare benefits are not payable for surgical assistance associated with procedures which have not been so identified.

T9.1.2 The assistance must be rendered by a medical practitioner other than the surgeon, the anaesthetist or the assistant anaesthetist.

T9.1.3 Where more than one practitioner provides assistance to a surgeon no additional benefits are payable. The assistance benefit payable is the same irrespective of the number of practitioners providing surgical assistance.

### **T9.2 Benefits payable under Item 51300**

T9.2.1 Medicare benefits are payable under item 51300 for assistance rendered at any operation identified by the word "Assist." for which the fee does not exceed the fee threshold specified in the item descriptor, or at a series or combination of operations identified by the word "Assist." for which the aggregate Schedule fee threshold specified in the item descriptor has not been exceeded.

**T9.3 Benefits payable under item 51303**

T9.3.1 Medicare benefits are payable under item 51303 for assistance rendered at any operation identified by the word "Assist." for which the fee exceeds the fee threshold specified in the item descriptor or at a series or combination of operations identified by the word "Assist." for which the aggregate Schedule fee exceeds the threshold specified in the item descriptor.

**T9.4 Benefits Payable Under Item 51309**

T9.4.1 Medicare benefits are payable under item 51309 for assistance rendered at any operation identified by the word "Assist." or a series or combination of operations identified by the word "Assist." and assistance at a delivery involving Caesarean section.

T9.4.2 Where assistance is provided at a Caesarean section delivery and at a procedure or procedures which have not been identified by the word "Assist.", benefits are payable under item 51306.

**T9.5 Assistance at Multiple Operations**

T9.5.1 Where surgical assistance is provided at two or more operations performed on a patient on the one occasion the multi operation formula is applied to all the operations to determine the surgeon's fee for Medicare benefits purposes. The multi-operation formula is then applied to those items at which assistance was rendered and for which Medicare benefits for surgical assistance is payable to determine the abated fee level for assistance. The abated fee is used to determine the appropriate Schedule item covering the surgical assistance (ie either Items 51300 or 51303).

T9.5.2 The derived fee applicable to Item 51303 is calculated on the basis of one-fifth of the abated Schedule fee for the surgery which attracts an assistance rebate.

**T9.6 Surgeons Operating Independently**

T9.6.1 Where two surgeons operate independently (ie neither assists the other or administers the anaesthetic) the procedures they perform are considered as two separate operations, and therefore, where a surgical assistant is engaged by each, or one of the surgeons, benefits for surgical assistance are payable in the same manner as if the surgeons were operating separately.

**T9.7 Assistance at Cataract and Intraocular Lens Surgery**

T9.7.1 The reference to "previous significant surgical complication" covers vitreous loss, rupture of posterior capsule, loss of nuclear material into the vitreous, intraocular haemorrhage, intraocular infection (endophthalmitis), cystoid macular oedema, corneal decompensation or retinal detachment.

50414	LOWER LIMB DEFICIENCY, treatment of congenital deficiency of the femur by resection of the distal femur and proximal tibia followed by knee fusion and rotationplasty (Anaes. 17732 = 5B + 27T) (Assist.) <b>Fee:</b> \$1,320.00 <b>Benefit:</b> 75% = \$990.00    85% = \$1,269.90	
50417	LOWER LIMB DEFICIENCY, treatment of congenital deficiency of the tibia by reconstruction of the knee, involving transfer of fibula or tibia, and repair of quadriceps mechanism (Anaes. 17727 = 5B + 22T) (Assist.) <b>Fee:</b> \$978.35 <b>Benefit:</b> 75% = \$733.80    85% = \$928.25	
50420	PATELLA, congenital dislocation of, reconstruction of the quadriceps (Anaes. 17720 = 4B + 16T) (Assist.) <b>Fee:</b> \$807.55 <b>Benefit:</b> 75% = \$605.70    85% = \$757.45	
50423	TIBIA, FIBULA OR BOTH, congenital deficiency of, transfer of the fibula to tibia, with internal fixation (Anaes. 17720 = 4B + 16T) (Assist.) <b>Fee:</b> \$745.40 <b>Benefit:</b> 75% = \$559.05    85% = \$695.30	

*TUMOROUS CONDITIONS*

50426

DIAPHYSEAL ACLASIA, removal of lesion or lesions from bone - 1 approach (Anaes. 17714 = 6B + 8T) (Assist.)  
**Fee:** \$346.85      **Benefit:** 75% = \$260.15    85% = \$296.75

**GROUP T9 - ASSISTANCE AT OPERATIONS**

**NOTE:** *Benefit in respect of assistance at an operation is not payable unless the assistance is rendered by a medical practitioner other than the anaesthetist or assistant anaesthetist. The amount specified is the amount payable whether the assistance is rendered by one or more than one medical practitioner.*

‡ Assistance at any operation identified by the word "Assist." for which the fee does not exceed \$416.95 or at a series or combination of operations identified by the word "Assist." where the fee for the series or combination of operations identified by the word "Assist." does not exceed \$416.95  
 (See para T9.2 of explanatory notes to this Category)  
 51300 **Fee:** \$64.45      **Benefit:** 75% = \$48.35    85% = \$54.80

‡ Assistance at any operation identified by the word "Assist." for which the fee exceeds \$416.95 or at a series of operations identified by the word "Assist." for which the aggregate fee exceeds \$416.95  
 (See para T9.3 of explanatory notes to this Category)  
 51303 **Derived Fee:** one fifth of the established fee for the operation or combination of operations

51306 Assistance at a delivery involving Caesarean section  
**Fee:** \$93.15      **Benefit:** 75% = \$69.90    85% = \$79.20

51309 Assistance at a series or combination of operations which have been identified by the word "Assist." and assistance at a delivery involving Caesarean section  
 (See para T9.4 of explanatory notes to this Category)  
**Derived Fee:** one fifth of the established fee for the operation or combination of operations (the fee for Item 16520 being the Schedule fee for the Caesarean section component in the calculation of the established fee)

# **INDEX TO GENERAL MEDICAL SERVICES**

## **PLEASE NOTE:**

**This index is a reference point for medical services which attract Medicare benefits under items included in the Schedule of General Medical Services. Medical practitioners should peruse the actual description of the item in the Schedule to ensure the correct item number is selected and to ascertain whether there are any restrictions relating to the payment of benefits. Restrictions are, as far as practicable, included in the description of the item. Otherwise they will be outlined in the notes immediately preceding the particular Category of the Schedule.**

Abscess, anal, drainage of	32174,32175	in connection with a medical service	17701-18019
appendiceal, laparotomy for drainage	30394	in connection with a dental operation	18102-18119
Bartholin's, incision of	35520	in connection with	
breast, exploration and drainage	30364	- breech delivery	17968
deep, percutaneous drainage	30224	- Caesarean section	18007
drainage tube, exchange of	30225	- change of dressing/plaster	18035
extradural, laminectomy for	40309	- computerised tomography	17980,17983
intracranial, excision of	39903	- digital subtraction angiography	18022
intra-orbital, drainage of	42572	- electrocochleography	17998
ischio-rectal, drainage of	32174,32175	- episiotomy repair	18010
laparotomy for drainage of	30394	- forceps delivery	17968
large, incision and drainage, with GA	30222,30223	- hyperbaric oxygen therapy	18026,18027
liver, open abdominal drainage of	30431	- incision of lesion causing airway obstruction	18019
middle ear, operation for	41626	- magnetic resonance imaging services	18013
pancreatic, laparotomy, external drainage	30575	- manipulative correction of inversion of uterus	18004
pelvic, laparotomy for drainage of	30394	- manual removal of products of conception	18001
peritonsillar, incision of	41807	- multiple procedures	(see Note T6.2)
prostate, drainage of	37212,37221	- muscle biopsy for malignant hyperpyrexia	18021
retroperitoneal, drainage of	30402	- nerve blocks	18016
small, incision, drainage, without GA	30219	- percutaneous central venous cannulation	17995
small, incision without drainage	*	- peripheral venous cannula, insertion of	17989
subperiosteal	43500-43524	- peripheral venous cannulation, open exposure	17992
subphrenic, laparotomy for drainage	30394	- phaeochromocytoma, removal of	17986
Accessory bone, osteotomy or osteectomy of	48400	- postpartum haemorrhage, treatment of	18001
Acetabular dysplasia, pelvis, bone graft/shelf procedure	50393	- procedure on person under 10 years	18030,18031,18032
Acetabulum, treatment of fracture of	47492-47510	- prolonged	17800
Achilles' tendon, operation for lengthening	49727	- radiotherapy	17965
tendon, repair of	49718,49721,49724	- reamputation of amputation stump	17977
Acoustic neuroma, removal of	41575-41579	- third degree tear, repair of	18001
Acupuncture, by a medical practitioner	173	- unusual length	17800,17805
Adductors to ischium transfer	50387	- vacuum extraction delivery	17968
Adenoids and tonsils, removal of	41788-41793	Anal canal, laser therapy (restriction)	35539,35542,35545
removal of	41800,41801	fistula, excision/repair	32156-32165
Adhesions, division of, via laparoscope	35637	fistula, readjustment of Seton	32166
division of, with laparotomy	30376,30378,30379	graciloplasty	32203
division of, with laparoscopy	30393	graciloplasty, insertion of stimulator & electrode	32209
labial, separation of	*	incontinence, Parks' procedure	32126
liver, destruction of by cryotherapy	30419	manometry, pelvic floor abnormalities	11830
nasal, division of	41683	skin tags or polyps, excision of	32142,32145
pharyngeal, division of	41758	sphincter, direct repair of	32129
preputial, breakdown of	*	sphincterotomy, independent, Hirschsprung's	43999
Adrenal gland, excision of	36500	stricture, anoplasty for	32123
gland tumour, excision of	30324	warts, removal under GA or nerve block	32177,32180
hyperplasia, congenital, vaginoplasty for	37851	Anastomosis, aorta, congenital heart disease	38706,38709
Alcohol, injection of trigeminal nerve/s	39100	arterial/venous, independent	32766
local infiltration, nerve or muscle	*	arterial/venous, with other operation	32769
retrobulbar injection of	42824

arteriovenous, upper or lower limb	34503,34509	maxillary, lavage of	41704
facio-hypoglossal/accessory nerve	39503	maxillary, proof puncture, lavage	41698,41701
ileo-rectal, with total colectomy	32012	removal of foreign body from	41716
intrathoracic, congenital heart disease	38727,38730	Anus, dilatation of (Lord's procedure)	32153
microvascular, in plastic surgery	45502	Aorta, anastomosis, congenital heart disease	38706,38709
oesophageal atresia, neonatal	43855	thoracic, management of rupture/dissection	38572
saphenous vein, for femoral vein bypass	34809	thoracic, repair/replacement procedures	38550-38571
vena cava, for congenital heart disease	38721,38724	Aortic bypass	32708,32710,32711
Aneurysm, cerebrovascular, clipping/reinforcement	39800	endarterectomy	33509
intracranial, ligation cervical vessels	39812	interruption, repair of	38712
intracranial proximal artery clipping	39806	valve leaflet/s, decalcification of	38483
left ventricular, plication of	38506	Aorto-duodenal fistula, repair of	34160,34163,34166
left ventricular, resection	38507,38508	Aorto-femoral endarterectomy	33515
major artery, replacement/repair	33050-33181	Aorto-iliac endarterectomy	33512
Angiofibroma, face/neck, removal by laser excision	30190	Aortopexy for tracheomalacia	43909
nasopharyngeal, removal	41767	Appendiceal abscess, laparotomy for drainage	30394
Angioma, cauterisation/injection into	45027	Appendicectomy	30571,30572,30574
excision of	45030-45036	Appendicostomy	30375
Angioplasty, peripheral laser	35315	Appendix, ruptured, laparotomy for drainage	30394
transluminal balloon	35300-35305	Arachnoidal cyst, craniotomy for	39718
Angioscopy	35324,35327	Areola, reconstruction of	45545
Ankle, achilles tendon, operation for lengthening	49727	Arm, amputation or disarticulation of	44328
achilles tendon, repair of	49718,49721,49724	Arnold Chiari malformation, decompression of	40106
and foot, tibialis tendon transfer	50339,50342	Arrhythmia ablation	38530,38533,38536
arthrodesis of	49712	surgery	38512-38536
arthroscopic surgery of	49703	Arterial anastomosis, not otherwise covered	32766,32769
arthroscopy of, diagnostic	49700	atherectomy, peripheral	35312
arthrotomy of	49706	cannulation for infusion chemotherapy, open	34524
dislocation, treatment of	47063,47066	catheterisation, peripheral	35317-35321
fracture, treatment of	47594-47603	line for blood pressure monitoring	11600,11601,13876
jerk test for half relaxation time	*	puncture and blood collection, diagnostic	13839
ligamentous stabilisation of	49709	Arteries, major, access as part of re-operation	35202
major tendon repair	49718	Arteriography, operative	35200
synovectomy of	50312	Arteriovenous access device, insertion of	34512
tibialis tendon transfer	50339,50342	access device, prosthetic, correction of	34518
total joint replacement	49715	access device, thrombectomy of	34515
Annuloplasty, heart valve	38475,38477,38478	anastomosis of upper or lower limb	34503,34509
Anophthalmic orbit, insertion cartilage/implant	42518	fistula, dissection and ligation/repair	34112-34127
orbit, placement of motility integrating peg	42518	fistula, ligation of cervical vessel/s	39812
orbit, removal of implant from socket	42518	fistula extremity, surgically created, closure	34130
socket, treatment as secondary procedure	42521	fistula, stenosis of, correction of	34518
Anoplasty for anal stricture	32123	malformation, excision of	45039,45042,45045
Anorectal carcinoma, excision of	32105	malformation, intracranial, excision of	39803
application of formalin	32212	malformation, intracranial artery clipping of	39806
examination, under GA	32171	malformation, laminectomy, radical excision of	40318
malformation, paediatric, operations	43960,43963,43966	shunt, declotting of	13106
malformation, neonatal, laparotomy and colostomy	43822	shunt, external, insertion/removal	34500,34506
sensation, measurement of	11830	Artery, anastomosis of, microvascular	45502
Anorectoplasty of anorectal malformation	43963,43966	bypass grafting, occlusive arterial disease	32700-32763
Antenatal cardiotocography (restriction)	16514	coeliac, decompression of	34142
care, independent of confinement	16500	coronary, bypass operations	38497,38500,38503
Antepartum haemorrhage, treatment of	16509	embolectomy of	33800,33803,33806
Anterior chamber, irrigation of blood from	42743	endarterectomy of	33500-33542
resection of rectum	32024,32025	ethmoidal, transorbital ligation of	41725
section of corpus callosum for epilepsy	40700	great, ligation/exploration, other	34103
synechiae, division of	42761	harvesting for coronary bypass	38496
vaginal repair	35575-35580	ligation/exploration not otherwise covered	34106
Antireflux operations	30527,30529,30530	major, of neck, ligation/exploration, other	34100
Antrectomy and/or vagotomy	30497,30503	major, repair of wound of	33815-33839
Antrobuccal fistula operation	41722	maxillary, transantral ligation of	41707
Antrostomy, radical	41710,41713	neck, reoperation for bleeding/thrombosis	33842
Antrum, drainage of, through tooth socket	41719	patch grafting to	33545,33548
intranasal, operation on	41716	popliteal, exploration for popliteal entrapment	34145

needle aspiration	*	marrow, harvesting of for transplantation	13700
percutaneous aspiration, deep organ	30094	marrow, in vitro processing/cryopreservation	13760
pleura	30090	tumour, benign, resection of	50230
prostate	37212,37215,37218	tumour, innocent, excision of	30241
punch, of synovial membrane	30087	tumour, malignant, operations for	50200-50239
rectum, full thickness	32096	Botulinum toxin injection into vocal cords	41869
renal (closed)	36561	Botulinus toxin injection for blepharospasm	42827
scalene node	30096	toxin injection for strabismus	42830
skin or mucous membrane	30071	Boutonniere deformity, reconstruction of	46444,46447
thyroid	*	Bowel, colectomy, total	32009-32021
vertebra, needle	30093	hemicolecotomy	32000,32003,32006
Bladder, aspiration of, by needle	37041	ileostomy closure/reservoir	32060-32069
biopsy of, with cystoscopy	36836	large, resection of	32000,32003
catheterisation of	36800	large, subtotal colectomy	32004,32005
cystostomy or cystotomy	37008	perineal proctectomy	32047
diverticulum of, excision or obliteration	37020	rectosigmoidectomy (Hartmann's op)	32030
ectopic, 'turning-in' operation	37842	rectum, resection of	32024-32028
enlargement of, using intestine	37047	rectum and anus, resection	32039-32046
excision of	37000,37014	resection for jejunal atresia, neonatal	43810
exstrophy closure	37050	resection for enterocolitis stricture, neonatal	43834
exstrophy of, repair of	37842	restoration following Hartmann's op	32029,32033
neck reconstruction, prostatectomy	37210,37211	ruptured, repair or removal of	30375
neck resection, endoscopic	36854	small, intubation	30487,30488
repair of rupture	37004	small, resection of	30565,30566
stress incontinence, suprapubic procedure	37044	small, strictureplasty	30564
transsection, with re-anastomosis to trigone	37053	Brachial plexus, exploration of	39333
tumour/s, diathermy/resection	36839,36845	vessel, ligation/exploration, other	34106
tumour/s, laser destruction with cystoscopy	36839	Brachycephaly, cranial vault reconstruction for	45785
washout test of	11921	Brachytherapy planning	15536
Blepharospasm, injection of botulinus toxin	42827	Brain stem evoked response audiometry	11300
Block, nerve, regional or field	(see nerve)	stem tumour, craniotomy for removal	39709
Blood, administration of	13703,13706	Branchial cyst, removal of	30286
arterial, collection for pathology	13839,13842	fistula, removal of	30289
collection of, in infants, for pathology	13312	Breast, biopsy, fine needle, imaging guided	30360
collection of, for transfusion	13709	central ducts, excision for benign condition	30367
dye - dilution indicator test	11715	core biopsy of solid tumour or tissue	30363
peripheral, invitro processing, cryopreservation	13760	cyst, aspiration of	*
pressure monitoring, indwelling catheter	11600,11601	cyst, excision of	30341-30346
pressure monitoring, indwelling catheter (ICU only)	13876	exploration/drainage, operating theatre	30364
retrograde admin for cardioplegia	38588	lesion, pre-op localisation, imaging guided	30361
sampling, foetal	16606	mammoplasty	45521,45524,45527
transfusion	13703,13706	manipulation tissue surrounding prosthesis	*
transfusion, foetal	16609-16615	mastectomy	(see mastectomy)
transfusion, paediatric/neonatal	13306,13309	microdochotomy	30366

## **CATEGORY 4 - ORAL AND MAXILLOFACIAL SERVICES**

(by Approved Dental Practitioners)

### **OUTLINE OF ARRANGEMENTS**

#### **OA. INTRODUCTION**

##### **OA.1 Benefits for Medical Services by Dental Practitioners**

Under the provisions of the Health Insurance Act 1973 (the Act), Medicare benefits are payable where an eligible person incurs medical expenses in respect of certain professional services rendered by an approved dental practitioner. Approved dental practitioners may also request certain diagnostic imaging services (see paragraph DIA.4.8 of Category 5 Explanatory Notes).

Details of the services attracting Medicare benefits are set out in the Schedule following these explanatory notes.

#### **OB. APPROVAL OF DENTAL PRACTITIONERS (ORAL AND MAXILLOFACIAL SURGEONS)**

##### **OB.1 Application for Approval**

State registered dentists practising in the specialty of oral and maxillofacial surgery may apply to the Medical Benefits (Dental Practitioners) Advisory Committee for the purposes of Subsection 3(1) of the Act for approval to carry out prescribed medical services (oral and maxillofacial surgery). When these practitioners are approved they may perform those items of oral and maxillofacial surgery listed in this Category. All dental practitioners approved for the purposes of Subsection 3(1) of the Act are also recognised to perform those items of oral surgery listed in Group C2 of the booklet "Medicare Benefits for the Treatment of Cleft Lip and Cleft Palate Conditions".

A Medical Benefits (Dental Practitioners) Advisory Committee considers applications lodged by dental practitioners and recommends to the Minister the names of those dental practitioners who, in its opinion, should be approved by the Minister for the purposes of Subsection 3(1) of the Act.

The Committee is composed of dental practitioners nominated by the Australian Dental Association. The only criterion for granting approval for the purposes of the Act is that the dental practitioner should be a State registered oral and maxillofacial surgeon who is engaged in the referred practice of oral and maxillofacial surgery.

Practitioners who consider that they meet the criterion set out in the preceding paragraph and who wish to be considered for approval for the purposes of Subsection 3(1) of the Act should write to the Manager (Eligibility), Health Insurance Commission, PO Box 1001, Tuggeranong, ACT, 2901 for an application form.

It is emphasised that -

- (i) the sole purpose of granting approval to dental practitioners is to enable payment of Medicare benefits;
- (ii) the services set out in Groups 01 to 09 of the Medicare Benefits Schedule book, and in the Cleft Lip and Cleft Palate Schedule are the only ones for which Medicare benefits are payable when the services are performed by an eligible dental practitioner.

##### **OB.2 Right of Appeal for Dental Practitioners Not Approved**

Where the Minister decides that a dental practitioner should not be approved as an oral and maxillofacial surgeon, the dental practitioner may appeal to the Medical Benefits (Dental Practitioners) Appeals Committee, which is composed of dental practitioners who are not on the Advisory Committee. The application should be made to the Manager (Eligibility), Health Insurance Commission, PO Box 1001, Tuggeranong, ACT, 2901.

### **EXPLANATORY NOTES**

#### **OC. INTERPRETATION OF THE SCHEDULE**

##### **OC.1 Principles of Interpretation**

Each professional service listed in the Schedule is a complete medical service in itself. Where a service is rendered partly by one practitioner and partly by another, only the one amount of benefit is payable.

##### **OC.2 Multiple Operation Rule**

The Schedule fees for two or more operations performed on a patient on the one occasion are calculated by the following rule:-

100% for the item with the greatest Schedule fee, plus 50% for the item with the next greatest Schedule fee, plus 25% for each other item.

- NOTE: 1. Fees so calculated which result in a sum which is not a multiple of 5 cents are to be taken to the next higher multiple of 5 cents
2. Where two or more operations performed on the one occasion have fees which are equal, one of these amounts shall be treated as being greater than the other or others of those amounts.
  3. The Schedule fee for benefits purposes is the aggregate of the fees calculated in accordance with the above formula.

The above rule does not apply to an operation which is one of two or more operations performed under the one anaesthetic on the same patient by different dental practitioners unless either practitioner assists the other. In this case, the fees and benefits specified in the Schedule

apply. For these purposes the term "operation" includes all services in Groups O3 to O9.

If the operation comprises a combination of procedures which are commonly performed together and for which a specific combined item is provided in the Schedule, it is regarded as the one item and service in applying the multiple operation rule.

### **OC.3 After-care (Post-operative Treatment)**

The fee specified for each of the operations listed in the Schedule contains a component for the consequential after-care customarily provided unless otherwise indicated. After-care is deemed to include all post-operative treatment rendered by practitioners and need not necessarily be limited to treatment given by the approved dental practitioner or to treatment given by any one practitioner. This does not preclude, however, the payment of benefit for professional services for the treatment by a dental practitioner of an intercurrent condition or an unusual complication arising from the operation.

Some minor operations are merely stages in the treatment of a particular condition. Professional services by dental practitioners subsequent to such operations should not be regarded as after-care but rather as continuation of the treatment of the original condition and should attract benefit. Item 52057 is a service to which this policy applies.

### **OC.4 Administration of Anaesthetics by Medical Practitioners**

When a medical practitioner administers an anaesthetic in connection with a procedure prescribed for the payment of Medicare benefits (and the procedure has been performed by an approved dental practitioner), Medicare benefits are payable for the administration of the anaesthetic on the same basis as if the procedure had been rendered by a medical practitioner.

Before Medicare benefits will be paid for the administration of an anaesthetic, or for the services of an assistant anaesthetist, the name of the practitioner who rendered the procedure must be shown on the account.

The Schedule fee and benefits payable for the administration of an anaesthetic in connection with a particular medical service are determined according to the number of anaesthetic units allocated to each procedure likely to be performed under anaesthesia. The appropriate anaesthetic item number and the number of "basic" and "time" units appropriate for each procedure are shown after the description of the procedure.

To ascertain the Schedule fee from the number of anaesthetic units so determined, medical practitioners should refer to Group T6 of Category 3 of this Book.

### **OC.5 Assistance at Operations (51800, 51803)**

Items covering operations which are eligible for benefits for assistance by an approved dental practitioner or surgical assistance have been identified by the inclusion of the word "Assist" in the item description. Medicare benefits are not payable for surgical assistance associated with procedures which have not been so identified.

The assistance must be rendered by a practitioner other than the surgeon, the anaesthetist or the assistant anaesthetist.

Where more than one practitioner provides assistance to an approved dental practitioner no additional benefits are payable. The assistance benefit is the same irrespective of the number of practitioners providing assistance.

#### Benefits payable under item 51800

Medicare benefits are payable under Item 51800 for assistance rendered at the following procedures:

52018, 52039, 52048, 52051, 52063, 52066, 52078, 52090, 52092, 52105, 52108, 52111, 52138, 52141, 52144, 52147, 52300, 52303, 52312, 52315, 52321, 52324, 52336, 52600, 52603, 52609, 52612, 52615, 52624, 52626, 52627, 52800, 52803, 52806, 52809, 52818, 52824, 53006, 53009, 53016, 53215, 53225, 53406, 53409, 53412, 53413, 53415, 53416, 53453, 53460.

Where assistance with any of the above procedures is provided by a medical practitioner, benefits are payable under item 51300.

#### Benefits payable under Item 51803

52054, 52114, 52117, 52120, 52122, 52123, 52126, 52129, 52148, 52306, 52330, 52333, 52337, 52339, 52342, 52345, 52348, 52351, 52354, 52357, 52360, 52363, 52366, 52369, 52372, 52375, 52378, 52379, 52380, 52382, 52618, 52621, 52812, 52815, 52821, 53015, 53019, 53209, 53212, 53218, 53221, 53224, 53227, 53230, 53233, 53414, 53418, 53419, 53422, 53423, 53424, 53425, 53427, 53429, 53455.

or at a combination of procedures (including those identified as payable under item 51800 above) for which the aggregate fee exceeds \$416.95.

Where assistance with any of the above procedures is provided by a medical practitioner, benefits are payable under Item 51303.

#### Assistance at multiple operations

Where assistance is provided at two or more operations performed on a patient on the one occasion the multi operation formula is applied to

all the operations to determine the surgical fee payable to each approved dental practitioner. The multi-operation formula is then applied to those items at which assistance was rendered and for which Medicare benefits for assistance is payable to determine the abated fee level for assistance. The abated fee is used to determine the appropriate Schedule item covering the surgical assistance (ie either Items 51800/51300 or 51803/51303).

The derived fee applicable to Item 51803/51303 is calculated on the basis of one-fifth of the abated Schedule fee for the surgery.

## **OC.6 Operations**

### **Osteotomy of Jaw (Items 52342 - 52375)**

The fees and benefits for these items include the various forms of internal or dental fixation, jaw immobilisation, the transposition of nerves and vessels and bone grafts taken from the same site. Bone grafts taken from a separate site, e.g. iliac crest, would attract additional benefit under Item 52318 in accordance with the multiple operation rule.

For the purposes of these items, a reference to maxilla includes the zygoma.

### **Genioplasty (Item 52378)**

Genioplasty attracts benefit once only although a section is made on both sides of the symphysis of the mandible.

### **Fracture of Mandible or Maxilla (Items 53400 - 53439)**

There are two maxillae in the skull and for the purpose of these items the mandible is regarded as comprising two bones. Hence a bilateral fracture of the mandible would be assessed as, say Item 53409 x 1½; two maxillae and one side of the mandible as Item 53406 x 1½ + 53409 x ¼.

Splinting in Item 53406 or 53409 refers to cap splints, arch bars, silver (cast metal) or acrylic splints.

**GROUP 01 - CONSULTATIONS**

<p>51700</p>	<p>PROFESSIONAL ATTENDANCE (other than a second or subsequent attendance in a single course of treatment) BY AN APPROVED DENTAL PRACTITIONER where the patient is referred to the approved dental practitioner - an attendance related to a subsequent operative procedure described in an item in Groups O3 to O9 where that attendance is at consulting rooms, hospital or nursing home  <b>Fee:</b> \$63.90      <b>Benefit:</b> 75% = \$47.95    85% = \$54.35</p>
<p>51703</p>	<p>PROFESSIONAL ATTENDANCE BY AN APPROVED DENTAL PRACTITIONER where the patient is referred to the approved dental practitioner - each attendance related to an operative procedure described in an item in Groups O3 to O9 subsequent to the first in a single course of treatment where that attendance is at consulting rooms, hospital or nursing home  <b>Fee:</b> \$32.00      <b>Benefit:</b> 75% = \$24.00    85% = \$27.20</p>

**GROUP O2 - ASSISTANCE AT OPERATION**

‡ Assistance by an approved dental practitioner at any operation under an item in groups O3 to O9 identified by the word "Assist." for which the fee does not exceed \$416.95 or at a series or combination of operations identified by the word "Assist." where the fee for the series or combination of operations identified by the word "Assist." does not exceed \$416.95  
*(See para OC. of explanatory notes to this Category)*

ORAL AND MAXILLOFACIAL  
SERVICES**

Service	Item	Service	Item
<b>A</b>		Exostosis, mandibular or palatal, excision of	52600
Abscess, incision with drainage, not requiring GA	52055	<b>F</b>	
large, incision with drainage, in operating theatre	52057	Face, contour reconstruction	52379
Alveolar ridge augmentation	52624,52626	Facial artery or vein, ligation of	52141
cleft, grafting of	52337	Fibroma, removal of	52036-52045
Antrobuccal fistula operation	53015	Fistula, antrobuccal, operation for	53015
Antrostomy, radical	53006	oro-antral, plastic closure of	53015
Antrum, drainage of, through tooth socket	53012	Flap repair, direct	52324,52327
intranasal operation, or removal of foreign body	53009	repair, single stage local	52300,52303,52306
maxillary, proof puncture and lavage of	53000,53003	Foreign body, antrum, removal of	53009
maxillary, removal of foreign body from	53009	body, deep, removal, interventional imaging	52144
Arch bars, to maxilla or mandible, removal of	52106	body, maxillary sinus, removal of	53009
Artery, facial, mandibular or lingual, ligation of	52141	body, muscle/other deep tissue, removal of	52018
maxillary, ligation of	52138	body, subcutaneous, removal, other	52015
Arthrocentesis, with irrigation of temporomandibular joint	53225	body, superficial, removal, other	52012
Arthroscopy of temporomandibular joint	53215,53218	body, tendon, removal of	52018,52144
Aspiration biopsy, one or more jaw cysts	52021	implants for contour reconstruction, insertion of	52321
Assistance at operation	51800,51803	Fracture, mandible or maxilla, treatment of	53400-53439
Attendance	51700,51703	zygomatic bone, treatment of	53411-53414
Axillary sinus, excision of	52033	Free grafts, full thickness	52315
<b>B</b>		grafts, mucosa/split skin/connective tissue	52309,52312
Basal cell carcinoma, complicated, removal	52051,52054	Frenulum, mandibular or maxillary, repair of	52084
cell carcinoma, uncomplicated, removal	52036-52048	Furuncle, incision with drainage, in operating theatre	52057
Biopsy, aspiration, of jaw cysts	52021	<b>G</b>	
lymph gland, muscle or other deep tissue or organ	52027	Genioplasty	52378
skin or mucous membrane	52024	Gland, lymph, biopsy of	52027
Bone graft, harvesting of, via separate incision	52318,52319	salivary, dilatation or diathermy of duct	52072
tumour, innocent, excision of	52063	salivary, incision of	52057
<b>C</b>		salivary, meatotomy or marsupialisation	52075
Calculus, removal of, from salivary gland duct	52075	salivary, removal of calculus from duct	52075
Caldwell-Luc's operation	53006	salivary, transposition of duct	52147
Carbuncle, incision with drainage, in operating theatre	52057	sublingual, extirpation of	52069
Cellulitis, incision with drainage, in operating theatre	52057	submandibular, extirpation of	52066
incision with drainage, not requiring GA	52055	submaxillary, extirpation of	52066
Cleft palate, primary repair	52333	submaxillary, incision of	52057,52147
palate, secondary repair, closure of fistula	52336	Glenoid fossa, zygomatic arch, temporal bone, recon	53209
palate, secondary repair, lengthening procedure	52339	Grafts, free, full thickness	52315
Condylectomy/condylotomy, temporomandibular joint	53224	mucosa or split skin	52309,52312
Contour reconstruction, insertion of foreign implants	52321	<b>H</b>	
Cyst, jaw, aspiration biopsy of	52021	Haematoma, incision with drainage, not requiring GA	52055
mandible or maxilla, segmental resection for	52114	large, incision with drainage, in operating theatre	52057
not otherwise covered, removal of	52036-52048	Haemorrhage, post-nasal and/or post-operative, control of	52135
<b>D</b>		Hemifacial microsomia, construction condyle and ramus	53212
Deep tissue or organ, biopsy of	52027	Hyperplasia, papillary, of palate, removal of	52609,52612,52615
Dermoid, excision of	52036-52045	Hypertrophied tissue, removal of	52036-52045
Diathermy, salivary gland duct	52072	<b>I</b>	
Dilatation, salivary gland duct	52072	Innocent bone tumour, excision of	52063
Dislocation, mandible, treatment of	53200,53203	Intranasal operation on antrum/removal foreign body	53009
Duct, salivary gland, diathermy or dilatation of	52072	<b>J</b>	
salivary gland, removal of calculus from	52075	Jaw, aspiration biopsy of cyst/s	52021
sublingual gland, removal of calculus from	52075	dislocation, treatment of	53200,53203
<b>E</b>		fracture, treatment of	53400-53439
Endo-biopsy	52024,52027	operation on, for osteomyelitis	52090

\* Payable on attendance basis

Service	Item	Service	Item
plastic and reconstructive operation on	52342-52375	Nasal bones, treatment of fracture/s	53458-53460
		Nasal septum, septoplasty	53016
<b>K</b>		Nerve, peripheral, neurectomy/neurotomy/tumour	52806,52809
Keloid, excision of	52036-52045	transposition of	52818
Kirschner wire, insertion of	52096	trigeminal, cryosurgery of	52824
		trunk, graft to	52821
<b>L</b>		trunk, neurolysis of	52803
Lacerations, repair and suturing of	52000-52009	trunk, repair of	52812,52815
Lavage and proof puncture of maxillary antrum	53000,53003	Neurectomy, peripheral nerve	52806,52809
Le Fort osteotomies	52380,52382	Neurolysis by open operation	52800
Lingual artery or vein, ligation of	52141	of nerve trunk	52803
Lip, full thickness wedge excision of	52108	Neurotomy, peripheral nerve	52806,52809
Lipoma, removal of	52036-52045	Node, lymph, biopsy of	52027
Local flap repair, single stage	52300,52303,52306		
Lymph gland or node, biopsy of	52027	<b>O</b>	
Lymphoid patches, removal of	52036-52045	Operative procedure not otherwise covered	52001
		Orbital cavity, bone or cartilage graft to wall or floor	53455
<b>M</b>		cavity, reconstruction of wall or floor	53453
Mandible, dislocation, treatment of	53200,53203	Oro-antral fistula, plastic closure of	53015
fixation by intermaxillary wiring	52420	Orthopaedic pin or wire, insertion of	52096
hemi-mandiblectomy of	52120	pin or wire, removal of	52099,52102
hemi-mandibular reconstruction with bone graft	52122	plates, removal of	52105
operation on, for osteomyelitis	52090	Osseointegration procedure	52627-52636
or maxilla, fractures, treatment of	53400-53439	Osteectomy of mandible or maxilla	52342-52375
osteectomy or osteotomy of	52342-52375	Osteomyelitis, operation on mandible or maxilla	52090
removal of one or more plates	52105	operation on skull	52092
removal of buried wire, pin or screw	52099,52102	Osteotomies, mid-facial	52380,52382
segmental resection of, for tumours or cysts	52114	Osteotomy of mandible or maxilla	52342-52375
sub-total resection of	52117		
total resection of	52123	<b>P</b>	
Mandibular artery or vein, ligation of	52141	Palatal exostosis, excision of	52600
exostosis, excision of	52600	Palate, cleft, repair of	52333,52336,52339
frenulum, repair of	52084	papillary hyperplasia, removal of	52609,52612,52615
Maxilla, operation on, for osteomyelitis	52090	plastic closure of defect of	52330
or mandible, fractures, treatment of	53400-53439	Papillary hyperplasia of the palate, removal of	52609,52612,52615
osteectomy or osteotomy of	52342-52375	Papilloma, removal of	52036-52045
removal of buried wire, pin or screw	52099,52102	Parotid duct, repair of	52148
removal of one or more plates	52105	Pin, orthopaedic, insertion of	52096
sub-total resection of	52117	orthopaedic, removal of	52099,52102
total resection of	52126,52129	Plastic repair, free grafts	52309,52312,52315
Maxillary antrum, proof puncture and lavage of	53000,53003	repair, single stage, local flap	52300,52303,52306
artery, ligation of	52138	Plates, orthopaedic, removal of	52015,52018
frenulum, repair of	52084	Premalignant lesions, liquid nitrogen cryotherapy	52034
sinus, drainage of, through tooth socket	53012	Preauricular sinus operations	52030
sinus, operations on	53006,53009	Proof puncture of maxillary antrum	53000,53003
sinus, sinus lift procedure	53019		
tuberosity, reduction of	52606	<b>R</b>	
Melanoma, excision of	52036-52045	Radical antrostomy	53006
Microsomia, hemifacial, construction condyle and ramus	53212	Ranula, removal of	52087
Mouth, lowering of floor of (Obwegeser or similar)	52621	Reduction of dislocation of mandible	53200,53203
Mucous membrane, biopsy of	52024	Rodent ulcer, operation for	52036-52045
membrane, repair of recent wound of	52000-52009		
Muscle, biopsy of	52027	<b>S</b>	
excision of	52060	Salivary gland duct, diathermy or dilatation of	52072
or other deep tissue, removal of foreign body	52018	gland duct, removal of calculus from	52075
Mylohyoid ridge, reduction of	52603	gland duct, transposition of	52147
		gland, incision of	52057
<b>N</b>		Scar, removal of, not otherwise covered	52036-52045
Naevus, excision of	52036-52045	Sebaceous cyst, removal of	52036-52045

## CATEGORY 5 - DIAGNOSTIC IMAGING SERVICES

### OUTLINE OF ARRANGEMENTS

#### DIA. DIAGNOSTIC IMAGING SERVICES IN RELATION TO MEDICARE BENEFITS

##### DIA.1 Introduction

Changes to the Health Insurance Act from 1 May 1991 imposed certain conditions on the payment of Medicare benefits for diagnostic imaging services and prohibiting certain practices in the provision of those services. The services currently covered by this legislation are diagnostic radiology, CT scanning, ultrasound and nuclear scanning.

Under this legislation, except in certain circumstances, Medicare benefits are only payable for a diagnostic service if it is rendered following a written request for that service by another medical practitioner. For X-rays of the head and certain other services, the requesting practitioner may also be a dental practitioner, a prosthodontist or oral and maxillofacial surgeon. For X-rays of the spine and pelvic region the requesting practitioner may also be a chiropractor or a physiotherapist and for specified X-rays of the foot the requesting practitioner may also be a podiatrist. (see DIA.4.8)

To help in defining a diagnostic imaging service, a separate Diagnostic Imaging Services Table was established.

The items of service which are subject to the written request requirement are classified as "R-type" (requested) services and are identified in the Diagnostic Imaging Services Table with the symbol "(R)" after the item description.

The items of service not subject to the request requirement are classified as "NR-type" (not requested) services and are identified with the symbol "(NR)" after the item description.

The "NR-type" items of service are in Group I1 - Ultrasound and Group I3 - Diagnostic Radiology. "NR-type" items in Group I1 - Ultrasound are Items 55029, 55031, 55033, 55035, 55037, 55039, 55041, 55043, 55045, 55049, 55051, 55053 and 55055. In Group I3 - Diagnostic Radiology, the "NR-type" Items are 57506, 57512, 57518, 57524, 57700, 57706, 58500, 58900, 60072, 60075, 60078, and all items in Group I3 Subgroup 16 (Preparation). All other diagnostic imaging services are classified as "R-type" services.

Items 60072, 60075 and 60078 (selective Digital Subtraction Angiography (DSA)) and items in Group I3, Subgroup 16, can only be rendered with certain "R-type" services. These items have not been classified as "R-type" services because this would require that there be a written request for the services referred to in these NR items in addition to the particular service requested.

##### DIA.2 Services Rendered "On Behalf Of" Medical Practitioners

###### DIA.2.1 Medicare Benefits Attracted

Diagnostic imaging services attract Medicare benefits if the service is rendered by:

- (a) a medical practitioner;
- (b) a person, other than a medical practitioner, who:
  - (i) is employed by a medical practitioner; or
  - (ii) provides the service under the supervision of a medical practitioner in accordance with accepted medical practice.

Benefits are not payable, for example, when a medical practitioner refers patients to self-employed paramedical personnel, such as radiographers or other persons who either bill the patient or the practitioner requesting the service.

##### DIA.3 Basic Requirements

###### DIA.3.1 General Rule for Medicare Eligibility

Except in circumstances detailed below, a Medicare benefit is not payable for a diagnostic imaging service unless, prior to commencing the relevant service, the providing practitioner receives a signed and dated written request from a referring practitioner who determined that the service was necessary (the treating practitioner). A valid request can be made by a medical practitioner on behalf of the treating practitioner, for example by a resident medical officer at a hospital on behalf of

the patient's practitioner.

The requesting practitioner must turn his or her mind to the clinical relevance of the request and determine that the service is necessary for the adequate professional care of the patient.

### ***DIA.3.2 Referral to Specified Practitioner Not Required***

It is not necessary that a written request for a diagnostic imaging service be addressed to a particular practitioner or that, if the request is addressed to a particular practitioner, the service must be rendered by that practitioner.

### ***DIA.3.3 Request for More Than One Service and Limit on Time to Render Services***

A practitioner may use a single request to order a number of diagnostic imaging services. However, all services provided under this request must be rendered within seven days after the rendering of the first service.

## **DIA.4 Exemptions from Basic Requirements**

### ***DIA.4.1 General Provision***

There are exemptions from the general written request requirements. These are detailed below.

### ***DIA.4.2 Consultant Physician or Specialist***

Except for R-type items which preclude in their description (such as most R-type items in General Ultrasound and items 59300, 59303) an exemption from the written request provisions, a written request is not required for the payment of Medicare benefits when the diagnostic imaging service is provided by or on behalf of a consultant physician or a specialist (other than a specialist in diagnostic radiology) in the course of that consultant physician or specialist practising in his or her specialty and after determining that the service was necessary. See section DIB.1.3 for details required on accounts.

### ***DIA.4.3 Remote Area Exemption***

A written request is not required for the payment of Medicare benefits for an "R-type" diagnostic imaging service rendered by a medical practitioner in a remote area, provided:

- the "R-type" service is not one for which there is a corresponding "NR-type" service; and
- the medical practitioner rendering the service has been granted a remote area exemption for that service.

Further information regarding the remote area exemption is set out in section DIC of these explanatory notes. See section DIB.1.3 for details required on accounts.

### ***DIA.4.4 Emergencies***

The written request requirement does not apply if the providing practitioner determined that, because the need for the service arose in an emergency, the service should be performed as quickly as possible. See section DIB.1.3 for details required on accounts.

### ***DIA.4.5 Lost Requests***

The written request requirement does not apply where:

- the person who received the diagnostic imaging service or someone acting on that person's behalf claimed that a medical practitioner, dentist, chiropractor, physiotherapist or podiatrist had made a written request for such a service but that the request had been lost; and
- the provider of the diagnostic imaging service or that practitioner's agent or employee obtained confirmation from the requesting practitioner.

In respect of requests by dentists, chiropractors, physiotherapists or podiatrists, the lost request exemption is applicable only to radiographic examinations of the specific areas they can request. For details required on accounts, see section DIB.1.3.

### ***DIA.4.6 Additional Necessary Services***

A written request is not required for a diagnostic imaging service if that service was rendered after one which had been formally requested and the providing practitioner had determined that, on the basis of the results obtained from the requested service, that an additional service was necessary. For details required on accounts, see section DIB.1.3.

### ***DIA.4.7 Pre-existing Diagnostic Imaging Practices***

The legislation provides for exemption from the written request requirement for services provided by practitioners who have operated pre-existing diagnostic imaging practices. To qualify for this "grandparent" exemption the providing practitioner

must:

- (a) be treating his or her own patient;
- (b) have determined that the service was necessary;
- (c) have rendered between 17 October 1988 and 16 October 1990 at least 50 services (which resulted in the payment of Medicare benefits) of the kind which have been designated "R-type" services from 1 May 1991;
- (d) provide the exempted services at the practice location where the services which enabled the practitioner to qualify for the "grandparent" exemption were rendered; and
- (e) render the service before 1 January 1998 as the legislation provides that, from that date, unless sooner varied, the exemption provision is automatically repealed.

Benefits are only payable for services exempted under these provisions where the service was rendered by the exempted medical practitioner at the exempted location. Exemptions are not transferable.

The above exemption applies to the services covered by the following Items: 57712, 57715, 57900, 57903, 57912, 57915, 57921, 58100, 58103, 58106, 58109, 58112, 58115, 58521, 58524, 58527, 58700, 58924 and 59103.

For details required on accounts, see section DIB.1.3.

#### ***DIA.4.8 Diagnostic Imaging Services Requested by Dental Practitioners, Chiropractors, Physiotherapists and Podiatrists***

The legislation specifies (R) type diagnostic imaging services which may be requested by dental practitioners, chiropractors, physiotherapists and podiatrists, subject to the requirements of State and Territory laws.

Dental practitioners (including oral and maxillofacial surgeons and prosthodontists) may request the following Items:

57509 57515 57521 57527 57900 57903 57906 57909 57912 57915 57918 57921 57924 57927 57930 57933  
57936 57939 57942 57945 58100 58300 58503 58903 59733 59739 59751 60100 60500 60503

Oral and maxillofacial surgeons may also request the following Items:

55028 55030 55032 55050 55052 56001 56007 56010 56013 56016 56019 56022 56028 56101

Chiropractors and physiotherapists may request the following Items:

57712 57715 58100 58103 58106 58109 58112 58115

Podiatrists may request the following Items:

57521 57527

#### **DIA.5 Medicare Benefits Not Payable**

##### ***DIA.5.1 Medicare Benefits in Relation to Diagnostic Imaging Services Rendered in Contravention of State or Territory Laws***

Where a diagnostic imaging service is rendered by or on behalf of a medical practitioner and the rendering of that service by the doctor or any other person contravenes a State or Territory law relating directly or indirectly to the use of diagnostic imaging procedures or equipment, Medicare benefits are not payable.

**DIA.5.2 Medicare Benefit Not Payable in Respect of Services Rendered by Disqualified Practitioners**

Medicare benefits are not payable for a diagnostic imaging service if, at the time the service was rendered, the providing practitioner or the practitioner on whose behalf the service was rendered was disqualified fully or partially from the Medicare benefits arrangements.

**DIA.5.3 Notification of Contraventions of Certain State and Territory Laws to Relevant Authorities**

The Managing Director of the Health Insurance Commission may notify the relevant State or Territory authorities if he/she believes that a person may have contravened a law of a State or Territory relating directly or indirectly to the use of diagnostic imaging procedures or equipment.

**DIA.6 Multiple Services Rules**

The multiple services rules apply to services rendered on or after 20 January 1997. There are three rules, and more than one rule may apply in a patient episode.

The rules do not apply to diagnostic imaging services rendered in a remote area by a practitioner who has a remote area exemption for that area. (See DIC re Remote Area Exemptions).

Reference is made in these rules to "R-type" and "NR-type" services and an explanation of these services is set out in paragraph DIA.1.

**Rule A.** When more than one diagnostic imaging service, R-type or NR-type, is provided to a patient by the same practitioner on the one day, then:

- the diagnostic imaging service with the highest Schedule fee has an unchanged Schedule fee; and
- the Schedule fee for each additional diagnostic imaging service is reduced by \$5.

**Rule B.** When an R-type diagnostic imaging service and a consultation are rendered for a patient by the same practitioner on the one day, there is a deduction to the Schedule fee for the diagnostic imaging service with the highest Schedule fee. The amount of the deduction will vary depending on the level of the Schedule fee for the consultation. The deductions are as follows:

- When the Schedule fee for the consultation is \$40 or more:
  - the Schedule fee for the diagnostic imaging service with the highest Schedule fee is reduced by \$35; or
  - if the Schedule fee for the diagnostic imaging service with the highest Schedule fee is less than \$35, the reduction will be the amount of that Schedule fee.
- When the Schedule fee for the consultation is less than \$40:
  - the Schedule fee for the diagnostic imaging service with the highest Schedule fee is reduced by \$15.

The deduction under Rule B is made once only. If there is more than one consultation, the relevant consultation is that with the highest Schedule fee. There is no further deduction for additional consultations.

A 'consultation' is a service rendered under an item from Category 1 of the Medicare Benefits Schedule, that is, items 1 to 10815 inclusive.

**Rule C.** When an R-type diagnostic imaging service or services and a medical service are carried out for a patient by the same practitioner on the one day:

- the Schedule fee for the diagnostic imaging service with the highest Schedule fee is reduced by \$5.

A deduction under Rule C is made once only. There is no further deduction for any additional medical services.

For Rule C, a 'medical service' is defined as any following item from the MBS:

- Category 2, items 11000 to 12533;
- Category 3, items 13020 to 51312;

- Category 4, items 51700 to 53455;
- Cleft Lip and Palate services, items 75001 to 75854.

Pathology services are not included in Rule C.

When both Rules B and C apply, the sum of the deductions in the Schedule fee for the diagnostic imaging service with the highest Schedule fee is not to exceed that Schedule fee.

## **DIB. DIAGNOSTIC IMAGING SERVICES REQUESTS**

### **DIB.1 Form etc. of Request**

#### **DIB.1.1 *Details of Services Requested***

A written request for a diagnostic imaging service does not have to be in any particular form. However, the legislation provides that a request must contain sufficient information, in terms that are generally understood by the profession, to clearly identify the item of service requested. Responsibility for the adequacy of requesting details rests with the requesting practitioner.

A written request must also be dated and contain:

- (i) the name and address or name and provider number in respect of the place of practice of the requesting practitioner; and
- (ii) the indicator 'A', to be shown on the request form, where the service requested is a pre-admission or post-discharge or outpatient type service that was part of a service:
  - (a) provided in the month prior to a patient's planned admission to hospital (either public or private) or day surgery facility that relates to that admission. This does not include the consultation at which it is decided to admit the patient to a hospital;  
OR
  - (b) provided in the month following a patient's discharge from hospital (either public or private), or a day surgery facility that relates to that person's hospital/day surgery treatment;  
OR
  - (c) provided to a patient who was referred or redirected to a doctor for treatment after presenting at an emergency or out-patient clinic at a public hospital;  
OR
  - (d) provided at a public hospital in relation to a person who is not admitted to that hospital in connection with that service.

Where the indicator 'A' is shown on a request form, the account issued by the medical practitioner who rendered the diagnostic imaging service must show the letter 'A' on the account issued to the patient, or, where the service is bulk billed, the DBIC claim header should be used. The DBIC forms are available from the Health Insurance Commission.

Where a diagnostic imaging service is self-determined by a medical practitioner, that medical practitioner must assess whether the service should be identified by the letter 'A', and if so, the accounts issued or bulk billed must be marked as referred to above.

#### **DIB.1.2 *Contravention of Request Requirements***

A practitioner who, without reasonable excuse, makes a request for a diagnostic imaging service that does not include the required information in his or her request or in a request made on his or her behalf is guilty of an offence under the Health Insurance Act 1973 punishable, upon conviction, by a fine of \$1000.

A medical practitioner who renders "R-type" diagnostic imaging services and who, without reasonable excuse, provides either directly or indirectly to a requesting practitioner a document to be used in the making of a request which would contravene the request information requirements is guilty of an offence under the Health Insurance Act 1973 punishable, upon conviction, by a fine of \$1000.

### **DIB.1.3 Details Required on Accounts, Receipts and Medicare Assignment of Benefits Forms**

In addition to the normal particulars of the patient, date of service, the services performed and the fees charged, the details which are to be entered on accounts or receipts, and Medicare assignment of benefits forms in respect of diagnostic imaging services are as follow:

- . If the professional service is provided by a specialist in diagnostic radiology the name and either the practice address or provider number of the radiologist who provided the service.
- . If the medical practitioner is not a specialist in diagnostic radiology the name and either the practice address or provider number of the practitioner who is claiming or has received payment or is the assignee under a direct billing agreement in respect of the service provided.
- . For "R-type" (requested) services and services rendered subsequent to lost requests, the account or receipt or the Medicare assignment form must indicate the date of the request and the name and provider number, or the name and address, of the requesting practitioner.
- . For a specialist service (rendered by a consultant physician or specialist, other than a specialist in diagnostic radiology, in the course of that consultant physician or specialist practising his or her speciality), a remote area service, an additional service or a pre-existing diagnostic imaging practice service, the account etc. must be endorsed with the letters "SD" to indicate that the service was self determined.
- . For emergencies, the account etc. must be endorsed "emergency".
- . In respect of lost requests the account etc. must be endorsed "lost request".

### **DIB.1.4 Retention of R-type Requests etc.**

A medical practitioner who has rendered an "R-type" diagnostic imaging service in response to a written request must retain that request for the period of 18 months commencing on the day on which the service was rendered.

A medical practitioner must, if requested by the Managing Director of the Health Insurance Commission, produce to an officer of the Commission written requests retained by that practitioner for an "R-type" diagnostic imaging service as soon as practicable but in any case no later than the end of the day after the day on which the Managing Director's request was made.

The officer of the Health Insurance Commission is authorised to make and retain copies of or take and retain extracts from written requests or written confirmations of lost requests.

A medical practitioner who, without reasonable excuse, fails to comply with the above requirements is guilty of an offence under the Health Insurance Act 1973 punishable, upon conviction, by a fine of \$1000.

### **DIB.1.5 Other Records of Diagnostic Imaging Services**

Providers of diagnostic imaging services must keep records of diagnostic imaging services in a manner that facilitates retrieval on the basis of the patient's name and date of service.

These records must include the report by the providing practitioner on the diagnostic imaging service.

For services rendered after a lost request, the records must include words to the effect that the request was lost but confirmed by the requesting practitioner and the manner of confirmation, e.g. how and when.

For emergency services, the records must indicate the nature of the emergency.

Medical practitioners must retain records of R-type diagnostic imaging services for a period of 18 months commencing on the day on which the service was rendered.

If requested by the Managing Director of the Health Insurance Commission, records retained by a providing practitioner must be produced to an officer of the Commission as soon as practicable but in any event within seven days after the day the Managing Director requests the production of those records.

Officers of the Health Insurance Commission may make and retain copies, or take and retain extracts, of such records.

A medical practitioner who, without reasonable excuse, contravenes any of the above provisions is guilty of an offence under the Health Insurance Act 1973 punishable, upon conviction, by a fine of \$1000.

## **DIC. REMOTE AREA EXEMPTIONS**

### **DIC.1 Remote Areas**

#### **DIC.1.1 *Designation of Remote Areas***

For remote area exemption purposes a remote area is one:

- (a) that is more than 30 kilometres by road from a hospital which provides a radiology service under the direction of a specialist in the specialty of diagnostic radiology;
- (b) that is more than 30 kilometres by road from a free-standing radiology facility under the direction of a specialist in the specialty of diagnostic radiology; and
- (c) where the facilities for rendering R-type diagnostic imaging services in the area in which the practice is situated (including facilities provided by practitioners visiting the area regularly) are such that patients in the area would suffer physical or financial hardship.

As is explained in section DIC.1.5, a remote area exemption may be restricted to certain services.

#### **DIC.1.2 *Application for Remote Area Exemption***

A medical practitioner who believes that he or she qualifies for exemption under the remote area definition and wishes to apply for such an exemption should make application, using the approved form (which is obtainable from the Health Insurance Commission), to the Managing Director, Health Insurance Commission, c/o General Manager, Medicare Benefits, PO Box 9822 in the Capital city in his or her State.

The form requires that the applicant provide the following details:

- (a) the practitioner's name, address and practice location;
- (b) a statement setting out the services for which exemption is sought;
- (c) the reasons for seeking the exemption;
- (d) the name, location, and distance from the applicant's practice, of the nearest radiology facility under the direction of a specialist radiologist; and
- (e) if any arrangements exist for the provision of services by a visiting radiologist, the nature of those arrangements.

#### **DIC.1.3 *Request for Further Information***

An applicant for remote area exemption may be requested by the Minister for Health to provide additional information within 60 days of a remote area exemption application having been made.

#### **DIC.1.4 *Grant of Remote Area Exemption***

The applicant must be granted a remote area exemption if the Minister is satisfied:

- (a) the applicant provided the required information;
- (b) the applicant's practice is located in a remote area; and
- (c) the facilities for rendering "R-type" diagnostic imaging services in the area in which the applicant's practice is located, including any visiting facilities, are such that, were the formal written request requirement to apply to the rendering of those services, patients in the area would suffer physical or financial hardship.

#### **DIC.1.5 *Restrictions on Remote Area Exemption***

Where the physical or financial hardship would only apply to the rendering of a limited range of diagnostic imaging services, the notice granting exemption from the written request requirements may restrict the remote area exemption to those services.

If a limited exemption is granted, the applicant will be provided in writing with the reasons for that restriction.

The person to whom a remote area exemption applies may apply in writing at any time seeking the removal of the restriction or a reduction in its scope.

The applicant may be requested in writing, within 60 days of making the application for removal of a restriction or a reduction in its scope, to provide additional information relating to the application.

If the Minister is satisfied that retention of the restriction or the refusal to grant a reduction in its scope would cause physical or

financial hardship to patients in the area, the restriction must be removed or reduced in scope and the applicant must be notified in writing accordingly.

#### **DIC.1.6 Refusal of Application**

The Minister may refuse an application for a remote area exemption, the removal of a restriction on a remote area exemption, or a reduction in the scope of a restriction on a remote area exemption by giving the applicant written notice of the refusal and the reasons for the refusal.

#### **DIC.1.7 Deemed Refusal for Review Purposes**

For the purposes of review by the Administrative Appeals Tribunal, the Minister will be deemed to have refused an application for a remote area exemption, the removal of a remote area restriction or a reduction in the scope of such a restriction if, at the end of 60 days after the application was made, the Minister has not made a decision, or has not sought further information from the applicant, or, having obtained additional information from the applicant, has not notified the applicant of his or her decision.

#### **DIC.1.8 Duration of Remote Area Exemption**

A remote area exemption remains in force for a period of up to 3 years unless revoked by the Minister.

#### **DIC.1.9 Renewal of Exemption**

A holder of a remote area exemption may apply for its renewal at any time within six months before it is due to expire. In any event, the Health Insurance Commission will send the holder a reminder notice and a renewal application six weeks before the current exemption expires.

The arrangements for dealing with renewal applications are the same as those applying to initial applications.

#### **DIC.1.10 Revocation of Exemption**

The Minister may revoke a remote area exemption if satisfied that the practice of the practitioner granted the exemption is no longer situated in a remote area, or that adequate diagnostic imaging facilities have become available in the relevant area to enable the written request requirement to operate without causing physical or financial hardship to patients in that area.

The Minister may also revoke an exemption if a Medicare Participation Review Committee has so advised.

Before revoking a remote area exemption, the practitioner must be given written notice indicating that revocation is being considered, detailing the grounds for considering revocation, and stating that the practitioner has the right to make a written submission, within six months of being given the notice, as to why the exemption should not be revoked.

The Minister must give due consideration to any such submissions made by or on behalf of the practitioner during those six months.

### **DID. REVIEW OF DECISIONS**

#### **DID.1 Administrative Appeals Tribunal**

##### **DID.1.1 Review by Administrative Appeals Tribunal**

A practitioner may apply to the Administrative Appeals Tribunal for a review of:

- (a) a decision to restrict a remote area exemption to certain "R-type" diagnostic imaging services; or
- (b) a decision to reduce the scope of a remote area exemption; or
- (c) a decision to refuse a remote area exemption; or
- (d) a deemed refusal of a remote area exemption application or of the reduction of the scope of an exemption; or
- (e) a decision to revoke a remote area exemption following advice by a Medicare Participation Review Committee.

##### **DID.1.2 Statements to Accompany Notification of Decisions**

When a person affected by a decision set out in DID.1.1 above is given written notice of that decision, the notice must include a statement advising that, if the person is dissatisfied with the decision, an application may be made to the Administrative Appeals Tribunal for a review of that decision.

Failure to comply with the above requirement does not affect the validity of the decision.

## **DIE. PROHIBITED PRACTICES**

### **DIE.1 Prohibited Diagnostic Imaging Practices**

For Medicare benefit purposes, a person is taken to be engaged in a prohibited diagnostic practice if:

- (a) the person is a service provider who directly or indirectly offers any inducement (whether by way of money, property or other benefit or advantage), or threatens any detriment or disadvantage, to a practitioner or any other person in order to encourage the practitioner to request the rendering of a diagnostic imaging service; or
- (b) the person is a service provider who, without reasonable excuse:
  - (i) directly or indirectly invites a practitioner to request the rendering of a diagnostic imaging service; or
  - (ii) does any act or thing that the person knows, or ought reasonably to know, is likely to have the effect of directly or indirectly encouraging a practitioner to request the rendering of a diagnostic imaging service; or
- (c) the person is a practitioner, or the employer of a practitioner, who, without reasonable excuse, asks, receives or obtains, or agrees to receive or obtain, any property, benefit or advantage of any kind for himself or herself, or any other person, from a service provider or a person acting on behalf of the service provider; or
- (d) the person is a practitioner who:
  - (i) accepts a request from another practitioner to render a diagnostic imaging service; and
  - (ii) in respect of any service (including a service for the use of diagnostic imaging equipment) connected with the rendering of the diagnostic imaging service, makes a payment, directly or indirectly:
    - (A) to the other practitioner; or
    - (B) if the diagnostic imaging service is not provided in a hospital - to a person who is the other practitioner's employer or to an employee of such a person; or
- (e) the person is a practitioner who accepts a request from another practitioner to render a diagnostic imaging service where there is in force an arrangement under which:
  - (i) the two practitioners share, directly or indirectly, the cost of employing staff, or of buying, renting or maintaining items of equipment; and
  - (ii) the amounts payable under the arrangement are not fixed at normal commercial rates; or
- (f) the person is a practitioner who accepts a request from another practitioner to render a diagnostic imaging service where there is in force an arrangement under which:
  - (i) the 2 practitioners share a particular space in a building; or
  - (ii) one practitioner provides, directly or indirectly, space in a building for the use or occupation of the other practitioner or permits the other practitioner to use or occupy space in a building;and the amounts payable under the arrangement are not fixed at normal commercial rates; or
- (g) the person is a specialist in the speciality of diagnostic radiology who stations diagnostic imaging equipment or employees of the specialist at the premises of another practitioner (whether it is a full-time arrangement or not), so that diagnostic imaging services may be rendered to the practitioner's patients by or on behalf of the specialist.

### **DIF.1 NOTICE OF POSSIBLE BREACHES**

#### ***DIF.1.1 Minister to Give Notice***

Where the Minister has reasonable grounds for believing that a person has engaged in prohibited diagnostic imaging practices, the Minister is required to notify that person in writing giving the grounds for that belief and setting out the particulars of the prohibited practice. The Minister is also required to invite the practitioner to show cause within 28 days, commencing on the day the notice is given, why no further action should be taken in relation to the person.

#### ***DIF.1.2 Minister to Consider Submissions***

Where a person makes a submission to the Minister within 28 days, the Minister must take the submission into account in determining whether to take further action in respect of that person.

#### ***DIF.1.3 Minister May Take Further Action***

If after 28 days the person has not made submissions to the Minister, or the person has made submissions and the Minister is satisfied that there are reasonable grounds for believing the person may have engaged in a prohibited diagnostic imaging practice, the Minister must give notice in writing to the Chairperson of a Medicare Participation Review Committee, setting out the particulars of the prohibited diagnostic imaging practice and the grounds for the Minister's belief.

Where a person provides a submission within the 28 day period and the Minister decides that no further action be taken against the person, that decision must be conveyed to the person in writing.

## **DIG. MEDICARE PARTICIPATION REVIEW COMMITTEE**

### **DIG.1 Chairperson to Establish Committee**

#### **DIG.1.1 *Establishment of Committee***

Upon receiving a notice from the Minister that a person is believed to have engaged in a prohibited diagnostic imaging practice, the Chairperson of a Medicare Participation Review Committee must establish a Committee.

Where a Chairperson receives a notice in relation to a practitioner, and the Committee has already been established in relation to the practitioner but the Committee has yet to make a determination in relation to the practitioner, the Chairperson must as soon as practicable, bring the notice to the attention of the Committee.

#### **DIG.1.2 *Composition of Committees***

For the purposes of determining whether a person has engaged in a prohibited diagnostic imaging practice, the Medicare Participation Review Committee will consist of five persons.

With the exception of the Chairperson, who must be a legal practitioner of not less than five years standing, all members must be medical practitioners experienced in the rendering of diagnostic services.

No Committee member may have a direct or indirect interest (whether pecuniary or otherwise) in a matter to be considered by the Committee.

#### **DIG.1.3 *Provision of Information to Person***

Any information given to a Committee by the Health Insurance Commission about a person must also be given to that person at or about the same time.

#### **DIG.1.4 *Committee may add Parties to Proceedings***

Where a Committee has reasonable grounds to believe that a person who employs or employed the practitioner (in respect of whom the Committee was established), or is or was an officer of a body corporate that employs or employed that practitioner may have caused or permitted the practitioner, or any other person, to engage in prohibited diagnostic imaging practices, it may determine whether the person caused or permitted those prohibited practices.

If the Committee has been established in relation to a body corporate which employs or employed a practitioner and the Committee has reasonable grounds to believe that a person who is or was an officer of the body corporate caused or permitted the practitioner to engage in a prohibited practice, it may determine whether it should consider whether that officer caused or permitted that prohibited practice to be engaged in.

#### **DIG.1.5 *Written Notice to Persons***

Written notice of any determination made by a Medicare Participation Review Committee must be given to the person in respect of whom the determination is made.

#### **DIG.1.6 *Committee Determinations***

If a Committee determines that a person engaged in, or permitted another person to engage in, a prohibited diagnostic imaging practice, it must make one of the following determinations:

- . that no action should be taken against the person;
- . that it should counsel the person;
- . that it should reprimand the person;
- . that the person, if a practitioner, is disqualified for the purposes of attracting Medicare benefits for some or all diagnostic imaging services for a specified period of not more than 5 years;
- . where the person employs, or has employed, a practitioner - that any practitioner who is employed by the person is, while so employed, taken to be disqualified;
- . where the person is or has been an officer of a body corporate that employs, or has employed, a practitioner - that any practitioner who is employed by a body corporate of which the person is an officer is, while so employed at a time when the person is such an officer, taken to be disqualified.

All determinations by Medicare Participation Review Committees must be in writing.

#### **DIG.1.7 *Nature Of Disqualification***

A Committee, having determined that a practitioner is disqualified or taken to be disqualified, must specify whether the

disqualification is full or partial; if partial the Committee must indicate whether the disqualification is in respect of one or more of the following:

- . the provision of specified professional services, or the provision of professional services other than specified professional services;
- . the provision of professional services to a specified class of persons, or the provision of professional services to persons other than a specified class of persons; and
- . the provision of professional services within a specified location, or the provision of professional services otherwise than within a specified location.

#### **DIG.1.8 *Specification of Period of Disqualification***

Where a Committee determines that a practitioner is disqualified, or taken to be disqualified, the Committee must specify in the determination the period of disqualification which must not exceed 5 years.

#### **DIG.1.9 *Determination of Services***

A Committee must identify all services it determines were rendered as the result of a person engaging in prohibited diagnostic imaging practices. If Medicare benefits were paid to a practitioner or have been paid or are payable to a person other than a practitioner, the Committee must determine that the benefits or a specified part of the benefits be paid by the practitioner to the Commonwealth. If Medicare benefits are payable but have not been paid, the Committee must determine that the benefits or a specified proportion of the benefits cease to be payable.

#### **DIG.1.10 *Revocation of Remote Area Exemption***

If a Committee determines that a medical practitioner engaged in, or caused or permitted another person to engage in a prohibited diagnostic imaging practice, and the practitioner has been granted a remote area exemption, the Committee must include in its determination advice to the Minister on whether the remote area exemption should be revoked and give its reasons for so advising.

#### **DIG.1.11 *Recovery of Benefits Paid***

Any Medicare payment made for a diagnostic imaging service which contravened a State or Territory law relating to the use of diagnostic imaging procedures or equipment is payable to the Commonwealth by the person who contravened the law.

## **EXPLANATORY NOTES**

### ***Principles of Interpretation and Billing***

- (1) *The service rendered must be clinically relevant for Medicare benefits to be payable. A "clinically relevant" service is a service rendered by a medical practitioner that is generally accepted in the medical profession as being necessary for the appropriate treatment or management of the patient to whom it is rendered.*

*As an example, an ultrasound to determine the sex of a foetus is not a clinically relevant service (unless there is an indication that the sex of the foetus will determine further courses of treatment, e.g., a genetic background to a sex-related disease or condition).*

- (2) *A service may only be billed for Medicare benefit purposes where the service rendered complies with the description in the relevant item.*

*Where an a service is covered specifically by an item, another item which also covers the service in more general terms, cannot be used.*

*Examples are:-*

- (a) *Ultrasound of the prostate, bladder base and urethra are covered by Items 55300 and 55303. A Medicare benefit is only payable for examination of these organs when the service fulfils the conditions set out in these item descriptions. Items covering examination of the urinary tract - Items 55038 and 55039, or male pelvis - Items 55044 and 55045, cannot be used instead of 55300 and 55303 for an ultrasound examination of the prostate, bladder base and urethra alone.*

- (b) *For some items, benefits are not payable unless there is a written request and the referring practitioner is not a member of the group of practitioners of which the rendering practitioner is also a member.*

*This requirement relates specifically to R-type ultrasound services of body regions in General Ultrasound (Items 55028, 55030, 55032, 55034, 55036, 55038, 55040, 55042, 55044, 55048, 55050, 55052 and 55058). Services under these items cannot be "self-determined" by a radiologist, by any other specialist or consultant physician or by any other medical practitioner. However, a medical practitioner may bill for the "NR-type" where he or she determines that the service is clinically relevant for the treatment of the patient's condition.*

## **DIH. ULTRASOUND**

### **DIH.1 Ultrasonic Cross-sectional Echography (Items 55028 to 55052)**

Items in this range identified with the symbol "(NR)" cover ultrasonic cross-sectional echography where the examination is rendered by a practitioner on his/her patient. Items in this range identified with the symbol "(R)" cover the examination where the patient has been referred to a medical practitioner outside the referring practitioner's practice specifically for the ultrasound scanning.

As a rule, benefit is payable once only for ultrasonic examination at the one attendance, irrespective of the areas involved.

Except as indicated in the succeeding paragraphs, "attendance" means that there is a clear separation between one service and the next. For example, from 1 November 1993, where there is a short time between one ultrasound and the next, benefits will be payable for one service only - as a guide, the Health Insurance Commission will look to a separation of 3 hours between services and this must be stated on accounts issued for more than 1 service on the one day.

However, where more than one ultrasound service is rendered on the one occasion and the additional service relates to a non-contiguous body area (and the services provided are "clinically relevant", that is, the service is generally accepted in the medical profession as being necessary for the appropriate treatment or management of the patient to whom it is rendered), benefits greater than the single rate may be payable. Accounts should be marked "non-contiguous body areas".

Benefits for two contiguous areas may be payable where it is generally accepted that there are different preparation requirements for the patient and a clear difference in set-up time and scanning, such as between abdomen and pelvis. Accounts should be endorsed "contiguous body area with different setup requirements".

### **DIH.2 Musculo-Skeletal (Items 55050 and 55051)**

Ultrasound of one or more musculo-skeletal areas is a single item payable only once irrespective of the number of regions scanned.

### **DIH.3 Routine Ultrasonic Scanning**

Medicare benefits are not attracted for routine ultrasonic screening associated with the termination of pregnancy.

Details of diagnostic imaging requesting requirement are set out in Section DIA.

### **DIH.4 Study of Region or Organ not covered by any other Item in this Group (Items 55056 and 55057)**

These items have been deleted following the removal of the determining functions from the Medicare Benefits Advisory Committee.

### **DIH.5 Investigations of Vascular Disease (Items 55238-55290)**

The vascular ultrasound items have been comprehensively revised. The common vascular ultrasound items are included together with the common combinations. Correct billing itemisation will assist ongoing fee relativity assessment in this area.

The fees include components for interpretation of the results and provision of the report which must be performed by a medical practitioner.

Where it is clinically necessary to perform studies on a patient on successive days in the same week, two studies are allowed in the working week.

Restrictions apply to items 55288 and 55290. Item 55288 is used when two examinations from items 55238 to 55286 (excluding items 55282 and 55284) are performed. However only one of the two examinations can be from the one block, (a) to (e). Benefits are not payable for combinations of items from any **one** block, (a) to (e) eg 55238, 55240.

Item 55290 is used when three examinations from items 55238 to 55286 (excluding items 55282 and 55284) are performed.

The same restrictions apply as for item 55288.

Where item 55276 or 55278 is rendered with another item or items as 'components' of the combination items 55288 or 55290, benefits are only payable where the services referred to at 55276 or 55278 have been performed in accordance with the descriptions where the study takes not less than 45 minutes, to the exclusion of any other service.

Example 1: A benefit is not payable where a practitioner performs items 55238 and 55240 together on a patient because both items are in the one block, (a). If a practitioner performs items 55238 and 55244, he/she would bill under item 55288, because 55238 and 55244 are in different blocks, (a) and (b).

Example 2: If a practitioner performs items 55238, 55276 and 55280, he/she would bill under item 55290.

#### **DII.6 Urological - Transrectal Ultrasound (Items 55300 and 55303)**

Benefits for these items are attracted only where the service is rendered in the circumstances specified in both items. These provide that -

- . a digital rectal examination was personally performed by the medical practitioner who also personally rendered the ultrasound service; and
- . the equipment used meets specifications; and
- . the patient was assessed prior to the service by a medical practitioner recognised in one or more of the specialties specified, not more than 60 days prior to the ultrasound service.

Item 55300 provides for the service where rendered by a medical practitioner who **did not** assess the patient, whereas Item 55303 provides for the service where rendered by a medical practitioner who **did** assess the patient.

#### **DII. COMPUTERISED TOMOGRAPHY (excluding Magnetic Resonance Imaging - see Note DII.6)**

##### **DII.1 General**

Several CT items have had minor amendments to descriptions to assist billing. Pre-contrast scans are included in an item of service with contrast medium only when the pre-contrast scans are of the same region.

##### **DII.2 Scan of more than one area**

Items have been provided to cover the common combinations of regions - see DII.6. However, where regions are scanned on the one occasion which are not covered by a combination item, for example, Item 57001 (scan of brain) and Item 56619 (scan of extremities), both examinations would attract separate benefit.

##### **DII.3 CT Scan of Temporal Bones with Air Study (Item 56019)**

This service would be preceded by a CT brain scan on either the same day or the previous day. The brain scan attracts a separate benefit.

##### **DII.4 CT Scan of the Spine and the Extremities (Items 56210-56216 and 56619-56625)**

Benefit for these services is no longer dependent upon the total number of slices.

##### **DII.5 CT Scan of Spine with Intrathecal Contrast Medium (Item 56219)**

The item incorporates the cost of contrast medium for intrathecal injection and associated x-rays. Benefits are not payable for this item when rendered in association with myelograms (Item 59724).

Where a myelogram is rendered under Item 59724 and a CT is necessary, the relevant Item would be scan of spine without intravenous contrast (Item 56210).

##### **DII.6 CT Scans of Multiple Regions**

The Schedule provides Items to cater for the common combinations of regions. The Items relating to the individual regions should not be used when scans of multiple regions are performed.

##### **DII.7 More than one Attendance of the Patient to Complete a Scan**

Where a patient attends for a scan which is only partly undertaken and the patient attends later that day or on a subsequent day to complete the scan, benefits are only payable for the one scan.

For example, where a request relates to two or more regions of the spine and one region only is scanned on one occasion with the balance of regions being scanned on a subsequent occasion, benefits are payable for one service only.

## **DIJ. DIAGNOSTIC RADIOLOGY**

### **DIJ.1 General**

There have been major changes to the diagnostic radiology table: item amalgamations; inclusion of most preparation items with procedures; new items.

With amalgamations, several items covering the one type of procedure have been merged eg. barium enema, arthrography, barium study of the upper gastro-intestinal tract. New items include the re-introduction of bronchography.

### **DIJ.2 Examination and Report**

The benefits allocated to each item from 57506 to 61109 inclusive covers the total procedure, i.e. the examination, reading and report. Separate benefits are not payable for individual components of the service, eg preliminary reading.

Where preliminary plain films were frequently billed with a procedure item, the value of the plain film fee(s) have been incorporated into the new item fee and the descriptions amended to include words such as "including any preliminary plain films". Benefits are not separately payable for associated plain films involved with these items.

### **DIJ.3 Films - exposure of more than one**

Where the radiographic examination of a specific area involves the exposure of more than one film, benefits are payable once only, except where special provision is made in the description of the item for the inclusion of all films taken for the purpose of the examination.

### **DIJ.4 Comparison X-rays - Limbs**

Where it is necessary for one or more films of the opposite limb to be taken for comparison purposes, benefits are payable for radiographic examination of one limb only. Comparison views are considered to be part of the examination requested.

### **DIJ.5 Plain Abdominal Film (Item 58900/58903)**

Benefits are not attracted for Items 58900/58903 in association with barium meal examinations or cholecystograms whether provided on the same day or previous day. Preliminary plain films are covered in each study.

### **DIJ.6 Radiography of the Breast.**

Benefits under items 59300 and 59303 are attracted only where the patient has been referred in specific circumstances as indicated in the description of the items. To facilitate these provisions, the Regulations to the Health Insurance Act require the requesting medical practitioner to include in the request letter or note, the clinical indication for the requested procedure. The request must be personally signed by the requesting practitioner. Three new items have been created, involving examinations with a surgical procedure and of breast tissue.

### **DIJ.7 Myelogram (Items 59724)**

Benefits are not payable where a myelogram is rendered in association with a CT myelogram (Item 56219 - see DII above). Where it is necessary to render a CT and a myelogram, CT Item 56210 would apply.

### **DIJ.8 Study of Region or Organ not covered by any other Item in this Group (Item 60700)**

This item has been deleted following the removal of determining functions of the Medicare Benefits Advisory Committee.

### **DIJ.9 Digital Subtraction Angiography (DSA) (Items 60000-60078)**

Benefits are payable only where these services are rendered in an angiography suite.

Each item includes all preparation and contrast injections other than for selective catheterisation. For Digital Subtraction Angiography (DSA), benefits are payable for a maximum of 1 DSA item (from Items 60000 to 60069). For selective DSA - 1 DSA item (from Items 60000 to 60069) and 1 item covering selective catheterisation (from 60072, 60075 or 60078).

If a DSA examination covers more than one of the specified regions/combinations, then the region/composition forming the major part of the examination should be selected, with itemisation to cover the total number of film runs obtained. A run is the injection of contrast, data acquisition, and the generation of a hard copy record.

### **DIJ.10 Preparation Items (Items 60903-60927)**

Benefits are not payable for preparation items when rendered with any service other than that specified in each item.

## **DIK. NUCLEAR MEDICINE IMAGING**

### **DIK.1 General**

The Nuclear Medicine Imaging part of the Schedule was restructured from 1 November 1996. The previous arrangement where a differential fee structure applied depending on whether the service was performed at a computerised installation ("C" items) or a non-computerised installation ("NC" items), has been changed to a single fee structure.

Benefits are now only payable where a nuclear medicine service is rendered by a medical specialist (see NOTE at the commencement of Group I4).

Benefits for a nuclear scanning service cover the preliminary examination of the patient, estimation of dosage, supervision of the administration of the dose and the performance of the scan, and compilation of the final report. Additional benefits will only be attracted for specialist physician or consultant physician attendances under Category 1 of the Schedule where there is a request for a full medical examination accompanied by a referral letter or note.

### **DIK.2 Radiopharmaceuticals**

The Schedule fees for nuclear medicine imaging services incorporate the costs of radiopharmaceuticals. Sestamibi myocardial perfusion studies have now been incorporated into items in Group I4.

### **DIK.3 Study of Region or Organ not covered by any other Item in this Group (Item 61503)**

This item has been deleted following the removal of the determining functions from the Medicare Benefits Advisory Committee.

The four items covered by recommendations of the Medicare Benefits Advisory Committee (i.e., old Items 61501(1), (2), (3) and (4)) have been incorporated into Group I4.

### **DIK.4 Single Photon Emission Tomography (SPECT)**

The derived fee item, single photon emission tomography (SPECT) services (old Item 61490), has been deleted and adjustments have been made to the fees for the relevant associated items.

Where SPECT has been performed in conjunction with another study and is not covered under the item descriptor or is not covered under Item 61462, no Medicare benefit is payable for the SPECT study.

### **DIK.5 Single Myocardial Perfusion Studies (Items 61302 and 61303)**

Items 61302 and 61303 apply to single myocardial perfusion studies which can only be used once and cannot be used in conjunction with any other myocardial perfusion study for an individual patient referral.

### **DIK.6 Myocardial Perfusion (Items 61306 and 61307)**

Items 61306 and 61307 refer to all myocardial perfusion studies involving two or more sets of imaging times related to an individual patient referral. This includes stress/rest, stress/re-injection, stress/rest and re-injection thallium studies, one or two day technetium-based perfusion agent protocols, mixed technetium-based perfusion agent/thallium protocols and the use of gated SPECT when undertaken.

### **DIK.7 Hepatobiliary Study (pre-treatment ..)(Item 61360)**

Item 61360 - the standard hepatobiliary item - also includes allowance of the pre-procedural CCK administration for preparatory emptying of the gall bladder and also morphine augmentation.

### **DIK.8 Hepatobiliary Study (infusion ..) (Item 61361)**

Item 61361 applies specifically to a standard hepatobiliary study to which has been added an infusion of sinaclide (CCK-8) following which acquisition is continued and quantification of gallbladder ejection fraction and/or common bile duct activity time curves are performed.

### **DIK.9 Whole Body Studies (Items 61426-61438)**

"Whole body" studies must include the trunk, head and upper and lower limbs down to the elbow and knee joints respectively, whether acquired as multiple overlapping camera views or whole body sweeps (runs) with additional camera views as required. Any study that does not fulfil these criteria is a localised study.

### **DIK.10 Repeat Studies (Item 61462)**

Item 61462 covers repeat planar (whole body or localised) and/or SPECT imaging performed on a separate occasion using the same administration of radiopharmaceutical. This does not apply to bone scans, adrenal studies or gastro-oesophageal reflux studies, myocardial perfusion studies, colonic transit or CFS transport studies, where allowance for performance of the delayed

study is incorporated into the baseline benefit fee. The repeat planar and SPECT imaging when performed on a separate occasion using the same administration of radiopharmaceutical should be itemised with the original item and associated with it.

#### **DIK.11 Thyroid Study (Item 61473)**

Item 61473 incorporates the measurement of thyroid uptake on a gamma camera using a proven technique, where clinically indicated.

### **DIL. MAGNETIC RESONANCE IMAGING**

#### **DIL.1 Non payment of Medicare Benefits for Magnetic Resonance Imaging (MRI)**

Magnetic Resonance Imaging (MRI) does not attract a Medicare benefit. Although a Medicare benefit for MRI services was payable in respect of services rendered at certain hospitals during the evaluation period of the technology, the benefit was withdrawn from 29 July 1992.

By agreement with the States, the Commonwealth contributes to the funding of MRI in the form of grants to the States. These grants enable the establishment of 18 publicly funded machines attached to neurosurgical units at major public hospitals, and the payment of radiologists to treat eligible private (non-compensable) patients. The grants were effective from 1 February 1992, rendering the Medicare benefit item superfluous.

Patients eligible for Medicare and private (non-compensable) patients are not charged for MRI services at the recognised (public) hospitals specified hereunder:

Royal North Shore Hospital, St Leonard's, NSW  
Royal Prince Alfred Hospital, Camperdown, NSW  
Prince of Wales Hospital, Randwick, NSW  
John Hunter Hospital, New Lambton, NSW  
Westmead Hospital, Parramatta, NSW  
Royal Melbourne Hospital, Parkville, VIC  
St Vincents Hospital, Fitzroy, VIC  
Alfred Group of Hospitals, Prahran, VIC  
Austin Hospital, Heidelberg, VIC  
Princess Alexandra Hospital, Woolloongabba, QLD  
Royal Brisbane Hospital, Herston, QLD  
Townsville Hospital, Townsville, QLD  
Royal Adelaide Hospital, Adelaide, SA  
Flinders Medical Centre, Bedford Park, SA  
Sir Charles Gairdner Hospital, Nedlands, WA  
Royal Perth Hospital, Perth, WA  
Royal Hobart Hospital, Hobart, TAS  
Canberra Hospital, Woden, ACT (renamed from Woden Valley Hospital)

Details of referral requirements should be obtained from the hospital concerned.

#### **DIL.2 Anaesthetic Services Associated with MRI**

Medicare benefits are payable under Item 18013 for anaesthetic services associated with MRI. Benefits are restricted to anaesthetic services administered in association with MRI services carried out using MRI equipment located at the hospitals listed above.

## **CATEGORY 6 - PATHOLOGY SERVICES**

### **OUTLINE OF ARRANGEMENTS**

#### **PA. PATHOLOGY SERVICES IN RELATION TO MEDICARE BENEFITS**

##### **PA.1 Basic Requirements**

###### **PA.1.1 *Determination of Necessity of Service***

The treating practitioner must determine that the pathology service is necessary.

###### **PA.1.2 *Request for Service***

The service may only be provided -

- (i) in response to a request from the treating practitioner or from another Approved Pathology Practitioner and the request must be in writing (or, if oral, confirmed in writing within fourteen days); or
- (ii) if determined to be necessary by an Approved Pathology Practitioner who is treating the patient.

###### **PA.1.3 *Provision of Service***

The following conditions relate to provision of services:

- (i) the service has to be provided by or on behalf of an Approved Pathology Practitioner;
- (ii) the service has to be provided in a pathology laboratory accredited for that kind of service;
- (iii) the proprietor of the laboratory where the service is performed must be an Approved Pathology Authority;
- (iv) the Approved Pathology Practitioner providing the service must either be the proprietor of the laboratory or party to an agreement, either by way of contract of employment or otherwise, with the proprietor of the laboratory in which the service is provided; and
- (v) no benefit will be payable for services provided by an Approved Pathology Practitioner on behalf of an Approved Pathology Authority if they are not performed in the laboratories of that particular Approved Pathology Authority.

##### **PA.2 Exceptions to Basic Requirements**

###### **PA.2.1 *Prescribed Pathology Services***

A prescribed pathology service is a service included in Group P9 of the Pathology Schedule. Group P9 contains 11 services which may be performed by a medical practitioner in his or her own surgery on his or her own patients.

Additionally, benefit is payable only where the service is determined to be necessary by the medical practitioner rendering the service, or is in response to a request by a member of a group of practitioners to which that practitioner belongs. (See para. PP.2 for the definition of a "group of practitioners".)

###### **PA.2.2 *Services Where Request Not Required***

A written request is not required for -

- (i) a prescribed pathology service rendered by or on behalf of a medical practitioner upon his or her own patients;
- (ii) a pathologist-determinable service. (A pathologist-determinable service is a pathology service determined to be necessary by an Approved Pathology Practitioner in respect of a person who is the patient of that

Approved Pathology Practitioner and which is rendered by or on behalf of that Approved Pathology Practitioner. Further information on additional pathology tests not covered by a request is provided at paragraph PB.3)

### **PA.3 Circumstances Where Medicare Benefits Not Attracted**

#### **PA.3.1 *Services Rendered by Disqualified Practitioner***

Medicare benefits are not payable for pathology services if at the time the service is rendered, the person, by or on whose behalf the service is rendered, is a person in relation to whom a determination is in force in relation to that class of services. That is, where an Approved Pathology Practitioner has breached an undertaking, and a determination has been made that Medicare benefits should not be paid during a specified period (of up to five years) in respect of specified pathology services rendered by the practitioner.

Note: An Approved Pathology Practitioner may be disqualified for reasons other than a breach of undertaking.

#### **PA.3.2 *Certain Pathology Tests Do Not Attract Medicare Benefits***

Certain tests of public health significance do not qualify for payment of Medicare benefits. Examples of services in this category are:

- . examination by animal inoculation;
- . Guthrie test for phenylketonuria;
- . neonatal screening for hypothyroidism (T4/TSH estimation);
- . neonatal screening for Cystic Fibrosis;
- . neonatal screening for Galactosemia;
- . pathology services used with the intention of monitoring the performance enhancing effects of any substance;
- . pathology tests carried out on specimens collected from persons occupationally exposed to sexual transmission of disease where the purpose of the collection of specimens is for testing in accordance with conditions determined by the health authority of the State or Territory in which the service is performed; or
- . any test related to the detection of the presence of human immunodeficiency virus (HIV).

In addition to the above, certain other tests do not qualify for payment of Medicare benefits. These include:

- . cytotoxic food testing;
- . pathology services performed for the purposes of tissue audit;
- . pathology services performed for the purposes of control estimation, repeat tests (e.g. for confirmation of earlier tests on the same specimen, etc);
- . preparation of autogenous vaccines;
- . tissue banking and preparation procedures;
- . pathology services which are performed routinely in association with the termination of pregnancy without there being any indication for the necessity of the services. However, benefits will be paid for the following pathology tests:
  - Item 65001 - haemoglobin estimation;
  - Item 65017 - blood grouping ABO and Rh (D antigen);
  - Item 65021 - examination of serum for Rh and/or other blood group antibodies; or
- . pathology services performed on stillborn babies or cadavers.

## **PB. REQUESTS**

### **PB.1 Responsibilities of Treating/Requesting Practitioners**

#### **PB.1.1 *Form of Request***

A treating practitioner may request a pathology service either orally or in writing but oral requests must be confirmed in writing within fourteen days from the day when the oral request was made.

Pathology request forms and combined pathology request/offer to assign forms which are prepared by the pathologists and distributed to requesting practitioners must be approved by the Health Insurance Commission (see paragraph PB.2). Written pathology requests from treating practitioners that are not on a form prepared and distributed by a pathologist do not need to be approved. However, all written requests for pathology services should contain the following particulars:

- (i) the individual pathology services, or recognised groups of pathology tests to be rendered (see Section PQ of these notes for the list of acceptable terms and abbreviations). The description must be sufficient to enable the item in which the service is specified to be identified;
- (ii) the requesting practitioner's signature and date of request;
- (iii) the surname, initials of given names, practice address and provider number of the requesting practitioner;
- (iv) the patient's name and address;
- (v) details of the hospital status of the patient, as follows (for benefit rate assessment). That is, whether the patient was or will be, at the time of the service or when the specimen is obtained:
  - (a) a private patient in a private hospital, or approved day hospital facility;
  - (b) a private patient in a recognised hospital;
  - (c) a Medicare patient in a recognised hospital;
  - (d) an outpatient of a recognised hospital;
- (vi) whether the request is a pre-admission or post-discharge or out patient service in respect of a patient in a public or private hospital or day hospital facility; and
- (vii) details of the person to whom the request is directed. A pathology request can be directed to an Approved Pathology Practitioner or an Approved Pathology Authority. If the request is directed to an Approved Pathology Authority, the form must show the full name and address of the Approved Pathology Authority. If the request is directed to an Approved Pathology Practitioner, the form must show the surname, initials or given names and place of practice of the Approved Pathology Practitioner to whom the request is addressed.

#### **PB.1.2 *Offence Not to Confirm an Oral Request***

A requesting practitioner who, without reasonable excuse, does not confirm in writing an oral request within fourteen days of making the oral request is guilty of an offence under the Health Insurance Act 1973 punishable, upon conviction, by a fine not exceeding \$1000, and the request is deemed never to have been made.

### **PB.2 Responsibilities of Approved Pathology Practitioners**

#### **PB.2.1 *Form of Request***

There is no official "request in writing" form, and the requesting practitioner's own stationery, or pre-printed forms supplied by Approved Pathology Practitioners/Authorities are acceptable, provided there are no check lists or "tick-a-box" lists of individual tests or groups of pathology services on the forms. However, pre-printed request forms issued by Approved Pathology Practitioners/Authorities for use by requesting practitioners must be approved by the Health Insurance Commission. Forms submitted for approval should be accompanied by other information or documentation such as that contained in notes for guidance, cover sheets, etc., provided to requesting practitioners.

### **PB.2.2 *Offence to Provide Unapproved Request Forms***

An Approved Pathology Practitioner or Approved Pathology Authority who, without reasonable excuse, provides (directly or indirectly) to practitioners request forms which are not approved by the Health Insurance Commission, is guilty of an offence under the Health Insurance Act 1973 punishable, upon conviction, by a fine not exceeding \$1000.

### **PB.2.3 *Request to Approved Pathology Authority***

It is acceptable for a request to be made to an Approved Pathology Authority who is the proprietor or one of the proprietors of a laboratory instead of making the request to the Approved Pathology Practitioner who renders the service or on whose behalf the service is rendered.

### **PB.2.4 *Holding, Retention, Recording and Production of Request Forms***

Approved Pathology Practitioners must hold a request in writing for all services requested by any other practitioner before billing patients.

An Approved Pathology Practitioner is required to retain written requests/confirmation of requests for pathology services for 18 months from the day when the service was rendered. This also applies to requests which an Approved Pathology Practitioner receives of which only some tests are referred to another Approved Pathology Practitioner (the first Approved Pathology Practitioner would retain the request for 18 months). If all tests were referred, the second pathologist would retain the original request.

If the written request or written confirmation has been recorded on film or other magnetic medium approved by the Minister for Health and Family Services, for the purposes of storage and subsequent retrieval, the record so made shall be deemed to be a retention of the request or confirmation. The production or reproduction of such a record shall be deemed to be a production of the written request or written confirmation.

An Approved Pathology Practitioner is required to produce, on request from an officer of the Health Insurance Commission, no later than the end of the day following the request from the officer, a written request or written confirmation retained pursuant to the above paragraphs. The officer is authorised to make and retain copies of or take and retain extracts from written requests or written confirmations.

### **PB.2.5 *Offences in Relation to Retaining and Producing Request Forms***

The following offences are punishable upon conviction by a fine not exceeding \$1000:

- (i) an Approved Pathology Practitioner who, without reasonable excuse, does not keep request forms for 18 months;
- (ii) an Approved Pathology Practitioner who, without reasonable excuse, does not produce a request form to an officer of the Health Insurance Commission before the end of the day following the day of the officer's request.

### **PB.2.6 *Referral From An Approved Pathology Practitioner To Another Approved Pathology Practitioner***

Where an Approved Pathology Practitioner refers some or all services requested to another Approved Pathology Practitioner not associated with the same Approved Pathology Authority the following apply:

- (i) where all the services are referred, he/she should forward the initial request to the second Approved Pathology Practitioner and when necessary, as mentioned in PG.1, forward a photocopy of the patient's assignment voucher so that the second Approved Pathology Authority can direct-bill Medicare;
- (ii) where some of the services which are listed in different items in the Schedule are referred, he/she must issue his/her own request in writing listing the tests to be performed, which would show in addition to the particulars listed in paragraph PB.1.1 above:
  - (a) name and provider number of the original requesting practitioner; and
  - (b) date of initial request;

- (iii) under the item coning rules (which limit benefits for multiple services) only one Medicare benefit is payable for services included in coned items except for estimations covered by Rule 6 entitled "designated pathology services". The exemption allows payment of more than one Medicare benefit where various components of the one item number from the same request e.g. drug assays (item 66235) are performed by two Approved Pathology Authorities.

Although the provisions concerning designated pathology services in Rule 6 permit similar services (e.g. hormone estimations) to be performed by 2 or more laboratories, with different Approved Pathology Authorities, the sum of the Medicare benefit payable for services provided by the laboratories concerned will not exceed the maximum amount payable under the item coning rules when a single laboratory performs all the estimations.

Notes:

- (i) the patient should be billed by each Approved Pathology Practitioner only for those services rendered by or on his/her behalf;
- (ii) photocopies of requests are not acceptable;
- (iii) in the case of "designated pathology services" (i.e. items 66241, 66417 and 69241 only)
- (a) a second Approved Pathology Authority, who has been requested to perform some of the tests in items 66235, 66405 and 69229 by the first Approved Pathology Authority to receive the request for pathology services, may claim up to \$16.40 under item 66241 if he/she performs two or more tests, \$55.25 under item 66417 if he/she performs five or more tests, and \$54.00 under item 69241 if he/she performs five or more tests; and
- (b) a patient episode initiation fee (PEI) is payable for the services provided by the laboratory which receives the original request and performs one or more of the estimations. However, no PEI is payable for services provided by the other laboratory which performs the remainder of the estimations. A "specimen referred fee" is payable instead. One Approved Pathology Authority cannot claim both a PEI and a "specimen referred fee" in relation to the same patient episode.

### **PB.2.7 Offence Not To Confirm An Oral Request**

An Approved Pathology Practitioner who, without reasonable excuse, does not confirm in writing an oral request to another Approved Pathology Practitioner within fourteen days of making the oral request is guilty of an offence under the Health Insurance Act 1973 punishable, upon conviction, by a fine not exceeding \$1000, and the request is deemed never to have been made.

### **PB.3 Pathology Tests Not Covered by Request**

An Approved Pathology Practitioner, who has been requested to perform one or more pathology services, may consider it necessary, in the interest of the patient, that additional tests to those requested be carried out. The Approved Pathology Practitioner must discuss this need with the requesting practitioner, and if the requesting practitioner determines that additional tests are necessary, the Approved Pathology Practitioner must arrange with the requesting practitioner to forward an amended or second request for those services. The account will then be issued in the ordinary way and the additional services will attract benefits providing the Approved Pathology Practitioner is a recognised specialist pathologist.

## **PC. DETAILS REQUIRED ON ACCOUNTS, RECEIPTS OR ASSIGNMENT FORMS**

### **PC.1 General**

Medicare benefit is not payable in respect of a pathology service unless specified details are provided, by the practitioner rendering the service, on his or her account, receipt or assignment form.

### **PC.2 Approved Pathology Practitioners**

In addition to holding a request in writing from the treating medical or dental practitioner or from another Approved Pathology Practitioner, the following additional details must be recorded on the account, receipt or assignment form of the Approved

Pathology Practitioner providing the service:

- (i) the surname and initials of the Approved Pathology Practitioner who performed the service and either his/her practice address or the provider number for the address;
- (ii) the name of the person to whom the service was rendered;
- (iii) the date on which the service was rendered;
- (iv) the name of the requesting practitioner;
- (v) the date on which the request was made;
- (vi) the requesting practitioner's provider number;
- (vii) a description of the pathology service in words which are derived from the item description in the Schedule and are of sufficient detail to identify the specific test in the Schedule that was rendered. Instead of such a full description, the abbreviations contained in the index and the group abbreviations listed at paragraph PQ.4 are acceptable alternatives (see paragraph PQ.1);
- (viii) where the treating practitioner determines or provides a pathology service on his/her own patient, the account must be endorsed "sd"; and
- (ix) provide collection centre identification number if specimen was collected in a licensed collection centre.

Where some services have been referred from one Approved Pathology Practitioner to another Approved Pathology Practitioner, the request details (i.e. the name and provider number of the requesting practitioner and the date of the request) to be shown on the second Approved Pathology Practitioner's account, receipt or assignment form must be those of the original requesting practitioner (and not those of the first Approved Pathology Practitioner).

### **PC.3 Prescribed Pathology Services**

For Prescribed Pathology Services (that is, pathology items in Group P9) the medical practitioner who renders the service must ensure his or her account, receipt or assignment form includes his or her name, address or provider number, the date of the service, and a description to clearly identify the service in the Schedule that was rendered.

If the service was determined necessary by another medical practitioner who is a member of the same group practice as the practitioner who rendered the service, the name of the requesting practitioner, sufficient to identify the practitioner from other practitioners in the same group practice with the same surname, must also be included together with the date on which the request was made.

## **PD. INBUILT MULTIPLE SERVICES RULE**

### **PD.1 Description of Rule**

The term "Inbuilt Multiple Services Rule" describes an arrangement which places limits on the benefits payable for items in the Pathology Services Table depending on the range of services performed during a single patient episode. A patient episode is defined in paragraph PO.4 of these notes.

### **PD.2 Exemptions**

Under Rule 4, exemptions to the multiple services rule have been granted for certain specified tests. In some circumstances tests which are repeated up to 4 times over a 24 hour period, or tests which are requested up to 6 times on a single request form and are performed within 6 months of the date of request may be eligible for separate Medicare benefits. The services to which the exemptions apply are listed under Rule 4.(1 and 2) and cover seriously or chronically ill patients who require particular tests under specified circumstances. In order to claim the exemptions, accounts should be endorsed "Rule 3 Exemption".

Where a practitioner seeks an exemption to the multiple services rule for a patient whose condition requires a series of pathology investigations at various times throughout any one day or over a longer period of time, and the services required are not exempted under Rule 4, an application for exemption can be made which is endorsed "S4B(3)". Some factors that the

delegate of the Minister may take into consideration in approving an exemption are: the patient is seriously ill; there are distinct and separate collections and performances of tests; and the services involve substantial additional expenses for the approved pathology practitioner. These, and other clinical details, should be supplied by the practitioner when seeking an S4B(3) exemption.

If Rule 3 exemptions are endorsed "S4B(3)", claim assessment could take longer as all S4B(3) claims are passed to the delegate for assessment. S4B(3) covers all exemptions to the multiple services rule but, where applicable, specific "Rule 3 exemption" endorsements will speed up the payment of claims.

## **PE. EPISODE CONE**

### **PE.1 Description of Rule 19**

The term "Episode Cone" describes an arrangement under which Medicare benefits payable in a patient episode for a set of pathology services, containing more than three items, ordered by a general practitioner for a non-hospitalised patient, will be equivalent to the sum of the benefits for the three items with the highest Schedule fees. Further information on the episode coning arrangements is provided in PO.5 of these notes.

### **PE.2 Exemptions**

Some items are not included in the count of the items performed when applying episode coning. The items which have been exempted from the cone include all the items in Groups P10 and P11, the Pap smear testing items (73053 and 73055) and the designated pathology services items (66241, 66417 and 69241).

## **PF. SCHEDULE FEES**

### **PF.1 Single Level Fees**

A single level Schedule fee as opposed to the previous SP and OP fee levels was introduced from 1 February 1992. The Schedule fee was set at 70% of the previous SP fee for all services except for a cytology item, a histopathology item and three high volume test items.

### **PF.2 Patient Episode Initiation Fees (PEIs)**

Items in Groups P10 and P11 of the Pathology Services Table are only applicable to services performed:

- (i) by or on behalf of an Approved Pathology Practitioner who is a recognised specialist pathologist; and
- (ii) in private practice.

Accordingly, these fees are not payable for pathology services rendered by an Approved Pathology Practitioner, being a specialist pathologist when requested for a:

- (i) privately referred out-patient of a recognised hospital;
- (ii) private in-patient in a recognised hospital; or where
  - (a) any pathology equipment of a recognised hospital, or a laboratory included in a prescribed class of laboratories, is used; or
  - (b) any member of the staff of a recognised hospital, or a laboratory included in a prescribed class of laboratories, participates in the provision of the service in the course of his/her employment with that hospital or laboratory.

The patient episode initiation fees (PEIs) will be applicable on an episodic basis i.e. a claim may be made for the provision of pathology services requested by a practitioner in respect of one individual on the same day. For example, if a practitioner orders three pathology tests for a person on the one day, Medicare benefits will be payable for each of those tests but only one PEI will be applicable.

This Rule applies even when the treating practitioner has requested pathology tests from two or more Approved Pathology Practitioners. Thus a PEI will only be paid for the first account submitted unless an exemption listed in Rule 4 or 15.(7) applies or an exemption has been granted under "S4B(3)".

Under Rule 15.(7) two PEIs are payable in relation to the same patient episode where a referring practitioner refers two different specimens to two different Approved Pathology Authorities in the following circumstances:

- a tissue pathology specimen and any other non-tissue pathology specimen; or
- a cytopathology specimen and any other non-cytopathology specimen.

Rule 15.(8) also provides that only one PEI will be paid for the collection of specimens from a patient on one day in or by a single Approved Pathology Authority.

The patient episode initiation fees are two-tiered.

A higher fee will be payable for specimens collected in a licensed collection centre, private hospital or day hospital facility where the patient is an in-patient. The specimen must be collected by an employee of the proprietor of the laboratory in which the pathology service will be rendered, or an Approved Pathology Practitioner associated with that laboratory.

A lower fee will be payable for specimens collected by the patient himself or herself or specimens collected by or on behalf of a treating practitioner.

### **PF.3 Patient Episode Initiation Fees for Certain Tissue Pathology and Cytology Items**

Tissue Pathology Item 72813, 72816, 72817, 72823, 72824, 72825, 72830 and 72836 and Cytology Items 73053, 73055 and 73057 will be subject to a different patient episode initiation fee structure - Items 73901 to 73905 refer.

### **PF.4 Hospital, Government etc Laboratories**

The following laboratories have been prescribed for the purposes of payment of Medicare benefits as outlined in paragraphs PF.2 and PF.3:

- (i) laboratories operated by the Commonwealth (these include Commonwealth health laboratories operated by the Department of Health and Family Services as well as the laboratories operated by other Departments, e.g. the Departments of Defence and Veterans' Affairs operate laboratories from which pathology services are provided);
- (ii) laboratories operated by a State Government or authority of a State. (Laboratories operated or associated with recognised hospitals are also included);
- (iii) laboratories operated by the Northern Territory and the Australian Capital Territory; and
- (iv) laboratories operated by the:

University of NSW  
University of Sydney  
University of New England  
Monash University  
University of Melbourne  
University of Queensland  
University of Adelaide  
University of Western Australia  
University of Tasmania  
Australian National University.

## **PG. ASSIGNMENT OF MEDICARE BENEFITS**

### **PG.1 Patient Assignment**

In addition to the general arrangements relating to the assignment of benefits, as outlined at paragraph 6 of the "General Explanatory Notes" in Section 1 of this book, it should be noted that, where the treating practitioner requests pathology services but the patient does not physically attend the Approved Pathology Practitioner, the patient may complete an assignment voucher at the time of the visit to the requesting doctor offering to assign benefits for the Approved Pathology Practitioner's services.

If an Approved Pathology Practitioner refers some of the tests requested by the treating practitioner to another Approved Pathology Authority, he/she should provide the second Approved Pathology Authority with a photocopy of the patient's assignment voucher so that the second Approved Pathology Authority can also direct-bill Medicare.

### **PG.2 Approved Pathology Practitioner Eligibility**

If a practitioner requests an Approved Pathology Practitioner to perform a necessary pathology service, that Approved Pathology Practitioner must personally perform the service or have it performed on his/her behalf in order to be eligible to receive benefits by way of assignment. If, however, the first Approved Pathology Practitioner arranges for the service to be rendered by a second Approved Pathology Practitioner with the same Approved Pathology Authority, the second Approved Pathology Practitioner and not the first, is eligible to receive an assignment of the Medicare benefit for the service in question.

## **PH. ACCREDITED PATHOLOGY LABORATORIES**

### **PH.1 Need For Accreditation**

A pathology service will not attract Medicare benefits unless that service is provided in a pathology laboratory which is accredited for that kind of service. Details of the administration of the pathology laboratory accreditation arrangements are set out below.

### **PH.2 Applying For Accreditation**

To become an Accredited Pathology Laboratory it is necessary to lodge a completed application form with the Manager Pathology, Health Insurance Commission, PO Box 1001, Tuggeranong ACT 2901. The prescribed fees for Approved Pathology Laboratories are:

- . \$2500 for Category 1 labs
- . \$2000 for Category 2 labs
- . \$1500 for Category 3 labs
- . \$ 750 for Category 5, 6 & 7 labs.

It is necessary for an application for inspection be made to an approved inspection agency. The National Association of Testing Authorities (NATA) has been chosen to act on the Commonwealth's behalf as the primary inspection agency. The Royal Australian College of General Practitioners (RACGP) has also been appointed to inspect laboratories in Category 5 (general practitioner) in Victoria only.

### **PH.3 Effective Period of Accreditation**

Accreditation takes effect from the date of approval by the Minister for Health and Family Services. The Minister has no power to backdate an approval. Transitional accreditation may be given pending full accreditation. An application and fee are required annually.

### **PH.4 Assessment of Applications for Accreditation**

The principles of accreditation for pathology laboratories as determined by the Minister (and based on National Pathology Accreditation Advisory Council guidelines) are used to assess applications for accreditation. These take into consideration staffing, supervision, premises, etc. Copies are available from: The Secretary, National Pathology Accreditation Advisory Council, GPO Box 9848, Canberra, ACT 2600.

## **PH.5 Refusal of Accreditation and Right of Review**

An applicant who has been notified of the intention to refuse accreditation may, within 28 days of being notified, provide further information to the Minister which may be taken into consideration prior to a final decision being made.

Applicants refused accreditation or any person affected by the decision have the right to appeal to the Administrative Appeals Tribunal.

## **PH.6 National Pathology Accreditation Advisory Council (NPAAC)**

NPAAC was established in 1979. Its functions are to assist in the introduction and maintenance of uniform standards of practice in pathology services throughout Australia and to initiate and coordinate educational programs in relation to pathology practice. The agencies used to inspect laboratories on the Commonwealth's behalf are required to conduct inspections using the standards set down by NPAAC. For further information contact the NPAAC Secretariat on (06) 289 6833.

## **PH.7 Change of Address/Location**

Laboratories are accredited for the particular premises given on the application form. Where a laboratory is relocated to other premises, any previously issued approvals for that Accredited Pathology Laboratory lapse. Medicare benefits are not payable for any pathology services performed at the new location until a new application has been approved by the Minister for Health and Family Services. Paragraph PH.2 sets out the method for applying for accreditation.

## **PH.8 Change of Ownership of a Laboratory**

Part of the assessment of an application for an Accredited Pathology Laboratory relates to the Approved Pathology Authority status. Where the ownership, or some other material change occurs affecting the laboratory, the Minister for Health and Family Services must be provided with those changed details. Medicare benefits will not be payable for any pathology services performed on any premises other than those premises for which approval has been given.

## **PH.9 Licensed Collection Centres**

To enable the payment of Medicare benefits for pathology services performed on pathology specimens collected in a collection centre, the centre must first be licensed. A licence can only be issued to a private Approved Pathology Authority who has been granted an allocation of units of entitlements for the current year.

Units of entitlement are allocated to existing private Approved Pathology Authorities on an annual basis. An APA may operate one LCC for each unit of entitlement except in designated rural and remote areas where a LCC will utilise 1/3 of a unit entitlement.

In order to be issued with a licence, a private Approved Pathology Authority must submit a completed application form to the Health Insurance Commission giving details of the location of the premises, the owner, and the staff to be employed at the centre. Staff working at the centre must be employed by the Approved Pathology Authority.

Collection centre licences must be applied for on an annual basis. The licence fee of \$1,000 is payable if the LCC is to operate for a full year. If a LCC is to operate for less than a full year, the fee is reduced on a pro rata basis.

Application forms and enquiries should be forwarded to the Manager, Pathology Section, Health Insurance Commission, PO Box 1001, Tuggeranong, ACT 2901.

## **PL APPROVED PATHOLOGY PRACTITIONERS**

### **PL.1 Introduction**

A pathology service will not attract Medicare benefits unless that service is provided by or on behalf of an Approved Pathology Practitioner. (Approved Pathology Practitioners must be registered medical practitioners.) Set out below is information which relates to Approved Pathology Practitioner requirements.

### **PL.2 Applying for Acceptance of the Approved Pathology Practitioner Undertaking**

To apply for acceptance of an Approved Pathology Practitioner Undertaking, it is necessary to send:

- (i) a completed application for acceptance of an Approved Pathology Practitioner Undertaking; and
- (ii) a signed Approved Pathology Practitioner Undertaking to the Pathology Registration Co-ordinator, Health Insurance Commission, PO Box 9822 (in your capital city).

An application form, undertaking and associated literature can be obtained from the Pathology Registration Co-ordinator.

### **PI.2.1 Payment of Acceptance Fee**

On receipt of advice that the Minister has accepted an undertaking, a cheque for \$500 should be despatched to the Pathology Registration Co-ordinator. Applicants are required to pay this fee within 14 days of the notice being given (ie. the day the notice is sent).

As there is no discretion under the Health Insurance Act 1973 to accept late payments, failure to pay the fee within the required time means that:

- (i) acceptance of the undertaking will be revoked;
- (ii) a new application must be completed;
- (iii) acceptance of the new undertaking cannot be backdated; and
- (iv) there will therefore be a period during which Medicare benefits cannot be paid.

### **PI.2.2 Reminder Process**

In administering the Approved Pathology Authority and Approved Pathology Practitioner arrangements, the Health Insurance Commission provides reminders to ensure that:

- (i) applicants whose undertaking are about to expire are aware of the consequences of late lodgement; and
- (ii) where the 14 day period for payment of fees is about to expire and the fees have not been paid, that applicants are aware of the consequences of failure to pay on time.

## **PI.3 Undertakings**

### **PI.3.1 Consideration of Undertakings**

The Minister is unable to accept an undertaking from a person in respect of whom there is a determination in force that the person has breached the undertaking, or from a person who, if the undertaking were accepted, would be likely to carry on the business of a prescribed person or would enable a person to avoid the financial consequences of the disqualification (or likely disqualification) of that prescribed person. A 'prescribed person' includes, amongst other things, fully or partially disqualified persons (or persons likely to be so disqualified).

Similarly an undertaking cannot be accepted unless the Minister is satisfied that the person giving such undertaking is a fit and proper person to be an Approved Pathology Practitioner.

When an undertaking has been given, the Minister may require the person giving the undertaking to provide additional information within a fixed period of time and if the person does not comply the Minister may refuse to accept the undertaking.

### **PI.3.2 Refusal of Undertaking and Rights of Review**

Where the Minister refuses to accept an undertaking, for any of the reasons shown above, the Minister must notify the person of the decision. The notification must include advice of a right of internal review of the decision and a right of further appeal to the Administrative Appeals Tribunal if the internal review upholds the original decision to refuse the undertaking.

### **PI.3.3 Effective Period of Undertaking**

The following applies:

- (i) Date of Effect - the earliest day from which the Minister or delegate can accept an undertaking is the day of

the decision in respect of the undertaking. The day the undertaking is signed is to be the day it is actually signed and must not be backdated;

- (ii) Period of Effect - in determining the period of effect of the undertaking the Minister shall, unless the Minister considers that special circumstances exist, determine that the period of effect shall be twelve months from the day on which the undertaking comes into force. There is a requirement for the Minister to notify persons giving undertakings of the period of time for which the undertaking is to have effect, and the notice is to advise persons whose interests are affected by the decision of their rights of appeal to the Administrative Appeals Tribunal against the Minister's decision;
- (iii) Renewals - when an undertaking is given and accepted by the Minister while a former undertaking is current, the former undertaking ceases to be in force. When an undertaking is given while a former undertaking is current and the date on which the former undertaking is to expire passes without the Minister giving notice to accept or reject the new undertaking, the former undertaking remains in force until the Minister gives such notification. However, this provision does not apply when the renewal application is not received by the Health Insurance Commission until after the expiry of the existing undertaking and so under these circumstances there will be a period during which Medicare benefits cannot be paid; and
- (iv) Cessation of Undertaking - the undertaking ceases to be in force if it is terminated, if the Minister revokes acceptance of the undertaking, or if the period of effect for the undertaking expires - whichever event first occurs.

An Approved Pathology Practitioner may terminate an undertaking at any time providing that the practitioner gives at least 30 days notice of his/her intention to do so.

#### **PL.4 Obligations and Responsibilities of Approved Pathology Practitioners**

The requirements of the legislation and the undertaking impose a number of obligations and responsibilities on Approved Pathology Practitioners and the Minister. The more complex of these not already dealt with are considered in paragraphs PK, PL and PM dealing with Breaches of Undertakings, Excessive Pathology Services, and Personal Supervision.

### **PJ. APPROVED PATHOLOGY AUTHORITIES**

#### **PJ.1 Introduction**

A pathology service will not attract Medicare benefits unless the proprietor of the laboratory in which the pathology service is performed is an Approved Pathology Authority. Following is information which relates to Approved Pathology Authority requirements.

#### **PJ.2 Applying for Acceptance of an Approved Pathology Authority Undertaking**

To apply for acceptance of an Approved Pathology Authority Undertaking, it is necessary to send:

- (i) a completed application for acceptance of an Approved Pathology Authority Undertaking; and
- (ii) a signed Approved Pathology Authority Undertaking.

to the Pathology Registration Co-ordinator, Health Insurance Commission, PO Box 9822 (in your capital city). Application forms, undertakings and associated literature can be obtained from the Pathology Registration Co-ordinator.

The application and the undertaking should be completed by the proprietor of the laboratory/ies and where the proprietor is not a natural person (e.g. company or partnership), an authorised representative/s should complete the forms. This proprietor can be:

- (i) a natural person;
- (ii) partners (natural persons and/or companies) in a partnership;
- (iii) a body corporate (i.e. a company); or

- (iv) a government authority (e.g. a public hospital).

### **PJ.2.1 *Payment of Acceptance Fee***

On receipt of advice that the Minister has accepted an undertaking, a cheque for \$1500 should be dispatched within 14 days or the undertaking will be cancelled and the whole process begun again with a consequent gap in the payment of benefits.

## **PJ.3 *Undertakings***

### **PJ.3.1 *Consideration of Undertakings***

The Minister is unable to accept undertakings from a person in respect of whom there is a determination in force that the person has breached the undertaking, or from a person who, if the undertaking were accepted, would be likely to carry on the business of a prescribed person or would enable a person to avoid the financial consequences of the disqualification (or likely disqualification) of that prescribed person. A 'prescribed person' includes, inter alia, fully or partially disqualified persons (or persons likely to be so disqualified).

Similarly an undertaking cannot be accepted unless the Minister is satisfied that the person giving such undertaking is a fit and proper person to be an Approved Pathology Authority.

When an undertaking has been given the Minister may require the person giving the undertaking to provide additional information within a specified period of time and if the person does not comply the Minister may refuse to accept the undertaking.

### **PJ.3.2 *Refusal of Undertaking and Rights of Review***

Where the Minister refuses to accept an undertaking, he must notify the person of the decision. The notification must include advice of a right of internal review of the decision and a right of further appeal to the Administrative Appeals Tribunal if the internal review upholds the original decision to refuse the undertaking.

### **PJ.3.3 *Effective Period of Undertaking***

The following applies:

- (i) Date of Effect - the earliest day from which the Minister or delegate can accept an undertaking is the day the undertaking is signed. The day the undertaking is signed is to be the day it is actually signed and must not be backdated;
- (ii) Period of Effect - in determining the period of effect of the undertaking the Minister shall, unless the Minister considers that special circumstances exist, determine that the period of effect shall be twelve months from the day on which the undertaking comes into force. There is a requirement for the Minister to notify persons giving an undertaking of the period of time for which the undertaking is to have effect, and the notice is to advise persons whose interests are affected by the decision of their rights of appeal to the Administrative Appeals Tribunal against the Minister's decision;
- (iii) Renewals - when an undertaking is given and accepted by the Minister while a former undertaking is current, the new undertaking does not take effect until the former undertaking ceases to be in force. When an undertaking is given while a former undertaking is current, and the date on which the former undertaking is to expire passes without notice of the Minister's acceptance or rejection of the new undertaking, the former undertaking remains in force until the Minister gives such notification;
- (iv) Cessation of Undertaking - the undertaking ceases to be in force if it is terminated, if the Minister revokes acceptance of the undertaking, or if the period of effect for the undertaking expires - whichever event first occurs.

An Approved Pathology Authority may terminate an undertaking at any time providing that at least 30 days notice of the intention to terminate the undertaking is given.

## **PJ.4 *Obligations and Responsibilities of Approved Pathology Authorities***

The requirements of the legislation and the undertaking impose a number of obligations and responsibilities on Approved

Pathology Authorities and the Minister. The more complex of these which have not already been covered are considered in paragraphs PK and PL dealing with Breaches of Undertakings and Excessive Pathology Services.

## **PK. BREACHES OF UNDERTAKINGS**

### **PK.1 Notice Required**

Where the Minister has reasonable grounds for believing that an Approved Pathology Practitioner or an Approved Pathology Authority has breached the undertaking, the Minister is required to give notice in writing to the person explaining the grounds for that belief and inviting the person to put a submission to the Minister to show cause why no further action should be taken in the matter.

### **PK.2 Decisions by Minister**

Where a person provides a submission, the Minister may decide to take no further action against the person. Alternatively the Minister may refer the matter to a Medicare Participation Review Committee, notifying the grounds for believing that the undertaking has been breached. If after 28 days no submission has been received from the person, the Minister must refer that matter to the Committee.

### **PK.3 Appeals**

The Minister is empowered to suspend an undertaking where notice has been given to a Medicare Participation Review Committee of its possible breach, pending the outcome of the Committee's proceedings. The Minister must give notice in writing to the person who provided the undertaking of the determination to suspend it, and the notice shall inform the person of a right of appeal against the determination to the Administrative Appeals Tribunal. The Minister may also publish a notice of a determination in the Commonwealth Gazette. Rights of appeal to the Administrative Appeals Tribunal also exist in respect of any determination made by a Medicare Participation Review Committee.

## **PL. INITIATION OF EXCESSIVE PATHOLOGY SERVICES**

### **PL.1 Notice Required**

Where the Minister has reasonable grounds for believing that a person, of a specified class of persons, has initiated, or caused or permitted the initiation of excessive pathology services the Minister is required to give notice in writing to the person explaining the grounds for the belief and inviting the person to put a submission to the Minister to show cause why no further action should be taken in the matter.

### **PL.2 Classes of Persons**

The classes of persons are:

- (i) the practitioner who initiated the services;
- (ii) the employer of the practitioner who caused or permitted the practitioner to initiate the services; or
- (iii) an officer of the body corporate employing the practitioner who caused or permitted the practitioner to initiate the services.

### **PL.3 Decisions by Minister**

Where a person provides a submission, the Minister may decide to take no further action against the person. Alternatively, the Minister may refer the matter to a Medical Services Committee of Inquiry, notifying the grounds for believing that excessive pathology services have been initiated. If after 28 days no submission has been received from the person, the Minister must refer the matter to the Committee. The Minister must give to the person notice in writing of the decision.

### **PL.4 Appeals**

Unlike the procedures relating to breaches of undertaking there is no power given to the Minister to determine a penalty. The Minister's role is either deciding to take no further action or referring the matter to a Medical Services Committee of Inquiry.

Accordingly, there are no rights of appeal to the Administrative Appeals Tribunal applicable to the above procedures. However, rights of appeal to the Administrative Appeals Tribunal exist in respect of any determination made by a Medicare Participation Review Committee.

## **PM. PERSONAL SUPERVISION**

### **PM.1 Introduction**

The Health Insurance Act 1973 provides that the form of undertaking to be given by an Approved Pathology Practitioner may make provision for pathology services carried out under the personal supervision of the Approved Pathology Practitioner.

### **PM.2 Extract from Undertaking**

The following is an extract from the Approved Pathology Practitioner undertaking:

#### "PART 1 - PERSONAL SUPERVISION

- 1) Subject to clause 2, I undertake that where a service is rendered on my behalf, I will accept personal responsibility for the rendering of that service under the following conditions of personal supervision -
  - a) Where a service is rendered on my behalf, I must usually be physically available in the laboratory during the rendering of that service.
  - b) I may be absent from the laboratory for brief periods where the absence is due to illness or other personal exigency, or involves activities which, in accordance with normal and accepted practice, relate to the provision of services by that laboratory. If such an absence occurs, and it does not exceed 7 consecutive days, then I will be regarded as continuing to personally supervise the rendering of services.
  - c) Where I am absent from the laboratory for more than 7 consecutive days, I must arrange for another approved pathology practitioner to personally supervise the rendering of services in the laboratory which would otherwise be rendered by me or on my behalf. Where such an arrangement is made, then I will be regarded as continuing to personally supervise the rendering of services.
  - d) For the purposes of the Health Insurance Act 1973, services will not be regarded as being rendered by me or on my behalf during any absence, for any reason, which occurs after I have already been absent for a total of 14 working days in any month that services are rendered.
  - e) If a service is being rendered on my behalf outside the normal hours of operation of the laboratory, I must be able to be contacted at the time that the service is being rendered by the person who is rendering the service. If required, I must be able to personally attend at the laboratory during the rendering of the service.
  - f) If a service is being rendered on my behalf by a person who is not-
    - i) a medical practitioner;
    - ii) a scientist; or
    - iii) a person having special qualifications or skills relevant to the service being rendered;and no person in the above groups is physically present in the laboratory, then I must be physically present in the laboratory and closely supervise the rendering of the service.
  - g) I accept responsibility for taking all reasonable steps to ensure that in regard to services rendered by me or on my behalf.
    - i) all persons who render services are adequately trained;

- ii) all services which are to be rendered in the laboratory are allocated to persons with appropriate qualifications and experience to render the services;
  - iii) the methods and procedures in operation in the laboratory for the purposes of rendering service are in accordance with proper and correct practices;
  - iv) for services rendered, proper quality control methods are established and reviewed to ensure their reliability and effectiveness; and
  - v) results of services and tests rendered are accurately recorded and reported.
- 2) Where services are to be rendered on my behalf in a laboratory:
- a) where the Minister has declared, by notice in writing, that the laboratory is located in an isolated area (as defined in the principles for the approval of premises as an accredited pathology laboratory), and the Minister is satisfied that the service could not reasonably be rendered in another laboratory; or
  - b) which is in category 3 or 4 of the categories of accreditation;

I undertake to take all reasonable measures to ensure that the service is rendered under the supervision of the person designated in the category of accreditation of that laboratory to supervise the rendering of the service.

- 3) I understand that, in relation to a laboratory which is specified in clause 2(b), the provisions of clause 2 will only apply for a period of 72 months after the commencement of section 23DB of the Health Insurance Act 1973 (1 August 1987), and that after that time the provisions of clause 1 will apply to me."

### **PM.3 Notes on the Above:**

Part 1 of the APP Undertaking outlines the requirements for the personal supervision by an Approved Pathology Practitioner where a pathology service is rendered by another person on behalf of the APP. It should be noted that "on behalf of" does not relieve an Approved Pathology Practitioner of professional responsibility for the service or from being personally involved in the supervision of services in the laboratory.

The only exemptions from the full requirement for personal supervision of services are for the permitted absences in clause 1 in the specific circumstances declared by the Minister (clause 2(a)) and for services provided in category 3 and 4 laboratories (clause 2(b)).

## **PN. CHANGES TO THE PATHOLOGY SERVICES TABLE**

### **PN.1 Health Insurance Regulations**

The Health Insurance Act 1973 allows the Minister for Health and Family Services to determine an appropriate Pathology Services Table which is then prescribed by Regulation.

The Minister has established a Committee to assist in determining changes to the Table. Any person or organisation seeking to make a submission to this Committee can contact the Secretariat in: The Pathology Section, Department of Health and Family Services, GPO Box 9848, CANBERRA, ACT 2601.

## **EXPLANATORY NOTES**

### **PO. DEFINITIONS**

#### **PO.1 Excessive Pathology Service**

This means a pathology service for which a Medicare benefit has become or may become payable and which is not reasonably

necessary for the adequate medical or dental care of the patient concerned.

## **PO.2 Group of Practitioners**

This means:

- (i) a practitioner conducting a medical practice or a dental practice together with another practitioner, or other practitioners, participating (whether as employees or otherwise) in the provision of professional services as part of that practice; or
- (ii) two or more practitioners conducting a medical practice or a dental practice as partners; or
- (iii) those partners together with any other practitioner who participates (whether as an employee or otherwise) in the provision of professional services as part of that practice.

## **PO.3 Initiate**

In relation to a pathology service this means to request the provision of pathology services for a patient.

## **PO.4 Patient Episode**

A patient episode comprises a pathology service or services specified in one or more items which are provided for a single patient, the need for which was determined under subsection 16A(1) of the Act on the same day, whether they were provided by one or more approved pathology practitioners on one day or over several days and whether they are requested by one or more treating practitioners. Even if a treating practitioner writes separate request forms to cover the collection of specimens at different times, where the decision to collect the multiple specimens was made at the same time, the multiple tests are deemed to belong to the same patient episode. In addition, if more than one request is made, on the same or different days, for tests on the same specimen within 14 days, they are part of the same patient episode.

Rule 4A provides an exemption to the above and enables services requested on one day which are performed under strictly limited circumstances for seriously or chronically ill patients with certain specified conditions to each be classified as a patient episode. See PD.2 for further information on exemptions.

Rule 15.(8) also provides that only a single patient episode initiation fee will be payable for all the specimens collected on one day from one patient in or by one Approved Pathology Authority.

## **PO.5 Episode Cone**

The episode cone is an arrangement, described in Rule 19, which effectively places an upper limit on the number of items for which Medicare benefits are payable in a patient episode. This cone only applies to services requested by general practitioners for their non-hospitalised patients. Pathology services requested for hospital in-patients, or ordered by specialists, are not subject to these coning arrangements.

When more than 3 items are requested by a general practitioner in a patient episode, the benefits payable will be equivalent to the sum of the benefits for the three items with the highest Schedule fees. Rule 19 provides that for the two items with the highest Schedule fees, Medicare benefits will be payable for each item. The remaining items are regarded as one service for which the benefit payable will be equivalent to that for the item with the third highest Schedule fee. Where items have the same Schedule fee, their item numbers are used as an artificial means to rank them.

The episode cone will apply even when the pathology services in a patient episode are performed by 2 or more Approved Pathology Authorities, with the exception of the services listed below.

The following items are not included in the count of the items performed when applying the episode cone:

- (i) all the items in Groups P10 and P11;
- (ii) Pap smear testing (items 73053 and 73055); and
- (iv) designated pathology services (items 66241, 66417 and 69241).

## **PO.6 Personal Supervision**

This means that an Approved Pathology Practitioner will, to the fullest extent possible, be responsible for exercising an acceptable level of control over the rendering of pathology services. See paragraphs PM.1 to PM.3 for a full description of the

responsibilities involved in personal supervision.

### **PO.7 Prescribed Pathology Service**

These are simple basic pathology services which are included in Group P9 and may be performed by a medical practitioner in the practitioner's surgery without the need to obtain Approved Pathology Authority, Approved Pathology Practitioner or Accredited Pathology Laboratory status.

### **PO.8 Proprietor of a Laboratory**

This means in relation to a pathology laboratory the person, authority or body of persons having effective control of:

- (i) the laboratory premises, whether or not the holder of an estate or interest in the premises;
- (ii) the use of equipment used in the laboratory; and
- (iii) the employment of staff in the laboratory.

### **PO.9 Specialist Pathologist**

This means a medical practitioner recognised for the purposes of the Health Insurance Act 1973 as a specialist in pathology (see paragraph 4.1 of the "General Explanatory Notes" in Section 1 of this book). The principal specialty of pathology includes a number of sectional specialties. Accordingly, a medical practitioner who is recognised as a specialist in a sectional specialty of pathology is recognised as a specialist pathologist for this purpose.

### **PO.10 Designated Pathology Service**

This means a pathology service specified in items 66241, 66417 or 69241. Where one Approved Pathology Practitioner in an Approved Pathology Authority has performed some but not all the estimations in a coned item and has requested another Approved Pathology Practitioner in another Approved Pathology Authority to do the rest, the service provided by the second practitioner is deemed to be the "designated pathology service". Thus the first practitioner claims under the appropriate item for the services which he/she provides while the second practitioner claims either 66241, 66417 or 69241. Only the first Approved Pathology Authority can claim a "patient episode initiation fee" while the second Approved Pathology Practitioner claims a "specimen referred fee".

The fee claimable under items 66241, 66417 and 69241 varies according to the number of services performed by the second Approved Pathology Practitioner. The fee quoted is the sum claimable for each test performed, up to the specified limit, so that the second Approved Pathology Practitioner may claim up to \$16.40 under item 66241 if he/she performs two or more tests, \$55.25 under item 66417 if he/she performs five or more tests, and \$54.00 under item 69241 if he/she performs five or more tests. If five or more tests are performed under item 69241 the pathologist should claim \$54.00 under this item rather than claiming item 69241 five times.

## **PP. INTERPRETATION OF THE SCHEDULE**

### **PP.1 Cholesterol and Triglyceride Tests (Item 66331)**

Where a cholesterol estimation or a triglyceride estimation or estimations for both cholesterol and triglycerides are performed (item 66331) in combination with 1 test from item 66201, the item to be claimed is 66335; item 66331 with 2 tests from item 66201, the item to be claimed is 66337; item 66331 with 3 tests from item 66201, the item to be claimed is 66339; item 66331 with 4 or more tests from item 66201, the item to be claimed is 66341. Item 66331 cannot be claimed separately if any tests from item 66201 are performed at the same time.

### **PP.2 Faecal Occult Blood Tests (Item 66422)**

The fee for item 66422 is only payable where both test methods described in the item have been performed.

### **PP.3 Tissue Pathology and Cytology (Items 72813 - 73057)**

When services described in Group P5 need to be performed upon material which is submitted for cytology items listed in Group P6 only the fee for the P6 item can be claimed.

#### **PP.4 Cervical and Vaginal Cytology (Items 73053 - 73057)**

Item 73053 only applies to the cytological examination of cervical smears collected from women with no symptoms, signs or recent history suggestive of cervical neoplasia as part of routine, biennial examination for the detection of pre-cancerous or cancerous changes. These items also apply to smears repeated due to an unsatisfactory routine smear, or if there is inadequate information provided to use item 73055.

Cytological examinations carried out under item 73053 should be in accordance with the agreed National Policy on Screening for the Prevention of Cervical Cancer. This policy provides for:

- (i) an examination interval of two years for women who have no symptoms or history suggestive of abnormal cervical cytology, commencing between the ages of 18 to 20 years, or one to two years after first sexual intercourse, whichever is later.
- (ii) cessation of cervical smears at 70 years for women who have had two normal results within the last five years. Women over 70 who have never been examined, or who request a cervical smear, should be examined.

This policy has been endorsed by the Royal Australian College of General Practitioners, the Royal Australian College of Obstetricians and Gynaecologists, The Royal College of Pathologists of Australasia, the Australian Cancer Society and the National Health and Medical Research Council.

The Health Insurance Act excludes payment of Medicare benefits for health screening services except where Ministerial directions have been issued to enable benefits to be paid, such as the Papanicolaou test. As there is now an established policy which has the support of the relevant professional bodies, routine screening in accordance with the policy will be regarded as good medical practice.

The screening policy will not be used as a basis for determining eligibility for benefits. However, the policy will be used as a guide for reviewing practitioner profiles.

Item 73055 applies to cervical cytological examinations where the smear has been collected for the purpose of management, follow up or investigation of a previous abnormal cytology report, or collected from women with symptoms, signs or recent history suggestive of abnormal cervical cytology.

Items 73057 applies to all vaginal cytological examinations, whether for a routine examination or for the follow up or management of a previously detected abnormal smear.

For cervical smears, treating practitioners are asked to clearly identify on the request form to the pathologist, by item number, if the smear has been taken as a routine examination or for the management of a previously detected abnormality.

#### **PP.5 Neonatal Bilirubin**

Item 66365 has been deleted and provision made for this service to be claimed under item 66201.

#### **PP.6 Eosinophil Cationic Protein Tests (Item 71095)**

Item 71095 applies to children aged less than 12 years who cannot be reliably monitored by spirometry or flowmeter readings.

### **PQ. ABBREVIATIONS, GROUPS OF TESTS**

#### **PQ.1 Abbreviations**

As stated at paragraph PC.2 of this Outline, details that must be recorded on accounts, receipts or assignment forms of an Approved Pathology Practitioner/Authority include a description of the pathology service that is of sufficient detail to identify the specific service rendered. The lists of abbreviations for group tests are contained in paragraph PQ.4. The lists of abbreviations for individual tests are contained in the Index to this Section. The abbreviations are provided to allow users to identify and refer to particular pathology services, or particular groups of pathology services, more accurately and conveniently.

The above requirements are mandatory for billing purposes but treating practitioners requesting pathology services are encouraged to use the approved abbreviations. In this regard treating practitioners should note that:

pathology services cannot be self determined by a rendering pathologist responding to a request. This places the onus for medical necessity on the treating practitioner who, in normal circumstances would, if he or she was unclear in deciding the appropriate test for a clinical situation, consult a pathologist for assistance.

Approved Pathology Practitioners/Authorities undertake not to issue accounts etc unless the pathology service was rendered in response to an unambiguous request.

### **PQ.2 Tests not Listed**

Tests which are not listed in the Pathology Services Table do not attract Medicare benefits. As explained at paragraph PN.1 of these Notes changes to the Pathology Services Table can only be made by the Minister for Health and Family Services.

### **PQ.3 Audit of Claims**

The Health Insurance Commission is undertaking routine audits of claims for pathology benefits against requested services to ensure compliance with the provisions of the Health Insurance Act 1973.

#### PQ.4 Groups of Tests

For the purposes of recording a description of the pathology service on accounts etc, an Approved Pathology Practitioner /Authority may use group abbreviations or group descriptions for the following specified groups of tests. These groups consist of two or more tests within the same item.

Treating practitioners are encouraged to use these group abbreviations or group descriptions where appropriate.

For ease of identification of group tests, it is recommended that practitioners use the following abbreviations. Tests requested individually may attract Medicare benefits.

<b>Group</b>	<b>Estimations Included in Group</b>	<b>Group Abbreviation</b>	<b>Item Numbers</b>
Cardiac enzymes	Lactate dehydrogenase (LDH), aspartate aminotransferase (AST) and creatinine kinase (CK)	CE	66205
Coagulation studies	Prothrombin time, activated partial thromboplastin time and two or more of the following tests-bleeding time, thrombin clotting time, fibrinogen degradation products, fibrin monomer, D-dimer factor XIII screening tests.	COAG	65035
Electrolytes	Sodium (NA) potassium (K) chloride (CL) and bicarbonate (HCO <sub>3</sub> )	E	66207
Lipid studies	Cholesterol (CHOL) and triglycerides (TRIG)	FATS	66331
Liver function tests	Alkaline phosphatase (ALP), alanine aminotransferase (ALT), aspartate aminotransferase (AST), albumin (ALB), bilirubin (BIL), gamma glutamyl transpeptidase (GGT), lactate dehydrogenase (LDH), and protein (PROT).	LFT	66211
Syphilis serology	Rapid plasma reagin test (RPR), or venereal disease research laboratory test (VDRL), and treponema pallidum haemagglutinin test (TPHA), or fluorescent treponemal antibody-absorption test (FTA)	STS	69231
Urea, electrolytes, creatinine	Urea, electrolytes, creatinine	U&E	66211

## **PR. COMPLEXITY LEVELS FOR HISTOPATHOLOGY ITEMS**

### **PR.1 Complexity Levels**

A new set of histopathology items has been developed, based on complexity and relative resource use, which better reflect the range of procedures performed and incorporate differential fees.

The set includes eight items (72813, 72816, 72817, 72823, 72824, 72825, 72830 and 72836) which relate to histopathology examinations previously covered by item 72801. They are defined in terms of complexity level and number of specimens.

Only one of these histopathology examination items can be claimed in a patient episode.

The remaining items (72846, 72847, 72851, 72852, 72855 and 72856) are add-on items, covering immunochemistry, electron microscopy and frozen sections, which can be claimed in addition to the main item when ordered by the requesting practitioner.

The lists of complexity levels by type of specimen are contained at the back of this Section.

## **PX. PATHOLOGY SERVICES TABLE**

### **PX.1 Rules for the Interpretation of the Pathology Services Table**

1. (1) In this table

**"patient episode"** means:

- (a) a pathology service or pathology services (other than a pathology service to which paragraph 1 (1) (b) refers) provided for a single patient whose need for the service or services was determined under subsection 16A of the Act:
  - (i) on the same day; or
  - (ii) if more than 1 test is performed on the 1 specimen within 14 days - on the same or different days;

whether the services:

- (iii) are requested by 1 or more practitioners; or
  - (iv) are described in a single item or in more than 1 item; or
  - (v) are rendered by 1 Approved Pathology Practitioner or more than 1 Approved Pathology Practitioner; or
  - (vi) are rendered on the same or different days; or
- (b) a pathology service to which rule 4 refers that is provided in the circumstances set out in that rule that relates to the service;

**"recognised pathologist"** means a medical practitioner recognised as a specialist in pathology by a determination under section 3D or subsection 61(3) of the Act;

**"serial examinations"** means a series of examinations requested on 1 occasion whether or not:

- (a) the materials are received on different days by the Approved Pathology Practitioner; or
- (b) the examinations or cultures were requested on 1 or more request forms by the treating practitioner;

**"the Act"** means the Health Insurance Act 1973.

1. (2) In these Rules, a reference to a request to an Approved Pathology Practitioner includes a reference to a request for a pathologist-determinable service to which subsection 16A(6) of the Act applies.

1. (3) A reference in this Table by number to an item that is not included in this Table is a reference to the item that has that number in the general medical services table or the diagnostic imaging services table, as the case requires.

1. (4) A reference to a Group in the Table includes every item in that Group.

## Precedence of items

### 2. (1) If a service is described:

- (a) in an item in general terms; and
- (b) in another item in specific terms;

only the item that describes the service in specific terms applies to the service.

### 2. (2) Subject to subrule (3), if:

- (a) subrule (1) does not apply; and
- (b) a service is described in 2 or more items;

only the item that provides the lower or lowest fee for the service applies to the service.

2. (3) If an item is expressed to include a pathology service that is described in another item, the other item does not apply to the service in addition to the first-mentioned item, whether or not the services described in the 2 items are requested separately.

## Circumstances in which services rendered following 2 requests to be taken to have been rendered following 1 request

3. (1) In subrule 3(2), "service" includes assay, estimation and test.

3. (2) Two or more pathology services (other than services to which, under rule 4, this rule does not apply) rendered for a patient following 2 or more requests are taken to have been rendered following a single request if:

- (a) the services are listed in the same item; and
- (b) the patient's need for the services was determined under subsection 16A(1) of the Act on the same day even if the services are rendered by an Approved Pathology Practitioner on more than one day.

## Services to which rule 3 does not apply

4. (1) Rule 3 does not apply to a pathology service described in item 66201, other than an estimation of fructosamine or lithium, if:

- (a) the service is rendered in relation to a single specimen taken on each of not more than 4 occasions in a period of 24 hours; and
- (b) the service is rendered to a patient in a hospital unit where:
  - (i) the presence of 1 nurse is required for each group of not more than 4 patients; and
  - (ii) the condition of the patients is continuously observed in relevant respects; and
- (c) in order to render the service, an Approved Pathology Practitioner who is a recognised pathologist has to arrange for a member of the laboratory staff of the Approved Pathology Authority concerned to undertake duties in respect of the service that are in addition to the usual duties of the staff member; and
- (d) the account for the service is endorsed "Rule 3 Exemption".

4. (2) Rule 3 does not apply to any of the following pathology services:

- (a) estimation of prothrombin time (INR) in respect of a patient undergoing anticoagulant therapy;
- (b) quantitative estimation of lithium in respect of a patient undergoing lithium therapy;
- (c) a service specified in item 65007 in relation to a patient undergoing chemotherapy for neoplastic disease or immunosuppressant therapy;
- (d) a service described in item 65007 in relation to clozaril, ticlopidine hydrochloride, methotrexate, gold, sulfasalazine or penicillamine therapy of a patient;
- (e) a service described in item 66201 in relation to methotrexate therapy of a patient;
- (f) quantitative estimation of urea, creatinine and electrolytes in relation to:
  - (i) cis-platinum therapy of a patient; or
  - (ii) chronic renal failure of a patient being treated in a dialysis program conducted by a recognised hospital;
- (g) quantitative estimation of albumin and calcium in relation to therapy of a patient with vitamin D, its metabolites or analogues;

if:

- (h) under a request for a service, other than a request for a service described in paragraph (a), no more than 6 tests are requested; and
- (i) the tests are performed within 6 months of the request; and
- (j) the account for the service is endorsed "Rule 3 Exemption".

**Item taken to refer only to the first service of a particular kind**

5. For the purposes of an item in Group P1 (Haematology):
- (a) if pathology services of a kind referred to in item 65017 or 65019 are rendered for a patient during a period when the patient is in hospital, the item applies only to the first pathology service of that kind rendered for the patient during that period; and
  - (b) if:
    - (i) tests (except tests mentioned in item 65023) are carried out in relation to a patient episode; and
    - (ii) specimen material from the patient episode is stored; and
    - (iii) in response to a request made within 14 days of the patient episode, further tests (except tests mentioned in item 65023) are carried out on the stored material;
- the later tests and the earlier tests are taken to be part of one patient episode.

**Certain items not to apply to a service referred by one pathology practitioner to another**

6. (1) In this rule:

**"designated pathology service"** means a pathology service in respect of tests relating to a single patient episode that are:

- (a) tests of the kind described in item 66235; or
- (b) tests of the kind described in item 66405; or
- (c) tests of the kind described in item 69229.

6. (2) This rule applies in respect of a designated pathology service where:

- (a) an Approved Pathology Practitioner ('**practitioner A**') in an Approved Pathology Authority:
  - (i) has been requested to render the designated pathology service; and
  - (ii) is unable, because of the lack of facilities in, or expertise or experience of the staff of, the laboratory of the authority, to render 1 or more (but not all) of the tests included in the service; and
  - (iii) requests an Approved Pathology Practitioner ('**practitioner B**') in another approved authority to render the test or tests that practitioner A is unable to render; and
  - (iv) renders each test included in the service, other than the test or tests in respect of which the request mentioned in subparagraph (iii) is made: and
- (b) the tests mentioned in subparagraph (a) (iv) that practitioner A renders are not tests constituting a service described in item 66239, 66415 or 69239.

6. (3) Where this rule applies in respect of a designated pathology service:

- (a) item 66235, 66237, 66405, 66407, 66409, 66411, 66413, 69229, 69231, 69233, 69235 or 69237 (as the case requires) applies in respect of the test or tests rendered by practitioner A; and
- (b) where practitioner B renders a service under a request referred to in subparagraph (2) (a) (iii) - subject to subrule (4), the amount specified in item 66241, 66417 or 69241 (as the case requires) is payable for each test that the service comprises.

6. (4) For the purposes of paragraph (3) (b), the maximum number of tests to which item 66241, 66417 or 69241 applies is:

- (a) in the case of item 66241:  
3 - **X**; or
- (b) in the case of item 66417 or 69241:  
6 - **X**

where **X** is the number of tests rendered by practitioner A in relation to the designated pathology service in respect of which the request mentioned in that paragraph is made.

6. (5) Items in Group P10 (Patient episode initiation) do not apply to the second-mentioned Approved Pathology Practitioner in subrule (2).

**Items not to be split**

7. Except as stated in rule 6, the amount specified in an item is payable only to one Approved Pathology Practitioner in respect of a single patient episode.

## Certain tests on stored material to be treated as part of the same patient episode

8. For the purposes of items in Group P2 (Chemical):

- (a) if a pathology service that involves the measurement of a substance in urine requires calculation of a substance/creatinine ratio, the service is taken to include the measurement of creatinine necessary for the calculation; and
- (b) if:
  - (i) tests are carried out in relation to a patient episode; and
  - (ii) specimen material from the patient episode is stored; and
  - (iii) in response to a request made within 14 days of the patient episode, further tests are carried out on the stored material;

the later tests and the earlier tests are taken to be part of one patient episode.

### Item 66317

9. The amount specified in item 66317 is not payable in respect of a pathology service described in the item unless at least one of the following paragraphs applies:

- (a) if the HDL cholesterol or apolipoprotein B/A1 ratio of the patient is requested to be determined because the patient has a serum cholesterol level  $>5.5$  mmol/L - the determination is performed on the sample that the serum cholesterol level determination for the patient was performed;
- (b) if the HDL cholesterol or apolipoprotein B/A1 ratio of the patient is requested to be determined because the patient has a fasting serum triglyceride level  $>2.0$  mmol/L - the determination is performed on the sample that the serum triglyceride level determination for the patient was performed;
- (c) the pathologist who renders the service has a written statement from the medical practitioner who requested the service that the patient is on a lipid lowering drug.

### Thyroid function testing

10. (1) For the purposes of item 66329:

"**abnormal level of TSH**" means a level of TSH that is outside the normal reference range in respect of the particular method of assay used to determine the level.

10. (2) Except where paragraph (a) of item 66329 is satisfied, the amount specified in the item is not payable in respect of a pathology service described in the item unless the pathologist who renders the service has a written statement from the medical practitioner who requested the service that satisfies subrule (3).

10. (3) The written statement from the medical practitioner must indicate:

- (a) that the tests are required for a particular purpose, being a purpose specified in paragraph (b) of item 66329; or
- (b) that the medical practitioner who requested the tests suspects the patient has a pituitary dysfunction; or
- (c) that the patient is on drugs that interfere with thyroid hormone metabolism or function.

### Meaning of "serial examinations or cultures"

11. For the purposes of an item in Group P3 (Microbiology):

- (a) "**serial examinations or cultures**" means a series of examinations or cultures requested on 1 occasion whether or not:
  - (i) the materials are received on different days by the Approved Pathology Practitioner; or
  - (ii) the examinations or cultures were requested on 1 or more request forms by the treating practitioner; and
- (b) if:
  - (i) tests are carried out in relation to a patient episode; and
  - (ii) specimen material from the patient episode is stored; and
  - (iii) in response to a request made within 14 days of the patient episode, further tests are carried out on the stored material;

the later tests and the earlier tests are taken to be part of one patient episode.

## Investigation for hepatitis and syphilis serology

12. (1) A medicare benefit is not payable in respect of more than one of items 69266, 69267, 69268, 69269, 69270, 69271, 69272, 69273, 69274, 69275, 69276, 69277, 69278, 69279, 69280, 69281 and 69283 in a patient episode.

(2) For the purposes of items 69279 and 69283, '**currently elevated transaminase level**' means a level of alanine aminotransferase or aspartate aminotransferase above the normal reference range in respect of the particular method of assay used to determine the level, as disclosed by a test carried out on a sample taken for the investigation or on a sample taken within the previous 7 days.

## Tests in Group P4 (Immunology) relating to antibodies

13. For the purposes of items in Group P4 (Immunology), in items 71119, 71121, 71123 and 71125, if:

- (a) tests are carried out in relation to a patient episode; and
- (b) specimen material from the patient episode is stored; and
- (c) in response to a request made within 14 days of the patient episode, further tests are carried out on the stored material;

the later tests and the earlier tests are taken to be part of one patient episode.

## Tests on biopsy material-Group P5 (Tissue Pathology) and Group P6 (Cytology)

14. (1) For the purposes of items in Group P5 (Tissue Pathology):

- (a) "**biopsy material**" means all tissue (other than a bone marrow biopsy) received by the Approved Pathology Practitioner from an operation, or a group of operations, performed on a patient at the same time; and
- (b) if:
  - (i) a pathology service that comprises the examination of biopsy material is rendered under any of those items; and
  - (ii) a further pathology service mentioned in any of those items is also rendered using that biopsy material; those pathology services are taken to be 1 pathology service; and
- (c) "**cytology**" means microscopic examination of 1 or more stained preparations of cells separated naturally or artificially from their normal environment by methods recognised as adequate to demonstrate their structure to a degree sufficient to enable an opinion to be formed about whether they are likely to be normal, abnormal but benign, or abnormal and malignant but, in accordance with customary laboratory practice, does not include examination of a blood film and a bone marrow aspirate; and
- (d) "**separately identified specimen**" means an individual specimen collected, identified so that it is clearly distinguished from any other specimen, and sent for testing by or on behalf of the treating practitioner responsible for the procedure in which the specimen was taken.

14. (2) For the purposes of Groups P5 and P6 of the Pathology Services Table, services in Group P6 include any services described in Group P5 on the material submitted for a test in Group P6.

14. (3) For the purposes of subrule (2), any sample submitted for cytology from which a cell block is prepared does not qualify for a Group P5 item.

14.(4) If more than 1 of the services mentioned in items 72813, 72816, 72817, 72823, 72824, 72825, 72830 and 72836 are performed in a single patient episode, a medicare benefit is payable for the item performed that has the highest schedule fee.

14.(5) If more than 1 histopathological examinations are performed on separate specimens, of different complexity levels, from a single patient episode, a medicare benefit is payable only for the examination that has the highest schedule fee.

14.(6) In items 72813, 72816, 72817, 72823, 72824, 72825, 72830 and 72836 a reference to a complexity level is a reference to a specimen type mentioned in Part 4 of this Table.

## Items in Groups P10 (Patient episode initiation) and P11 (Specimen referred) not to apply in certain circumstances

15. (1) For the purposes of this rule and items in Groups P10 (Patient episode initiation) and P11 (Specimen referred);

**"institution"** means a place at which residential accommodation or day care is, or both residential accommodation and day care are, made available to:

- (a) disadvantaged children; or
- (b) juvenile offenders; or
- (c) aged persons; or
- (d) chronically ill psychiatric patients; or
- (e) homeless persons; or
- (f) unemployed persons; or
- (g) persons suffering from alcoholism; or
- (h) persons addicted to drugs; or
- (i) physically or mentally handicapped persons; but does not include:
- (j) a hospital; or
- (k) a nursing home; or
- (l) accommodation for aged persons that is attached to a nursing home or situated within a nursing home complex;

**"licensed collection centre"** has the same meaning as in Part IIA of the Act;

**"prescribed laboratory"** means a laboratory operated by:

- (a) the Commonwealth; or
- (b) a State; or internal Territory; or
- (c) an authority of a State or internal Territory; or
- (d) an Australian tertiary education institution;

**"specimen collection centre"** has the same meaning as in Part IIA of the Act;

**"treating practitioner"** has the same meaning as in paragraph 16A(1)(a) of the Act.

**15. (2)** If a service described in an item in Group P10 or P11 is rendered by, or on behalf of, an Approved Pathology Practitioner who is a recognised pathologist, the relevant one of those items does not apply to the service if:

- (a) the service is rendered upon a request made in the course of an out-patient service at a recognised hospital; or
- (b) the service is rendered upon a request made for a patient who is a private patient in a recognised hospital when the request is made; or
- (c) the pathology equipment of a recognised hospital, or a prescribed laboratory, is used rendering the service; or
- (d) a member of the staff of a recognised hospital, or a prescribed laboratory, participates in the service in the course of the member's employment with the hospital or laboratory.

**15. (3)** An item in Group P10 or P11 does not apply to a pathology service to which subsection 16A(7) of the Act applies.

**15. (4)** An item in Group P10 or P11 does not apply to a pathology service unless at least one item in Groups P1 to P8 also applies to that service.

**15. (5)** Subject to subrule (7), if one item in Group P10 applies to a patient episode, no other item in that Group applies to that patient episode.

**15. (6)** An item in Group P11 applies only to the Approved Pathology Practitioner or Approved Pathology Authority to whom the specimen mentioned in the item was referred.

**15. (7)** If, in respect of the same patient episode:

- (a) services referred to in 1 or more items in Group P5 and 1 or more of Groups P1, P2, P3, P4, P6, P7 and P8 are rendered by an Approved Pathology Practitioner in the laboratory of another Approved Pathology Authority; and
- (b) services referred to in 1 or more items in Group P6 and 1 or more of Groups P1, P2, P3, P4, P5, P7 and P8 are rendered by another Approved Pathology Practitioner in another Approved Pathology Authority;

the fee specified in the applicable item in Group P10 is payable to both Approved Pathology Practitioners.

**15. (8)** If more than one specimen is collected from a person on the same day for the provision of pathology services:

- (a) in accordance with more than one request; and
- (b) in or by a single Approved Pathology Authority;

only a single amount specified in the applicable item in Group P10 is payable for the services.

**15. (9)** The amount specified in item 73921 is payable only once in respect of a single patient episode.

**Application of an item in Group P11 (Specimen referred) to a service excludes certain other items**

**16.** If item 73921 applies to a patient episode, none of the items in Group P10 applies to any pathology service rendered by the Approved Pathology Authority or approved pathology provider who claimed item 73921 in respect of that patient episode.

**Circumstances in which an item in Group P11 (Specimen referred) does not apply**

**17. (1)** An Item in Group P11 does not apply to a referral if:

- (a) a service in respect of the same patient episode has been carried out by the referring Approved Pathology Authority; and
- (b) the Approved Pathology Authority to which the referral is made is related to the referring Approved Pathology Authority.

**17. (2)** An Approved Pathology Authority is related to another Approved Pathology Authority for the purpose of subclause (1) if:

- (a) both Approved Pathology Authorities are employed (including employed under contract) by the same person, whether or not that person is also an Approved Pathology Authority; or
- (b) either of the Approved Pathology Authorities is employed (including employed under contract) by the other; or
- (c) both Approved Pathology Authorities are corporations and are related corporations within the meaning of the Corporations Law; or
- (d) the Approved Pathology Authorities are partners (whether or not either or both of the Approved Pathology Authorities are individuals and whether or not other persons are in partnership with either or both of the Approved Pathology Authorities).

**Abbreviations**

**18. (1)** The abbreviations in Part 3 of this Table may be used to identify particular pathology services or groups of pathology services.

**18. (2)** The names of services or drugs not listed in Part 3 of this Table must be written in full.

**Certain pathology services to be treated as one service**

**19. (1)** In this rule:

**"general practitioner"** means a medical practitioner who:

- (a) is not a consultant physician in any specialty; and
- (b) is not a specialist in any specialty;

**"set of pathology services"** means a group of pathology services:

- (a) that consists of services that are described in at least 4 different items; and
- (b) all of which are requested in a single patient episode; and
- (c) each of which relates to a patient who is not an admitted patient of a hospital; and
- (d) none of which is referred to:
  - (i) in item 66241, 66417, 69241, 73053 or 73055; or
  - (ii) in an item in Group P10 (Patient episode initiation) or Group P11 (Specimen referred).

**19. (2)** If a general practitioner requests a set of pathology services, the pathology services in the set are to be treated as individual pathology services in accordance with this rule.

**19. (3)** If the fee specified in one item that describes any of the services in the set of pathology services is higher than the fees specified in the other items that describe the services in the set:

- (a) the pathology service described in the first-mentioned item is to be treated as one pathology service; and
- (b) either:
  - (i) the pathology service in the set that is described in the item that specifies the second-highest fee is to be treated as one pathology service; or
  - (ii) if 2 or more items that describe any of those services specify the second-highest fee - the pathology service described in the item that specifies the second-highest fee, and that has the lowest item number, is to be treated as one pathology service; and
- (c) the pathology services in the set, other than the services that are to be treated as one pathology service under paragraphs (a) and (b), are to be treated as one pathology service.

**19. (4)** If the fees specified in 2 or more items that describe any of the services in the set of pathology services are the same, and higher than the fees specified in the other items that describe the services in the set:

- (a) the pathology service in the set that is described in the item that specifies the highest fee, and has the lowest item number, is to be treated as one pathology service; and
- (b) the pathology service in the set that is described in the item that specifies the highest fee, and has the second-lowest item number, is to be treated as one pathology service; and
- (c) the pathology services in the set, other than the services that are to be treated as one pathology service under paragraphs (a) and (b), are to be treated as one pathology service.

**19. (5)** If pathology services are to be treated as one pathology service under paragraph (3)(c) or paragraph (4)(c), the fee for the one pathology service is the highest fee specified in any of the items that describe the pathology services that are to be treated as the one pathology service.

71119	Antibodies to tissue antigens not elsewhere specified in this Table - detection, including quantitation if required, of 1 antibody <b>Fee:</b> \$17.10 <b>Benefit:</b> 75% = \$12.85 85% = \$14.55
71121	Detection of 2 antibodies specified in item 71119 <b>Fee:</b> \$20.50 <b>Benefit:</b> 75% = \$15.40 85% = \$17.45
71123	Detection of 3 antibodies specified in item 71119 <b>Fee:</b> \$23.90 <b>Benefit:</b> 75% = \$17.95 85% = \$20.35
71125	Detection of 4 or more antibodies specified in item 71119 <b>Fee:</b> \$27.30 <b>Benefit:</b> 75% = \$20.50 85% = \$23.25
71127	Functional tests for lymphocytes - quantitation other than by microscopy of: (a) proliferation induced by 1 or more mitogens; or (b) proliferation induced by 1 or more antigens; or (c) estimation of 1 or more mixed lymphocyte reactions; including a test described in item 65005 (if performed), with a maximum of 2 patient episodes in a 12 month period - each patient episode <b>Fee:</b> \$174.05 <b>Benefit:</b> 75% = \$130.55 85% = \$147.95
71129	2 tests described in item 71127 <b>Fee:</b> \$215.00 <b>Benefit:</b> 75% = \$161.25 85% = \$182.75
71131	3 or more tests described in item 71127 <b>Fee:</b> \$255.95 <b>Benefit:</b> 75% = \$192.00 85% = \$217.60
71135	Quantitation of neutrophil function, comprising at least 2 of the following: (a) chemotaxis; (b) phagocytosis; (c) oxidative metabolism; (d) bactericidal activity; including any test described in item 65005 (other than nitroblue tetrazolium reduction slide test), with a maximum of 2 patient episodes in a 12 month period - each patient episode <b>Fee:</b> \$205.25 <b>Benefit:</b> 75% = \$153.95 85% = \$174.50

PATHOLOGY	IMMUNOLOGY
71137	Quantitation of cell-mediated immunity by multiple antigen delayed type hypersensitivity intradermal skin testing using a minimum of 7 antigens, with a maximum of 2 patient episodes in a 12 month period - each patient episode <b>Fee:</b> \$29.85 <b>Benefit:</b> 75% = \$22.40    85% = \$25.40
71139	Characterisation of 3 or more leucocyte surface antigens by immunofluorescence or immunoenzyme techniques to assess lymphoid or myeloid cell populations, including a total lymphocyte count by any method, on 1 or more specimens of blood, CSF or serous fluid <b>Fee:</b> \$102.65 <b>Benefit:</b> 75% = \$77.00    85% = \$87.30
71141	Characterisation of 3 or more leucocyte surface antigens by immunofluorescence or immunoenzyme techniques to assess lymphoid or myeloid cell populations on 1 or more disaggregated tissue specimens <b>Fee:</b> \$194.80 <b>Benefit:</b> 75% = \$146.10    85% = \$165.60
71143	Characterisation (but not monitoring) of 6 or more leucocyte surface antigens by immunofluorescence or immunoenzyme techniques to assess lymphoid or myeloid cell populations in an immunological or haematological malignancy, including a service described in 1 or both of items 71139 and 71141 (if performed), on a specimen of blood, CSF, serous fluid or disaggregated tissue <b>Fee:</b> \$256.60 <b>Benefit:</b> 75% = \$192.45    85% = \$218.15
71145	Characterisation (but not monitoring) of 6 or more leucocyte surface antigens by immunofluorescence or immunoenzyme techniques to assess lymphoid or myeloid cell populations in an immunological or haematological malignancy, including a service described in 1 or more of items 71139, 71141 and 71143 (if performed), on 2 or more specimens of disaggregated tissues or 1 specimen of disaggregated tissue and 1 or more specimens of blood, CSF or serous fluid <b>Fee:</b> \$418.95 <b>Benefit:</b> 75% = \$314.25    85% = \$368.85
71147	HLA-B27 typing <b>Fee:</b> \$32.00 <b>Benefit:</b> 75% = \$24.00    85% = \$27.20
71149	Complete tissue typing for 4 HLA-A and HLA-B Class I antigens (including any separation of leucocytes), including a service described in item 71147 (if performed) <b>Fee:</b> \$106.85 <b>Benefit:</b> 75% = \$80.15    85% = \$90.85
71151	Tissue typing for HLA-DR, HLA-DP and HLA-DQ Class II antigens (including any separation of leucocytes) - phenotyping or genotyping of 2 or more antigens <b>Fee:</b> \$117.30 <b>Benefit:</b> 75% = \$88.00    85% = \$99.75

PATHOLOGY	TISSUE PATHOLOGY
<b>GROUP P5 - TISSUE PATHOLOGY</b>	
72813	<p>Examination of complexity level 2 biopsy material with 1 or more tissue blocks, including specimen dissection, all tissue processing, staining, light microscopy and professional opinion or opinions - 1 or more separately identified specimens</p> <p>(Item is subject to rule 14)</p> <p><b>Fee:</b> \$79.00                      <b>Benefit:</b> 75% = \$59.25    85% = \$67.15</p>
72816	<p>Examination of complexity level 3 biopsy material with 1 or more tissue blocks, including specimen dissection, all tissue processing, staining, light microscopy and professional opinion or opinions - 1 separately identified specimen</p> <p>(Item is subject to rule 14)</p> <p><b>Fee:</b> \$84.50                      <b>Benefit:</b> 75% = \$63.40    85% = \$71.85</p>

PATHOLOGY	CYTOLOGY
<b>GROUP P6 - CYTOLOGY</b>	
73043	Cytology (including serial examinations) of nipple discharge or smears from skin, lip, mouth, nose or anus for detection of precancerous or cancerous changes - 1 or more tests <b>Fee:</b> \$19.80 <b>Benefit:</b> 75% = \$14.85 85% = \$16.85
73045	Cytology (including serial examinations) for malignancy (other than an examination mentioned in item 73053); and including any Group P5 service, if performed on: (a) specimens resulting from washings or brushings from sites not specified in item 73043; or (b) a single specimen of sputum or urine; or (c) 1 or more specimens of other body fluids 1 or more tests <b>Fee:</b> \$45.00 <b>Benefit:</b> 75% = \$33.75 85% = \$38.25
73047	Cytology of a series of 3 sputum or urine specimens for malignant cells <b>Fee:</b> \$90.00 <b>Benefit:</b> 75% = \$67.50 85% = \$76.50
73049	Cytology material obtained directly from a patient by fine needle aspiration of solid tissue or tissues <b>Fee:</b> \$65.00 <b>Benefit:</b> 75% = \$48.75 85% = \$55.25
73051	Cytology material obtained directly from a patient by fine needle aspiration of solid tissue or tissues if: (a) the aspiration is performed by a recognised pathologist; or (b) a recognised pathologist attends the aspiration and performs cytological examination during the attendance <b>Fee:</b> \$163.85 <b>Benefit:</b> 75% = \$122.90 85% = \$139.30
73053	Cytology of smears from cervix: (a) for detection of precancerous or cancerous changes in women with no symptoms, signs or recent history suggestive of cervical neoplasia; or (b) due to an unsatisfactory smear taken in the circumstances defined in para (a) above; or (c) if there is inadequate information provided to use item 73055 each examination <i>(See para PP. of explanatory notes to this Category)</i> <b>Fee:</b> \$17.80 <b>Benefit:</b> 75% = \$13.35 85% = \$15.15
73055	Cytology not associated with item 73053, of smears from cervix in association with: (a) the management of previously detected abnormalities including precancerous or cancerous conditions; or (b) the investigation of women with symptoms, signs or recent history suggestive of cervical neoplasia; each test <i>(See para PP. of explanatory notes to this Category)</i> <b>Fee:</b> \$17.80 <b>Benefit:</b> 75% = \$13.35 85% = \$15.15
73057	Cytology of smears from vagina, not associated with item 73053 or 73055 nor to monitor hormone replacement therapy - each test <i>(See para PP. of explanatory notes to this Category)</i> <b>Fee:</b> \$17.80 <b>Benefit:</b> 75% = \$13.35 85% = \$15.15
73059	† Immunocytochemical examination of material obtained by procedures described in items 73045, 73047, 73049 and 73051 for the characterisation of a malignancy by immunofluorescence, immunoperoxidase or other labelled antibody techniques with multiple antigenic specificities per specimen - 1 to 3 antibodies <b>Fee:</b> \$30.00 <b>Benefit:</b> 75% = \$22.50 85% = \$25.50
73060	† Immunocytochemical examination of material obtained by procedures described in items 73045, 73047, 73049 and 73051 for the characterisation of a malignancy by immunofluorescence, immunoperoxidase or other labelled antibody techniques with multiple antigenic specificities per specimen - 4 or more antibodies <b>Fee:</b> \$40.00 <b>Benefit:</b> 75% = \$30.00 85% = \$34.00

PATHOLOGY	CYTOGENETICS
<b>GROUP P7 - CYTOGENETICS</b>	
73287	Chromosome studies, including preparation, count, karyotyping and identification by banding techniques or fragile X-site determination of 1 or more of any tissue or fluid except blood - 1 or more tests <b>Fee:</b> \$327.60 <b>Benefit:</b> 75% = \$245.70    85% = \$278.50
73289	Chromosome studies, including preparation, count, karyotyping and identification by banding techniques or fragile X-site determination of blood - 1 or more tests <b>Fee:</b> \$296.85 <b>Benefit:</b> 75% = \$222.65    85% = \$252.35

PATHOLOGY	INFERTILITY & PREGNANCY TESTS
<b>GROUP P8 - INFERTILITY AND PREGNANCY TESTS</b>	
73521	Semen examination for presence of spermatozoa or examination of cervical mucus for spermatozoa (Huhner's test) <b>Fee:</b> \$6.80 <b>Benefit:</b> 75% = \$5.10    85% = \$5.80
73523	Semen examination (other than post-vasectomy semen examination), including: (a) measurement of volume, sperm count and motility; and (b) examination of stained preparations; and (c) morphology; and (if performed) (d) differential count and 1 or more chemical tests; with a maximum of 4 episodes in a 12 month period - each episode <b>Fee:</b> \$35.80 <b>Benefit:</b> 75% = \$26.85    85% = \$30.45
73525	Sperm antibodies - sperm-penetrating ability - 1 or more tests <b>Fee:</b> \$18.20 <b>Benefit:</b> 75% = \$13.65    85% = \$15.50
73527	Chorionic gonadotrophin (beta-HCG) - detection in serum or urine by 1 or more methods, including serial dilution if performed, for diagnosis of pregnancy - 1 or more tests <b>Fee:</b> \$9.90 <b>Benefit:</b> 75% = \$7.45    85% = \$8.45
73529	Chorionic gonadotrophin (beta-HCG), quantitation in serum by 1 or more methods (except by latex, membrane, strip or other pregnancy test kit) for diagnosis of hydatidiform mole, HCG - secreting neoplasm, or threatened abortion, or follow-up of abortion or diagnosis of ectopic pregnancy, including any services performed in 73527 - 1 test <b>Fee:</b> \$28.25 <b>Benefit:</b> 75% = \$21.20    85% = \$24.05

**GROUP P9 - SIMPLE BASIC PATHOLOGY TESTS**

+ 73801	Semen examination for presence of spermatozoa <b>Fee:</b> \$6.75 <b>Benefit:</b> 75% = \$5.10    85% = \$5.75
+ 73802	Leucocyte count, erythrocyte sedimentation rate, examination of blood film (including differential leucocyte count), haemoglobin, haematocrit or erythrocyte count - 1 test <b>Fee:</b> \$4.45 <b>Benefit:</b> 75% = \$3.35    85% = \$3.80
+ 73803	2 tests described in item 73802 <b>Fee:</b> \$6.20 <b>Benefit:</b> 75% = \$4.65    85% = \$5.30
+ 73804	3 or more tests described in item 73802 <b>Fee:</b> \$7.95 <b>Benefit:</b> 75% = \$6.00    85% = \$6.80
+ 73805	Microscopy of urine whether stained or not, or catalase test <b>Fee:</b> \$4.45 <b>Benefit:</b> 75% = \$3.35    85% = \$3.80
73806	Pregnancy test by 1 or more immunochemical methods <b>Fee:</b> \$9.90 <b>Benefit:</b> 75% = \$7.45    85% = \$8.45
+ 73807	Microscopy for wet film other than urine, including any relevant stain <b>Fee:</b> \$6.75 <b>Benefit:</b> 75% = \$5.10    85% = \$5.75
+ 73808	Microscopy of Gram-stained film, including (if performed) a service described in item 73805 or 73807 <b>Fee:</b> \$8.45 <b>Benefit:</b> 75% = \$6.35    85% = \$7.20
+ 73809	Chemical tests for occult blood in faeces by reagent stick, strip, tablet or similar method <b>Fee:</b> \$2.30 <b>Benefit:</b> 75% = \$1.75    85% = \$2.00
+ 73810	Microscopy for fungi in skin, hair or nails - 1 or more sites <b>Fee:</b> \$6.75 <b>Benefit:</b> 75% = \$5.10    85% = \$5.75
+ 73811	Mantoux test <b>Fee:</b> \$10.95 <b>Benefit:</b> 75% = \$8.25    85% = \$9.35

PATHOLOGY	PATIENT EPISODE INITIATION
<b>GROUP P10 - PATIENT EPISODE INITIATION</b>	
+ 73901	Initiation of a patient episode that consists only of a service described in item 73053, 73055 or 73057 from a person who is not in a recognised hospital or a prescribed laboratory <b>Fee:</b> \$7.95 <b>Benefit:</b> 75% = \$6.00    85% = \$6.80
73903	Initiation of a patient episode that consists only of 1 or more services described in items 72813, 72816, 72817, 72823, 72824, 72825, 72830 and 72836 from a person who is an in-patient of a hospital other than a recognised hospital <b>Fee:</b> \$14.15 <b>Benefit:</b> 75% = \$10.65    85% = \$12.05
73905	Initiation of a patient episode that consists only of 1 or more services described in items 72813, 72816, 72817, 72823, 72824, 72825, 72830 and 72836 from a person who is not an in-patient of a private hospital and not a patient of a recognised hospital <b>Fee:</b> \$7.85 <b>Benefit:</b> 75% = \$5.90    85% = \$6.70
+ 73907	Initiation of a patient episode by collection of a specimen for a service (other than a service described in item 73901, 73903, 73905 or in Group P9) if the specimen is collected in a licensed collection centre <b>Fee:</b> \$16.55 <b>Benefit:</b> 75% = \$12.45    85% = \$14.10
+ 73909	Initiation of a patient episode by collection of a specimen for a service (other than a service described in item 73901, 73903, 73905 or in Group P9) if the specimen is collected by an approved pathology practitioner or an employee of an approved pathology authority from a person who is an in-patient of a hospital other than a recognised hospital <b>Fee:</b> \$16.55 <b>Benefit:</b> 75% = \$12.45    85% = \$14.10
+ 73910	Initiation of a patient episode by collection of a specimen for a service (other than a service described in item 73901, 73903 or 73905 or in Group P9) if the specimen is collected by an approved pathology practitioner or an employee of an approved pathology authority from a person in the place where the person was residing <b>Fee:</b> \$10.15 <b>Benefit:</b> 75% = \$7.65    85% = \$8.65
+ 73912	Initiation of a patient episode by collection of a specimen for a service (other than a service described in item 73901, 73903 or 73905 or in Group P9) if the specimen is collected by an approved pathology practitioner or an employee of an approved pathology authority from a person in a nursing home or institution <b>Fee:</b> \$10.15 <b>Benefit:</b> 75% = \$7.65    85% = \$8.65
+ 73913	Initiation of a patient episode by collection of a specimen for a service (other than a service described in item 73901, 73903, 73905 or 73907 or items in Group P9) if the specimen is collected from the person by the person <b>Fee:</b> \$10.15 <b>Benefit:</b> 75% = \$7.65    85% = \$8.65
+ 73915	Initiation of a patient episode by collection of a specimen for a service (other than a service described in items 73901, 73903 or 73905 or items in Group P9) if the specimen is collected by or on behalf of the treating practitioner <b>Fee:</b> \$10.15 <b>Benefit:</b> 75% = \$7.65    85% = \$8.65

PATHOLOGY	SPECIMEN REFERRED
<b>GROUP P11 - SPECIMEN REFERRED</b>	
+  73921	Receipt of a specimen by an approved pathology practitioner of an approved pathology authority from another approved pathology practitioner of a different approved pathology authority or another approved pathology authority  (Item is subject to subrule 15(9)) <b>Fee:</b> \$10.15 <b>Benefit:</b> 75% = \$7.65    85% = \$8.65

Microbial antigen testing - Streptococcus pneumoniae	SPN	66219
Microbial antigen testing - Varicella zoster	VCZN	69219
Micropolyspora faeni	MIC	69229
Microscopic examination of - faeces for parasites	OCP	69285-87

Service		Item
Microscopic examination of - material other than blood	M	69201
Microscopy & culture of - material from nose, throat, eye or ear	MCS1	69205
Microscopy & culture of - material from skin, superficial sites, urethra, vagina, cervix or rectum	MCS2	69207
Microscopy & culture of - post-op wounds, aspirations of body cavities, synovial fluid, CSF & op/biopsy spec.		MCS369209
Microscopy & culture of - specimens of sputum	MCS2	69207
Microscopy & culture of - specimens of sputum, urine or other body fluids for mycobacteria	AFB	69213
Microscopy & culture to detect pathogenic micro-organisms including chlamydia	MCS4	69282
Microscopy, culture, identification & sensitivity of urine	UMCS	69217
Mitochondria - tissue antigens - antibodies	MA	71119
Mouth - cytology on specimens from	SMCY	73043
Mucin-like carcinoma - associated antigen	MCA1	66261
Mumps - microbial antibody testing	MUM	69229
Murray Valley encephalitis - microbial antibody testing	MVE	69229
Mycobacteria microscopy & culture of sputum	AFB	69213
Mycoplasma pneumoniae - microbial antibody testing	MYC	69229
Myoglobin in urine	UMY	66213
N-acetyl procainamide	NAPC	66235
Neisseria gonorrhoeae - microbial antigen testing	GON	69219
Neisseria meningitidis - antigens	NMG	69219
Neisseria meningitidis - microbial antibody testing	MEN	69229
Neisseria meningitidis - microbial antigen testing	NMG	69219
Neural tube defects and Down's syndrome	NTDD	66321
Neuron - tissue antigens - antibodies	ANE	71109
Neuron specific enolase	NSEN	66261
Neutrophil cytoplasm - tissue antigens - antibodies	ANCA	71109
Neutrophil functions	NFT	71135
Newcastle disease - microbial antibody testing	NCD	69229
Nickel	NI	66277
Nipple discharge - cytology on specimens from	SMCY	73043
Nitrazepam	NITR	66235
Nordothiepin	NDIP	66235
Norfluoxetine	NFLE	66235
Nortriptyline	NORT	66235
Nose - cytology on specimens from	SMCY	73043
Nose - microscopy & culture of material from	MCS1	69205
Nuclear antigens - detection of antibodies to	ANA	71097
Oestradiol	E2	66405
Oestriol	E3	66373
Oestriol - for Down's syndrome and neural tube defect testing	NTDD	66321
Oestrone	E1	66405
Oligoclonal proteins	OGP	71065
Op/biopsy specimens - microscopy & culture of material from	MCS3	69209
Osmolality, serum or urine	OSML	66223
Ovary - tissue antigens - antibodies	AOV	71109
Oxalate	OXAL	66367
Oxazepam	OXAZ	66235
PAA (phenyl acetic acid)	PAA	66281
Palmitic acid in amniotic fluid	PALM	66243
Pap smear	CCR	73053
Papanicolaou test	CCR	73053
Paracetamol	PARA	66235
Parainfluenza 1 - microbial antibody testing	PF1	69229
Parainfluenza 2 - microbial antibody testing	PF2	69229
Parainfluenza 3 - microbial antibody testing	PF3	69229
Paraprotein investigation - by electrophoresis	EPPI	66249
Paraprotein investigation - by immunoelectrophoresis or immunofixation	PPRO	71061
Paraprotein investigation - on concurrently collected serum or urine	PPSU	71063

Red blood cells - Kleihauer	KLEI	65005
Red cell folate & serum B12 & serum folate if required	RCF	66267
Red cell porphyrins - qualitative test	RCP	65027
Referred specimen fee		73921
Renin	REN	66405
Respiratory syncytial virus - microbial antigen testing	RSVN	69219
Respiratory syncytial virus - microbial antibody testing	RSV	69229
Reticulin - tissue antigens - antibodies	RCA	71119
Reticulocyte count	RETC	65001
Rheumatoid factor	RF	71106
Rheumatoid factor - quantitation	RFQ	71106
Ross River virus - microbial antibody testing	RRV	69229
RSV (respiratory syncytial virus) - microbial antigen testing	RSVN	69219
RSV (respiratory syncytial virus) - microbial antibody testing	RSV	69229
Rubella - serology	RUB	69229
Salicylate (aspirin)	SALI	66235
Salivary gland - tissue antigens - antibodies	ASG	71109
Salmonella typhi (H) - microbial antibody testing	SAH	69229
Salmonella typhi (O) - microbial antibody testing	SAO	69229
Schistosoma - microbial antibody testing	STO	69229
Scl-70 - tissue antigens - antibodies	SCL	71119
Secretin	SSGR	66297
Selenium	SE	66277
Semen examination	SEE	73523
Semen examination - for spermatozoa (post vasectomy)	SES	73521
Serology - in pregnancy (see Pregnancy serology)		
Serotonin	5HT	66367
Serum - B12	B12	66265
Serum - folate (with B12)	FOL	66265
Serum - folate (with B12 red cell folate)	RCF	66267
Sex hormone binding globulin	SHBG	66405
Skeletal muscle - tissue antigens - antibodies	SLA	71109
Skin - cytology	SMCY	73043
Skin - microscopy & culture of material from	MCS2	69207
Skin basement membrane - tissue antigens - antibodies	SKA	71109
Smooth muscle - tissue antigens - antibodies	SMA	71119
Snake venom	HISS	66231
Sodium	NA	66201
Solid tissue or tissues - chemical assays	ENZS	66285
Solid tissue or tissues - cytology of fine needle aspiration	FNCY	73049
Solid tissue or tissues - cytology of fine needle aspiration by, or in presence of pathologist	FNCP	73051

**COMPLEXITY LEVELS FOR HISTOPATHOLOGY ITEMS**

<b>Specimen Type</b>	<b>Complexity Level</b>
Adrenal resection, neoplasm	5
Adrenal resection, not neoplasm	4
Aneurysm - all types	3
Anus, fissure or fistula	3
Anus, haemorrhoids	3
Anus tag	3
Appendix	3
Artery, atheromatous plaque	3
Artery, biopsy	4
Bartholin's gland - cyst	3
Bile duct, resection - all specimens	6
Bone, biopsy, curettings or fragments - lesion	5
Bone, biopsy or curettings quantitation - metabolic disease	6
Bone, femoral head	4
Bone, resection, neoplasm - all sites and types	6
Bone marrow, biopsy	4
Bone - all specimens not otherwise specified	4
Brain neoplasm, resection - cerebello-pontine angle	4
Brain or meninges, biopsy - all lesions	5
Brain or meninges, not neoplasm - temporal lobe	6
Brain or meninges, resection - neoplasm (intracranial)	5
Brain or meninges, resection - not neoplasm	4
Branchial cleft, cyst	4
Breast biopsy, excision - non-palpable malignant neoplasm	6
Breast, biopsy, excision - palpable malignant neoplasm	6
Breast, biopsy, needle with localization	6
Breast, mastectomy with nodes (including radical)	6
Breast tissue - not otherwise specified	4
Bronchus, biopsy	4
Carotid body - neoplasm	5
Cholesteatoma	3
Digits, amputation - not traumatic	4
Digits, amputation - traumatic	2
Endocrine neoplasm - not otherwise specified	5
Extremity, amputation or disarticulation - neoplasm	6
Extremity, amputation - not otherwise specified	4
Eye, conjunctiva - biopsy or pterygium	3
Eye, cornea	4
Eye, enucleation or exenteration - all lesions	5
Eye - not otherwise specified	4
Fallopian tube, biopsy	4
Fallopian tube, ectopic pregnancy	4
Fallopian tube, sterilization	2
Fetus with dissection	6
Foreskin - new born	2
Foreskin - not new born	3
Gallbladder	3
Gallbladder and porta hepatis-radical resection	6
Ganglion cysts	3
Glomus, neoplasm	4
Gum or oral mucosa, biopsy	4
Heart valve	4
Heart - not otherwise specified	5
Hernia sac	2
Hydrocele sac	2
Joint tissue including bone	4
Joint - all structures other than bone	3
Kidney, biopsy including transplant	5
Kidney, nephrectomy transplant	5
Kidney, partial or total nephrectomy or nephroureterectomy - neoplasm	5
Kidney, partial or total nephrectomy - not neoplasm	4
Large bowel, biopsy - all sites	4
Large bowel, colostomy - stoma	3
Large bowel, polyp	4
Large bowel, segmental resection - colon, not neoplasm	5
Large bowel (including rectum), neoplasm	6

Larynx, biopsy	4
Larynx, partial or total resection	5
Larynx, resection with nodes or pharynx or both	6
Lip, biopsy or wedge resection	4
Liver, hydatid cyst - resection for trauma	4
Liver - all specimens not otherwise specified	5
Lung, needle or transbronchial biopsy	4
Lung, resection - neoplasm	6
Lung, wedge biopsy	5
Lung segment, lobe or total - not neoplasm	5
Lymph node, biopsy - all sites	4
Lymph nodes, regional resection - all sites	5
Mediastinum mass	5
Muscle, biopsy	5
Nasopharynx or oropharynx, biopsy	4
Nerve, biopsy neuropathy	5
Nerve, neurectomy or removal of neoplasm	4
Nerve - not otherwise specified	3
Nose, mucosal biopsy	4
Nose or sinuses, polyps	3
Odontogenic neoplasm	5
Odontogenic or dental cyst	4
Oesophagus, biopsy	4
Oesophagus, diverticulum	3
Oesophagus, partial or total resection	6
Omentum, biopsy	4
Ovary with or without tube - neoplasm	5
Ovary with or without tube - not neoplasm	4
Pancreas, biopsy	5
Pancreas, cyst	4
Pancreas, subtotal or total with or without splenectomy	6
Parathyroid gland(s)	4
Penisectomy with node dissection	5
Penisectomy - simple	4
Periarticular tissue - ganglion cyst	3
Periarticular tissue - not otherwise specified	4
Peritoneum, biopsy	4
Pituitary neoplasm	4
Placenta - not third trimester	4
Placenta - third trimester, abnormal pregnancy or delivery	4
Pleura or pericardium, biopsy or tissue	4
Products of conception, spontaneous or missed abortion	4
Products of conception, termination of pregnancy	3
Prostate, radical resection	6
Prostate - all types of specimen not otherwise specified	4
Retroperitoneum, neoplasm	5
Salivary gland, Mucocele	3
Salivary gland, neoplasm - all sites	5
Salivary gland - all specimens not otherwise specified	4
Sinus, front nasal, ethmoidectomy	6
Sinus, paranasal, biopsy	4
Sinus, paranasal, resection - neoplasm	5
Skin, biopsy - blistering skin diseases	5
Skin, biopsy - inflammatory dermatosis	5
Skin, local resection - orientation or margins, at least 5cm long	4
Skin - all specimens not otherwise specified including all neoplasms	3
Small bowel, diverticulum	3
Small bowel, resection - neoplasm	6
Small bowel - all specimens not otherwise specified	4
Soft tissue, extensive resection at least 5cm long - neoplasm	6
Soft tissue, lipoma and variants	3
Soft tissue, neoplasm, not lipoma - all specimens	5
Soft tissue - not otherwise specified	4
Spleen	5
Stomach, biopsy	4
Stomach, resection, neoplasm - all specimens	6
Stomach - all specimens not otherwise specified	4
Tendon or tendon sheath, ganglion cyst	3
Tendon or tendon sheath, giant cell neoplasm	4
Tendon or tendon sheath - not otherwise specified	4

Testis, biopsy	5
Testis and adjacent structures, castration	2
Testis and adjacent structures, neoplasm with or without nodes	5
Testis and adjacent structures, vas deferens sterilization	2
Testis and adjacent structures - not otherwise specified	3
Thymus - not otherwise specified	5
Thyroglossal duct - all lesions	4
Thyroid - all specimens	5
Tissue or organ not otherwise specified, abscess	3
Tissue or organ not otherwise specified, haematoma	3
Tissue or organ not otherwise specified, malignant neoplasm with regional nodes	6
Tissue or organ not otherwise specified, neoplasm local	4
Tissue or organ not otherwise specified, pilonidal cyst or sinus	3
Tissue or organ not otherwise specified, thrombus or embolus	3
Tissue or organ not otherwise specified, veins varicosity	3
Tissue or organ - all specimens not otherwise specified	3
Tongue, biopsy	4
Tongue or tonsil, neoplasm local	5
Tongue or tonsil, neoplasm with nodes	6
Tonsil, biopsy - excluding resection of whole organ	4
Tonsil or adenoids or both	2
Trachea, biopsy	4
Ureter, biopsy	4
Ureter, resection	5
Urethra, biopsy	4
Urethra, resection	5
Urinary bladder, partial or total with or without prostatectomy	6
Urinary bladder, transurethral resection of neoplasm	5
Urinary bladder - all specimens not otherwise specified	4
Uterus, cervix, curettings or biopsy	4
Uterus, cervix cone, biopsy	5
Uterus, endocervix, polyp	4
Uterus, endometrium, polyp	4
Uterus with or without adnexa, malignant neoplasm - all specimen types not otherwise specified	5
Uterus with or without adnexa, neoplasm, Wertheim's or pelvic clearance	6
Uterus - all specimens not otherwise specified	4
Vagina, biopsy	4
Vagina, radical resection	6
Vaginal mucosa, incidental	3
Vulva or labia, biopsy	4
Vulval, subtotal or total with or without nodes	6
