| 18375 | <p>Botulinum Toxin Type A Purified Neurotoxin Complex (Botox), intravesical injection of, with cystoscopy, for the treatment of urinary incontinence, including all such injections on any one day, if:</p> <p>(a) the urinary incontinence is due to neurogenic detrusor overactivity as demonstrated by urodynamic study of a patient with:</p>  |

**T11. BOTULINUM TOXIN INJECTIONS**

(i) multiple sclerosis; or

(ii) spinal cord injury; or

(iii) spina bifida and who is at least 18 years of age; and

(b) the patient has urinary incontinence that is inadequately controlled by anti-cholinergic therapy, as manifested by having experienced at least 14 episodes of urinary incontinence per week before commencement of treatment with botulinum toxin type A; and

(c) the patient is willing and able to self-catheterise; and

(d) the requirements relating to botulinum toxin type A under the Pharmaceutical Benefits Scheme are complied with; and

(e) treatment is not provided on the same occasion as a service described in item 104, 105, 110, 116, 119, 11900 or 11919

For each patient - applicable not more than once except if the patient achieves at least a 50% reduction in urinary incontinence episodes from baseline at any time during the period of 6 to 12 weeks after first treatment (Anaes.)

(See para TN.11.1 of explanatory notes to this Category)

**Fee:** \$233.55      **Benefit:** 75% = \$175.20

Botulinum Toxin Type A Purified Neurotoxin Complex (Botox), injection of, for the treatment of chronic migraine, including all injections in 1 day, if:

(a) the patient is at least 18 years of age; and

(b) the patient has experienced an inadequate response, intolerance or contraindication to at least 3 prophylactic migraine medications before commencement of treatment with botulinum toxin, as manifested by an average of 15 or more headache days per month, with at least 8 days of migraine, over a period of at least 6 months, before commencement of treatment with botulinum toxin; and

(c) the requirements relating to botulinum toxin type A under the Pharmaceutical Benefits Scheme are complied with

18377

For each patient-applicable not more than twice except if the patient achieves and maintains at least a

## INDEX

- (other than acromion), osteectomy/osteotomy 48406, 48409
- controlled hydrodilatation of bladder 36827
  - diathermy or resection of bladder tumour/s 36845
  - endoscopic incision/resection 36825, 36854
  - formation of 45227
  - injection into bladder wall 36851
  - insertion of ureteric stent, or brush biopsy 36821
  - insertion of urethral prosthesis 36811
  - laser destruction of bladder tumours 36840
  - lavage of blood clots from bladder 36842
  - or primary restoration of alimentary continuity after 41843
  - preparation of site and attachment to site 45233
  - removal of foreign body 36833
    - removal of, twelve years or over 41793
    - removal of, under twelve years 41789
  - resection of ureterocele 36848
  - spreading of pedicle 45236
  - ureteric catheterisation 36818, 36824
  - ureteric meatotomy 36830
  - urethroscopy with/without urethral dilatation 36812
  - with tracheostomy and plastic reconstruction 30294
  - without litholapaxy 36863
  - without urethroscopy 36815
  - Achilles, repair of 49718, 49721, 49724, 49727
    - and mastoidectomy 41551, 41560
    - and ossicular chain reconstruction 41542
    - and revision of mastoidectomy 41566
  - artificial prosthesis, insertion of for grafting 46414
  - control under GA, independent 30058
  - diabetes or anaemia 16502
    - following circumcision, with GA 30663
    - following tonsillectomy, with GA 41797
  - foot, adductor hallucis, transfer of 49827, 49830
  - foot, repair of 49800, 49803, 49806, 49809, 49812
  - foreign body in, removal 30068
  - hand/digit, synovectomy of 46336, 46339, 46342, 46345, 46348, 46351, 46354, 46357, 46360
  - hand/wrist, repair of 46420, 46423, 46426, 46429, 46432, 46435
    - insertion of pressure regulating balloon, pump 37387
    - into bladder 36588, 36591
    - into intestine 36594
    - into isolated intestinal segment 36600, 36603
    - into skin 36585
  - intrauterine growth retardation 16508
  - laparotomy for control of 30385
  - lengthening of 47957, 47960, 47963
  - major, of ankle, repair of 49718, 49721, 49724, 49727
    - or ligament transfer 47966
  - prosthesis, artificial, insertion for grafting 46414
  - reconstruction of, by tendon graft 46408
  - reconstruction, congenital atresia 45662
  - removal of foreign body, incision 41503
  - repair of 47954, 49718
  - retromastoid removal of 41575-41576, 41578-41579
    - revision or removal of 37390
  - sheath, open operation for tenovaginitis 46363, 47972
  - tenotomy 47960, 47963
  - threatened premature labour 16502, 16508
  - tonsils/adenoids, arrest, under GA 41797
  - transfer of, to restore elbow function 50405
  - transfer of, to restore hand function 46417
  - translabyrinthine removal 41575-41576, 41578-41579
  - transmastoid removal 41575-41576, 41578-41579
  - transplantation of 47966
  - with arytenoidectomy 41867
  - with division of laryngeal web 41868
  - with mastoidectomy and ossicular chain recon 41554, 41563
  - with removal of juvenile papillomata 41858
  - with removal of papillomata by laser surgery 41861
  - with removal of tumour 41864
- abbe 45701, 45704
- A**
- Abbe flap, reconstruction of cleft lip 45701
- Abdomen, burst, repair of 30403
- abdomen, lower 20800, 20802-20806, 20810, 20815, 20820, 20830, 20832, 20840-20842, 20844-20848, 20850, 20855, 20860, 20862-20864, 20866-20868, 20880, 20882, 20884
- abdomen, upper 20700, 20702-20706, 20730, 20740, 20745, 20750, 20752, 20754, 20756, 20770, 20790-20794, 20798-20799
- abdominal aortic aneurysm, endovascular repair 33116, 33119
- Abdominal apron, wedge excision 30165
- abdominal contouring post diabetic injections 31346
- Abdomino-perineal resection, rectum and anus 32039, 32042, 32045-32046
- Abdomino-vaginal op for stress incontinence 35602, 35605
- ablation of, by radiofrequency electrosurgery 35616
- abnormality detected by mammography 31506
- Abortion, threatened, treatment of 16505
- Abrasive therapy 45021, 45024
- Abscess, anal, drainage of 32174-32175
- abscess, incision with drainage 30223
- abscess, laparotomy for drainage of 30394
- abscess, open drainage of 37212
- access device, prosthetic, correction of 34518
- access device, thrombectomy of 34515
- Accessory bone, osteotomy or osteectomy of 48400
- Acetabular dysplasia, pelvis, bone graft/shelf procedure 50393
- Acetabulum, treatment of fracture of 47492, 47495, 47498, 47501, 47504, 47507, 47510
- achilles tendon, repair of 49718, 49721, 49724
- Achilles' tendon, operation for lengthening 49727
- Acoustic neuroma, removal of 41575-41576, 41578-41579
- additional incisions for astigmatism 42673
- Adductors to ischium transfer 50387
- Adenoids and tonsils, removal of 41789, 41793
- adhesiolysis, with hysteroscopy 35633
- Adhesions, division of, via laparoscope 31450, 31452, 35637

| arterial/venous, with other operation                  | 32769                             | 23180, 23190, 23200, 23210, 23220, 23230, 23240, 23250     |  |
| Arteries, major, access as part of re-operation        | 35202                             | 23260, 23270, 23280, 23290, 23300, 23310, 23320, 23330     |  |
| Arteriography, operative                               | 35200                             | 23340, 23350, 23360, 23370, 23380, 23390, 23400, 23410     |  |
| Arteriography, preparation for                         | 38215, 38218                      | 23420, 23430, 23440, 23450, 23460, 23470, 23480, 23490     |  |
| Arteriovenous access device, insertion of              | 34512                             | 23500, 23510, 23520, 23530, 23540, 23550, 23560, 23570     |  |
| arteriovenous malformation, excision of                | 39803                             | 23580, 23590, 23600, 23610, 23620, 23630, 23640, 23650     |  |
| arteriovenous, dissection, ligation                    | 34112, 34115, 34118               | 23660, 23670, 23680, 23690, 23700, 23710, 23720, 23730     |  |
| arteriovenous, dissection, repair                      | 34121, 34124, 34127               | 23740, 23750, 23760, 23770, 23780, 23790, 23800, 23810     |  |
| 34130  |                                   | 23820, 23830, 23840, 23850, 23860, 23870, 23880, 23890     |  |
| arteriovenous, external, insertion/removal             | 34500, 34506                      | 23900, 23910, 23920, 23930, 23940, 23950, 23960, 23970     |  |
| arteriovenous, ligation cervical vessel/s              | 39812                             | 23980, 23990, 24100-24136                                  |  |

assistance, modifiers 25000, 25005, 25010, 25015, 25020  
25025, 25030  
Assisted reproductive technologies 13200, 13203, 13206  
13209, 13212, 13215, 13218, 13221  
atherectomy, peripheral 35312  
Atherectomy, peripheral arterial 35312  
atresia, auditory canal reconstruction 45662  
Atresia, choanal, repair/correction 45645-45646  
atresia/corrosive stricture, replacement for 43903  
Atrial chamber/s, operations for arrhythmia 38512, 38515  
Atticotomy 41533, 41536  
auditory canal, correction of 41521  
Auditory canal, external 41524  
auditory meatus, removal of exostoses 41518  
augmentation 38766  
Augmentation mammoplasty 45524, 45527-45528  
Aural polyp, removal of 41506  
aural, removal of 41506, 41509  
Autoconjunctival transplant 42641  
Avulsion, penis, repair of 37411  
Axilla, lymph glands, excision of 30332  
Axillary hyperhidrosis, excision for 30180, 30183  
Axillary hyperhidrosis, vessel, ligation/exploration, other 34103  
Axillofemoral graft, infected, excision of 34172

## B

Baker's cyst, excision of 30114  
Baker's, excision of 30114  
Balloon catheter, right heart, insertion of 13818  
balloon dilatation of 41832  
Balloon enteroscopy 30680, 30682, 30684, 30686  
balloon pump, insertion of 38362, 38609  
balloon pump, removal of 38612-38613  
bands or lingual tonsils, removal of 41804  
Bariatric Surgery 31569, 31572, 31575, 31578, 31581, 31584  
Bariatric surgery, surgical reversal of 31584  
Bartholin's abscess, incision of 35520  
Bartholin's, cautery destruction of 35517  
Bartholin's, excision of 35513  
Bartholin's, incision of 35520  
Bartholin's, marsupialisation of 35517  
base tumour, removal, infra-temporal 41581  
Bat ear or similar deformity, correction of 45659  
bed, reconstruction of laceration 46486  
benign lesion 31500, 31503  
benign, of soft tissue, removal 31350  
Bicornuate uterus, plastic reconstruction for 35680  
bicornuate, plastic reconstruction for 35680  
Bile duct, common, radical resection 30461, 30463-30464  
Biliary atresia, paediatric, portoenterostomy for 43978  
biliary dilatation 30495  
biliary drainage 30440, 30451, 30495  
biliary stenting 30492  
biliary/renal tract, extraction of 30450  
biopsies, multiple, with infracolic omentectomy 35726  
biopsy 30409, 30411-30412  
biopsy (closed) 36561  
biopsy of 30075, 30081, 30084, 30087, 42676  
biopsy of for suspected malignancy 35620  
biopsy of prostate 37212, 37218  
biopsy of solid tumour, vacuum-assisted, image guided 31530

biopsy of vertebra 30093  
biopsy of with hysteroscopy 35630  
biopsy of, with cystoscopy 36836  
biopsy of, with IUD insertion for idiopathic menorrhagia 35502  
Biopsy, aggressive bone/deep tissue tumour 50200-50201  
biopsy, by cardiac catheterisation 38275  
biopsy, deep organ, imaging guided 30094  
biopsy, using ABBI 31539, 31545  
bladder stress, suprapubic operation 37044  
Bladder, aspiration of, by needle 37041  
bladder, cystoscopic removal of 36833  
bladder, diathermy/resection with cystoscopy 36840, 36845  
bladder, endoscopic incision/resection 36854  
bladder, laser destruction with cystoscopy 36840  
bladder, removal of 36863  
Bladder, stress incontinence, sling procedure 37040, 37338  
blepharospasm 18369-18370, 18372, 18374  
blood pressure monitoring 13876  
body tumour, resection of 34148, 34151, 34154  
bone conduction hearing system 41603-41604  
bone graft to 50644  
bone grafting for pseudarthrosis 46405  
bone grafting of phalanx for 46402, 46405  
bone marrow 30081, 30084, 30087  
bone, benign, requiring allograft, resection of 50230  
Bone, cysts, injection into or aspiration of 47900  
bone, fracture, treatment of 45981, 47762, 47765, 47768  
47771  
bone, injection into or aspiration of 47900  
bone, innocent, excision of 30241  
bone, malignant, operations for 50200-50201, 50203, 50206  
50209, 50212, 50215, 50218, 50221, 50224, 50227, 50230  
50233, 50236, 50239  
bone, operation on, for osteomyelitis 43509, 43518  
bone, osteectomy or osteotomy of 48424, 48427  
bone, reconstruction of 45788  
bone, removal of styloid process of 30244  
bone, resection for removal of tumour 41584, 41587  
bones, bone grafting, pseudarthrosis 46402, 46405  
bones, fracture, treatment of 47735, 47738, 47741  
bones, operation for osteomyelitis 46462  
bones, osteotomy/osteectomy 46396, 46399  
Botulinum toxin, injection for 18350-18351, 18353-18354  
18360, 18362, 18365-18366, 18368-18370, 18372, 18374  
18377, 18379  
Boutonniere deformity, reconstruction of 46444, 46447  
bowel intubation 30488  
bowel strictureplasty 30564  
Bowel, colectomy, total 30608, 30622, 32009, 32012, 32015  
32018, 32021  
bowel, endoscopic examination of 32095  
Brachial fistula 43832  
Brachial plexus, exploration of 39333  
Brachial, removal of 30287  
Brachycephaly, cranial vault reconstruction for 45785  
Brachytherapy planning 15536  
brain, operations for 39703  
Branchial cyst, removal of 30286-30287  
branchial, removal of 30286, 30289  
breast 31530, 31533, 31548  
Breast, biopsy, fine needle, imaging guided 31533  
breast, correction of (unilateral) 45556

|  |                            |   |  |

| floor repair, laparoscopic or abdominal                    | 35595                                    | for arachnoidal cyst 39718                                 |
| Fluid Filled Cavity, drainage of                           | 16624                                    | for cardiopulmonary bypass 38600, 38603                    |
| fluid filled cavity, drainage of                           | 16624                                    | for congenital cystadenomatoid malformation 43861          |
| fluid reservoir, insertion of                              | 39018                                    | for congenital lobar emphysema 43861                       |
| focal spasticity   | 18360                                    | for control of post-operative haemorrhage 30385, 33845     |
| following gynaecological surgery, under GA                 | 35759                                    | for cordotomy or myelotomy 39124                           |
| following intraocular procedures                           | 42857                                    | for drainage 30394   |
| foot   | 49815, 49833, 49836-49839, 49842, 49845  | for grading of lymphoma 30384                              |
| foot deformities due to spasticity                         | 18354                                    | for gross intra-peritoneal sepsis 30396                    |
| Foot, amputation or disarticulation of                     | 44359, 44361, 44364                      | for implantable bone conduction hearing system 41603-41604 |
| For anaesthesia  | 20100, 20102, 20104, 20120, 20124, 20140 | for intussusception, paediatric 43933, 43936               |
| 20142-20148, 20160, 20162, 20164, 20170, 20172, 20174      |  | for neonatal conditions 43801, 43804, 43807, 43810, 43813  |
| 20176, 20190, 20192, 20210, 20212, 20214, 20216, 20220     |  | 43816, 43819, 43822, 43825, 43828, 43831                   |
| 20222, 20225, 20230, 20300, 20305, 20320-20321, 20330      |  | for oesophageal atresia, neonatal 43852                    |
| 20350, 20352, 20355, 20400-20406, 20410, 20420, 20440      |  | for osteomyelitis/removal infected bone 39906              |
| 20450, 20452, 20470, 20472, 20474-20475, 20500, 20520      |  | For prostate cancer 15338, 15513, 15539, 37220             |
| 20522, 20524, 20526, 20528, 20540, 20542, 20546, 20548     |  | for removal of thymus or mediastinal tumour 38446          |
| 20560, 20600, 20604, 20620, 20622, 20630, 20632, 20634     |  | for reopening post-op for haemorrhage/swelling 39721       |
| 20670, 20680, 20690, 20700, 20702-20706, 20730, 20740      |  | for retrograde cerebral perfusion 38577                    |
| 20745, 20750, 20752, 20754, 20756, 20770, 20790-20794      |  | for staging of gynaecological malignancy 35726             |
| 20798-20800, 20802-20806, 20810, 20815, 20820, 20830       |  | for supercharging of pedicled flaps 45561                  |
| 20832, 20840-20842, 20844-20848, 20850, 20855, 20860       |  | for symblepharon 45629                                     |
| 20862-20864, 20866-20868, 20880, 20882, 20884, 20886       |  | for thrombosis 33845                                       |
| 20900, 20902, 20904-20906, 20910-20912, 20914, 20916       |  | for trauma, involving 3 or more organs 30388               |
| 20920, 20924, 20926, 20928, 20930, 20932, 20934, 20936     |  | for trichiasis 42587-42588                                 |
| 20938, 20940, 20942-20944, 20946, 20948, 20950             |  | for tumour 36532   |
| 20952-20954, 20956, 20958, 20960, 21100, 21110, 21112      |  | for tumour, complicated 36533                              |
| 21114, 21116, 21120, 21130, 21140, 21150, 21155, 21160     |  | Foramen Magnum, tumour or vascular lesion, excision 39662  |
| 21170, 21195, 21199-21200, 21202, 21210, 21212, 21214      |  | Forearm, amputation or disarticulation of 44328            |
| 21216, 21220, 21230, 21232, 21234, 21260, 21270, 21272     |  | forearm, wrist & hand 21800, 21810, 21820, 21830, 21832    |
| 21274-21275, 21280, 21300, 21321, 21340, 21360, 21380      |  | 21834, 21840, 21842, 21850, 21860, 21865, 21870, 21872     |
| 21382, 21390, 21392, 21400, 21402-21404, 21420, 21430      |  | foreign body in cornea or sclera, removal of 42644         |
| 21432, 21440, 21445, 21460-21462, 21464, 21472, 21474      |  | foreign body in, removal of 42563, 42569                   |
| 21480, 21482, 21484, 21486, 21490, 21500, 21502, 21520     |  | foreign body in, removal of, other than simple 41659       |
| 21522, 21530, 21532, 21535, 21600, 21610, 21620, 21622     |  | foreign body in, superficial, removal of 30061             |
| 21630, 21632, 21634, 21636, 21638, 21650, 21652, 21654     |  | Foreign body, antrum, removal of 41716                     |
| 21656, 21670, 21680, 21682, 21685, 21700, 21710, 21712     |  | foreign body, removal not otherwise covered 30064          |
| 21714, 21716, 21730, 21732, 21740, 21756, 21760, 21770     |  | foreign body, removal of 42563, 42569                      |
| 21772, 21780, 21785, 21790, 21800, 21810, 21820, 21830     |  | foreign, insertion for contour reconstruction 45051        |
| 21832, 21834, 21840, 21842, 21850, 21860, 21865, 21870     |  | formation of, including endoscopic procedures 41885        |
| 21872, 21878-21887, 21900, 21906, 21908, 21910, 21912      |  | fracture, treatment of 47348, 47351, 47378, 47381          |

fractured, operations for 39606, 39609, 39612, 39615  
fractures, treatment by reduction 47663, 47666, 47672  
47678  
free fascia for facial nerve paralysis 45575, 45578  
free grafting 45406, 45409, 45412, 45415, 45418, 45439  
45442, 45445, 45448, 45451, 45460-45462, 45464-45466  
45468-45469, 45471-45472, 45474-45475, 45477-45478  
45480-45481, 45483-45494  
Free grafts 45400, 45403, 45406, 45409, 45412, 45415, 45418  
45439, 45442, 45445, 45448, 45451, 45460-45462  
45464-45466, 45468-45469, 45471-45472, 45474-45475  
45477-45478, 45480-45481, 45483-45494  
free tissue transfer, complete revision of 45497  
free tissue transfer, first stage revision of 45498  
free tissue transfer, revision of 45496-45499  
free tissue transfer, second stage revision 45499  
free transfer of 45563-45565  
free, split skin 45400, 45403, 45406, 45409, 45412, 45415  
45418, 45439, 45442, 45445, 45448, 45451, 45460-45462  
45464-45466, 45468-45469, 45471-45472, 45474-45475  
45477-45478, 45480-45481, 45483-45494  
frenuloplasty 37435  
Frenulum, mandibular or maxillary, repair 30281  
frenulum, repair of 30281  
frontal sinus 41740  
Frontal sinus, catheterisation of 41740  
frontal, catheterisation of 41740  
frontal, radical obliteration of 41746  
frontal, trephine of 41743  
Fronto-ethmoidectomy, radical 41734  
Fronto-nasal ethmoidectomy 41731  
Fronto-orbital advancement 45782, 45785  
fronto-radical 41734  
full face chemical peel 45019  
Full thickness grafts, free 45451  
full thickness laceration, repair 30052  
full thickness laceration, repair of 30052  
full thickness repair of laceration (restriction) 30052  
full thickness wedge excision 45665  
full thickness wedge excision of 45665  
Fundoplasty/plication, antireflux operation 30527  
30529-30530  
Funnel chest, elevation of 38457-38458  
Furuncle, incision with drainage of 30219, 30223

## G

Gallbladder, drainage of 30375  
Galvanocautery of skin lesions 30192  
Gamete intra-fallopian transfer 13200, 13203, 13206, 13209  
13212, 13215, 13218, 13221  
Ganglion, excision of 30107  
ganglion, excision of 46494  
Gangliotomy, radiofrequency trigeminal 39109  
Gangrenous tissue, debridement of 35100, 35103  
Gartner duct cyst, removal of 35557  
Gastrectomy, partial 30518  
Gastrectomy, sleeve 31575  
Gastric band reservoir, adjustment of 31590  
Gastric band, adjustable, placement of 31569  
Gastric band, adjustment of 31587  
Gastric bypass by Roux-en-Y 31572

Gastric bypass, by Biliopancreatic diversion, with or without  
duodenal switch 31581  
gastric ulcer, suture of 30375  
gastric, in the treatment of ingested poison 14200  
gastric, perforated, suture of 30375  
gastric, removal of 30520  
Gastro-camera investigation 30473  
Gastro-oesophageal balloon intubation 13506  
gastrocnemius aponeurosis, operation for lengthening 49728  
Gastroduodenal stricture, balloon dilatation 30475  
Gastroduodenostomy 30515  
Gastroenterostomy 30515  
Gastroplasty 31578  
Gastroschisis, operations for 43864, 43867  
Gastroscopy 30473, 30478  
gastrostomy 30375  
Gastrostomy button, non-endoscopic insertion/replacement 30483,  
30636  
gastrostomy tube, jejunal extension 31460  
gastrostomy, percutaneous 30481-30482  
Genioplasty 45761  
genito-urinary, repair 35596  
Gilliam's operation 35684  
gland bearing area, excision of 30180, 30183  
gland tumour, excision of 30324  
gland, excision of palpebral lobe 42593  
gland, extirpation of 30256, 30259  
gland, meatotomy or marsupialisation 30266  
gland, operations on 30262, 30266, 30269  
gland, superficial lobectomy/removal of tumour 30253  
gland, total extirpation of 30247, 30250  
glands, biopsy of 30075, 30078  
glands, groin, excision of 30329-30330  
glands, pelvic, radical excision of 35551  
Glaucoma, filtering and allied operations for 42746, 42749  
Glenoid fossa, reconstruction of 45788  
Glioma, craniotomy for removal of 39709  
Globe of eye, evisceration of 42512, 42515  
globe of, evisceration of 42512  
Glomus tumour, transmastoid removal of 41623  
glomus, removal of 41620, 41623  
Glossectomy, with partial pharyngectomy 41785  
Gonadal dysgenesis, vaginoplasty for 37851  
Goniotomy 42758  
gracilis neosphincter 32210  
graciloplasty 32203, 32209  
Graciloplasty procedures 32200, 32203, 32206, 32209-32210  
graciloplasty, insert. stimulator & electrode 32209  
graciloplasty, insertion of 32206  
graciloplasty, insertion of stimulator & electrode 32209  
Graffenberg's (or Graf) ring, introduction of 35503  
graft 45018  
graft for priapism 37396  
graft over cornea 42638  
graft to femur 48200, 48203  
graft to humerus 48212, 48215  
graft to lid 42860  
graft to nerve trunk 39315  
graft to orbit 42524  
graft to other bones 48239  
graft to phalanx or metacarpal 46402, 46405  
graft to radius and ulna 48221

graft to radius or ulna 48218, 48224, 48227  
 graft to scaphoid 48230, 48233, 48236  
 graft to tibia 48206, 48209  
 Graft, axillo-femoral, infected, excision of 34172  
 graft, harvesting of 47726, 47729, 47732  
 graft, infected, excision of 34172  
 graft, infected, of extremities, excision of 34175  
 graft, infected, of neck, excision of 34157  
 graft, infected, of trunk, excision of 34169  
 graft, with internal fixation 48242  
 grafting for aneurysm 33050, 33055  
 grafting for symblepharon 45629  
 grafting to artery or vein 33545, 33548  
 grafting, arterial, for occlusive arterial disease 32700  
 32703, 32708, 32710-32712, 32715, 32718, 32721, 32724  
 32730, 32733, 32736, 32739, 32742, 32745, 32748, 32751  
 32754, 32757, 32760, 32763  
 grafting, cross leg, saphenous to iliac or femoral vein 34806  
 Granuloma, cautery of 42677  
 granuloma, excision under GA 43948  
 granulomatous disease 44130  
 granuloplasty, meatal advancement 37818-37819  
 Gravid uterus, evacuation of contents by curettage 35643  
 gravid, evacuation of contents 35643  
 Great vessel, intrathoracic operation on, other 38456  
 Great vessel, ligation or exploration, other 34103  
 Greater trochanter, transplant of ileopsoas tendon 50121  
 greater trochanter, transplantation of 50121  
 Groin, lymph, excision of 30329-30330  
 growth retardation, attendance for 16508  
 growth stimulator 45821  
 Gunderson flap operation 42638  
 Gynaecological examination under GA 35500  
 gynaecological, radical or debulking operation 35720  
 Gynatresia, vaginal reconstruction for 35565

## H

Haemangioma, cauterisation of (restriction) 45027  
 Haemapheresis 13750, 13755  
 Haematoma, aspiration of 30216  
 haematoma, drainage of 30387  
 Haemochromatosis 13757  
 Haemodialysis, in hospital 13100, 13103  
 Haemofiltration, continuous (ICU) 13885, 13888  
 Haemoperfusion, in hospital 13100, 13103  
 Haemorrhage, antepartum, treatment of 16509  
 haemorrhage, arrest of 41656, 41677  
 haemorrhage, burr-hole craniotomy for 39600, 39603  
 Haemorrhoidectomy 32138-32139  
 Hair transplants, congenital/traumatic alopecia 45560  
 Hallux rigidus/valgus, correction of 49821, 49824, 49827  
 49830, 49833, 49836-49839, 49842  
 hallux valgus or hallux rigidus, correction of 49821  
 49824, 49827, 49830, 49833, 49836-49839, 49842  
 hammer or claw, correction of 49848, 49851  
 Hammer toe, correction of 49848  
 hamstring tendon transfer 50357, 50360  
 Hand, amputation or disarticulation of 44325, 44328  
 hand, excision of 46494-46495, 46498  
 Hartmann's operation 32030  
 harvesting for coronary bypass 38496

harvesting, leg/arm, for bypass, not same limb 32760  
 harvesting, leg/arm, for patch graft, not same incision 33551  
 head 20100, 20102, 20104, 20120, 20124, 20140, 20142-20148  
 20160, 20162, 20164, 20170, 20172, 20174, 20176, 20190  
 20192, 20210, 20212, 20214, 20216, 20220, 20222, 20225  
 Heart arrhythmia, ablation of 38287, 38290, 38293  
 heart disease, operations for 38700, 38703, 38706, 38709  
 38712, 38715, 38718, 38721, 38724, 38727, 38730, 38733  
 38736, 38739, 38742, 38745, 38748, 38751, 38754, 38757  
 38760, 38763, 38766  
 Heller's operation 30532-30533  
 hemi-arthroplasty of 48915  
 hemi-mandibular reconstruction with bone graft 45608  
 hemiarthroplasty of 49517  
 Hemiarthroplasty, hand 46309, 46312, 46315, 46318, 46321  
 Hemicircumcision, for hypospadias 37354  
 Hemicolectomy 32000, 32003, 32006  
 hemicolectomy 32000, 32003, 32006  
 Hemiepiphysis, staple arrest of 48509  
 Hemifacial microsomia, construction condyle and ramus 45791  
 hemifacial spasm 18350-18351  
 Hemilaryngectomy, vertical, with tracheostomy 41837  
 Hemispherectomy, for intractible epilepsy 40706  
 Hemithyroidectomy 30306  
 Hemivulvectomy 35536  
 Hepatic duct, common, resection for carcinoma 30463-30464  
 hepatic, destruction of liver tumours 30419  
 Hernia, antireflux operations for 30527, 30529-30530, 43838  
 43841  
 Hernia, epigastric or Linea Alba Hernia 43805  
 hernia, repair of 30403, 30600-30601, 30609, 30614, 30621  
 hernia, repair, age less than 3 months 44108, 44111, 44114  
 Hernia, scrotal, large and irreducible, repair of 30640  
 Herniated muscle, fascia, deep, repair of 30238  
 Hiatus hernia, antireflux operations for 30527, 30529-30530  
 Hickman catheter, insertion of, for chemotherapy 34527-34528  
 High dose rate brachytherapy 37227  
 high energy transurethral microwave thermotherapy 37230  
 37233  
 Hindquarter, amputation or disarticulation of 44373  
 Hinselmann colposcope, examination uterine cervix 35614  
 hip 49303, 49306, 49309, 49312, 49315, 49318-49319, 49321  
 49324, 49327, 49330, 49333, 49346, 49360, 49363, 49366  
 Hip, amputation or disarticulation at 44370  
 Hirschsprung's disease, colostomy/enterostomy for 30375  
 Home, dialysis 13104  
 Hormone implantation, by cannula 14206  
 hormone or living tissue 14203, 14206  
 humerus 48412, 48415  
 Humerus, bone graft to 48212, 48215  
 Hummelsheim type muscle transplant, squint 42848  
 Hydatid cyst, liver, total excision of 30437-30438  
 hydatid cyst, removal of contents of 30434, 30436  
 hydatid cyst, total excision of 30437-30438  
 hydatid cysts of lung 38424  
 hydatid cysts, enucleation of 38424  
 hydatid, liver, treatment of 30434, 30436-30438  
 hydatid, lungs, enucleation of 38424  
 Hydradenitis, excision for 31245  
 Hydrocele, infantile, repair of 30614  
 Hydrocephalus, operations for 40000, 40003, 40006, 40009  
 Hydrocortisone, injections into keloid with GA 30210

|   |  |  |                                   |
|---|--|--|-----------------------------------|
| Hydrodilatation of bladder with cystoscopy            | 36827  | in oral & maxillofacial, uncomplicated, removal of     | 45801                             |
| Hydrotubation of Fallopian tubes                      | 35703, 35709                                   | 45803, 45805, 45807, 45809                             |                                   |

joint, manipulation of 45851  
 joint, open surgical exploration of 45861, 45863, 45865  
 45867, 45869, 45871, 45873  
 joint, other 50100, 50102-50103, 50109, 50127  
 joint, synovectomy of 46342  
 joint, synovectomy/capsulectomy/debridement 46336  
 joint, total replacement arthroplasty of 46309, 46312  
 46315, 46318, 46321  
 joint, total replacement of 49857  
 joint, volar plate arthroplasty 46307  
 juice, collection of 30488  
 Juvenile cataract, removal of 42716  
 juxtasceral Depot injection 42741

## K

Keratotomy, partial, for corneal scars 42647  
 Keratoplasty 42653, 42656  
 keratoplasty, epithelial debridement for 42651  
 Keratosis, obturans, surgical removal 41509  
 Kidney, dialysis, in hospital 13100, 13103  
 kidney, removal from 36558  
 kidney, removal of 36540, 36543  
 Kirschner wire, insertion of 47921  
 knee 49500, 49509, 49512, 49517-49519, 49521, 49524, 49527  
 49530, 49533-49534, 49545, 49557-49564, 49566  
 knee & popliteal area 21300, 21321, 21340, 21360, 21380  
 21382, 21390, 21392, 21400, 21402-21404, 21420, 21430  
 21432, 21440  
 Knee, amputation at or below 44367  
 knee, removal of 49515

## L

Labyrinth, destruction of 41572  
 Labyrinthotomy 41572  
 Laceration, ear/eyelid/nose/lip, full thickness, repair 30052  
 lacerations not involving sclera 30032  
 Lacrimal canalicular system, establishment patency 42599  
 42602  
 lacrimal, excision of palpebral lobe 42593  
 Lagrange's operation (iridectomy and sclerectomy) 42746  
 Laminectomy and insertion of epidural implant 39139  
 Laparoscopic division of adhesions 31450, 31452, 35637  
 laparoscopic 30391, 31470, 35638  
 Laparoscopic resection of 35641  
 laparoscopically assisted 35750, 35753-35754, 35756  
 laparoscopically assisted hysterectomy 35750, 35753-35754  
 35756  
 Laparoscopy and hysteroscopy under GA 35636  
 laparoscopy, complicated 35641  
 Laparoscopy, diagnostic 30627  
 Laparostomy 30397, 30399  
 Laparotomy and division of adhesions 30376, 30378-30379  
 30623, 30626  
 laparotomy for drainage of 30394  
 Large intestine, resection of 32000, 32003  
 large loop excision 35647-35648  
 large, excision of 30111  
 large, incision and drainage, with GA 30223  
 large, resection of 32000, 32003  
 large, subtotal colectomy 32004-32005

Laryngeal web, division of 41868  
 Laryngectomy 41834  
 Laryngofissure, external operation on 41876  
 Laryngopharyngectomy 41843  
 Laryngoplasty 41876, 41879  
 Laryngoscopy 41846  
 Larynx, direct examination of 41846  
 laser 30191, 42785  
 laser ablation of prostate 37207-37208  
 laser angioplasty 35315  
 laser photocoagulation 42806  
 laser resection of endobronchial tumours 41901  
 laser therapy (restriction applies) 35539, 35542, 35545  
 laser therapy for intraepithelial neoplasia 35539, 35542  
 35545  
 laser therapy of gastrointestinal tract 30479  
 laser therapy, intraepithelial neoplasia 35539, 35542  
 35545  
 Laser: ablation of prostate, endoscopic 37207-37208  
 Lateral pharyngeal bands, removal of 41804  
 Lavage and proof puncture of maxillary antrum 41698, 41701  
 lavage in the treatment of ingested poison 14200  
 lavage, total, intra-operative 32186  
 Le Fort osteotomies 45753-45754  
 leaflet/s, aortic, decalcification of 38483  
 left ventricular, plication of 38506  
 left ventricular, resection 38507-38508  
 Leg, amputation 44367, 44370  
 leg, lower (below knee) 21460-21462, 21464, 21472, 21474  
 21480, 21482, 21484, 21486, 21490, 21500, 21502, 21520  
 21522, 21530, 21532  
 leg, upper (except knee) 21195, 21199-21200, 21202, 21210  
 21212, 21214, 21216, 21220, 21230, 21232, 21234, 21260  
 21270, 21272, 21274-21275, 21280  
 lengthening by translocation of corpora 37423  
 lengthening procedures 50303, 50306  
 Lens, artificial, insertion of 42701, 42703  
 lens, insertion of 42701  
 lens, removal of 42704  
 lens, removal, replacement different lens 42707  
 lens, repositioning of, open operation 42704  
 Lensectomy 42731  
 lesion, pre-op localisation, for ABBI 31542  
 lesion, pre-op localisation, imaging guided 31536  
 lesion/s, removal, diaphyseal aclasia 50426  
 lesions, multiple injections for 30207  
 Lesions, skin, multiple injections for 30207  
 lesions, treatment of 30192  
 Leveen shunt, insertion of 30408  
 Lid, ophthalmic, suturing of 42584  
 ligament or tendon transfer 49503, 49506  
 Ligament, finger joint, repair of 46333  
 ligament, transverse, division of 39331  
 ligamentous stabilisation of 49103, 49709  
 ligation of maxillary artery 41707  
 ligation or exploration not otherwise covered 34106  
 Ligation, great vessel 34103  
 ligation/exploration not otherwise covered 34106  
 Ligature of cervix, purse string, removal of 16512  
 light coagulation for 42782  
 limb, debridement of superficial tissue 35103  
 Limb, fasciotomy of 30226

| Stenosis, arteriovenous fistula/access device, correction of | 34518                                 | subdural, tap for  | 39009                     |
| stenosis, duodeno-duodenostomy/jejunostomy                   | 43807                                 | Sublingual gland, duct, removal of calculus                | 30266                     |
| stenosis, patch angioplasty for                              | 34815                                 | sublingual, extirpation of                                 | 30259                     |
| stent insertion  | 35306, 35309                          | sublingual/salivary gland duct, removal of                 | 30266                     |
| stent, application   | 34824, 34827, 34830, 34833            | Submandibular abscess, incision of                         | 30223                     |

submandibular, extirpation of 30256  
 Submaxillary gland, repair of cutaneous fistula 30269  
   submucous resection of 41692  
 Submucous resection of nasal septum 41671  
   subperiosteal 43500, 43503, 43506, 43509, 43512, 43515  
     43518, 43521, 43524  
 Subperiosteal abscess 43500, 43503, 43506, 43509, 43512  
   43515, 43518, 43521, 43524  
 Subphrenic abscess, laparotomy for drainage of 30394  
   subphrenic, laparotomy for drainage 30394  
 Subtalar arthrodesis 50118  
   subtalar joint 50118  
   subtalar, arthrodesis of 50118  
   subtemporal 40015  
 Subtemporal decompression 40015  
 Subungual haematoma, incision of 30219  
   subvalvular structures, reconstruction, re-implantation 38490  
 Suction biopsy of rectum 30071  
   superficial 15000, 15003, 15006, 15009, 15012  
   superficial, of parotid gland 30253  
   superficial, removal of 30061  
   supervision in home 13104  
   supervision in hospital 13100, 13103  
   support procedures 13815, 13818, 13830, 13839, 13842  
     13847-13848, 13851, 13854, 13857, 38362, 38600, 38603  
     38609, 38612-38613, 38615, 38618, 38621, 38624  
   supraglottic 41840  
 Supraglottic laryngectomy with tracheostomy 41840  
 Suprapubic cystostomy or cystotomy 37008  
   suprapubic procedure for 37044  
   surgery 38390, 38393, 38512, 38515, 38518, 42702, 43801  
     43804, 43807, 43810, 43813, 43816, 43819, 43822  
   surgery for congenital heart disease 38700, 38703, 38706  
     38709, 38712, 38715, 38718, 38721, 38724, 38727, 38730  
     38733, 38736, 38739, 38742, 38745, 38748, 38751, 38754  
     38757, 38760, 38763, 38766  
   surgery for penile drainage causing impotence 37420  
   surgery, for congenital heart disease 38700, 38703, 38706  
     38709, 38712, 38715, 38718, 38721, 38724, 38727, 38730  
     38733, 38736, 38739, 38742, 38745, 38748, 38751, 38754  
     38757, 38760, 38763, 38766  
   surgery, open, not otherwise covered 38653  
   surgery, re-operation via median sternotomy 38640  
   surgical 35000, 35003, 35006, 35009, 35012  
 Surgical reduction of enlarged elements, macrodactyly 46510  
 Suspension of uterus 35684  
   suspension or fixation of 35684  
 Suture, laser division of, eye, following trabeculoplasty 42794  
   suture, running, manipulation of 42667  
 Sutures, adjustable, readjustment of, for squint 42845  
   sutures, removal of 42668  
 Swann-Ganz catheterisation 13818  
 Sycosis barbae/nuchae, excision of 31245  
 Symblepharon, grafting for 45629  
 Syme's amputation of foot 44361  
   sympathectomy 35000, 35003, 35006, 35009, 35012  
 Symphysis pubis, fracture, treatment of 47474, 47477, 47480  
   47483, 47486, 47489  
 Synacthen stimulation testing 30097  
 Synechiae, division of 42761  
   synechiae, division of 42761  
   synovectomy of 45867, 48936, 49509, 50312

## T

synovectomy of tendon/s 46348, 46351, 46354, 46357, 46360  
   synovectomy of, not otherwise covered 50104  
 Synovectomy, of ankle 50312  
   tags, anal, excision of 32142, 32145

Talipes equinovarus, cast/manipulation/splint 49878  
 Talus fracture, treatment of 47606, 47609, 47612, 47615  
   47618  
   tantalum marker, insertion and removal 42805  
 Tantalum markers, surgical insertion of 42805  
   tapping of 30628  
   tarsal cauterisation for 42581  
   tarsal, extirpation of 42575  
 Tarsometatarsal joint, fracture, treatment of 47621, 47624  
 Tarsorrhaphy 42584  
   tarsorrhaphy 42584  
   tarsus 48406, 48409  
 Tarsus, dislocation, treatment of 47063, 47066  
   tarsus, for ectropian/entropian 42581  
 Tear duct, probing of 42610-42611, 42614-42615  
 Teflon injection, into vocal cord 41870  
 Temporal artery, biopsy of 34109  
   temporal, biopsy of 34109  
   temporo-mandibular 45755  
   temporomandibular joint 45758  
 Temporomandibular joint, arthroplasty 45758  
   tenckhoff peritoneal dialysis, removal of 13110  
 Tendon 49718, 49721, 49724, 49727  
   tendon of hand, tenolysis of 46450  
   tendon of, repair of 49800, 49803  
   tendon or ligament transplantation of 49812  
   tendon pulley, reconstruction 46411  
   tendon sheath, finger or thumb, open operation 46522  
   tendon sheath, open operation 46363  
   tendon sheath, operation for tendovaginitis 46363  
   tendon transfer for restoration of function 46417  
   tendon, hand, tenolysis of 46453  
   tendon, hand/wrist, synovectomy of 46339  
   tendon, removal of 30068  
   tendon, repair of 46420, 46423, 46426, 46429, 46432, 46435  
     49718, 49721, 49724  
   tendon, synovectomy of 46339  
   tendon, wrist, repair of 46426, 46429  
   tendon/s, digit, synovectomy of 46348, 46351, 46354, 46357  
     46360  
 Tenolysis, hand 46450, 46453  
 Tenoplasty 47963  
 Tenosynovectomy 47969  
 Tenosynovitis, open operation, tendon sheath hand/wrist 46363  
 Tenotomy 47960, 47963, 49806, 49809  
   tenotomy 47960  
   tenotomy of 49806, 49809  
 Tenovaginitis, open operation for 46363, 47972  
 Teratoma, mediastinal, thoracotomy and excision 43912  
   teratoma, neonatal, excision of 43876, 43879  
 Testicular implant 45051  
 Testis, exploration of 37604, 37810, 37813  
 Testopexy 37803  
 Tethered cord, release of 40112  
 Thenar spaces of hand, drainage of 46519

| to prepare bypass site for anastomosis                    | 33554  | Transluminal balloon angioplasty                        | 35300, 35303               |
| to retina, independent procedure                          | 42818  | Transmastoid decompression of endolymphatic sac         | 41590                      |
| Toe, amputation or disarticulation of                     | 44338, 44342, 44346                            | Transmetacarpal amputation of hand                      | 44325                      |
| 44350, 44354, 44358                                       |  | Transmetatarsal amputation of foot                      | 44364                      |
| toe, fracture, treatment of                               | 47663, 47666, 47672, 47678                     | Transorbital ligation of ethmoidal arteries             | 41725                      |
| Toenail, ingrowing, excision or resection for             | 47915-47916                                    | transplant  | 36503, 36506, 36509        |
| 47918   |  | transplant (Hummelsheim type), for squint               | 42848                      |
| toilet, using operating microscope                        | 41647  | transplant to restore valvular function                 | 34821                      |

# **CATEGORY 4: ORAL AND MAXILLOFACIAL SERVICES**

## SUMMARY OF CHANGES FROM 14/09/2019

The 14/09/2019 changes to the MBS are summarised below and are identified in the Schedule pages by one or more of the following words appearing above the item number:

- |                         |       |
|-------------------------|-------|
| (a) new item            | New   |
| (b) amended description | Amend |
| (c) fee amended         | Fee   |
| (d) item number changed | Renum |
| (e) EMSN changed        | EMSN  |

There are no changes to this Category for 14/09/2019.

## **ORAL AND MAXILLOFACIAL SERVICES NOTES**

### **ON.1.1 Benefits for Medical Services Performed by Approved Dental Practitioners**

Under the provisions of the *Health Insurance Act 1973* (the Act), Medicare benefits are payable where an eligible person incurs medical expenses in respect of certain professional services rendered by a approved dental practitioner approved before 1 November 2004.

Category 4 is restricted to those dental practitioners who were approved by the Minister prior to 1 November 2004 for the provision of oral and maxillofacial surgery services and relevant attendances.

Approved dental practitioners may also request certain diagnostic imaging services - refer to Category 5 - Diagnostic Imaging Services for more information.

### **ON.1.2 Changes to the Scheme Effective from 1 November 2004**

From 1 November 2004, access to Category 4 is restricted to those dental practitioners who were approved by the Minister prior to 1 November 2004. No new approvals will be granted after that date.

#### Background

Since 2000, practitioners performing oral and maxillofacial surgery in Australia are required to have both dental and medical qualifications in order to sit for their FRACDS(OMS) exam. This effectively means that since then, any practitioner who has obtained an FRACDS(OMS) or equivalent can access Category 3 of the MBS because they are medically qualified. The Government, in consultation with the Australian and New Zealand Association of Oral and Maxillofacial Surgeons, the Australian Dental Association, the Royal Australian College of Surgeons, the Royal Australian College of Dental Surgeons and the Australian Medical Association, has agreed that access by new practitioners to Category 4 will be withdrawn from 1 November 2004. Practitioners who were approved prior to that date will continue to have access to Category 4. The long-term proposal is that once all practitioners who currently access Category 4 have left the workforce, Category 4 will be removed from the Medicare Benefits Schedule.

Details of the services attracting Medicare benefits are set out in the Medicare Benefits Schedule.

### **ON.2.1 Definition of Oral and Maxillofacial Surgery**

Oral and Maxillofacial Surgery is defined as the surgical specialty which deals with the diagnosis, surgical and adjunctive treatment of diseases, injuries and defects of the oral and maxillofacial region.

### **ON.2.2 Services That Can Be Provided**

Dental practitioners holding the FRACDS (OMS) or equivalent who were approved by the Minister prior to 1 November 2004 may perform prescribed oral and maxillofacial services listed in this category. All dental practitioners approved for the purposes of subsection 3(1) of the Act are also recognised to perform those items of oral and maxillofacial surgery listed in Group C2 of the booklet "Medicare Benefits for Treatment of Cleft Lip and Cleft Palate Conditions".

It is emphasised that -

- the sole purpose of granting approval to dental practitioners is to enable payment of Medicare benefits;
- the services set out in Groups 01 to 011 of the Medicare Benefits Schedule book, and in the Cleft Lip and Cleft Palate Schedule are the only ones for which Medicare benefits are payable when the services are performed by an eligible dental practitioner.

### **ON.3.1 Principles of Interpretation**

Each professional service listed in the Schedule is a complete medical service in itself. Where a service is rendered partly by one practitioner and partly by another, only the one amount of benefit is payable.

### **ON.3.2 Multiple Operation Rule**

The Schedule fees for two or more operations performed on a patient on the one occasion are calculated by the following rule:-

100% for the item with the greatest Schedule fee, plus 50% for the item with the next greatest Schedule fee, plus 25% for each other item.

#### **NOTE:**

1. Fees so calculated which result in a sum which is not a multiple of 5 cents are to be taken to the next higher multiple of 5 cents
2. Where two or more operations performed on the one occasion have fees which are equal, one of these amounts shall be treated as being greater than the other or others of those amounts.
3. The Schedule fee for benefits purposes is the aggregate of the fees calculated in accordance with the above formula.

The above rule does not apply to an operation which is one of two or more operations performed under the one anaesthetic on the same patient by different dental practitioners unless either practitioner assists the other. In this case, the fees and benefits specified in the Schedule apply. For these purposes the term "operation" includes all services in Groups O3 to O9.

If the operation comprises a combination of procedures which are commonly performed together and for which a specific combined item is provided in the Schedule, it is regarded as the one item and service in applying the multiple operation rule.

### **ON.3.3 After Care (Post-operative Treatment)**

The fee specified for each of the operations listed in the Schedule contains a component for the consequential after-care customarily provided unless otherwise indicated. After-care is deemed to include all post-operative treatment rendered by practitioners and need not necessarily be limited to treatment given by the approved dental practitioner or to treatment given by any one practitioner. This does not preclude, however, the payment of benefit for professional services for the treatment by a dental practitioner of an intercurrent condition or an unusual complication arising from the operation.

Some minor operations are merely stages in the treatment of a particular condition. Professional services by dental practitioners subsequent to such operations should not be regarded as after-care but rather as continuation of the treatment of the original condition and should attract benefit. Item 52057 is a service to which this policy applies.

### **ON.3.4 Administration of Anaesthetics by Medical Practitioners**

When a medical practitioner administers an anaesthetic in connection with a procedure prescribed for the payment of Medicare benefits (and the procedure has been performed by an approved dental practitioner), Medicare benefits are payable for the administration of the anaesthetic on the same basis as if the procedure had been rendered by a medical practitioner.

The Schedule fee for anaesthesia is established using the RVG schedule at Category 3 - Group T10.

Before the payment of benefits for the administration of anaesthesia, or for the services of an assistant anaesthetist, a number of additional details are required on the anaesthetist's account:

- The anaesthetist's account must show the name/s of the medical practitioner/s who performed the associated operation/s. Also, where the after hours emergency modifier applies to the anaesthesia service, the account must include the start time, the end time and the total time of the anaesthesia;
- The assistant anaesthetist's account must show the name/s of the medical practitioners who performed the associated operation/s, as well as the name of the principle anaesthetist. In addition, where the after hours

emergency modifier applies, the assistant anaesthetist's account must record the start time, the end time and the total time for which he or she was providing professional attention to the patient during the anaesthesia.

#### **ON.4.1 Consultations - (Items 51700 and 51703)**

The consultation item numbers (51700 and 51703) are to be used by approved dental practitioners in the practice of oral and maxillofacial surgery.

The referral must be from a registered dental practitioner or a medical practitioner.

#### **ON.4.2 Assistance at Operations - (Items 51800 and 51803)**

Items covering operations which are eligible for benefits for assistance by an approved dental practitioner in the practice of oral and maxillofacial surgery or surgical assistance have been identified by the inclusion of the word "Assist" in the item description. Medicare benefits are not payable for surgical assistance associated with procedures which have not been so identified.

The assistance must be rendered by a practitioner other than the surgeon, the anaesthetist or the assistant anaesthetist.

Where more than one practitioner provides assistance to an approved dental practitioner no additional benefits are payable. The assistance benefit is the same irrespective of the number of practitioners providing assistance.

##### Benefits payable under item 51800

Medicare benefits are payable under Item 51800 for assistance rendered at the following procedures:

51900, 51904, 52010, 52018, 52039, 52048, 52051, 52062, 52063, 52066, 52078, 52090, 52092, 52095, 52105, 52108, 52111, 52130, 52138, 52141, 52144, 52147, 52182, 52300, 52303, 52312, 52315, 52321, 52324, 52336, 52339, 52424, 52440, 52452, 52480, 52482, 52600, 52603, 52609, 52612, 52615, 52624, 52626, 52627, 52800, 52803, 52806, 52809, 52818, 52824, 52828, 52830, 53006, 53009, 53016, 53215, 53220, 53225, 53226, 53236, 53239, 53242, 53406, 53409, 53412, 53413, 53415, 53416, 53453, 53460.

Where assistance with any of the above procedures is provided by a medical practitioner, benefits are payable under item 51300.

##### Benefits payable under Item 51803

Medicare benefits are payable under Item 51803 for assistance rendered at the following procedures:

51906, 52054, 52094, 52114, 52117, 52120, 52122, 52123, 52126, 52129, 52131, 52148, 52158, 52184, 52186, 52306, 52330, 52333, 52337, 52342, 52345, 52348, 52351, 52354, 52357, 52360, 52363, 52366, 52369, 52372, 52375, 52378, 52379, 52380, 52382, 52430, 52442, 52444, 52446, 52456, 52484, 52618, 52621, 52812, 52815, 52821, 52832, 53015, 53017, 53019, 53209, 53212, 53218, 53221, 53224, 53227, 53230, 53233, 53414, 53418, 53419, 53422, 53423, 53424, 53425, 53427, 53429, 53455.

or at a combination of procedures (including those identified as payable under item 51800 above) for which the aggregate fee exceeds the amount specified in the item.

Where assistance with any of the above procedures is provided by a medical practitioner, benefits are payable under Item 51303.

##### Assistance at multiple operations

Where assistance is provided at two or more operations performed on a patient on the one occasion the multi operation formula is applied to all the operations to determine the surgical fee payable to each approved dental practitioner. The multi-operation formula is then applied to those items at which assistance was rendered and for which Medicare benefits for assistance is payable to determine the abated fee level for assistance. The abated fee is

used to determine the appropriate Schedule item covering the surgical assistance (ie either Items 51800/51300 or 51803/51303).

The derived fee applicable to Item 51803/51303 is calculated on the basis of one-fifth of the abated Schedule fee for the surgery.

#### **ON.4.3 Repair of Wound - (Item 51900)**

Item 51900 covers debridement of "deep and extensively contaminated" wound. Benefits are not payable under this item for debridement which would be expected to be encountered as part of an operative approach to the treatment of fractures.

#### **ON.4.4 Lipectomy, Wedge Excision - Two or More Excisions - (Item 51906)**

Multiple lipectomies attract benefits under Item 51906 once only, i.e. the multiple operation rule does not apply.

Medicare benefits are not payable in respect of liposuction.

#### **ON.4.5 Upper Aerodigestive Tract Endoscopic Procedure - (Item 52035)**

The following are guidelines of appropriate minimum standards for the performance of GI endoscopy in relation to (a) cleaning, disinfection and sterilisation procedures, and (b) anaesthetic and resuscitation equipment. These guidelines are based on the advice of the Gastroenterological Society of Australia, the Sections of HPB and Upper GI and of Colon and Rectal Surgery of the Royal Australasian College of Surgeons, and the Colorectal Surgical Society of Australia.

##### *Cleaning, disinfection and sterilisation procedures*

Endoscopic procedures should be performed in facilities where endoscope and accessory reprocessing protocols follow procedures outlined in:-

- (i) 'Infection and Endoscopy' (3rd edition), Gastroenterological Society of Australia;
- (ii) 'Infection control in the health care setting - Guidelines for the prevention of transmission of infectious diseases', National Health and Medical Research Council; and
- (iii) Australian Standard AS 4187-1994 (and Amendments), Standards Association of Australia.

##### *Anaesthetic and resuscitation equipment*

Where the patient is anaesthetised, anaesthetic equipment, administration and monitoring, and post operative and resuscitation facilities should conform to the standards outlined in 'Sedation for Endoscopy', Australian & New Zealand College of Anaesthetists, Gastroenterological Society of Australia and Royal Australasian College of Surgeons. These guidelines will be taken into account in determining appropriate practice in the context of the Professional Services Review process.

#### **ON.4.6 Tumour, cyst, Ulcer or Scar - (Items 52036 to 52054)**

It is recognised that odontogenic keratocysts, although not neoplastic, often require the surgical management of benign tumours.

#### **ON.4.7 Aspiration of Haematoma - (Item 52056)**

Aspiration of haematoma is indicated in clinical situations where incision may leave an unsightly scar or where access is difficult for conventional drainage.

#### **ON.4.8 Osteotomy of Jaw - (Items 52342 to 52375)**

The fee and benefit for these items include the various forms of internal or dental fixation, jaw immobilisation, the transposition of nerves and vessels and bone grafts taken from the same site.

Bone grafts taken from a separate site, e.g. iliac crest, would attract additional benefit under Item 52318 or 52319 for the harvesting, plus item 52130 or 52131 for the grafting.

Where the site of grafting under item 52131 requires closure by single stage local flap, item 52300 may be claimed where clinically appropriate. Clinically appropriate in this instance means that the flap is required to close defects because the defect cannot be closed directly.

A local skin flap is an area of skin or subcutaneous tissue designed to be elevated from the skin adjoining a defect requiring closure. The flap remains partially attached by pedicle and is moved to the defect by rotation, advancement or transposition, or a combination of these manoeuvres.

Benefits are only payable where the flap is required for adequate wound closure. A secondary defect will be created which may be closed by direct suture, skin grafting or sometimes a further local skin flap. This latter procedure will also attract benefit if closed by graft or flap repair but not been closed by direct suture.

By definition, direct wound closure (e.g. by suture) does not constitute skin flap. Similarly, angled, curved or trapdoor incisions which are used for exposure and which are sutured back into the same position relative to the adjacent tissues are not skin flap repairs. Undermining of the edges of the wound prior to suturing is considered a normal part of wound closure and is not considered to skin flap repair.

For the purposes of these items, a reference to maxilla includes the zygoma.

#### **ON.4.9 Genioplasty - (Item 52378)**

Genioplasty attracts benefit once only although a section is made on both sides of the symphysis of the mandible.

#### **ON.4.10 Fracture of Mandible or Maxilla - (Items 53400 to 53439)**

There are two maxillae in the skull and for the purpose of these items the mandible is regarded as comprising two bones.

Hence a bilateral fracture of the mandible would be assessed as:

- Item 53409 x 1½;
- two maxillae and one side of the mandible as Item 53406 x 1½ + 53409 x ¼.

Splinting in Item 53406 or 53409 refers to cap splints, arch bars, silver (cast metal) or acrylic splints.

#### **ON.4.12 Destruction of Nerve Branch by Neurolytic Agent - (Item 53706)**

Item 53706 includes the use of botulinum toxin as a neurolytic agent.

## ORAL AND MAXILLOFACIAL SERVICES ITEMS

| <b>01. CONSULTATIONS</b>           |   |
|------------------------------------|---|
|                                    | <b>Group O1. Consultations</b>  |

## INDEX

### A

Abscess, incision with drainage, requiring admission 52055  
 Abscess, large, incision with drainage, requiring admission 52057  
 Alveolar ridge augmentation 52624, 52626  
 Alveolar ridge augmentation, cleft grafting of 52337  
 Antrobuccal fistula operation 53015  
 Antroscopy of temporomandibular joint 53215, 53218  
 Antrostomy, radical 53006  
 Antrum, drainage of, through tooth socket 53012  
 Antrum, intranasal operation, or removal of foreign body 53009  
 Antrum, maxillary, proof puncture and lavage of 53000, 53003  
 Antrum, maxillary, removal of foreign body from 53009  
 Arch bars, to maxilla or mandible, removal of 52106  
 Artery, facial, mandibular or lingual, ligation of 52141  
 Artery, maxillary, ligation of 52138  
 Arthrocentesis, with irrigation of temporomandibular joint 53225  
 Aspiration biopsy, one or more jaw cysts 52021  
 Assistance at operation 51800, 51803  
 Attendance 51700, 51703  
 Axillary sinus, excision of 52033

### B

Basal cell carcinoma, complicated, removal 52051, 52054  
 Basal cell carcinoma, uncomplicated, removal 52036, 52039  
 52045, 52048  
 Basal cell carcinoma, uncomplicated, removal 52042  
 Biopsy, aspiration of jaw cysts 52021  
 Biopsy, aspiration of jaw cysts, lymph gland, muscle or other deep  
 tissue or org 52027  
 Biopsy, aspiration of jaw cysts, skin or mucous membrane 52024  
 bone, fracture, treatment of 53410-53411  
 Bone, graft, harvesting of, via separate incision 52319  
 Bone, graft, harvesting of, via separate incision 52318  
 Bone, graft, to other bones 52130  
 Bone, graft, with internal fixation 52131  
 Bone, growth stimulator 52095  
 Bone, tumour, malignant, operations for 52180, 52182, 52184  
 52186  
 Bone, cyst, injection into or aspiration of 52064

### C

Calculus, removal of, salivary gland duct 52075  
 Caldwell-Luc's operation 53006  
 Carbuncle, incision with drainage, in operating theatre 52057  
 Cauterisation, septum/turbinates/pharynx 53060  
 Cellulitis, incision with drainage, not requiring GA 52055  
 Cleft lip, operations for 52440, 52442, 52444, 52446, 52450  
 52452, 52456, 52458  
 Cleft palate, palate, secondary repair, closure of fistula 52336  
 Cleft palate, palate, secondary repair, lengthening procedure 52339  
 Cleft palate, primary repair 52333  
 Composite graft to nose, ear or eyelid 52482  
 Condylectomy/condylotomy 53224  
 Contour reconstruction, insertion of foreign implants 52321  
 Cricothyrostomy 52133

Cutaneous nerve, nerve graft to 52832  
 Cutaneous nerve, repair of 52828, 52830  
 Cyst, jaw, aspiration biopsy of, mandible or maxilla, segmental  
 resection of 52114  
 Cyst, jaw, not otherwise covered, removal of 52036, 52039  
 52042, 52045, 52048  
 Cyst, jaw, aspiration biopsy of 52021

### D

Deep tissue or organ, biopsy of 52027  
 deep, percutaneous drainage 52058  
 Dermis, dermofat or fascia graft 52424  
 Dermoid, excision 52036, 52039, 52042, 52045  
 Diathermy, salivary gland duct 52072  
 Dilatation, salivary gland duct 52072  
 Dislocation, mandible, treatment of 53200, 53203  
 drainage tube, exchange of 52059  
 Duct, salivary gland, diathermy or dilatation of 52072  
 Duct, salivary gland, removal of calculus from 52075  
 Duct, sublingual gland, removal of calculus from 52075

### E

Endo-biopsy 52024, 52027  
 Endoscopic, laser therapy of upper aerodigestive tract 52035  
 Exostosis, mandibular or palatal, excision of 52600  
 External fixation, orthopaedic, removal 52097-52098

### F

Face, contour reconstruction 52379  
 Facial artery or vein, ligation of 52141  
 Fibroma, removal of 52036, 52039, 52042, 52045  
 Fistula, antrobuccal, operation for 53015  
 Fistula, oro-antral, plastic closure of 53015  
 Flap repair, direct 52324, 52327  
 Flap repair, single stage local 52300, 52303, 52306  
 Foreign body, antrum, removal of 53009  
 Foreign body, deep, removal, interventional imaging 52144  
 Foreign body, implants for contour reconstruction, insertion of  
 52321  
 Foreign body, maxillary sinus, removal of 53009  
 Foreign body, muscle/other deep tissue, removal of 52018  
 Foreign body, subcutaneous, removal, other 52015  
 Foreign body, superficial removal, other 52012  
 Foreign body, tendon, removal of 52018, 52144  
 Fracture, mandible or maxilla, treatment of 53400, 53403  
 53406, 53409-53416, 53418-53419, 53422-53425, 53427, 53429  
 53439  
 Fracture, zygomatic bone, treatment of 53411-53414  
 Free grafts, full thickness 52315  
 Free grafts, full thickness grafts, mucosa/split skin/connective  
 tissue 52309, 52312  
 Frenulum, mandibular or maxillary, repair of 52084

Muscle, or other deep tissue, removal of foreign body 52018  
 Muscle, ruptured repair of 52061-52062  
 Mylohyoid ridge, reduction of 52603

## N

Naevus, excision of 52036, 52039, 52042, 52045  
 Nasal bones, treatment of fracture/s 53458-53460  
 Nasal cavity and/or post nasal space, examination of 53056  
 Nasal cavity, packing for arrest of haemorrhage 53062  
 Nasal haemorrhage, arrest of 53058  
 Nasal haemorrhage, cryotherapy to 53064  
 Nasal septum, reconstruction 53017  
 Nasal septum, septoplasty 53016  
 Nasal, space, post, direct examination of 53052  
 Nasendoscopy 53054  
 Nerve, clock, regional or field 53700, 53702, 53704  
 Nerve, peripheral, neurectomy/neurotomy/tumour 52806, 52809  
 Nerve, transposition of 52818  
 Nerve, trigeminal, cryosurgery of 52824  
 Nerve, trunk, graft to 52821  
 Nerve, trunk, neurolysis of 52803  
 Nerve, trunk, repair of 52812, 52815  
 Neurectomy, peripheral nerve 52806, 52809  
 Neurolysis by open operation 52800  
 Neurolysis, of nerve trunk 52803  
 Node, lymph, biopsy of 52027

## O

Orbital cavity, bone or cartilage graft to wall or floor 53455  
 Orbital cavity, reconstruction of wall or floor 53453  
 Oro-antral fistula, plastic closure of 53015  
 Orthopaedic pin or wire, insertion of 52096  
 Orthopaedic pin or wire, removal of 52099, 52102  
 Orthopaedic, plates, removal of 52105  
 Osseointegration procedure 52627, 52630, 52633, 52636  
 Osteectomy of mandible or maxilla 52342, 52345, 52348, 52351  
 52354, 52357, 52360, 52363, 52366, 52369, 52372, 52375  
 Osteomyelitis, operation on mandible or maxilla 52090  
 Osteomyelitis, operation on skull 52092  
 Osteomyelitis, operation on combination of adjoining bones 52094  
 Osteotomies, mid-facial 52380, 52382  
 Osteotomy, of mandible or maxilla 52342, 52345, 52348, 52351  
 52354, 52357, 52360, 52363, 52366, 52369, 52372, 52375

## P

Palatal exostosis, excision of 52600  
 Palate, cleft, repair of 52333, 52336, 52339  
 Palate, papillary hyperplasia removal of 52609, 52612, 52615  
 Palate, plastic closure of defect of 52330  
 Papillary hyperplasia of the palate, removal of 52609, 52612  
 52615  
 papillary hyperplasia removal of 52609, 52612, 52615  
 Papilloma, removal of 52036, 52039, 52042, 52045  
 Parotid duct, repair of 52148  
 Pharyngeal flap for velo-pharyngeal incompetence 52460  
 Pin, orthopaedic removal of 52102  
 Pin, orthopaedic, insertion of 52096  
 Pin, orthopaedic, removal of 52099

Plastic repair, free grafts 52309, 52312, 52315  
 Plastic repair, single stage, local flap 52300, 52303, 52306  
 Plates, orthopaedic, removal of 52015, 52018  
 Post nasal space, direct examination of with/without biopsy 53052  
 Post nasal space, examination under GA 53056  
 preauricular sinus operation 52030  
 Premalignant lesions, cryotherapy, diathermy or carbon dioxide  
 laser 52034  
 Proof puncture of maxillary antrum 53000, 53003

## R

Radical anrostomy 53006  
 Ranula, removal of 52087  
 Reduction, of dislocation of mandible 53200, 53203  
 Rodent ulcer, operation for 52036, 52039, 52042, 52045

## S

Salivary gland duct, diathermy or dilatation of 52072  
 Salivary gland duct, removal of calculus from 52075  
 Salivary gland duct, transposition of 52147  
 Salivary gland, incision of 52057  
 Salivary gland, repair of cutaneous fistula of 52073  
 Scar, removal of, not otherwise covered 52036, 52039, 52042  
 52045  
 Sebaceous cyst, removal of 52036, 52039, 52042, 52045  
 Segmental resection, of mandible or maxilla for tumours 52114  
 Single stage local flap repair 52303, 52306  
 Single stage local flap repair 52300  
 Sinus, excision of 52030, 52033  
 Sinus, maxillary, drainage of, through tooth socket 53012  
 Skin biopsy repair of recent wound 52000, 52003, 52006  
 52009  
 Skin biopsy, of 52024  
 Skull, operation on, for osteomyelitis 52092  
 Subcutaneous, foreign body, removal, other 52015  
 Subcutaneous, tissue, repair of recent wound 52000, 52003  
 52006, 52009  
 Sublingual gland duct, removal of calculus from 52075  
 Sublingual gland, extirpation of 52069  
 Submandibular abscess, incision of 52057  
 Submandibular ducts, relocation of 52158  
 Submandibular gland, extirpation of 52066  
 Submandibular gland, incision of 52057  
 Submaxillary gland, extirpation of 52066  
 Submaxillary gland, incision of 52057  
 Superficial foreign body, removal of 52012  
 Superficial, wound repair of 52000, 52009  
 Suture, of traumatic wounds 52000, 52003, 52006, 52009

## T

Temporal, bone glenoid fossa/zygomatic arch, reconstruction of 53209  
 Temporomandibular joint, arthrodesis 53239  
 Temporomandibular joint, arthroscopy of 53215, 53218  
 Temporomandibular joint, arthrotomy 53220  
 Temporomandibular joint, external fixation, application of 53242  
 Temporomandibular joint, irrigation of 53225  
 Temporomandibular joint, manipulation of 53206

|   |                            |
|---|----------------------------|
| Temporomandibular joint, open surgical exploration of     | 53221                      |
| 53224-53227, 53230, 53233                                 |                            |
| Temporomandibular joint, stabilisation of                 | 53236                      |
| Temporomandibular joint, synovectomy of                   | 53226                      |
| Tendon, foreign body in, removal of                       | 52018                      |
| Tendon, or other deep tissue, foreign body in, removal of | 52018                      |
| Tissue, subcutaneous, repair of recent wound              | 52000, 52003               |
| 52006, 52009  |                            |
| Tongue, partial excision of                               | 52078                      |
| Tongue, tie, repair of                                    | 52081, 52084               |
| Tracheostomy  | 52132                      |
| Traumatic wounds, repair of                               | 52000, 52003, 52006, 52009 |
| Trigeminal nerve, injection with alcohol, cortisone, etc  | 52826                      |
| Tuberosity, maxillary, reduction of                       | 52606                      |
| Tumour, bone, innocent, excision of                       | 52063                      |
| Tumour, mandible or maxilla, segmental resection of       | 52114                      |
| Tumour, not otherwise covered, removal of                 | 52036, 52039               |
| 52042, 52045, 52048                                       |                            |
| Tumour, peripheral nerve, removal of                      | 52806, 52809               |
| Tumour, soft tissue, excision of                          | 52051, 52054               |
| Turbinates, submucous resection of                        | 53070                      |

## V

|  |       |
|--|-------|
| Vein, facial, mandibular or lingual, ligation of | 52141 |
| Vermilionectomy                                  | 52111 |
| Vestibuloplasty, unilateral or bilateral         | 52618 |

## W

|  |                            |
|--|----------------------------|
| Washout, antrum                            | 53000, 53003               |
| wedge excision                             | 51904, 51906               |
| Wire, orthopaedic, insertion of            | 52096                      |
| Wire, orthopaedic, removal of              | 52099, 52102               |
| Wound, debridement under GA or major block | 51900                      |
| Wound, dressing of, requiring GA           | 51902                      |
| Wound, traumatic, suture of                | 52000, 52003, 52006, 52009 |

## Z

|                                   |       |
|-----------------------------------|-------|
| Zygomatic arch, reconstruction of | 53209 |
|-----------------------------------|-------|

# **CATEGORY 5: DIAGNOSTIC IMAGING SERVICES**

## SUMMARY OF CHANGES FROM 14/09/2019

The 14/09/2019 changes to the MBS are summarised below and are identified in the Schedule pages by one or more of the following words appearing above the item number:

|                         |       |
|-------------------------|-------|
| (a) new item            | New   |
| (b) amended description | Amend |
| (c) fee amended         | Fee   |
| (d) item number changed | Renum |
| (e) EMSN changed        | EMSN  |

### **New Items**

61311 61332 61333 61336 61337 61341 61344

### **New temporary nuclear medicine MBS items**

New temporary MBS items added to allow patients access to some nuclear medicine scans during radiopharmaceutical supply shortages

## DIAGNOSTIC IMAGING SERVICES NOTES

### IN.0.1 Requests For Diagnostic Imaging Services

#### Request requirements

Medicare benefits are not payable for diagnostic imaging services that are classified as R-type (requested) services unless prior to commencing the relevant service, the practitioner receives a signed and dated request from a requesting practitioner who determined the service was necessary.

There are exemptions to the request requirements in specified circumstances. These circumstances are detailed below under 'Exemptions from the written request requirements for R-type diagnostic imaging services'.

#### Form of a diagnostic imaging request

A request for a diagnostic imaging service does not have to be in a particular form, however, the legislation provides that a request must be in writing and contain sufficient information, in terms that are generally understood by the profession, to clearly identify the item/s of service requested.

A request to a medical imaging specialist for a diagnostic imaging service should include sufficient clinical information to assist the service provider to accurately provide the diagnostic imaging service requested and:

- ensure compliance with the MBS item descriptors, and
- where the requested service involves ionising radiation (x-ray, CT etc.), make a decision whether to expose the patient to radiation, consistent with the diagnostic imaging providers' obligations under the International Commission on Radiological Protection's (ICRP) doctrine of radiation protection.

Unless sufficient clinical information is provided, the requesting practitioner may be asked to provide additional information to the diagnostic imaging provider, which could result in delays for the patient.

The following should be provided on a request for a diagnostic imaging service:

(a) - ***A clear and legible request*** - a request must be in writing, dated and be legible so that all information contained is transferred between requestor and provider without loss of content or meaning, or risk of misinterpretation. The use of abbreviations should be avoided. Where permitted, verbal referrals should ensure clear communication between the requestor and provider.

- Under the Electronic Transactions Act 1999, this information can be provided in electronic form.

(b) - ***Identity of the patient*** – a request should include details which confirm the identity of the patient, including their contact details.

(c) - ***Identity of the requestor*** – a request should include the identity and contact details of the requesting practitioner, including their Medicare provider number, to ensure effective and timely communication.

(d) - ***Clinical detail*** - a request should include a clinical justification for each examination requested and performed to support the performance of the diagnostic imaging examination.

- Requests should contain information to enable the provider to confirm that the requested diagnostic imaging modality and examination are appropriate to that individual patient's presentation and circumstances, to answer the referrer's diagnostic question with the least number of diagnostic steps (with due regard for patient safety, radiation dose, local expertise and cost).
- Where the request is for diagnostic imaging involving ionising radiation (e.g. x-ray, CT) the request should include clinical information for the provider to determine whether the expected clinical benefit to the patient of being exposed to diagnostic radiation outweighs the risk of radiation exposure ('justification for medical radiation exposure').

The provider must have sufficient information to justify and approve a medical radiation procedure. Where known, this information should include pregnancy status for women of child-bearing age.

Before requesting a diagnostic imaging service, the requesting practitioner must turn their mind to the clinical relevance of the request and determine that the service is necessary. For example, an ultrasound to determine the sex of a foetus is generally not a clinically relevant service, unless there is an indication this service will determine further courses of treatment (e.g. where there is a genetic risk of a sex-related disease or condition).

The requestor should consider whether:

- they are duplicating recent tests,
- the results would change the diagnosis, affect patient management or do more harm than good.
  - The Royal Australian and New Zealand College of Radiologists' Education Modules for Appropriate Imaging Referrals contains decision support tools for select clinical scenarios
  - The Australian Radiation Protection and Nuclear Safety Agency's Radiation Protection of the Patient Module provides information about diagnostic imaging for medical practitioners, to ensure radiation use is justified, and may aid in communicating benefits and risks of diagnostic imaging modalities to patients.
- the benefits and risks to the patient or carer have been communicated, including any alternatives available, and
- there is information available to the patient about the tests requested. Consumer resources available include the:
  - *NPS MedicineWise Choosing Wisely* program
  - Consumers Health Forum's *Why do I even need this test? A Diagnostic Imaging and Informed Consent Consumer Resource*
  - The Royal Australian and New Zealand College of Radiologists' *Inside Radiology* website.

(e) - **MBS requirements** - a request should meet any specific MBS item requirements. Failure to provide this information may mean that a Medicare benefit is not paid for the service.

### **Who may request a diagnostic imaging service**

The following practitioners may request a diagnostic imaging service:

- Specialists and consultant physicians can request any diagnostic imaging service.
- Other medical practitioners can request any service and specific Magnetic Resonance Imaging Services - see Note IN.0.18.
- A medical practitioner, on behalf of the treating practitioner, for example, by a resident medical officer at a hospital on behalf of the patient's treating practitioner.
- Dental Practitioners, Physiotherapists, Chiropractors, Osteopaths and Podiatrists registered or licensed under State or Territory laws
- Participating nurse practitioners and participating midwives.

**All dental practitioners may request the following items:**

57509, 57515, 57521, 57523, 57527, 57540, 57901, 57902, 57903, 57906, 57909, 57912, 57915, 57918, 57921, 57924, 57927, 57930, 57933, 57939, 57942, 57945, 57960, 57963, 57966, 57969, 58100, 58300, 58503, 58903, 59733, 59739, 59751, 60100, 60500, 60503.

Oral and maxillofacial surgeons, prosthodontists, dental specialists (periodontists, endodontists, pedeodontists, orthodontists) and specialists in oral medicine and oral pathology are also able to request the following items:

***Oral and maxillofacial surgeons (without medical specialist registration)***

55005, 55008, 55011, 55028, 55030, 55032, 56001 to 56220, 56224, 56227, 56230, 56259, 56301 to 56507, 56541, 56547, 56801 to 57007, 57041, 57047, 57341, 57345, 57703, 57705, 57709, 57711, 57712, 57714, 57715, 57717, 58103 to 58115, 58117, 58123, 58124, 58306, 58308, 58506, 58508, 58521 to 58527, 58529, 58909, 58911, 59103, 59104, 59703, 59704, 60000 to 60010, 60506, 60507, 60509, 60510, 61109, 61110, 61372, 61421, 61425, 61429, 61430, 61433, 61434, 61446, 61449, 61450, 61453, 61454, 61457, 61462, 61672, 61690, 61691, 61693, 61694, 61695, 61696, 61702, 61703, 61704, 61705, 61706, 61707, 61710, 63007, 63016, 63334 and 63346.

***Oral and maxillofacial surgeons (with medical specialist registration)***

Oral and maxillofacial surgeons who also have a medical qualification and are registered as medical specialist can request any item in the Diagnostic Imaging Services Table, subject to their scope of practice and any clauses or requirements relevant to the individual item.

***Prosthodontists***

55005, 55028, 56013, 56016, 56022, 56028, 56053, 56056, 56062, 56068, 57362, 57363, 58306, 58308, 61421, 61425, 61429, 61430, 61433, 61434, 61446, 61449, 61450, 61453, 61454, 61457, 61462, 61690, 61691, 61693, 61694, 61695, 61696, 61702, 61703, 61704, 61705, 61706, 61707, 61710, 63334 and 63346.

***Dental specialists (periodontists, endodontists, pedeodontists, orthodontists).***

56022, 56062, 57362, 57363, 58306, 58308, 61421, 61454, 61457, 61690, 61706, 61707, 63334, 63346.

***Specialists in oral medicine and/or oral pathology***

55005, 55008, 55011, 55028, 55030, 55032, 56001, 56007, 56010, 56013, 56016, 56022, 56028, 56041, 56047, 56050, 56053, 56056, 56062, 56068, 56101, 56107, 56141, 56147, 56301, 56307, 56341, 56347, 56401, 56407, 56441, 56447, 57341, 57345, 57362, 57363, 58306, 58308, 58506, 58508, 58909, 58911, 59103, 59104, 59703, 59704, 60000 to 60010, 60506, 60507, 60509, 60510, 61109, 61110, 61372, 61421, 61425, 61429, 61430, 61433, 61434, 61446, 61449, 61450, 61453, 61454, 61457, 61462, 61672, 61690, 61691, 61693, 61694, 61695, 61696, 61702, 61703, 61704, 61705, 61706, 61707, 61710, 63007, 63016, 63334, and 66346.

**Chiropractors may request:**

57712, 57714, 57715, 57717, 58100 to 58106 (inclusive), 58109, 58111, 58112, 58117 and 58123.

See para IN.0.17 of explanatory notes

**Physiotherapists and Osteopaths may request:**

57712, 57714, 57715, 57717, 58100 to 58106 (inclusive), 58109, 58111, 58112, 58117, 58120, 58121, 58123, 58126 and 58127.

See para IN.0.17 of explanatory notes

**Podiatrists** may request:

55836, 55837, 55840, 55841, 55844, 55845, 57521, 57523, 57527, 57536, 57540, 57539.

**Participating Nurse Practitioners** may request:

55014, 55036, 55059, 55061, 55070, 55076, 55600, 55601, 55768, 55769, 55800, 55801, 55804, 55805, 55808, 55809, 55812, 55813, 55816, 55817, 55820, 55821, 55824, 55825, 55828, 55829, 55832, 55833, 55836, 55837, 55840, 55841, 55844, 55845, 55848, 55849, 55850, 55851, 55852, 55853, 57509, 57515, 57521, 57523, 57527, 57530, 57533, 57536, 57540, 57703, 57705, 57709, 57711, 57712, 57714, 57715, 57717, 57721, 58503 to 58527 (inclusive) and 58529

**Participating Midwives** may request:

55700, 55701, 55704, 55706, 55707, 55710, 55713, 55714, 55718, 55722.

### **Form of a request**

Responsibility for the adequacy of requesting details rests with the requesting practitioner. A request for a diagnostic imaging service does not have to be in a particular form. However, the legislation provides that a request must be in writing and contain sufficient information, in terms that are generally understood by the profession, to clearly identify the item/s of service requested. This includes, where relevant, noting on the request the clinical indication(s) for the requested service. The provision of additional relevant clinical information can often assist the service provider and enhance the overall service provided to the patient. As such, this practice is actively encouraged.

A written request must be signed and dated and contain the name and address or name and provider number in respect of the place of practice of the requesting practitioner.

### ***Referral to specified provider not required***

It is not necessary that a written request for a diagnostic imaging service be addressed to a particular provider or that, if the request is addressed to a particular provider, the service must be rendered by that provider. Request forms containing relevant information about a diagnostic imaging provider supplied, or made available to, a requesting practitioner by a diagnostic imaging provider on, or after, 1 August 2012 must include a statement that informs the patient that the request may be taken to a diagnostic imaging provider of the patient's choice.

### **Request for more than one service and limit on time to render services**

The requesting practitioner may use a single request to order a number of diagnostic imaging services. However, all services provided under this request must be rendered within seven days after the rendering of the first service.

### **Contravention of request requirements**

A practitioner who, without reasonable excuse makes a request for a diagnostic imaging service that does not include the required information in his or her request or in a request made on his or her behalf is guilty of an offence under the Health Insurance Act 1973 punishable, upon conviction, by a fine of \$1000.

A practitioner who renders "R-type" diagnostic imaging services and who, without reasonable excuse, provides either directly or indirectly to a requesting practitioner a document to be used in the making of a request which would contravene the request information requirements is guilty of an offence under the Health Insurance Act 1973 punishable, upon conviction, by a fine of \$1000.

### **Exemptions from the written request requirements for R-type diagnostic imaging services**

There are exemptions from the general written request requirements (R-type) diagnostic imaging services and these are outlined as follows:

### ***Consultant physician or specialist***

A consultant physician or specialist is a medical practitioner recognised for the purposes of the Health Insurance Act 1973 as a specialist or consultant physician, in a particular specialty.

Except for R-type items which in their description state that a referral is required (such as most R-type items in General Ultrasound and items 59300, 59303), a written request is not required for the payment of Medicare benefits when the diagnostic imaging service is provided by or on behalf of a consultant physician or a specialist (other than a specialist in diagnostic radiology) in his or her specialty and after clinical assessment he/she determines that the service was necessary. For details required for accounts/receipts see Note IN.0.7.

However, if in the referral to the consultant physician or specialist, the referring practitioner specifically requests a diagnostic imaging service (eg to a cardiologist to perform an echocardiogram) the service provided is a requested, not self-determined service. If further services are subsequently provided, these further services are self-determined - see "Additional services".

### ***Additional services***

A written request is not required for a diagnostic imaging service if that service was provided after one which has been formally requested and the providing practitioner determines that, on the basis of the results obtained from the requested service, that an additional service was necessary. However, the following services cannot be self-determined as "additional services":

- R-type items which in their description (such as most R-type items in General Ultrasound and items 59300, 59303) state that a referral is required (practitioners should claim the NR item in these circumstances);
- MRI services; and
- services not otherwise able to be requested by the original requesting practitioner.

For details required for accounts/receipts see Note IN.0.7.

### ***Substituted services***

- A provider may substitute a service for the service originally requested when:
  - the provider determines, from the clinical information provided on the request, that the substituted service would be more appropriate for the diagnosis of the patient's condition; and
  - the provider has consulted with the requesting practitioner or taken all reasonable steps to do so before providing the substituted service; and
  - the substituted service was one that would be accepted as a more appropriate service in the circumstances by the practitioner's speciality group.

However, the following services cannot be substituted:

- R-type items which in their description (such as most R-type items in General Ultrasound and items 59300, 59303) state that a referral is required;
- MRI services; and
- services not otherwise able to be requested by the original requesting practitioner.

For details required for accounts/receipts see Note IN.0.7.

## **Remote areas**

A written request is not required for the payment of Medicare benefits for a R-type diagnostic imaging service rendered by a medical practitioner in a remote area provided:

- the R-type service is not one for which there is a corresponding NR-type service; and
- the medical practitioner rendering the service has been granted a remote area exemption for that service.

For details required for accounts/receipts see Note IN.0.7.

### *Definition of remote area*

The definition of a remote area is one that is more than 30 kilometres by road from:

- a) a hospital which provides a radiology service under the direction of a specialist in the specialty of diagnostic radiology; and
- b) a free-standing radiology facility under the direction of a specialist in the specialty of diagnostic radiology.

### *Application for remote area exemption*

A medical practitioner, other than a consultant physician or specialist, who believes that he or she qualifies for exemption under the remote area definition, should obtain an application form from the Department of Human Services' website [www.humanservices.gov.au](http://www.humanservices.gov.au) or by contacting the Department of Human Services' Provider Eligibility Section, by email at [sa.prov.elig@humanservices.gov.au](mailto:sa.prov.elig@humanservices.gov.au) or via phone on 1800 032 259 Monday to Friday, between 8.30 am and 5.00 pm, Australian Eastern Standard Time.

### *Quality assurance requirement for remote area exemption*

Application for, or continuation of, a remote area exemption will be contingent on practitioners being enrolled in an approved continuing medical education and quality assurance program. For further information, please visit the Australian College of Rural and Remote Medicine (ACRRM) website at [www.acrrm.org.au](http://www.acrrm.org.au), or call the ACRRM on 1800 223 226.

## **Emergencies**

The written request requirement does not apply if the providing practitioner determines that, because the need for the service arose in an emergency, the service should be performed as quickly as possible.

For details required for accounts/receipts see Note IN.0.7.

## **Lost requests**

The written request requirement does not apply where:

- the person who received the diagnostic imaging service, or someone acting on that person's behalf, claimed that a written request had been made for such a service but that the request had been lost; and
- the provider of the diagnostic imaging service or that provider's agent or employee obtained confirmation from the requesting practitioner that the request had been made.

The lost request exemption is applicable only to services that the practitioner could originally request.

For details required for accounts/receipts see Note IN.0.7.

### ***Pre-existing diagnostic imaging practices***

The legislation provides for exemption from the written request requirement for services provided by practitioners who have operated pre-existing diagnostic imaging practices. The exemption applies to the services covered by the following Items: 57712, 57714, 57715, 57717, 57901, 57902, 57903, 57911, 57912, 57914, 57915, 57917, 57921, 57926, 57929, 57935, 58100 to 58115, 58117, 58123, 58124, 58521, 58523, 58524, 58526, 58527, 58529, 58700, 58702, 59103 and 59104.

To qualify for this "grandparent" exemption the providing practitioner must:

- a) be treating his or her own patient;
  - b) have determined that the service was necessary;
  - c) have rendered between 17 October 1988 and 16 October 1990 at least 50 services (which resulted in the payment of Medicare benefits) of the kind which have been designated "R-type" services from 1 May 1991;
  - d) provide the exempted services at the practice location where the services which enabled the practitioner to qualify for the "grandparent" exemption were rendered; and
  - e) be enrolled in an approved continuing medical education and quality assurance program from 1 January 2001.
- For further information, please contact the Royal Australian College of General Practitioners (RACGP), at [www.racgp.org.au](http://www.racgp.org.au), on 1800 472 247 or via email to [racgp@racgp.org.au](mailto:racgp@racgp.org.au), or the Australian College of Rural and Remote Medicine (ACRRM), at [www.acrrm.org.au](http://www.acrrm.org.au) or by calling 1800 223 226.

Benefits are only payable for services exempted under these provisions where the service was provided by the exempted medical practitioner at the exempted location. Exemptions are not transferable.

For details required for accounts/receipts see Note IN.0.7.

### **Retention of requests**

A medical practitioner who has rendered an R-type diagnostic imaging service in response to a written request must retain that request for a period of two years commencing on the day on which the service was rendered.

A medical practitioner must, if requested by the Department of Human Services CEO, produce written requests retained by that practitioner for an R-type diagnostic imaging service as soon as practicable and in any case by the end of the day after the day on which the Department of Human Services CEO's request was made. An employee of the Department of Human Services is authorised to make and retain copies of or take and retain extracts from written requests or written confirmations of lost requests.

A medical practitioner who, without reasonable excuse, fails to comply with the above requirements is guilty of an offence under the Health Insurance Act 1973 punishable, upon conviction, by a fine of \$1000.

The Department of Health has developed a [Health Practitioner Guideline to substantiate that a valid request existed \(pathology or diagnostic imaging\)](#), which is located online at [www.health.gov.au](http://www.health.gov.au).

### **IN.0.2 Who May Provide A Diagnostic Imaging Service**

Unless otherwise stated, a diagnostic imaging service specified in the DIST may be provided by:

- a) a medical practitioner; or
- b) a person, other than a medical practitioner, who provides the service under the supervision of a medical practitioner in accordance with accepted medical practice.

For the purposes of Medicare, however, the rendering practitioner is the medical practitioner who provides the report.

Medicare benefits are not payable, for example, when a medical practitioner refers patients to self-employed paramedical personnel, such as radiographers or other persons, who either bill the patient or the practitioner requesting the service.

***Reports provided by practitioners located outside Australia***

Under the Act, Medicare benefits are only payable for services rendered in Australia. Where a service consists of a number of components, such as a diagnostic imaging service, all components need to be rendered in Australia in order to qualify for Medicare benefits. For diagnostic imaging services, this means that all elements of the service, including the preparation of report on the procedure, would need to be rendered in Australia.

As such, Medicare benefits are not payable for services which have been reported on by medical practitioners located outside Australia.

**Who may perform a Diagnostic Radiology Procedure:**

All items in Group I3 (excluding Sub-group 10) must be performed by:

- a) a medical practitioner;
- b) a medical radiation practitioner who provides the service under the supervision of a medical practitioner in accordance with accepted medical practice.

A medical radiation practitioner means a person registered or licenced as a medical radiation practitioner under a law of a State or Territory.

However, for a service mentioned in items 57901 to 57969, a diagnostic imaging procedure may also be performed by a dental practitioner who:

- (a) may request the service because of the operation of subsection 16B (2) of the Health Insurance Act 1973; and
- (b) provides the service under the supervision of a medical practitioner in accordance with accepted medical practice.

**Exceptions to this requirement**

Requirements on who must perform a diagnostic radiology procedure do not apply where the service is performed in:

- a) RA2, RA3 OR RA4; OR
- b) both:
  - i) in RA1; and
  - ii) RRMA4 or RRMA5

**RA1** means an inner regional area as classified by the ASGC.

**RA2** means an outer regional area as classified by the ASGC.

**RA3** means a remote area as classified by the ASGC.

**RA4** means a very remote area as classified by the ASGC

**RRMA4** means a small rural centre as classified by the Rural, Remote and Metropolitan Areas Classification.

**RRMA5** means a rural centre with an urban centre population of less than 10,000 persons as classified by the Rural, Remote and Metropolitan Areas Classification.

However, diagnostic radiology procedures in these areas must also be performed by a medical practitioner; or a person, other than a medical practitioner, who provides the service under the supervision of a medical practitioner in accordance with accepted medical practice.

### **IN.0.3 Diagnostic Imaging Services - Overview**

Section 4AA of the *Health Insurance Act 1973* (the Act) enables the *Health Insurance (Diagnostic Imaging Services Table) Regulations* to prescribe a table of diagnostic imaging services that sets out rules for interpretation of the table, items of diagnostic imaging services and the amount of fees applicable to each item.

For further information on diagnostic imaging, visit the [Department of Health's website](#)

### **IN.0.4 What Is A Diagnostic Imaging Service**

A diagnostic imaging service is defined in the Act as meaning "an R-type diagnostic imaging service or an NR-type diagnostic imaging service to which an item in the DIST applies".

A diagnostic imaging procedure is defined in the Act as 'a procedure for the production of images (for example x-rays, computerised tomography scans, ultrasound scans, magnetic resonance imaging scans and nuclear scans) for use in the rendering of diagnostic imaging services'.

The Schedule fee for each diagnostic imaging service described in the DIST covers both the diagnostic imaging procedure and the reading and report on that procedure by the diagnostic imaging service provider. Exceptions to the reporting requirement are as follows:

- (a) where the service is provided in conjunction with a surgical procedure, the findings may be noted on the operation record (items 55054, 55130, 55135, 55848, 55850, 57341, 57345, 59312, 59314, 60506, 60509 and 61109);
- (b) where a service is provided in preparation of a radiological procedure (items 60918 and 60927).

As for all Medicare services, diagnostic imaging services have to be clinically relevant before they are eligible for Medicare benefits. A clinically relevant service is a service that is generally accepted in the profession as being necessary for the appropriate treatment of the patient.

For NR-type services (and R-type services provided without a request under the exemption provisions - see IN.0.1 - 'Exemptions from the written request requirements for R-type diagnostic imaging services'), the clinical relevance of the service is determined by the providing practitioner. For R-type services rendered at the request of another practitioner, responsibility for determining the clinical relevance of the service lies with the requesting practitioner.

### **IN.0.5 Maintaining Records of Diagnostic Imaging Services**

Providers of diagnostic imaging services must keep records of diagnostic imaging services in a manner that facilitates retrieval on the basis of the patient's name and date of service. Records of R-type diagnostic imaging services must be retained for a period of 2 years commencing on the day on which the service was rendered.

The records must include the report by the providing practitioner on the diagnostic imaging service. For ultrasound services, where the service is performed on behalf of a medical practitioner the report must record the name of the sonographer.

- Where the provider *substitutes* a service for the service originally requested, the provider's records must include:
  - words indicating that the providing practitioner has consulted with the requesting practitioner and the date of consultation; or

- if the providing practitioner has not consulted with the requesting practitioner, sufficient information to demonstrate that he or she has taken all reasonable steps to do so.

- For services rendered after a *lost request*, the records must include words to the effect that the request was lost but confirmed by the requesting practitioner and the manner of confirmation, eg. how and when.

j. For *emergency services*, the records must indicate the nature of the emergency.

If requested by the Managing Director, the Department of Human Services, records retained by a providing practitioner must be produced to an officer of the Department of Human Services as soon as practicable but in any event within seven days after the day the Managing Director requests the production of those records. the Department of Human Services officers may make and retain copies, or take and retain extracts, of such records.

A medical practitioner who, without reasonable excuse, contravenes any of the above provisions is guilty of an offence under the *Health Insurance Act 1973* punishable, upon conviction, by a fine of \$1000.

### **IN.0.6 Registration of Site Undertaking Diagnostic Imaging Procedures**

All sites (including hospitals) and bases for mobile equipment at or from which diagnostic imaging procedures are performed need to be registered with the Department of Human Services for the purposes of Medicare.

Registered sites and bases for mobile equipment are allocated a Location Specific Practice Number (LSPN). The LSPN is a unique identifier comprising a six digit numeric and is required on all accounts, receipts and Medicare assignment of benefits forms for diagnostic imaging services before patients can receive Medicare benefits. In addition, benefits are not payable unless there is equipment of appropriate type listed on the register for the practice.

Sites or bases for mobile equipment need only register once. To maintain registration, sites are required to advise the Department of Human Services of any changes to their primary information within 28 days of the change occurring. Primary information is:

- proprietor details;
- ACN (for companies);
- business name and ABN;
- address of practice site or base for mobile equipment;
- type of equipment located at the site;
- information about any health care provider not employed at, or contracted to provide services for the site or base, who has an interest in any of the equipment listed on the register.

Registration will be suspended if a proprietor fails to respond to notices from the Department of Human Services about registration details. The suspension will be lifted as soon as the notices are responded to and Medicare benefits will be backdated for the period of suspension.

Registration will be cancelled after a continuous period of three months suspension. Cancellation under these circumstances is taken to have commenced from the date of suspension.

The proprietor may, at any time, request cancellation of the registration of a practice site or base for mobile equipment. Otherwise, registration may be cancelled by the Department of Human Services if the registration was obtained improperly (false information supplied) or if the proprietor fails to notify the Department of Human Services of primary information. A decision to cancel a registration will only be made following due consideration of a submission by the site or base. The proprietor may apply to the Administrative Appeals Tribunal for a review of this decision. If registration is cancelled involuntarily, the proprietor may not apply to re-register the site or base for a period of 12 months unless permitted to do so.

Proprietors of unregistered practices (including where the registration is under suspension or has been cancelled) need to either advise patients in writing or display a notice that no Medicare benefits will be payable for the diagnostic imaging services.

For full details about Location Specific Practice Numbers, including how to register a practice site. A list of LSPN registrations is available on the Department of Human Services' website at [www.medicaraustralia.gov.au/yourhealth/our\\_services/lspn\\_search.htm](http://www.medicaraustralia.gov.au/yourhealth/our_services/lspn_search.htm) and this allows practitioners and the general public to verify the registration status of practice sites eligible for Medicare benefits.

From 1 July 2010 practices applying for an LSPN will also need to apply for and be accredited under the Stage II Diagnostic Imaging Accreditation Scheme in order to be eligible to provide diagnostic imaging services under Medicare.

## **ACCREDITATION OF SITES UNDERTAKING DIAGNOSTIC IMAGING SERVICES**

### **Background**

In June 2007, legislation was enacted to amend the Health Insurance Act 1973 to establish a diagnostic imaging accreditation scheme under which mandatory accreditation would be linked to the payment of Medicare benefits for radiology and non-radiology services.

The Scheme commenced on 1 July 2008 and covered only practices providing radiology services. From 1 July 2010, the Scheme continued the accreditation arrangements for practices providing radiology services, and broadened the scope of the scheme to include practices providing non-radiology services such as cardiac ultrasound and angiography, obstetric and gynaecological ultrasound and nuclear medicine imaging services.

## **ACCREDITATION OF PRACTICES UNDERTAKING DIAGNOSTIC IMAGING SERVICES**

### **Background**

In 2007, the Diagnostic Imaging Accreditation Scheme (the Scheme) was established by the Health Insurance Amendment (Diagnostic Imaging Accreditation) Act 2007 to ensure Medicare funding is directed to diagnostic imaging services that are safe, effective and responsive to the needs of health care consumers.

The Scheme was implemented in two stages.

### **Stage 1**

In 2008 Stage 1 of the Scheme commenced requiring practices providing radiology and some ultrasound services to meet a minimum of 3 entry level standards.

### **Stage 2**

In 2009 the Scheme was broadened to mandate accreditation for all practices providing Medicare rebateable diagnostic imaging services and increasing the number of standards from 3 entry level Practice Standards to 15 full suite Practice Accreditation Standards.

The deadline for Practices to attain the full suite of accreditation standards was phased in to allow practices time to meet the increased number of standards. Practices accredited under Stage 1 of the Scheme were required to meet the new standard by 1 July 2012, whereas Practices who gained entry into the Scheme in Stage 2 have until 2013 to become fully accredited.

### **First time accreditation**

New practices entering the Scheme may choose to be accredited against either three entry-level Practice Standards or the full suite of Practice Accreditation Standards. Practices initially choosing to be accredited against the entry level Standards have a further period two years to become accredited against the full suite of Standards.

## **Re-accreditation of Practices**

Practices previously accredited must seek re-accreditation against the full suite of Practice Standards and cannot apply for re-accreditation against the entry level Standards.

## **Medicare rebateable diagnostic imaging services**

All Practices intending to render any diagnostic imaging services for the purpose of Medicare benefits must be accredited under the Scheme. This includes non-radiology services such as cardiac ultrasound and angiography, obstetrics and gynaecological ultrasound and nuclear medicine imaging services.

## **Non-Accredited Practices**

Practices may choose not to be accredited and still provide diagnostic imaging services, but these services do not attract a Medicare rebate.

Practices providing non Medicare funded diagnostic imaging services are bound by the requirements of the Health Insurance Act 1973 (Div 5/Section 23DZZIAE) to inform patients prior to carrying out the service, that the Practice is not accredited and as such the service does not attract a Medicare rebate.

## **The Medical Imaging Accreditation Program (MIAP)**

For a number of years the Royal Australian and New Zealand College of Radiologist (RANZCR) has delivered a voluntary accreditation program jointly with the National Association of Testing Authorities, Australia.

Practices participating in MIAP can seek recognition of their MIAP accreditation under the Scheme. This recognition will grant MIAP Practices accreditation against the full suite of Standards until the date of the expiration of the recognised MIAP accreditation. By this date Practices will need to either provide their Approved Accrerator with evidence of renewal of MIAP accreditation or have been granted accreditation against the full suite of Standard.

## **The Accreditation Standards**

The current Practice Accreditation Standards are made up of three entry level Practice Accreditation Standards and the full suite of Practice Accreditation Standards. If a practice is applying for accreditation against the entry level Practice Accreditation Standards, an accreditation decision will be made within 15 business days of the lodgement of an application for accreditation. If a practice is applying for accreditation against the full suite of Practice Accreditation Standards, an accreditation decision will be made within 30 business days of the lodgement of an application for accreditation.

From the date of being granted accreditation, the practice site can provide diagnostic imaging services under Medicare.

### Entry Level Standards

- i. Registration and Licensing Standard
- j. Radiation and Safety Standard
- k. Equipment Inventory Standard

### Full Suite Accreditation Standards

Part 1- Organisational Standards

Part 2 - Pre-procedure Standards

Part 3 - Procedure Standards

Part 4 - Post Procedure Standards

## **Applying for accreditation**

Whether a practice is applying for accreditation against entry-level standards or the full suite of Practice Accreditation Standards, the application process is the same. A practice is required to submit to an approved accreditor either:

- an application for accreditation providing written documentary evidence of compliance with the entry level accreditation standards or the full suite Practice Accreditation Standards; or
- written evidence of accreditation under the Medical Imaging Accreditation Program (MIAP) jointly administered by the Royal Australian and New Zealand College of Radiologists (RANZCR) and the National Association of Testing Authorities Australia (NATA).

## **Renewal of Accreditation**

Practices awarded accreditation against the full suite of Practice Accreditation Standards enter the maintenance program which requires them to be re-accredited every 4 years.

## **Approved Accreditors**

There are three Accreditation agencies approved by the Minister for Health to provide Accreditation services:

**Health and Disability Auditing Australia** **Ph: 1800 601 696**  
(HDAAu)

**National Association of Testing Authorities** **Ph: 1800 621 666**  
(NATA)

**Quality Innovation Performance** **Ph: 1300 888 329**  
(QIP)

Phone: (02) 6289 8859

## **IN.0.7 Details Required on Accounts, Receipts and Medicare Assignment of Benefit Forms**

In addition to the normal particulars of the patient, date of service, the services performed and the fees charged, the details which must be entered on accounts or receipts, and Medicare assignment of benefits forms in respect of diagnostic imaging services are as follows:

- the Location Specific Practice Number (LSPN) of the diagnostic imaging premises or mobile facility where the diagnostic imaging procedure was undertaken;
- if the professional service is provided by a specialist in diagnostic radiology the name and either the address of the place of practice, or the provider number, of that specialist;
- if the medical practitioner is not a specialist in diagnostic radiology the name and either the practice address or provider number of the practitioner who is claiming or receiving fees;

- for "R-type" (requested) services and services rendered subsequent to lost requests, the account or receipt or the Medicare assignment form must indicate the date of the request and the name and provider number, or the name and address, of the requesting practitioner.
- services that are *self-determined* must be endorsed with the letters 'SD' to indicate that the service was self-determined. Services are classified as self determined when rendered:
  - **by a consultant physician or specialist, in the course of that consultant physician or specialist practicing his or her specialty (other than a specialist in diagnostic radiology), or**
  - **to provide additional services to those specified in the original request and the additional services are of the type that would have otherwise required a referral from a specialist or consultant physician; or**
  - in a *remote area*, or
  - **under a pre-existing diagnostic imaging practice exemption.**
  - *substituted services* the account etc. must be endorsed 'SS'.
  - *emergencies*, the account etc. must be endorsed "emergency".
  - *lost requests* the account etc. must be endorsed "lost request".

#### **IN.0.8 Contravention of State and Territory Laws and Disqualified Practitioners**

Medicare benefits are not payable where a diagnostic imaging service is provided by, or on behalf of, a medical practitioner, and the provision of that service by that practitioner or any other person contravenes a State or Territory law which, directly or indirectly, relates to the use of diagnostic imaging procedures or equipment. The Managing Director of the Department of Human Services may notify the relevant State or Territory authorities if he/she believes that a person may have contravened a law of a State or Territory relating directly or indirectly to the use of diagnostic imaging procedures or equipment.

#### **IN.0.9 Prohibited Practices**

Changes have been made to legislation relating to diagnostic imaging services provided under Medicare.

*Amendments to the Health Insurance Act 1973* (the Act) relating to diagnostic services funded under Medicare came into effect on 1 March 2008. The changes were implemented following measures introduced in the *Health Insurance Amendment (Inappropriate and Prohibited Practices and other Measures) Act 2007*.

##### **Who might be affected?**

- Anyone who can provide or request a Medicare-funded diagnostic imaging service might be affected.
- Anyone who has a relevant connection to a provider or a requester, including relatives, bodies corporate, trusts, partnerships and employees may also be affected.

##### **What is prohibited?**

- It is unlawful to ask for, accept, offer or provide a benefit, or make a threat, that is reasonably likely to induce a requester to make diagnostic imaging requests, or is related to the business of providing diagnostic imaging services.
- It is a criminal offence to ask for, accept, offer, or provide a benefit, or make a threat, that is intended to induce requests to a particular provider.
- The prohibitions apply to the provision of benefits, or the making of threats, that are directed to a requester by a provider, whether directly or through another person.

**A requester of diagnostic imaging services means:**

- a medical practitioner;
- a dental practitioner, a chiropractor, a physiotherapist, a podiatrist or an osteopath (in relation to certain types of services prescribed in Regulations);
- a person who employs, or engages under a contract for services, one of the people mentioned above; or
- a person who exercises control or direction over one of the people mentioned above (in his or her professional capacity).

**A provider of a diagnostic imaging service means:**

- a person who renders that kind of service;
- a person who carries on a business of rendering that kind of service;
- a person who employs, or engages under a contract for services, one of the people detailed above; or
- a person who exercises control or direction over a person who renders that kind of service or a person who carries on a business of rendering that kind of service.

**What is permitted?**

Under the Act it is permitted to:

- share the profits of a diagnostic imaging business, provided the dividend is in proportion to the beneficiary's interest in the business;
- accept or pay remuneration, including salary, wages, commission, provided the remuneration is not substantially different from the usual remuneration paid to people engaged in similar employment;
- make or accept payments for property, goods or services, provided the amount paid is not substantially different from the market value of the property, goods or services;
- make or accept payments for shared property, goods or services, provided the amount paid is proportionate to the person's share of the cost of the property, goods or services and shared staff and/or equipment are not used to provide diagnostic imaging services;
- provide or accept property, goods or services, provided the benefit exchanged is not substantially different from the market value of the property, goods or services;

**Are there any benefits, other than those described in the Act, that are permitted?**

- The Minister has determined that certain types of benefit are permitted. These include items to support a requester to view diagnostic imaging reports, such as specially designed computer monitors. Modest gifts and hospitality may also be permitted, under certain circumstances.

Further information on the *Health Insurance (Permitted Benefits - diagnostic imaging services) Determination 2008* can be found on the Department of Health website at [www.health.gov.au/legislativeamendments](http://www.health.gov.au/legislativeamendments)

**What are the penalties for those not complying with the provisions?**

- If you breach the provisions, you could potentially be subject to a range of penalties, depending on the kind of breach, including:
  - o civil penalties;

o criminal offences;

o referral to a Medicare Participation Review Committee (MPRC), possibly resulting in loss of access to Medicare.

For further information on Prohibited Practices visit the Department of Health website at [www.health.gov.au/legislativeamendments](http://www.health.gov.au/legislativeamendments)

## **IN.0.10 Multiple Services Rules**

### **Background**

There are several rules that may apply when calculating Medicare benefits payable when multiple diagnostic imaging services are provided to a patient at the same attendance (same day). These rules were developed in association with the diagnostic imaging profession representative organisations and reflect that there are efficiencies to the provider when these services are performed on the same occasion. Unless there are clinical reasons for doing so, they should be provided to the patient at the one attendance and the efficiencies from doing this reflected in the overall fee charged.

### **General diagnostic imaging - multiples services**

The diagnostic imaging multiple services rules apply to all diagnostic imaging services. There are three rules, and more than one rule may apply in a patient episode. The rules do not apply to diagnostic imaging services rendered in a remote area by a medical practitioner who has a remote area exemption for that area - see IN.0.1.

Rule A. When a medical practitioner renders two or more diagnostic imaging services to a patient on the same day, then:

- the diagnostic imaging service with the highest Schedule fee has an unchanged Schedule fee; and
- the Schedule fee for each additional diagnostic imaging service is reduced by \$5.

Rule B. When a medical practitioner renders at least one R-type diagnostic imaging service and at least one consultation to a patient on the same day, there is a deduction to the Schedule fee for the diagnostic imaging service with the highest Schedule fee as follows:

- if the Schedule fee for the consultation is \$40 or more - by \$35; or
- if the Schedule fee for the consultation is less than \$40 but more than \$15 - by \$15; or
- if the Schedule fee for the consultation is less than \$15 - by the amount of that fee.

The deduction under Rule B is made once only. If there is more than one consultation, the consultation with the highest Schedule fee determines the deduction amount. There is no further deduction for additional consultations.

A 'consultation' is a service rendered under an item from Category 1 of the Medicare Benefits Schedule (MBS), that is, items 1 to 10816 inclusive.

Rule C. When a medical practitioner renders an R-type diagnostic imaging service and at least one non-consultation service to the same patient on the same day, the Schedule fee for the diagnostic imaging service with the highest Schedule fee is reduced by \$5.

A deduction under Rule C is made once only. There is no further deduction for any additional medical services.

For Rule C, a 'non-consultation' is defined as any following item from the MBS:

- Category 2, items 11000 to 12533;
- Category 3, items 13020 to 51318;

- Category 4, items 51700 to 53460;
- Cleft Lip and Palate services, items 75001 to 75854 (as specified in the 'Medicare Benefits for the treatment of cleft lip and cleft palate conditions' book.)

Pathology services are not included in Rule C.

When both Rules B and C apply, the sum of the deductions in the Schedule fee for the diagnostic imaging service with the highest Schedule fee is not to exceed that Schedule fee.

### **Ultrasound - Vascular**

This rule applies to all vascular ultrasound items claimed on the same day of service ie whether performed at the same attendance by the same practitioner or at different attendances.

Where more than one vascular ultrasound service is provided to the same patient by the same practitioner on the same date of service, the following formula applies to the Schedule fee for each service:

- 100% for the item with the greatest Schedule fee
- plus 60% for the item with the next greatest Schedule fee
- plus 50% for each other item.

When the Schedule fee for some of the items are the same, the reduction is calculated in the following order:

- 100% for the item with the greatest Schedule fee and the lowest item number
- plus 60% for the item with the greatest Schedule fee and the second lowest item number
- plus 50% for each other item

Note: If 2 or more Schedule fees are equally the highest, the one with the lowest item number is taken to have the higher fee eg. Item 55238 and 55280, item 55238 would be considered the highest.

When calculating the benefit, it should be noted that despite the reduction, the collective items are treated as one service for the application of Rule A of the General Diagnostic Imaging Multiple Services rules and the patient gap. Examples can be found at [the Department of Human Services' website](#).

### **Magnetic Resonance Imaging (MRI) - Musculoskeletal**

If a medical practitioner performs 2 or more scans from subgroup 12 and 13 for the same patient on the same day, the fees specified for items that apply to the service are affected as follows:

- (a) the item with the highest schedule fee retains 100% of the schedule fee; and
- (b) any other fee, except the highest is reduced by 50%.

Note: If 2 or more Schedule fees are equally the highest, the one with the lowest item number is taken to have the higher fee eg. Item 63322 and 63331, item 63322 would be considered the highest.

If the reduced fee is not a multiple of 5 cents, the reduced fee is taken to be the nearest amount that is a multiple of 5 cents.

In addition, the modifying item for contrast may only be claimed once for a group of services subject to this rule.

If a medical practitioner provides:

- (a) 2 or more MRI services from subgroups 12 and 13 for the same patient on the same day; and

(b) 1 or more other diagnostic imaging services for that patient on that day

the amount of the fees payable for the MRI services is taken, for the purposes of this rule, to be an amount payable for 1 diagnostic imaging service in applying Rule A of the General Diagnostic Imaging Multiple Services rules.

### **IN.0.11 Capital Sensitivity Measure for Diagnostic Imaging Equipment**

Almost all services listed in the Diagnostic Imaging Services Table of the Medicare Benefits Schedule (MBS), excluding Positron Emission Tomography (PET) services, have two different schedule fees - schedule '(K)' items (100 per cent of the MBS fee) and schedule '(NK)' items (approximately 50 per cent of the MBS fee) for diagnostic imaging services provided on aged equipment.

This is known as the 'capital sensitivity measure', and it is in place for almost all diagnostic imaging equipment providing services (excluding PET) under Medicare. The measure is intended to improve the quality of diagnostic imaging services by encouraging providers to upgrade and replace aged equipment as appropriate.

On 27 November 2013, the remote location exemptions provisions that apply to CT items 56001-57361 and angiography items 59903-59974 were amended so they are consistent with other diagnostic imaging modalities.

A regional exemption automatically applies if services are provided in a location in Remoteness Area (RA) outer regional, remote, or very remote. Exemptions may be granted by the Department of Health (subject to particular criteria) to practices located in RA inner regional areas, where the location was previously under the Rural, Remote and Metropolitan Area (RRMA) classification system, RRMA4 or RRMA5.

As there may be a number of diagnostic imaging providers which met the previous exemption criteria, but not the current criteria, a grandfathering provision will be implemented. A diagnostic imaging provider which was eligible to claim schedule '(K)' items for CT and angiography services because they met the previous exemption criteria prior to 27 November 2013, may claim schedule '(K)' items until 1 July 2016. This transition period will allow affected providers an opportunity to upgrade or replace their equipment.

As part of the 2014-15 Federal Budget the Government announced *the 'Medicare Benefits Schedule - revised capital sensitivity provisions for diagnostic imaging equipment'* measure, which will strengthen the quality and safety of MBS diagnostic imaging services through alignment and consistency of the capital sensitivity measure across all modalities (except PET).

This measure includes:

· the extension of the capital sensitivity measure to all angiography services, including the previously excluded MBS items 60000 to 60078;

- iii. introduction of a 'maximum extended life age' of 15 years for CT and angiography services; and
- iv. increasing the 'maximum extended life age' for MRI services to 20 years.

The changes will take effect on 1 January 2015.

After 1 January 2015, any CT and angiography machine that has not reached maximum extended life age (15 years) but has reached its new effective life age, and is upgraded before 1 January 2015 is eligible for K items from 1 January 2015, until the machine reached its maximum extended life age.

After 1 January 2015, any CT and angiography machine that has not reached its maximum extended life age (15 years) but has reached its new effective life age, and is upgraded between 1 January 2015 and 1 January 2016, is eligible for K items on and from the day that it is upgraded until the machine reached its maximum extended life age.

### *Further detail*

For full details about the rules for claiming the schedule '(K)' and schedule '(NK)' items, the exemptions, and the definition of upgrade, providers should access the Department of Health's website at:

[www.health.gov.au/capitalsensitivity](http://www.health.gov.au/capitalsensitivity)

### **IN.0.12 Group I2 - Computed Tomography (CT)**

#### **Capital sensitivity items**

A reduced Schedule fee applies to CT services provided on equipment that is 10 years old or older. This equipment must have been first installed in Australia ten or more years ago, or in the case of imported pre-used equipment, must have been first manufactured ten or more years ago. A range of items cover services provided on older equipment. These items are:

56041, 56047, 56050, 56053, 56056, 56062, 56068, 56070, 56076, 56141, 56147, 56259, 56341, 56347, 56441, 56447, 56449, 56452, 56541, 56547, 56659, 56665, 56841, 56847, 57041, 57047, 57247, 57345, 57355, 57361.

These items are identified by the addition of the letter '(NK)' at the end of the item. These items should be used where services are performed on equipment ten years old or older, except where equipment is located in a remote area when items with the letter "K", as described below, will apply.

Items 56001 to 57356 (which contain the symbol (K) at the end of the item should be used for services which are performed on a date which is less than ten years after the date on which the CT equipment used in performing the service was first installed in Australia. In the case of imported pre-used CT equipment, the services must have been performed on a date which is less than ten years from the first date of manufacture of the equipment.

#### **Professional supervision**

CT services (items 56001 to 57356) are not eligible for a Medicare rebate unless the service is performed:

- (a) under the professional supervision of a specialist in the specialty of diagnostic radiology who is available:
  - (i) to monitor and influence the conduct and diagnostic quality of the examination; and
  - (ii) if necessary, to personally attend on the patient; or
- (b) if paragraph (a) cannot be complied with
  - (i) in an emergency, or
  - (ii) because of medical necessity in a remote area - refer to DID.4.4 for definition of remote area.

Note: Practitioners do not have to apply for a remote area exemption in these circumstances.

Items 57360 and 57361 apply only to a CT service that is:

- (a) performed under the professional supervision of a specialist or consultant physician recognised by the Conjoint Committee for the Recognition of Training in CT Coronary Angiography who is available:
  - (i) to monitor and influence the conduct and diagnostic quality of the examination; and
  - (ii) if necessary, to attend on the patient personally; and
- (b) reported by a specialist or consultant physician recognised by the Conjoint Committee for the Recognition of Training in CT Coronary Angiography; or
- (c) if paragraph (a) and (b) cannot be complied with

(i) in an emergency, or

(ii) because of medical necessity in a remote area - refer to DID.4.4 for definition of remote area.

#### **Use of a hybrid PET/CT or SPECT/CT machine**

CT scans rendered on hybrid Positron Emission Tomography (PET)/CT or hybrid Single Photon Emission Computed Tomography (SPECT)/CT units are eligible for a Medicare benefit provided:

- the CT scan is not solely used for the purposes of attenuation correction and anatomical correlation of any associated PET or SPECT scan; and

- the CT scan is rendered under the same conditions as those applying to services rendered on stand-alone CT equipment. For example, the service would need to be properly requested and performed under the professional supervision of a specialist radiologist, including specialist radiologists with dual nuclear medicine qualifications.

#### **Scan of more than one area**

Items have been provided to cover the common combinations of regions - see Multiple Regions below. However, where regions are scanned on the one occasion which are not covered by a combination item, for example, item 56220 (scan of the spine) with item 56619 (scan of extremities), both examinations would attract separate benefit.

#### **Multiple regions**

Items have been provided to cover the common combinations of regions. The items relating to the individual contiguous regions should not be used when scans of multiple regions are performed.

More than one attendance of the patient to complete a scan

Items 56220 to 56240 and 56619 to 56665 apply once only for a service described in any of those items, regardless of the number of patient attendances required to complete the service. For example, where a request relates to two or more regions of the spine and one region only is scanned on one occasion with the balance of regions being scanned on a subsequent occasion, benefits are payable for one combination service only upon completion.

#### **Pre contrast scans**

Pre contrast scans are included in an item of service with contrast medium only when the pre-contrast scans are of the same region.

#### **Head**

##### ***Exclusion of acoustic neuroma***

If an axial scan is performed for the exclusion of acoustic neuroma, Medicare benefits are payable under item 56001 or 56007.

##### ***Assessment of headache***

If the service described in item 56007 or 56047 is used for the assessment of headache of a patient, the fee mentioned in the item applies only if:

- (a) a scan without intravenous contrast medium has been undertaken on the patient; and
- (b) the service is required because the result of the scan is abnormal.

This rule applies to a patient who:

- (i) is under 50 years; and

- (ii) is (apart from the headache) otherwise well; and
- (iii) has no localising symptoms or signs; and
- (iv) has no history of malignancy or immunosuppression.

### **Spine**

CT items exist which separate the examination of the spine into the cervical, thoracic and lumbosacral regions. These items are 56220 to 56240 inclusive. They include items for CT scans of two regions of the spine (56233, 56234, 56235 and 56236) and for all three regions of the spine (56237, 56238, 56239 and 56240). Restrictions apply to the following items:

- (a) item 56233 is used where two examinations of the kind referred to in items 56220, 56221 and 56223 are performed. The item numbers of the examination which are performed must be shown on any accounts issued or patient assignment forms completed.
- (b) item 56234 is used where two examinations of the kind referred to in items 56224, 56225 and 56226 are performed. The item numbers of the examination which are performed must be shown on any accounts issued or patient assignment forms completed.
- (c) item 56235 is used where two examinations of the kind referred to in items 56227, 56228 and 56229 are performed. The item numbers of the examination which are performed must be shown on any accounts issued or patient assignment forms completed
- (d) item 56236 is used where two examinations of the kind referred to in items 56230, 56231 and 56232 are performed. The item numbers of the examination which are performed must be shown on any accounts issued or patient assignment forms completed

*Example:* for a CT examination of the spine where the cervical and thoracic regions are to be studied (item 56233), item numbers 56220 and 56221 must be specified.

### **With intrathecal contrast medium (Item 56219)**

The item incorporates the cost of contrast medium for intrathecal injection and associated x-rays. Benefits are not payable for this item when rendered in association with myelograms (Item 59724). Where a myelogram is rendered under item 59724 and a CT is necessary, the relevant item would be scan of spine without intravenous contrast (Item 56220, 56221 or 56223).

### **Upper abdomen and pelvis**

Items 56501, 56507, 56541 and 56547 are not eligible for Medicare Benefits if performed for the purpose of performing a virtual colonoscopy (otherwise known as CT colonography and CT colography). CT Colonography is covered by items 56553 and 56555.

### **Computed Tomography of the Colon (Items 56553 and 56555)**

In items 56553 and 56555 the terms 'high risk' and 'incomplete colonoscopy' are defined as follows:

#### ***High Risk***

Asymptomatic people fit into this category if they have:

- three or more first-degree or a combination of first-degree and second-degree relatives on the same side of the family diagnosed with bowel cancer (suspected hereditary non-polyposis colorectal cancer or NPCC), or
- two or more first-degree or second-degree relatives on the same side of the family diagnosed with bowel cancer, including any of the following high-risk features:

- multiple bowel cancers in the one person
- bowel cancer before the age of 50 years
- at least one relative with cancer of the endometrium, ovary, stomach, small bowel, ureter, biliary tract or brain
- at least one first-degree relative with a large number of adenomas throughout the large bowel (suspected familial adenomatous polyposis or FAP), or
- somebody in the family in whom the presence of a high-risk mutation in the adenomatous polyposis coli (APC) gene or one of the mismatch repair (MMR) genes has been identified.

Source: NHMRC 2005 Clinical Practice Guidelines for the Prevention, Early Detection and Management of Colorectal Cancer - Category 3 - those at potentially high risk.

### ***Incomplete Colonoscopy***

For audit purposes, an incomplete colonoscopy is defined as one that is not completed for technical or medical reasons and must have been performed in the preceding 3 months.

### **Spiral angiography**

#### ***Items 57350 and 57355 and items 57351 and 57356***

CT spiral angiography items 57351 and 57356 apply under certain circumstances specified in the items including where a service to which items 57350 or 57355 have been performed on the same patient within the previous 12 months, whereas items 57350 and 57355 apply under the circumstances specified in the items and where the service has not been performed on the same patient within the previous 12 months.

#### **Computed tomography of the coronary arteries (Items 57360 and 57361)**

Payment of Medicare rebates for items 57360 and 57361 is limited to specialists or consultant physicians who have fulfilled the training and credentialing requirements developed by the Conjoint Committee for the Recognition of Training in CT Coronary Angiography (CTCA). The descriptors for CT spiral angiography items 57350, 57351, 57355 and 57356 and CT chest items 56301, 56307, 56341, 56347, 56801, 56807, 56841, 56847, 57001, 57007, 57041 and 57047 clarify that they are not to be used to image the coronary arteries.

## **IN.0.13 Group I4 - Nuclear Medicine Imaging**

### **General**

Benefits for a nuclear scanning service are only payable when the service is performed by a specialist or consultant physician, or by a person acting on behalf of the specialist and the final report of the service is compiled by the specialist or consultant physician who performed the preliminary examination of the patient and the estimation and administration of the dosage.

Additional benefits will only be attracted for specialist physician or consultant physician attendance under Category 1 of the Schedule where there is a request for a full medical examination accompanied by a referral letter or note of referral.

### **Credentialling for nuclear medicine imaging services**

Payment of Medicare rebates for nuclear medicine imaging services is limited to specialists or consultant physicians who are credentialled by the Joint Nuclear Medicine Credentialling and Accreditation Committee of the Royal Australian College of Physicians (RACP) and the Royal Australian and New Zealand College of Radiologists (RANZCR). The scheme has been developed by the profession in consultation with Government to ensure that specialists in nuclear medicine are appropriately trained and licensed, provide appropriate personal supervision of procedures and are involved in ongoing continuing medical education.

For information regarding the Scheme and for application forms, please phone the RACP or RANZCR.

### **Radiopharmaceuticals**

The Schedule fees for nuclear medicine imaging services incorporate the costs of radiopharmaceuticals.

### **Single Photon Emission Computed Tomography (SPECT)**

Where SPECT has been performed in conjunction with another study and is not covered under the item descriptor or is not covered under Item 61462, no Medicare benefit is payable for the SPECT study.

### **Single myocardial perfusion studies (Items 61302 and 61303)**

Items 61302 and 61303 apply to single myocardial perfusion studies which can only be used once and cannot be used in conjunction with any other myocardial perfusion study for an individual patient referral.

### **Myocardial perfusion (Items 61306 and 61307)**

Items 61306 and 61307 refer to all myocardial perfusion studies involving two or more sets of imaging times related to an individual patient referral. This includes stress/rest, stress/re-injection, stress/rest and re-injection thallium studies, one or two-day technetium-based perfusion agent protocols, mixed technetium-based perfusion agent/thallium protocols and the use of gated SPECT when undertaken.

### **Hepatobiliary study (pre-treatment) (Item 61360)**

Item 61360 - the standard hepatobiliary item - also includes allowance of the pre-procedural CCK administration for preparatory emptying of the gall bladder and also morphine augmentation.

### **Hepatobiliary study (infusion) (Item 61361)**

Item 61361 applies specifically to a standard hepatobiliary study to which has been added an infusion of sinaclide (CCK-8) following which acquisition is continued and quantification of gallbladder ejection fraction and/or common bile duct activity time curves are performed.

### **Whole body studies (Items 61426-61438)**

"Whole body" studies must include the trunk, head and upper and lower limbs down to the elbow and knee joints respectively, whether acquired as multiple overlapping camera views or whole body sweeps (runs) with additional camera views as required. Any study that does not fulfil these criteria is a localised study.

### **Repeat studies (Item 61462)**

Item 61462 covers repeat planar (whole body or localised) and/or SPECT imaging performed on a separate occasion using the same administration of radiopharmaceutical. The repeat planar and SPECT imaging when performed on a separate occasion using the same administration of radiopharmaceutical should be itemised as item 61462 and the original item and date of service should be indicated for reference purposes.

This item does not apply to bone scans, adrenal studies or gastro-oesophageal reflux studies, myocardial perfusion studies, colonic transit or CFS transport studies, where allowance for performance of the delayed study is incorporated into the baseline benefit fee.

### **Thyroid study (Item 61473)**

Item 61473 incorporates the measurement of thyroid uptake on a gamma camera using a proven technique, where clinically indicated.

### **Positron Emission Tomography (PET); (Items 61523 to 61647).**

In patients with Hodgkin and non- Hodgkin lymphoma (excluding indolent non- Hodgkin lymphoma), whole body FDG PET studies should not be used for surveillance nor for assessment of patients with suspected (as opposed to confirmed) disease recurrence.

Whole body FDG PET studies should be used as an alternative rather than additional to conventional CT scanning.

Payment of Medicare rebates for PET services is limited to credentialed specialists or consultant physicians who meet eligibility requirements in the *Diagnostic Imaging Services Table Regulations*. PET services must be:

- iii. performed under the supervision of:
  - a) specialist or consultant physician credentialed under the Joint Nuclear Medicine Specialist Credentialling Program for the Recognition of the Credentials of Nuclear Medicine Specialists for Positron Emission Tomography overseen by the Joint Nuclear Medicine Credentialling and Accreditation Committee of the RACP and RANZCR; or
  - b) practitioner who is a Fellow of either RACP or RANZCR, and who, prior to 1 November 2011, reported 400 or more studies forming part of PET services for which a Medicare benefit was payable, and who holds a current license from the relevant State radiation licensing body to prescribe and administer the intended PET radiopharmaceuticals to humans;
    - h. provided in a comprehensive facility that can provide a full range of diagnostic imaging services (including PET, CT, X-Ray and diagnostic ultrasound) and cancer treatment services (including chemotherapy, radiation oncology and surgical oncology) at the one site;
    - i. provided using equipment that meets the Requirements for PET Accreditation (Instrumentation & Radiation Safety) 3<sup>rd</sup> Edition (2017) issued by the Australian and New Zealand Society of Nuclear Medicine Inc;
    - j. only provided following referral from a recognised specialist or consultant physician.

All PET providers must complete a specific PET provider Statutory Declaration prior to being eligible to claim Medicare rebates. Statutory declarations can be obtained directly from the Department of Human Services.

### **IN.0.14 Management of bulk-billed services**

#### **Additional bulk billing payment for diagnostic imaging services (item 64990 and 64991)**

Item 64990 operates in the same way as item 10990 and item 64991 operates in the same way as item 10991, apart from the following differences:

- Item 64990 and 64991 can only be used in conjunction with items in the Diagnostic Imaging Services Table of the MBS;
- Item 64990 and 64991 applies to diagnostic imaging services self determined by general practitioners and specialists with dual qualifications acting in their capacity as general practitioners;
- Specialists and consultant physicians who provide diagnostic imaging services are not able to claim item 64990 or 64991 unless, for the purposes of the *Health Insurance Act 1973*, the medical practitioner is also a general practitioner and the service provided by the medical practitioner has not been referred to that practitioner by another medical practitioner or person with referring rights.

## **IN.0.15 Group I1 - Ultrasound**

### **Professional supervision for ultrasound services - R-type eligible services**

Ultrasound services (items 55028 to 55854) marked with the symbol (*R*) with the exception of items 55600 and 55603 are not eligible for a Medicare rebate unless the diagnostic imaging procedure is performed under the professional supervision of a:

- (a) specialist or a consultant physician in the practice of his or her specialty who is available to monitor and influence the conduct and diagnostic quality of the examination, and if necessary to personally attend the patient; or
- (b) practitioner who is not a specialist or consultant physician who meets the requirements of A or B hereunder, and who is available to monitor and influence the conduct and diagnostic quality of the examination and, if necessary, to personally attend the patient.

A. Between 1 September 1997 and 31 August 1999, at least 50 services were rendered by or on behalf of the practitioner at the location where the service was rendered and the rendering of those services entitled the payment of Medicare benefits.

B. Between 1 September 1997 and 31 August 1999, at least 50 services were rendered by or on behalf of the practitioner in nursing homes or patients' residences and the rendering of those services entitled payment of Medicare benefits.

If paragraph (a) or (b) cannot be complied with, ultrasound services are eligible for a Medicare rebate:

- (i) in an emergency; or
- (ii) in a location that is not less than 30 kilometres by the most direct road route from another practice where services that comply with paragraph (a) or (b) are available.

Note: Practitioners do not have to apply for a remote area exemption in these circumstances.

### **Sonographer accreditation**

Sonographers performing medical ultrasound examinations (either R or NR type items) on behalf of a medical practitioner must be suitably qualified, involved in a relevant and appropriate Continuing Professional Development program and be Registered on the Register of Accredited Sonographers held by the Department of Human Services.

### **Eligibility for registration**

To be eligible for registration on the Register of Accredited Sonographers held by the Department of Human Services, the person must be accredited with the Australian Sonographer Accreditation Registry. For accreditation with the Australian Sonographer Accreditation Registry the person must:

- hold an accredited postgraduate qualification in medical ultrasound; or
- be studying ultrasound.

For further information, please contact the Department of Human Services, Provider Liaison Section, on 132150 for the cost of a local call or the Australian Sonographer Accreditation Registry through its website at [www.asar.com.au](http://www.asar.com.au).

### **Report requirements**

The sonographer's initial and surname is to be written on the report. The name of the sonographer is not required to be included on the copy of the report given to the patient. For the purpose of this rule, the "name" means the sonographer's initial and surname.

## **Benefits payable**

As a rule, benefit is payable once only for ultrasonic examination at the one attendance, irrespective of the areas involved.

Except as indicated in the succeeding paragraphs, *attendance* means that there is a clear separation between one service and the next. For example, where there is a short time between one ultrasound and the next, benefits will be payable for one service only. As a guide, the Department of Human Services will look to a separation of three hours between services and this must be stated on accounts issued for more than one service on the one day.

Where more than one ultrasound service is rendered on the one occasion and the service relates to a non-contiguous body area, and they are "clinically relevant", (ie. the service is generally accepted in the medical profession as being necessary for the appropriate treatment or management of the patient to whom it is rendered), benefits greater than the single rate may be payable. Accounts should be marked "non-contiguous body areas".

Benefits for two contiguous areas may be payable where it is generally accepted that there are different preparation requirements for the patient and a clear difference in set-up time and scanning. Accounts should be endorsed "contiguous body area with different set-up requirements".

### **Subgroup 1 - General Ultrasound**

#### **Abdominal Ultrasound Items 55014, 55016, 55036 and 55037**

Medicare benefits are not payable for ultrasound items 55014, 55016, 55036 and 55037 unless a morphological assessment of the abdomen has been performed. For R-type services, the providing practitioner must provide a report of the service performed to the requesting practitioner. For NR-type services, the report must be included in the record of the consultation.

#### **Post-void residual items 55084 and 55085**

When a post-void residual is the only service clinically indicated and/or rendered, it is inappropriate to report a pelvic, urinary or abdominal ultrasound, instead of or in addition to this service (55084 or 55085). Similarly, if a complete pelvic, urinary or abdominal ultrasound is billed, it is inappropriate to bill separately for a post-void residual determination, since payment of this has already been included in the payment for the complete scans.

The report must contain an entry denoting the post-void residual amount and/or bladder capacity as calculated/estimated from the ultrasound device. In addition, the medical record must contain documentation of the indication for the service and the number of times performed.

### **Subgroup 2 - Cardiac ultrasound**

#### **Transoesophageal echocardiography - Item 55135 and consequential amendment to Item 55130**

The Medical Services Advisory Committee (MSAC) has reviewed intra-operative transoesophageal echocardiography and recommended that public funding for this procedure be supported on an interim basis and be restricted to assessment of cardiac valve competence following valve replacement or repair. Item 55135 has been developed for these indications in consultation with the Australian Society of Anaesthetists, the Australian Medical Association and the Cardiac Society of Australia and New Zealand. Indications other than those recommended by MSAC will continue to be funded under item 55130. Further research will be undertaken to assist MSAC in its future evaluation of the use of intra-operative transoesophageal echocardiography.

### **Subgroup 3 - Vascular ultrasound**

Benefits payable

Medicare benefits are only payable for:

a maximum of two vascular ultrasound studies in a seven-day period. A vascular ultrasound study may include one or more items. Additionally where a patient is referred for a bilateral study of both arms or both legs (eg both arms for item 55238), the account should indicate 'bilateral' or 'left' and 'right' to enable benefit to be paid.

clinically relevant services, that is, the service is generally accepted in the medical profession as being necessary for the appropriate treatment or management of the patient to whom it is rendered. Any decision to have a patient return on a different day to complete a multi-area diagnostic imaging service should only be made on the basis of clinical necessity.

### ***Multiple Vascular Ultrasound Services - refer to DIJ***

Separation of services on the one day/contiguous and non-contiguous body areas

These rules do not apply to the vascular ultrasound items and therefore will not impact on the MVUSSR.

### **Examination of peripheral vessels**

Vascular ultrasound services can be claimed in conjunction with item 11612.

### **Subgroup 4: Urological ultrasound**

#### **Prostate ultrasound (Items 55600 to 55604)**

Benefits for these items are payable where the service is rendered in the following circumstances:

- a digital rectal examination of the prostate was personally performed by the medical practitioner who also personally rendered the ultrasound service; and
- the transducer probe or probes used can obtain both axial and sagittal scans in 2 planes at right angles; and
- the patient was assessed prior to the service by a medical practitioner recognised in one or more of the specialties specified, not more than 60 days prior to the ultrasound service.

Items 55600 and 55601 cover the situation where the service was rendered by a medical practitioner who **did not** assess the patient, whereas items 55603 and 55604 cover the situation where the service was rendered by a medical practitioner who **did** assess the patient.

### **Subgroup 5: Obstetric and Gynaecological ultrasound**

#### **NR Services**

Medicare benefits are not payable for more than three NR-type ultrasound services in Subgroup 5 of Group 11 (ultrasound) that are performed on the same patient in any one pregnancy.

#### **Clinical indications**

For items where clinical indications are listed (items 55700, 55704, 55707, 55718, 55759 and 55768), or where a clinical indication is required (items 55712, 55721, 55764 and 55772) for performance of subsequent scans the referral must identify the relevant clinical indication for the service.

It should be noted that a patient must have previously had either a 55706 or 55709 ultrasound in the same pregnancy to be eligible to claim for either a 55712 or 55715 obstetric service. To be eligible to claim for either a 55721 or 55725 obstetric service, a patient must have previously had either a 55718 or 55723 ultrasound in the same pregnancy.

If the service is self-determined (items 55703, 55705, 55708, 55715, 55723, 55725, 55762, 55766, 55770 and 55774), the clinical condition or indication must be recorded in the medical practitioner's clinical notes.

## **Dating of pregnancy**

When dating a pregnancy for the purpose of items 55700 to 55774, a patient is:

- a) "less than 12 weeks of gestation" means up to 11 weeks and 6 days of pregnancy;
- b) "12 to 16 weeks of gestation" means from 12 weeks 0 days of pregnancy up to 16 weeks plus 6 days of pregnancy (inclusive);
- c) "17 to 22 weeks of gestation" means from 17 weeks 0 days of pregnancy up to 22 weeks plus 6 days of pregnancy (inclusive); or
- d) "after 22 weeks of gestation" means from 23 weeks 0 days of pregnancy onwards
- e) "after 24 weeks of gestation" means from 25 weeks 0 days of pregnancy onwards.

## **Nuchal Translucency Testing**

Where a nuchal translucency measurement is performed when the pregnancy is dated by a crown rump length of 45-84mm in conjunction with items 55700 (R ) or 55703 (NR) or 55704 (R) or 55705 (NR), then items 55707 (R ) or 55708 (NR) should be claimed. If nuchal translucency measurement for risk of foetal abnormality is performed in conjunction with any additional condition in items 55700, 55703, 55704 or 55705, only one fee is payable.

It should be noted that the Royal Australian and New Zealand College of Obstetricians and Gynaecologists (RANZCOG) provides a credentialling program for providers of nuchal translucency scans. It is anticipated that use of items 55707 and 55708 will be restricted to credentialed medical practitioners and sonographers in the future.

## **Multiple pregnancies**

Obstetric ultrasound items 55759 to 55774 cover scanning of a patient who is experiencing a multiple pregnancy. The items incorporate a fee adjustment in recognition of the added complexity and costs associated with scanning multiple pregnancies. Based on the recommendations of the profession, the items apply only to patients where a multiple pregnancy has been confirmed by ultrasound. The items include identical restrictions and provisions as the second and third trimester items (55706-55725), and include items for referred and non-referred services.

Obstetric ultrasound and non-metropolitan providers (Items 55712, 55721, 55764 and 55772)

Where a practitioner has obstetric privileges at a non-metropolitan hospital and refers for items 55712, 55721 and 55764 and 55772, the practitioner must confirm his/her eligibility by stating 'non-metropolitan obstetric privileges' on the referral form.

In relation to items 55712, 55721, 55764 and 55772, non-metropolitan area includes any location outside of the Sydney, Melbourne, Brisbane, Adelaide, Perth, Greater Hobart, Darwin or Canberra major statistical divisions, as defined in the Australian Standard Geographical Classification 2010 published by the Australian Bureau of Statistics (publication number 1216.0 of 2010).

## **Subgroup 6: Musculoskeletal (MSK) ultrasound**

### **Personal attendance**

Medicare Benefits are only payable for a musculoskeletal ultrasound service (items 55800 to 55854) if the medical practitioner responsible for the conduct and report of the examination personally attends during the performance of the scan and personally examines the patient. Services that are performed because of medical necessity in a remote location are exempt from this requirement - see DID for definition of remote area. Note: Practitioners do not have to apply for a remote area exemption in these circumstances.

## **Multiple Musculoskeletal Ultrasound Scans - items 55800 to 55846**

Generally Medicare benefits are payable for more than one musculoskeletal ultrasound scan performed on the same day, however the scans are subject to Rule A of the general diagnostic imaging multiple services rules.

It is not permitted to split a bilateral scan. Where bilateral ultrasound scans are performed (or more than one area is scanned under items 55844 or 55646) the relevant item should be itemised once only on accounts and receipts or Medicare bulk billing forms. For example if both shoulders are scanned, Item 55808 (or 55810 as the case may be) should be claimed once only. This is because the item descriptor for these items covers one or both sides, or one or more areas. A patient should not be asked to make a second appointment in order to attract a benefit for multiple scans.

### **Shoulder and knee (Items 55808 and 55810 and 55828 and 55830)**

Benefits for shoulder ultrasound items 55808 and 55810 are only payable when referral is based on the clinical indicators outlined in the item descriptions. Benefits are not payable when referred for non-specific shoulder pain alone.

Benefits for knee ultrasound items 55828 and 55830 are only payable when referral is based on the clinical indicators outlined in the item descriptions. Benefits are not payable when referred for non-specific knee pain alone or other knee conditions including:

- meniscal and cruciate ligament tears; and
- assessment of chondral surfaces.

### **IN.0.16 Restriction on item 55054**

The Health Insurance (General Medical Services Table) Regulations now require that an item in Group T10 (Relative Value Guide) cannot be claimed in association with item 55054 (ultrasound when used in conjunction with procedures). This came into effect on 1 November 2012.

The use of ultrasound guidance provided in association with anaesthetic procedures is currently being assessed by the Medical Services Advisory Committee (MSAC) for safety, effectiveness and cost-effectiveness (MSAC Application 1183 - Ultrasound imaging in the practice of anaesthesia).

Medicare rebates will continue to be available for the procedures alone and whether individual anaesthetists choose to use ultrasound to assist with those procedures is a matter of clinical judgement for those providers.

### **IN.0.17 Group I3 - Diagnostic Radiology Examination and report**

As for all diagnostic imaging services, the benefits allocated to each item from 57506 to 60509 inclusive cover the total service, ie. the image, reading and report. Separate benefits are not payable for individual components of the service, eg preliminary reading. Benefits are not separately payable for associated plain films involved with these items.

#### **Exposure of more than one film**

Where the radiographic examination of a specific area involves the exposure of more than one film, benefits are payable once only, except where special provision is made in the description of the item for the inclusion of all films taken for the purpose of the examination. This means that if an x-ray of the foot is requested, regardless of the number of exposures from different angles, the completed service comprises x-ray of the foot by one or more exposures and the report. The exception to this would be the plain x-ray of the spine items (58100 to 58115) where the item number differs dependent upon the regions of the spine that are examined at the same occasion, ie. 58112 applies where two regions are examined.

## **Comparison X-rays**

Where it is necessary for one or more films of the opposite limb to be taken for comparison purposes, benefits are payable for radiographic examination and reporting of one limb only. Comparison views are considered to be part of the examination requested.

### **Subgroup 4: Radiographic examination of the spine**

#### ***Multiple regions***

Multiple region items require that the regions of the spine to be studied must be specified on any account issued or patient assignment form completed.

#### **Item 58112 - spine, two regions**

Where item 58112 is rendered (spine, two regions), the item numbers for the regions of the spine being studied must be specified (ie. from items 58100, 58103, 58106 and 58109).

*Example:* for a radiographic examination of the spine where the cervical and thoracic regions are to be studied, item numbers 58100 and 58103 must be specified on any account issued or patient assignment forms completed.

#### **Item 58115 - spine, three region**

Where item 58115 is rendered (spine, three regions), the item numbers for the regions of the spine being studied must be specified (items 58100, 58103, 58106 and 58109).

*Example:* for a radiographic examination of the spine where the cervical, the thoracic and the lumbosacral regions are to be studied, item numbers 58100, 58103 and 58106 must be specified on any accounts issued or patient assignment forms completed.

#### **Item 58115 & 58108 - spine, three and four region - medical practitioner**

Three and four region radiographic examinations items 58115 and 58108 only apply when requested by a medical practitioner.

#### **Items 58120, 58121, 58126 and 58127 - spine, three and four region - non-medical practitioner**

Items 58120, 58121, 58126 and 58127 apply to physiotherapists and osteopaths who request a three or four region x-ray and only allow a benefit for one of the items, per patient, per calendar year.

#### ***Hand and wrist combination X-ray***

An examination of the hand and the wrist on the same side should be claimed as item 57512 (NR) or 57515 (R). If items 57506 (NR) or 57509 (R) are claimed for multiple non-adjacent areas on the same side, or areas on different sides, the account should include annotation on this eg L and R hand, hand and humerus.

#### ***Images produced using Dual Energy X-ray Absorptiometry (DEXA) equipment***

X-ray items of the spine 58100 to 58115 and hip 57712 and 57715 cannot be claimed when images are produced using Dual Energy X-ray Absorptiometry (DEXA) equipment.

### **Subgroup 8: Radiographic examination of alimentary tract and biliary system**

#### ***Plain abdominal film (Items 58900/58903)***

Benefits are not attracted for Items 58900/58903 in association with barium meal examinations or cholecystograms whether provided on the same day or previous day. Preliminary plain films are covered in each study.

## **Subgroup 10: Radiographic examination of the breasts**

### ***Request requirements (items 59300 and 59303)***

Benefits under items 59300 and 59303 are attracted only where the patient has been referred in specific circumstances as indicated in the description of the items. To facilitate these provisions, the requesting medical practitioner is required to include in the request the clinical indication for the procedure. The requesting practitioner must personally sign the request.

The reference to "with or without thermography" has been removed from the item descriptor for items 59300 and 59303 with effect from 1 November 2003. The Radiology Management Committee (RMC) at its meeting of 12 August 2003, agreed that there is no current scientific evidence to support the use of thermography in the early detection of breast cancer and in the reduction of mortality.

### ***Professional supervision***

Mammography services (items 59300 to 59318) are not eligible for a Medicare rebate unless the diagnostic imaging procedure is performed under the professional supervision of a:

- (a) specialist in the specialty of diagnostic radiology who is available to monitor and influence the conduct and diagnostic quality of the examination, and, if necessary, to personally attend on the patient; or
- (b) if paragraph (a) cannot be complied with:
  - (i) in an emergency; or
  - (ii) because of medical necessity in a remote location.

Note: Practitioners do not have to apply for a remote area exemption in these circumstances.

## **Subgroup 12: Radiographic examination with opaque or contrast media**

### ***Myelogram (Item 59724)***

Benefits are not payable where a myelogram is rendered in association with a CT myelogram (Item 56219 - see DIL.9.1). Where it is necessary to render a CT and a myelogram, CT Items 56220, 56221 and 56223 would apply.

## **Subgroup 13: Angiography**

### ***Angiography services - meaning of (K) and (NK)***

A reduced Schedule fees applies to cardiac angiography services provided on equipment that is 10 years old or older. This equipment must have been first installed in Australia ten or more years ago, or in the case of imported pre-used equipment, must have been first manufactured ten or more years ago.

A range of items cover services provided on older equipment. These items are 59971, 59972, 59973 and 59974, are identified by the addition of the letters '(NK)' at the end of the item and should be used where services are performed on equipment ten years old or older.

Items 59903, 59912, 59925 and 59970 have the letter '(K)' included at the end of the item. These items should be used where services are performed on equipment first installed in Australia less than ten years ago. In the case of imported pre-used equipment, the services must have been performed on a date which is less than ten years from the first date of manufacture of the equipment.

### ***Digital subtraction angiography (DSA) (Items 60000-60078)***

Benefits are payable only where these services are rendered in an angiography suite (a room that contains only equipment designed for angiography that is able to perform digital subtraction or rapid-sequence film angiography).

Benefits are not payable when these services are rendered using mobile DSA imaging equipment as these services are covered by item 59970.

Each item includes all preparation and contrast injections other than for selective catheterisation. For Digital Subtraction Angiography (DSA), benefits are payable for a maximum of 1 DSA item (from Items 60000 to 60069). For selective DSA - 1 DSA item (from Items 60000 to 60069) and 1 item covering selective catheterisation (from 60072, 60075 or 60078).

If a DSA examination covers more than one of the specified regions/combinations, then the region/combination forming the major part of the examination should be selected, with itemisation to cover the total number of film runs obtained. A run is the injection of contrast, data acquisition, and the generation of a hard copy record.

#### **Subgroup 16: Preparation for radiological procedure**

##### ***Preparation items (Items 60918 and 60927)***

Items 60918 and 60927 apply only to the preparation of a patient for a radiological procedure for a service to which any of items 59903 to 59974 apply. A report is not required for these services.

#### **IN.0.18 Group I5 - Magnetic Resonance Imaging Itemisation**

MRI items in Group I5 are divided into subgroups defined according to the area of the body to be scanned, (ie head, spine, musculoskeletal system, cardiovascular system or body) and the number of occasions in a defined period in which Medicare benefits may be claimed by a patient. Subgroups are divided into individual items, with each item being for a specific clinical indication.

##### **Eligible services**

Items in Subgroups 1 to 21 of Group I5 (other than items 63541 to 63544) apply to a MRI or MRA service performed:

- iii. on request by a recognised specialist or consultant physician, where the request made in writing identifies the clinical indication for the service;
- iv. under the professional supervision of an eligible provider; and
- v. with eligible equipment.

Items 63395 to 63398 and the items in Subgroups 19, 20 and 21 (other than items 63455 and 63461) of Group I5 apply to a MRI service performed:

- iii. on request by a recognised specialist or consultant physician, where the request made in writing identifies the clinical indication for the service;
- iv. under the professional supervision of an eligible provider; and
- v. with partial eligible equipment.

Items in Subgroup 22 of Group I5 apply to a MRI or MRA service performed:

- d. on request by a medical practitioner, where the request made in writing identifies the clinical indication for the service;
- e. under the professional supervision of an eligible provider; and
- f. with eligible equipment or partial eligible equipment.

Items in Subgroups 33 and 34 of Group I5 apply to a MRI service performed

- k. on request by a medical practitioner other than a specialist or consultant physician, where the request made in writing identifies the clinical indication for the service;
- l. under the professional supervision of an eligible provider; and

- m. with eligible equipment or partial eligible equipment.

Prostate Multiparametric MRI items 63541 to 63544 apply to a service performed:

- a. at the request of a specialist in the speciality of urology, radiation oncology, or medical oncology; and
- b. in a permissible circumstance; and
- c. using:
  - (i) eligible equipment; or
  - (ii) partial eligible equipment.

### **Requests**

A request must be in writing and identify the clinical indications for the service.

MRI services can only be requested by a recognised specialist medical practitioner or consultant physician for the purpose of the Health Insurance Act 1973. However, there are exceptions to this provision for a limited number of MRI:

- f. All dental specialists, prosthodontists, oral and maxillofacial surgeons, oral medicine specialists and oral pathology specialists may request item 63334 - scan of musculoskeletal system for derangement of the temporomandibular joint (s); and
- g. Oral and maxillofacial surgeons and oral medicine and oral pathology specialists can also request item 63007 - scan of the head for skull base or orbital tumour; and
- h. Items in subgroup 33 and 34 may only be requested by a medical practitioner other than a specialist or a consultant physician.

For cardiac MRI items 63395 to 63398 (scan for diagnosis of arrhythmogenic right ventricular cardiomyopathy (ARVC)), the request must specify that ARVC is suspected on the basis of diagnostic criteria endorsed by the Cardiac Society of Australia and New Zealand (CSANZ), in force at the time the service is requested.

### **Permissible circumstances for performance of service**

Group I5 items must be performed as follows:

(a) both:

- iv. under the professional supervision of an eligible provider who is available to monitor and influence the conduct and diagnostic quality of the examination, including, if necessary, by personal attendance on the patient; and
- v. reported by an eligible provider; or

(b) if paragraph (a) is not complied with:

- iv. in an emergency; or
- v. because of medical necessity, in a remote location (refer to DID).

Note: Practitioners do not have to apply for a remote area exemption in these circumstances.

### **Eligible providers**

For items in Group I5 (excluding cardiac MRI items 63395 to 63398), an eligible provider is a specialist in diagnostic radiology who satisfies the Chief Executive Medicare (Department of Human Services) that he or she is a participant of the Royal Australian and New Zealand College of Radiologists' (RANZCR) Quality and Accreditation Program.

For cardiac MRI items 63395 to 63398, an eligible provider is a specialist in diagnostic radiology or a consultant physician, who is recognised by the Conjoint Committee for Certification in Cardiac MRI. The conjoint committee

is comprised of specialists from the Royal Australian and New Zealand College of Radiologists (RANZCR) and the Cardiac Society of Australia and New Zealand (CSANZ).

**Eligible Provider declaration**

The specialist must give the Department of Human Services a statutory declaration:

- iv. stating that he or she is enrolled in the RANZCR Quality and Accreditation Program (except for providers only providing cardiac MRI (items 63395 to 63398));
- v. specifying the location of the MRI equipment;
- vi. specifying the kinds of diagnostic imaging equipment offered at the location;
- vii. stating the date of installation of the equipment (and the time of installation if this occurred on 12 May 1998); and
- viii. if the equipment had not been installed before 7.30pm on 12 May 1998 (Eastern Standard Time), the specialist must also give the Department of Human Services a copy of the contract for the purchase or lease of the equipment.

In addition the Department of Human Services may request further supporting documentation or information. Specialists or consultant physicians are advised to contact the Provider Liaison Section, the Department of Human Services on 132 150 prior to lodging a declaration.

**Eligible equipment is equipment which is:**

- h. is located at premises of a comprehensive practice; and
- i. is made available to the practice by a person:
  - a. who is subject to a deed with the Commonwealth that relates to the equipment; and
  - b. for whom the deed has not been terminated; and
- j. is not identified as partial eligible equipment in the deed

**Partial eligible equipment is equipment which is:**

Equipment that:

- g. is located at premises of a comprehensive practice; and
- h. is made available to the practice by a person:
  - a. who is subject to a deed with the Commonwealth that relates to the equipment; and
  - b. for whom the deed has not been terminated; and
- i. is identified as partial eligible equipment in the deed

The location of Medicare-eligible MRI machines is available at the Department of Health's website at <http://www.health.gov.au>

**Number of eligible services**

Services in subgroups 1, 4, 6, 8, 11 and 18 have no frequency restriction.

For other MRI subgroups frequency restrictions on services are as follows:

| MRI or MRA items | Limitation period | Maximum number of services |
|------------------|-------------------|----------------------------|
| 63040 to 63085   | 12 months         | 3                          |
| 63101 and 63104  | 12 months         | 3                          |
| 63125 to 63136   | 12 months         | 3                          |
| 63161 to 63194   | 12 months         | 3                          |
| 63219 to 63265   | 12 months         | 3                          |
| 63271 to 63285   | 12 months         | 3                          |

|                                      |                    |   |
|--------------------------------------|--------------------|---|
| 63322 to 63348                       | 12 months          | 3 |
| 63361 and 63364                      | 12 months          | 2 |
| 63385 to 63394                       | 12 months          | 2 |
| 63395 and 63396                      | 12 months          | 1 |
| 63397 and 63398                      | 36 months          | 1 |
| 63401 to 63408                       | 12 months          | 3 |
| 63416 and 63419                      | 12 months          | 1 |
| 63425 to 63433                       | 12 months          | 2 |
| 63455 to 63458 and<br>63461 to 63467 | 12 months          | 1 |
| 63545 to 63546                       | 12 months          | 1 |
| 63547 and 63548                      | patient's lifetime | 1 |
| 63482 and 63486                      | 12 months          | 3 |
| 63507 to 63523 and<br>63551 to 63561 | 12 months          | 3 |

Items 63470 or 63473 in subgroup 20 may be claimed only once in a patient's lifetime.

Items in subgroup 22 (modifying items) may only be ordered in conjunction with an eligible MRI/MRA service.

Items 63501 and 63502 in subgroup 32 may only be claimed once in any 12-month period, and items 63504 and 63505 have no restrictions.

*Example:* Item 63271 in subgroup 10 can be claimed by a patient on three occasions in any 12 month period. If the patient had claimed Medicare benefits for the following:

| Item  | Date of Service |
|-------|-----------------|
| 63271 | 10/12/04        |
| 63271 | 18/4/05         |
| 63271 | 16/10/05        |
| 63271 | 11/12/05        |

The following table provides examples of further dates of service would, and would not, be eligible:

| Date of service | Claimable? | Why?  |
|-----------------|------------|---|
| 12/3/05         | No         | Between 10/12/04 and 9/12/05, the patient would have had 4 x 63271 in 12 months - 10/12/04, 12/3/05, 18/4/05 and 16/10/05 |
| 4/3/06          | No         | Between 5/3/05 and 4/3/06, the patient would have had 4 x 63271 in 12 months - 18/4/05, 16/10/05, 11/12/05 and 4/3/06     |
| 20/4/06         | Yes        | Between 21/4/05 and 20/4/06, the patient would have had 3x 63271 in 12 months - 16/10/05, 11/12/05 and 20/4/06            |

The frequency restrictions are therefore considered to be rolling restrictions and not based on calendar or financial years.

In addition, restrictions on the number of services of the kind described in subgroup 12 apply to specific anatomical sites. Where an item description applies to more than one anatomical site the restriction on the number of services applies to each site.

Item 63328, MRI scan for derangement of the knee or its supporting structures, applies to two specific anatomical sites, ie, right knee and left knee. Each anatomical site may be scanned up to 3 times in any 12-month period.

Prostate Multiparametric MRI items 63541 and 63542 are applicable not more than once in a 12 month period.

Prostate Multiparametric MRI items 63543 and 63544 may be claimed:

- j. at the time of diagnosis of prostate cancer; and
- k. 12 months following diagnosis; and
- l. every third year thereafter; or
- m. at any time if there is clinical concern from the specialist requesting the service.

Clinical concern means a clinical decision that the prostate cancer has progressed, and includes prostate specific antigen progression.

Items 63543 and 63544 are not applicable for the purposes of treatment planning or for monitoring after treatment of prostate cancer.

### **IN.0.19 Bulk Billing Incentive**

To provide an incentive to bulk-bill, for out of hospital services that are bulk billed the schedule fee is reduced by 5% and rebates paid at 100% of this revised fee (except for item 61369, and all items in Group I5 - Magnetic Resonance Imaging). For items in Group I5 - Magnetic Resonance Imaging, the bulk billing incentive for out of hospital services is 100% of the Schedule Fee listed in the table.

### **IN.1.1 New Explanatory Note for DVT**

Medical practitioners referring patients for duplex ultrasound for suspected lower limb DVT (items 55221, 55222, 55244 and 55246) should read and consider the Royal Australian and New Zealand College of Radiologists' [RANZCR 2015 Choosing Wisely recommendations](#), or such RANZCR Choosing Wisely recommendations that succeed it.

### **IN.1.2 Duplex Ultrasound for Pulmonary Embolism**

Medical practitioners referring patients for imaging for suspected PE (items 57351, 57356, 61328, 61340, 61348) should read and consider The Royal Australian and New Zealand College of Radiologists' [RANZCR 2015 Choosing Wisely recommendations](#), or such clinical RANZCR Choosing Wisely recommendations as succeed it.

**DIAGNOSTIC IMAGING SERVICES ITEMS**

11. ULTRASOUND

6. MUSCULOSKELETAL

SHOULDER OR UPPER ARM, 1 or both sides, ultrasound scan of, where:

(a) the service is not associated with a service to which an item in Subgroups 2 or 3 of this Group applies; and

(b) the referring practitioner is not a member of a group of practitioners of which the providing practitioner is a member,

and where the service is provided, for the assessment of one or more of the following conditions or suspected

conditions:

- evaluation of injury to tendon, muscle or muscle/tendon junction; or
- rotator cuff tear/calcification/tendinosis (biceps, subscapular, suspraspinatus, infraspinatus); or
- biceps subluxation; or
- capsulitis and bursitis; or
- evaluation of mass including ganglion; or
- occult fracture; or
- acromioclavicular joint pathology.(R)

(See para IN.0.19 of explanatory notes to this Category)

**Fee:** \$109.10      **Benefit:** 75% = \$81.85    85% = \$92.75

Note: *Benefits are only payable when referred based on the clinical indicators outlined in the item descriptions. Benefits are not payable when referred for non-specific shoulder pain alone.*

SHOULDER OR UPPER ARM, 1 or both sides, ultrasound scan of, where:

## INDEX

### A

Abdomen, barium X-ray 58909  
 Abdominal x-ray, plain 58900, 58903  
 Air contrast study, with opaque enema 58921  
 Air insufflation 59763  
 Alimentary tract, x-ray of 58900, 58903, 58909, 58912  
 58915-58916, 58921  
 Angiocardiology 59903  
 Angiography, cerebral, preparation for 60918  
 Angiography, coronary 59912  
 Angiography, digital subtraction (DSA) 60000-60001  
 60003-60004, 60006-60007, 60009-60010, 60012-60013  
 60015-60016, 60018-60019, 60021-60022, 60024-60025  
 60027-60028, 60030-60031, 60033-60034, 60036-60037  
 60039-60040, 60042-60043, 60045-60046, 60048-60049  
 60051-60052, 60054-60055, 60057-60058, 60060-60061  
 60063-60064, 60066-60067, 60069-60070  
 Angiography, with mobile image intensification 59970  
 Ankle, x-ray of 57518, 57521, 57524, 57527  
 Antegrade pyelography 58715  
 Arm, x-ray of 57506, 57509, 57512, 57515  
 Arteriogram - selective, preparation 60927  
 Arteriography 59912  
 Arteriography or venography, selective 60072-60073  
 60075-60076, 60078-60079  
 Arteriography, preparation for 60918  
 Arteriography, selective 59912  
 Arthrography 59751

### B

Barium, alimentary tract 58909, 58912, 58915  
 Biliary system, x-ray of 58927, 58933, 58936  
 Bone, age study 58300  
 Bowel - small, barium x-ray of 58912, 58915  
 Bowel - small, enema 58916  
 Breast x-ray, excised tissue 59318  
 Breast x-ray, restriction applies 59300, 59303  
 Breast x-ray, with surgical procedure 59312, 59314  
 Bronchography 59715  
 Bulk-billing 64990-64991

### C

Calculus, salivary, x-ray of 57918  
 CBCT dental imaging 57362-57363  
 Cephalometry, x-ray 57902  
 Cerebral angiography, preparation for 60918  
 Cervical spine, x-ray of 58100  
 Chest, x-ray of 58500, 58503, 58506, 58509  
 Cholegraphy 58927, 58933, 58936  
 Clavicle, x-ray of 57706, 57709  
 Coccyx, x-ray of 58109  
 Colon, x-ray of 58912, 58921  
 Computed Tomography of the colon 56553, 56555  
 Computerised tomography, brain, chest and upper abdomen 57001,  
 57007, 57041, 57047

Computerised tomography, chest and upper abdomen 56301  
 56307, 56341, 56347  
 Computerised tomography, coronary arteries 57360-57361  
 Computerised tomography, facial bones 56022, 56028, 56062  
 56068  
 Computerised tomography, head, brain 56001, 56007, 56041  
 56047  
 Computerised tomography, interventional technique 57341  
 57345  
 Computerised tomography, middle ear 56016, 56056  
 Computerised tomography, neck 56101, 56107, 56141, 56147  
 Computerised tomography, orbits 56013, 56053  
 Computerised tomography, pelvimetry 57201, 57247  
 Computerised tomography, pelvis 56409, 56412, 56449, 56452  
 Computerised tomography, pituitary fossa 56010, 56050  
 Computerised tomography, spine 56219-56221, 56223-56240  
 56259  
 Computerised tomography, spiral angiography 57350-57351  
 57355-57356  
 Computerised tomography, upper abdomen 56401, 56407, 56441  
 56447  
 Computerised tomography, upper abdomen & pelvis 56501, 56507  
 56541, 56547  
 Computerised tomography, chest, abdomen, pelvis, neck 56801  
 56807, 56841, 56847  
 Contrast media, intro for radiology 60918  
 Coronary arteriography, selective 59912  
 Cysto-urethrography, retrograde micturating 58721  
 Cystography, retrograde 58718

### D

Dacryocystography 59703  
 Defaecogram 58939  
 Digits & phalanges 57506, 57509, 57512, 57515, 57518, 57521  
 57524, 57527  
 Discography 59700  
 Duodenum, barium x-ray of 58909, 58912  
 Duplex scanning, carotid and vertebral vessels 55274  
 Duplex scanning, of abdominal aorta, arteries, iliac arteries and  
 veins 55276  
 Duplex scanning, of arteries/grafts lower limb 55238  
 Duplex scanning, of arteries/grafts upper limb 55248  
 Duplex scanning, of intra-cranial vessels 55280  
 Duplex scanning, of penis, cavernosal artery 55282  
 Duplex scanning, of penis, cavernosal tissue 55284  
 Duplex scanning, of renal/visceral vessels 55278  
 Duplex scanning, of veins lower limb, venous disease 55246  
 Duplex scanning, of veins lower limb, venous thrombosis 55244  
 Duplex scanning, veins upper limb 55252

### E

Echocardiographic, exam of heart 55113-55118, 55130, 55135  
 Echography, ultrasonic 55028-55033, 55036-55039, 55048-55049  
 55054, 55070, 55073, 55076, 55079, 55084-55085

55113-55118  
 Elbow, x-ray 57506, 57509  
 Enema, opaque x-ray 58921  
 Eye, x-ray of 57924

**F**

Facial bones, x-ray of 57912  
 Femur, x-ray of 57518, 57527, 57721  
 Fistulogram 59739  
 Fluoroscopic exam 60500, 60503, 60506, 60509, 61109  
 Foot, x-ray of 57518, 57521, 57524, 57527  
 Forearm, x-ray of 57506, 57515  
 Foreign body, localisation of and report 59103

**G**

Gallbladder, x-ray of 58927, 58933, 58936

**H**

Hand/wrist/forearm/elbow 57506, 57509, 57512, 57515  
 Hip joint, x-ray of 57712  
 Humerus, x-ray of 57506, 57509, 57512, 57515  
 Hysterosalpingography 59712

**I**

Intravenous pyelogram 58706

**K**

Knee/foot/ankle/leg/femur x-ray 57518, 57521, 57524, 57527

**L**

Larynx, neck tissues, x-ray of 57945  
 Leg, x-ray of 57518, 57521, 57524, 57527  
 Lumbo-sacral spine, x-ray of 58106  
 Lung fields, x-ray of 58500, 58503, 58506  
 Lymphangiography 59754

**M**

Magnetic Resonance Angiography, cardiovascular system 63401  
 63404  
 Magnetic Resonance Angiography, persons under 16 years 63416  
 Magnetic Resonance Imaging, body 63461  
 Magnetic Resonance Imaging, cardiovascular system 63385  
 63388, 63391  
 Magnetic Resonance Imaging, cervical spine and brachial plexus  
 63271, 63274, 63277, 63280  
 Magnetic Resonance Imaging, Head 63001  
 Magnetic Resonance Imaging, head 63004, 63007, 63010, 63040  
 63043, 63046, 63049, 63052, 63055, 63058, 63061, 63064  
 63067, 63070, 63073  
 Magnetic Resonance Imaging, head and cervical spine 63125  
 63128, 63131  
 Magnetic Resonance Imaging, head and neck vessels 63101  
 Magnetic Resonance Imaging, modifying items 63491, 63494  
 63497-63499

Magnetic Resonance Imaging, musculoskeletal system 63301  
 63304, 63307, 63322, 63325, 63328, 63331, 63334, 63337  
 63340, 63361

Magnetic Resonance Imaging, pelvis and upper abdomen 63470  
 63473

Magnetic Resonance Imaging, person under 16 years 63425  
 63428, 63440, 63443, 63446

Magnetic Resonance Imaging, PIP Breast Implant 63501-63502  
 63504-63505

Magnetic Resonance Imaging, spine - one region or two  
 contiguous regions 63151, 63154, 63161, 63164, 63167, 63170,  
 63173

63176, 63179, 63182, 63185

Magnetic Resonance Imaging, spine - three contiguous or two non  
 contiguous regio 63201, 63204, 63219, 63222, 63225  
 63228, 63231, 63234, 63237

Malar bones, x-ray of 57912

Mammary ductogram 59306, 59309

Mammography, (restriction applies) 59300, 59303

Mandible, X-ray of 57915

Mastoids, X-ray of 57906

Maxilla, X-ray of 57912

Myelography 59724

**N**

Nephography 58700, 58715

Nose, X-ray of 57921

Nuclear Medicine Imaging, brain study 61402, 61405

Nuclear medicine imaging, cardiovascular, cardiac blood flow,  
 shunt/output study 61320

Nuclear medicine imaging, cardiovascular, gated cardiac study -  
 1st pass/cardiac 61314

Nuclear medicine imaging, cardiovascular, gated cardiac study -  
 intervention 61316

Nuclear medicine imaging, cardiovascular, gated cardiac study-  
 planar or spect 61313

Nuclear Medicine Imaging, cerebro spinal fluid study 61409  
 61413

Nuclear Medicine Imaging, endocrine, adrenal study 61484-61485

Nuclear Medicine Imaging, endocrine, parathyroid study 61480

Nuclear Medicine Imaging, endocrine, thyroid study 61473

Nuclear Medicine Imaging, gastrointestinal, bowel haemorrhage  
 study 61364

Nuclear Medicine Imaging, gastrointestinal, colonic transit study  
 61384

Nuclear Medicine Imaging, gastrointestinal, gastric emptying  
 61381, 61383

Nuclear Medicine Imaging, gastrointestinal, gastro-oesophageal  
 reflux study 61373

Nuclear Medicine Imaging, gastrointestinal, hepatobiliary study  
 61360-61361

Nuclear Medicine Imaging, gastrointestinal, oesophageal clearance  
 study 61376

Nuclear Medicine Imaging, genitourinary, cystoureterogram 61397

Nuclear Medicine Imaging, genitourinary, renal cortical study  
 61387

Nuclear Medicine Imaging, genitourinary, renal study 61386  
 61389-61390, 61393

Nuclear Medicine Imaging, genitourinary, renal study including  
 renogram or plana 61386

Nuclear Medicine Imaging, genitourinary, testicular study 61401

Ultrasound, musculoskeletal 55800, 55854  
 Ultrasound, obstetric and gynaecological 55700, 55703-55709  
 55712, 55715, 55718, 55721, 55723, 55725, 55729, 55736  
 55739, 55759, 55762, 55764, 55766, 55768, 55770, 55772  
 55774  
 Ultrasound, urological 55603  
 Ultrasound, vascular 55238, 55244, 55246, 55248, 55252  
 55274, 55276, 55278, 55280, 55282, 55284, 55292, 55294  
 55296  
 Upper forearm & elbow, leg and knee, X-ray of 57524, 57527  
 Upper forearm & elbow, X-ray 57512, 57515  
 Urethrography, retrograde 58718  
 Urinary tract, X-ray of 58700, 58706, 58715, 58718, 58721

**V**

Venography, selective 60072-60073, 60075-60076, 60078-60079

**W**

Wrist/hand/forearm/elbow/humerus X-ray of 57506, 57509  
 57512, 57515

**X**

X-ray, alimentary tract and biliary system 58900, 58903

# **CATEGORY 6: PATHOLOGY SERVICES**

## SUMMARY OF CHANGES FROM 14/09/2019

The 14/09/2019 changes to the MBS are summarised below and are identified in the Schedule pages by one or more of the following words appearing above the item number:

- |                         |       |
|-------------------------|-------|
| (a) new item            | New   |
| (b) amended description | Amend |
| (c) fee amended         | Fee   |
| (d) item number changed | Renum |
| (e) EMSN changed        | EMSN  |

There are no changes to this Category for 14/09/2019.

## **PATHOLOGY SERVICES NOTES**

### **PN.0.1 Changes to the Pathology Services Table Health Insurance Regulations**

The *Health Insurance Act 1973* allows the Minister for Health to determine an appropriate Pathology Services Table which is then prescribed by Regulation.

The Minister has established the Pathology Services Table Committee (PSTC) to assist in determining changes to the Table (except new medical services and technologies - see below). Any person or organisation seeking to make a submission to this Committee can contact the PSTC Secretariat on (02) 6289 4080 or e-mail [pstc.secretariat@health.gov.au](mailto:pstc.secretariat@health.gov.au) and/or write to: Secretary, PSTC, MDP 107, Department of Health and Ageing, GPO Box 9848, CANBERRA ACT 2601.

Pathology submissions relating to new medical services and technologies should be forwarded to the Medical Services Advisory Committee (MSAC). MSAC has been established to advise the Minister on the strength of evidence pertaining to new and emerging medical technologies and procedures in relation to their safety, effectiveness and cost effectiveness, and under what circumstances public funding should be supported.

Any person or organisation seeking to make a submission to MSAC can contact the MSAC Secretariat on (02) 6289 7550 or email [msac.secretariat@health.gov.au](mailto:msac.secretariat@health.gov.au) and/or write to: MSAC Secretariat, Australian Government, Department of Health, MDP 106, GPO Box 9848, CANBERRA ACT 2601. The application form and guidelines for applying can also be obtained from MSAC's website - [www.msac.gov.au](http://www.msac.gov.au)

### **PN.0.2 Explanatory Notes - Definitions Excessive Pathology Service**

This means a pathology service for which a Medicare benefit has become or may become payable and which is not reasonably necessary for the adequate medical or dental care of the patient concerned.

### **PN.0.3 Group of Practitioners**

This means:

- (i) a practitioner conducting a medical practice or a dental practice, or a participating nurse practitioner practice, or a participating midwife practice together with another practitioner, or other practitioners, participating (whether as employees or otherwise) in the provision of professional services as part of that practice; or
- (ii) two or more practitioners conducting a medical practice or a dental practice, or a participating nurse practitioner practice, or a participating midwife practice as partners; or
- (iii) those partners together with any other practitioner who participates (whether as an employee or otherwise) in the provision of professional services as part of that practice.

### **PN.0.4 Initiate**

In relation to a pathology service this means to request the provision of pathology services for a patient.

### **PN.0.5 Patient Episode**

A patient episode comprises a pathology service or services specified in one or more items which are provided for a single patient, the need for which was determined under subsection 16A(1) of the Act on the same day, whether they were provided by one or more approved pathology practitioners on one day or over several days and whether they are requested by one or more treating practitioners. Even if a treating practitioner writes separate request forms to cover the collection of specimens at different times, where the decision to collect the multiple specimens was made at the same time, the multiple tests are deemed to belong to the same patient episode. In addition, if more than one

request is made, on the same or different days, for tests on the same specimen within 14 days, they are part of the same patient episode.

Rule 4 of the Pathology Services Table provides an exemption to the above and enables services requested on one day which are performed under strictly limited circumstances for seriously or chronically ill patients with certain specified conditions to each be classified as a patient episode. See PD.2 for further information on exemptions.

Rule 14.(8) also provides that only a single patient episode initiation fee will be payable for all the specimens collected on one day from one patient in or by one Approved Pathology Authority.

### **PN.0.7 Personal Supervision**

This means that an Approved Pathology Practitioner will, to the fullest extent possible, be responsible for exercising an acceptable level of control over the rendering of pathology services. See PM.1 to PM.3 for a full description of the responsibilities involved in personal supervision.

### **PN.0.8 Prescribed Pathology Service**

These are simple basic pathology services which are included in Group P9 and may be performed by a medical practitioner in the practitioner's surgery without the need to obtain Approved Pathology Authority, Approved Pathology Practitioner or Accredited Pathology Laboratory status.

### **PN.0.9 Proprietor of a Laboratory**

This means in relation to a pathology laboratory the person, authority or body of persons having effective control of:

- (i) the laboratory premises, whether or not the holder of an estate or interest in the premises;
- (ii) the use of equipment used in the laboratory; and
- (iii) the employment of staff in the laboratory.

### **PN.0.10 Specialist Pathologist**

This means a medical practitioner recognised for the purposes of the Health Insurance Act 1973 as a specialist in pathology (see 5.1 of the "General Explanatory Notes" in Section 1 of this book). The principal specialty of pathology includes a number of sectional specialties. Accordingly, a medical practitioner who is recognised as a specialist in a sectional specialty of pathology is recognised as a specialist pathologist for this purpose.

### **PN.0.11 Designated Pathology Service**

This means a pathology service specified in items 65150, 65175, 66650, 66695, 66711, 66722, 66785, 66800, 66812, 66819, 66825, 69384, 69494, 71089, 71153 or 71165. Where one Approved Pathology Practitioner in an Approved Pathology Authority has performed some but not all the estimations in a coned item and has requested another Approved Pathology Practitioner in another Approved Pathology Authority to do the rest, the service provided by the second practitioner is deemed to be the "designated pathology service". Thus the first practitioner claims under the appropriate item for the services which he/she provides while the second practitioner claims one of items 65150, 65175, 66650, 66695, 66711, 66722, 66785, 66800, 66812, 66819, 66825, 69384, 69494, 71089, 71153 or 71165. Where one Approved Pathology Practitioner in an Approved Pathology Authority has performed some, but not all estimations and has requested another Approved Pathology Practitioner in another Approved Pathology Authority to do the remainder, the first Approved Pathology Practitioner can raise a "patient episode initiation fee". The second Approved Pathology Practitioner who receives the specimen can raise a "specimen referred fee".

### **PN.0.12 Interpretation of The Schedule - Items Referring to 'The Detection Of'**

Items that contain the term 'detection of' should be taken to mean 'testing for the presence of'.

**PN.0.13 Blood Grouping - (Item 65096)**

Where a request includes 'Group and Hold' or 'Group and Save', the appropriate item is 65096.

**PN.0.14 Glycosylated Haemoglobin - (Item 66551)**

The requirement of "established diabetes" in this item may be satisfied by:

- (a) a statement of the diagnosis by the ordering practitioner on the current request form or on a previous request form held in the database of the Approved Pathology Authority; or
- (b) two or more blood glucose levels that are in the diabetic range and is contained in the database of the Approved Pathology Authority; or
- (c) an oral glucose tolerance test result that is in the diabetic range and is contained in the database of the Approved Pathology Authority.

**PN.0.15 Iron Studies - (Item 66596)**

Where a request includes 'Iron Studies', 'IS', 'Fe', '% saturation' or 'Iron', the relevant item is 66596.

**PN.0.16 Faecal Occult Blood - (Items 66764 to 66770)****PN.0.17 Antibiotics/Antimicrobial Chemotherapeutic Agents**

A test for the quantitation of antibiotics/antimicrobial chemotherapeutic agents is claimable under item 66800 or 66812 - 'quantitation of a drug being used therapeutically'.

**PN.0.18 Human Immunodeficiency Virus (HIV) Diagnostic Tests - (included in Items 69384, 69387, 69390, 69393, 69396, 69405, 69408, 69411, 69413 and 69415)**

Prior to ordering an HIV diagnostics tests (included in items 69384, 69387, 69390, 69393, 69396, 69405, 69408, 69411, 69413, 69415) the ordering practitioner should ensure that the patient has given informed consent. Appropriate discussion should be provided to the patient. Further discussion may be necessary upon receipt of the test results.

**PN.0.19 Hepatitis - (Item 69481)**

Benefits for item 69481 are payable only if the request from the ordering practitioner indicates in writing that the patient is suspected of suffering from acute or chronic hepatitis; either by the use of the provisional diagnosis of hepatitis or by relevant clinical or laboratory information eg "hepatomegaly", "jaundice" or "abnormal liver function tests".

**PN.0.20 Eosinophil Cationic Protein - (Item 71095)**

Item 71095 applies to children aged less than 12 years who cannot be reliably monitored by spirometry or flowmeter readings.

**PN.0.21 Tissue Pathology and Cytology - (Items 72813 to 73061)**

When services described in Group P5 need to be performed upon material which is submitted for cytology items listed in Group P6 only the fee for the P6 item can be claimed.

**PN.0.22 Cervical and Vaginal Screening - (Items 73070 to 73076)**

It is the responsibility of the treating healthcare practitioner to determine if the sample is being collected as part of the routine screening program under 73070 or 73071 or represents a sample falling under 73072 or 73073 or 73074 or 73075 or 73076, and to indicate this on the request form. Unless a co-test is specifically requested, requiring the pathology laboratory to perform both a human papillomavirus (HPV) test and a liquid based cytology (LBC) test on

the same specimen, the pathology laboratory will by default perform an HPV test and then only undertake reflex LBC testing if oncogenic HPV (any type) is detected. The pathology laboratory will issue the HPV test result, the LBC test result and overall screening risk rating as a combined report as prescribed by the National Pathology Accreditation Advisory Council (NPAAC) Requirements for Laboratories reporting tests for the National Cervical Screening Program (NPAAC Requirements).

The test used for detecting oncogenic HPV must allow partial HPV genotyping to identify HPV16, HPV18 with or without HPV45 as well as meet the criteria for a population based screening test as prescribed by the NPAAC Requirements.

When used together, the self-collection device and the HPV test must meet the NPAAC Requirements, including the HPV test must be a polymerase chain reaction (PCR) test.

73070 applies to an HPV test on a cervical specimen for primary screening purposes and collected by a healthcare practitioner (or an accredited test provider under the supervision of a healthcare practitioner) from an asymptomatic patient as part of routine five yearly screening recommended by the National Cervical Screening Program. The Health Insurance Act 1973 excludes payment of Medicare Benefits for health screening services except where Ministerial directions have been issued to enable benefits to be paid, this includes HPV testing that is performed in accordance with the policy of the National Cervical Screening Program (available at [www.cancerscreening.gov.au](http://www.cancerscreening.gov.au)). This policy provides for a screening interval of five years for an asymptomatic patient commencing at 24 years and 9 months of age and for a patient aged between 70 to 74 years of age to cease cervical screening if the last test result is normal (i.e. low risk). A patient aged 75 years of age or older who has never had a cervical screening test or has not had one in the previous five years, may request a cervical screening test and be screened.

In accordance with the national policy for the National Cervical Screening Program, where oncogenic HPV (any type) is detected, the pathology laboratory will conduct reflex LBC automatically under 73076 (a) without requiring an additional request by the treating healthcare professional.

73071 only applies to HPV tests for primary screening purposes requested by a healthcare practitioner on a self-collected vaginal specimen if a specimen collected by a healthcare practitioner has been declined.

HPV testing on self collected vaginal specimens carried out under 73071 should be in accordance with the agreed National Cervical Screening Program Self Collection Policy. The Policy allows self collection where a patient is  $\geq$  30 years of age and has either never screened or is under screened (i.e. overdue for cervical screening by at least two years, being greater than 7 years since the patient's last HPV screening test). A patient aged 75 years of age or older who has never had a cervical screening test or has not had one in the previous seven years, may request a self collected vaginal sample and be screened.

During the early years of the transition, this may include a patient who is overdue since the patient's last conventional Pap test (i.e. greater than four years since last conventional Pap).

It is the intention of the National Cervical Screening Program where oncogenic HPV has previously been detected under this Item, the healthcare practitioner collected liquid based sample from the cervix that follows, can be claimed under 73076 (a) with a further request by the treating healthcare practitioner.

73072 applies to HPV tests where the specimen has been collected in accordance with the National Cervical Screening Program: Guidelines for the Management of Screen Detected Abnormalities, Screening in Specific Populations and Investigation of Abnormal Vaginal Bleeding (2016 Guidelines) which provides for:

- (a) an HPV test (and reflex LBC) performed on a patient within a specific population suggestive of a higher risk of pre cancerous or cancerous cervical changes. HPV tests carried out in specific populations under Item 73072 should be in accordance with the 2016 Guidelines including:
  - (i) screening with a primary HPV test (and reflex LBC) every 3 years for an immune-deficient patient; or

- (ii) a single HPV test between 20 and 24 years of age could be considered by healthcare practitioners on a case by case basis for a patient who experienced first sexual activity at a young age (less than 14 years of age) and who has not received the HPV vaccine before sexual debut; or
- (b) an HPV test (and reflex LBC) performed for the follow up management of previously detected oncogenic HPV infection with a negative or possible/low grade squamous intraepithelial lesion (LSIL) cytology result; or
- (c) a co-test (HPV+LBC) for the investigation of symptoms of cervical cancer, most commonly abnormal vaginal bleeding; or
- (d) co-test (HPV+LBC) for the management of a patient following treatment of high grade squamous intraepithelial lesions (HSIL) of the cervix as part of a 'test of cure' process performed at 12 months after treatment and annually thereafter, until receiving a negative co-test on two separate consecutive occasions, then the patient can return to routine five yearly screening. In accordance with the 2016 Guidelines this also applies to a patient undergoing follow up or post-treatment for a glandular abnormality as part of annual surveillance performed indefinitely; or
- (e) a co-test (HPV+LBC) for the follow up management of glandular abnormalities; or
- (f) a co-test (HPV+LBC) for screening a patient exposed to diethylstilbestrol (DES) in utero and daughters of patients exposed to DES in utero, if requested.

A co-test requires both HPV and LBC tests to be performed irrespective of the HPV test result. A reflex LBC is only required if oncogenic HPV (any type) is detected; where oncogenic HPV (any type) has been detected in a liquid based sample from the cervix by a healthcare professional, the pathology laboratory will conduct LBC automatically without requiring an additional request.

73073 applies to the management of a patient with previously detected oncogenic HPV (any type) infection on a self collected vaginal sample if a specimen collected by a healthcare practitioner has been declined. It may only be claimed when the test is performed within in a 21 month period following detection of oncogenic HPV (any type) associated with 73071.

It is expected that most patients who are undergoing follow up, after detection of oncogenic HPV (any type) on a self collected vaginal sample, will agree to have a clinician collected cervical sample at the follow up visit. Some patients may decline and this Item applies to this group of patients. It is the intention of the National Cervical Screening Program where oncogenic HPV has previously been detected under this Item, the healthcare practitioner collected liquid based sample from the cervix that follows, can be claimed under 73076 (a) with a further request by the treating healthcare practitioner.

73074 applies to an HPV test on a vaginal vault specimen collected by a healthcare practitioner (or an accredited test provider under the supervision of a healthcare practitioner) from a patient with past history of total hysterectomy, in accordance with the 2016 Guidelines which provides for:

- (a) an HPV test for a patient who has no evidence of cervical pathology and the patient's screening history is not available, performed at 12 months following a total hysterectomy and annually thereafter until a patient has two negative HPV tests (i.e. oncogenic HPV not detected) on two separate consecutive occasions and can be advised that no further testing is required; or
- (b) a co-test (HPV+LBC) for a patient who has had a total hysterectomy, performed at 12 months following a total hysterectomy and annually thereafter until two consecutive co-tests are negative:
  - (i) if unexpected LSIL or HSIL is identified in the cervix at the time of total hysterectomy after completed 'test of cure' process; or
  - (ii) if the total hysterectomy was for treatment of high-grade cervical intraepithelial neoplasia in the presence of benign gynaecological disease; or

(iii) if the total hysterectomy was after histologically confirmed HSIL without Test of Cure and there is no cervical pathology; or

(c) indefinite co-testing (HPV+LBC) for a patient who has had a total hysterectomy, performed at 12 months after treatment and annually thereafter if the total hysterectomy was after adenocarcinoma in situ (AIS).

73075 applies to HPV tests repeated due to an unsatisfactory HPV test under 73070 or 73071 or 73072 or 73073 or 73074.

73076 applies to a liquid-based cytology (LBC) test on a cervical or vaginal vault specimen:

(a) as part of a reflex test following detection of oncogenic HPV described in the national policy and 2016 Guidelines associated with items 73070 or 73071 or 73072 (a) or (b) or 73073 or 73074 or 73075; or

(b) as part of a co-test described in the national policy and 2016 Guidelines under 73072 (c) or (d) or (e) of (f) or 73074; or

(c) where the previous specimen collected is unsatisfactory; or

(d) for the follow up management of a patient with a past history of total hysterectomy for endometrial adenocarcinoma.

#### **PN.0.23 Detection of mutation tests (Items 73297, 73300, 73305, 73334, 73339 and 73340)**

Prior to ordering these tests (73297, 73300, 73305, 73334, 73339 and 73340) the ordering practitioner should ensure the patient (or approximate proxy) has given informed consent. Testing should only be performed after genetic counselling. Appropriate genetic counselling should be provided to the patient either by the specialist treating practitioner, a genetic counselling service or a clinical geneticist on referral. Further counselling may be necessary upon receipt of the test results.

#### **PN.0.24 Additional Bulk Billing Payment for Pathology Services - (Item 74990 and 74991)**

Item 74990 operates in the same way as item 10990 and item 74991 operates in the same way as item 10991, apart from the following differences:

- Item 74990 and 74991 can only be used in conjunction with items in the Pathology Services Table of the MBS;
- Item 74990 and 74991 applies to unreferred pathology services performed by a medical practitioner which are included in Group P9 of the Pathology Services Table, and unreferred pathology services provided by category M laboratories;
- Item 74990 and item 74991 applies to pathology services self determined by general practitioners and specialists with dual qualifications acting in their capacity as general practitioners;
- Specialists and consultant physicians who provide pathology services are not able to claim item 74990 or item 74991 unless, for the purposes of the Health Insurance Act, the medical practitioner is also a general practitioner and the service provided by the medical practitioner has not been referred to that practitioner by another medical practitioner or person with referring rights.

Rules 3 and 18 of the *Health Insurance (Pathology Services Table) Regulations 2003* have been amended to exclude item 74990 and 74991 from the Multiple Services Rule and the Coning Rule.

Item 74991 can only be used where the service is provided at, or from, a practice location in a regional, rural or remote area (RRMA 3 to 7 under the Rural Remote Metropolitan Areas classification system), or in all of Tasmania.

### **PN.0.25 Transfer of Existing Items from Group P1 (Haematology) to Group P7 Genetics Effective 1 May 2006.**

P16.14 has been created to note the transfer of existing items from Group P1 (Haematology) items 65168, 65174, 65200 and item 66794 from Group P2 (Chemistry) to Group P7 (Genetics) as items 73308, 73311, 73314, 73317 and the introduction of the new item in Group P7 (Genetics) item 73320 HLA-B27 typing by nucleic acid amplification (NAA) which was effective as of 1 May 2006.

### **PN.0.26 RAS gene mutation status (Item 73338)**

Item 73338 provides for testing of RAS mutations to limit subsidy of anti-EGFR antibodies to only those patients demonstrated to have no RAS mutations.

For a Medicare benefit to be payable, the test must be conducted for all clinically relevant mutations on KRAS exons 2, 3 and 4 and NRAS exons 2, 3 and 4, or until a RAS mutation is found.

Enabling the requirements of the item descriptor to be met once any RAS mutation is found means that once the test indicates that the patient is not RAS wild-type and therefore not suitable for access to cetuximab and panitumumab under the PBS, a pathologist is not required to continue testing for other clinically relevant mutations.

### **PN.0.27 Germline BRCA gene mutation tests (Items 73295, 73296 and 73333)**

Patients who are found to have any form of affected allele should be referred for post-test genetic counselling as there may be implications for other family members. Appropriate genetic counselling should be provided to the patient either by the specialist treating practitioner, a genetic counselling service or a clinical geneticist on referral.

### **PN.0.28 Abbreviations, Groups of Tests**

As stated at P3.2 of the Outline, details that must be recorded on accounts, receipts or assignment forms of an Approved Pathology Practitioner/Authority include a description of the pathology service that is of sufficient detail to identify the specific service rendered. The lists of abbreviations for group tests are contained in PQ.4. The lists of abbreviations for individual tests are contained in the Index to this Section. The abbreviations are provided to allow users to identify and refer to particular pathology services, or particular groups of pathology services, more accurately and conveniently.

The above requirements may be used for billing purposes but treating practitioners requesting pathology services are encouraged to use the approved abbreviations. In this regard treating practitioners should note that:

- pathology services cannot be self determined by a rendering pathologist responding to a request. This places the onus for medical necessity on the treating practitioner who, in normal circumstances would, if he or she was unclear in deciding the appropriate test for a clinical situation, consult a pathologist for assistance; and
- Approved Pathology Practitioners/Authorities undertake not to issue accounts etc unless the pathology service was rendered in response to an unambiguous request.

### **PN.0.29 Tests not Listed**

Tests which are not listed in the Pathology Services Table do not attract Medicare benefits. As explained at PN.1 of the Outline, changes to the Pathology Services Table can only be made by the Minister for Health and Ageing.

### **PN.0.30 Audit of Claims**

The Department of Human Services is undertaking routine audits of claims for pathology benefits against requested services to ensure compliance with the provisions of the Health Insurance Act 1973.

### **PN.0.31 Groups of Tests**

For the purposes of recording a description of the pathology service on accounts etc, an Approved Pathology Practitioner /Authority may use group abbreviations or group descriptions for the following specified groups of

tests. These groups consist of two or more tests within the same item. These groups exclude abbreviations such as MBA and TORCH.

Treating practitioners are encouraged to use these group abbreviations or group descriptions where appropriate.

For ease of identification of group tests, it is recommended that practitioners use the following abbreviations. Tests requested individually may attract Medicare benefits.

| <b>Group</b>                       | <b>Estimations included in Group</b>   | <b>Group Abbreviation</b> | <b>Item Numbers</b> |
|------------------------------------|--|---------------------------|---------------------|
| Cardiac enzymes or cardiac markers | Creatine kinase isoemzymes, Myoglobin, Troponin  | CE / CM                   | 66518, 66519        |
| Coagulation studies                | Full blood count, Prothrombin time, Activated partial thromboplastin time and two or more of the following tests - Fibrinogen, Thrombin, Clotting time, Fibrinogen degradation products, Fibrin monomer, D-dimer factor XIII screening tests             | COAG                      | 65129, 65070        |
| Electrolytes                       | Sodium (NA), Potassium (K), Chloride (CL) and Bicarbonate (HCO3)   | E                         | 66509               |
| Full Blood Examination             | Erythrocyte count, Haematocrit, Haemoglobin, Platelet count, Red cell count, Leucocyte count, Manual or instrument generated differential, Morphological assessment of blood film where appropriate  | FBE, FBC, CBC             | 65070               |
| Lipid studies                      | Cholesterol (CHOL) and Triglycerides (TRIG)  | FATS                      | 66503               |
| Liver function tests               | Alkaline phosphatase (ALP),<br><br>Alanine aminotransferase (ALT),<br><br>Aspartate aminotransferase (AST),<br><br>Albumin (ALB), Bilirubin (BIL),<br><br>Gamma glutamyl transpeptidase (GGT),<br>Lactate dehydrogenase (LDH), and<br><br>Protein (PROT) | LFT                       | 66512               |
| Syphilis serology                  | Rapid plasma regain test (RPR), or<br><br>Venereal disease research laboratory test (VDRL), and Treponema pallidum haemagglutination test (TPHA), or Fluorescent treponemal antibody-absorption test (FTA)   | STS                       | 69387               |

### **PN.0.32 Complexity Levels for Histopathology Items**

Only one of these histopathology examination items (72813, 72816, 72817, 72818, 72823, 72824, 72825, 72826, 72827, 72828, 72830, 72836 and 72838) can be claimed in a patient episode.

The remaining items (72844, 72846, 72847, 72848, 72849, 72850, 72851, 72852, 72855, 72856 and 72857) are add-on items, covering enzyme histochemistry and immunohistochemistry, electron microscopy and frozen sections, which can be claimed in addition to the main item.

The list of complexity levels by type of specimen are contained at the back of this Section.

### **PN.0.33 Pathology Services Table**

#### **Rules for the Interpretation of the Pathology Services Table**

Please note that in the Health Insurance (Pathology Services Table) Regulations 2010 (effective 1 November 2010) rules and sub-rules are referred to as clauses and sub-clauses. In addition in the Regulations a rule that refers to specific items within a pathology group, for example Group P1 Haematology, is listed directly above the Schedule of Services for that group. A table cross referencing the following rules with the clauses in the Regulations is at the end of this section.

**1. (1)** In this table

*patient episode* means:

(a) a pathology service or pathology services (other than a pathology service to which paragraph 1 (1) (b) refers) provided for a single patient whose need for the service or services was determined under section 16A of the Act:

(i) on the same day; or

(ii) if more than 1 test is performed on the 1 specimen within 14 days - on the same or different days;

whether the services:

(iii) are requested by 1 or more practitioners; or

(iv) are described in a single item or in more than 1 item; or

(v) are rendered by 1 approved pathology practitioner or more than 1 approved pathology practitioner; or

(vi) are rendered on the same or different days; or

(b) a pathology service to which rule 4 refers that is provided in the circumstances set out in that rule that relates to the service.

*receiving APP* means an approved pathology practitioner in an approved pathology authority who performs one or more pathology services in respect of a single patient episode following receipt of a request for those services from a referring APP.

*recognised pathologist* means a medical practitioner recognised as a specialist in pathology by a determination under section 3D, 3DB or 3E of the Act.

*referring APP* means an approved pathology practitioner in an approved pathology authority who:

(i) has been requested to render 1 or more pathology services, all of which are requested in a single patient episode; and

(ii) is unable, because of the lack of facilities in, or expertise or experience of the staff of, the laboratory of the authority, to render 1 or more of the pathology services; and

(iii) requests an approved pathology practitioner (the *receiving APP*) in another approved pathology authority to render the pathology service or services that the referring APP is unable to render; and

(iv) renders each pathology service (if any) included in that patient episode, other than the pathology service or services in respect of which the request mentioned in subparagraph (iii) is made.

*serial examinations* means a series of examinations requested on 1 occasion whether or not:

- (a) the materials are received on different days by the approved pathology practitioner; or
- (b) the examinations or cultures were requested on 1 or more request forms by the treating practitioner.

**the Act** means the *Health Insurance Act 1973*.

**1. (2)** In these rules, a reference to a request to an approved pathology practitioner includes a reference to a request for a pathologist-determinable service to which subsection 16A (6) of the Act applies.

**1. (3)** A reference in this table by number to an item that is not included in this table is a reference to the item that has that number in the general medical services table or the diagnostic imaging services table, as the case requires.

**1. (4)** A reference to a **Group** in the table includes every item in the Group and a reference to a **Subgroup** in the table includes every item in the Subgroup.

### **Precedence of items**

**2. (1)** If a service is described:

- (a) in an item in general terms; and
- (b) in another item in specific terms;

only the item that describes the service in specific terms applies to the service.

**2. (2)** Subject to subrule (3), if:

- (a) subrule (1) does not apply; and
- (b) a service is described in 2 or more items;

only the item that provides the lower or lowest fee for the service applies to the service.

**2. (3)** If an item is expressed to include a pathology service that is described in another item, the other item does not apply to the service in addition to the first-mentioned item, whether or not the services described in the 2 items are requested separately.

### **Application of item 74990 and 74991**

**2. (4)** Despite subrules (1), (2) and (3):

- (a) if the pathology service described in item 74991 is provided to a person, either that item or item 74990, but not both those items, applies to the service; and
- (b) if item 74990 or 74991 applies to a pathology service, the fee specified in that item applies in addition to the fee specified in any other item in the table that applies to the service.

**2. (5)** For items 74990 and 74991:

**bulk-billed**, in relation to a pathology service, means:

- (a) a medicare benefit is payable to a person in respect of the service; and
- (b) under an agreement entered into under section 20A of the Act:
  - (i) the person assigns to the practitioner by whom, or on whose behalf, the service is provided, his or her right to the payment of the medicare benefit; and

(ii) the practitioner accepts the assignment in full payment of his or her fee for the service provided.

**Commonwealth concession card holder** means a person who is a concessional beneficiary within the meaning given by subsection 84(1) of the *National Health Act 1953*.

**unreferred service** means a pathology service that:

(a) is provided to a person by, or on behalf of, a medical practitioner, being a medical practitioner who is not a consultant physician, or specialist, in any speciality (other than a medical practitioner who is, for the purposes of the Act, both a general practitioner and a consultant physician, or specialist, in a particular speciality); and

(b) has not been referred to the medical practitioner by another medical practitioner or person with referring rights.

**2. (6)** For item 74991:

**ASGC** means the document titled Australian Standard Geographical Classification (ASGC) 2002, published by the Australian Bureau of Statistics, as in force on 1 July 2002.

**practice location**, in relation to the provision of a pathology service, means the place of practice in respect of which the practitioner by whom, or on whose behalf, the service is provided, has been allocated a provider number by the Commission.

**Regional, rural or remote area** means an area classified as RRMA 3-7 under the Rural, Remote and Metropolitan Areas Classification.

**Rural, Remote and Metropolitan Areas Classification** has the meaning given by subrule 3 (1) of Part 2 of Schedule 1 to the general medical services table.

**SLA** means a Statistical Local Area specified in the ASGC.

**SSD** mean a Statistical Subdivision specified in the ASGC.

**Circumstances in which services rendered following 2 requests to be taken to have been rendered following 1 request**

**3. (1)** In subrule 3(2), **service** includes assay, estimation and test.

**3. (2)** Two or more pathology services (other than services to which, under rule 4, this rule does not apply) rendered for a patient following 2 or more requests are taken to have been rendered following a single request if:

(a) the services are listed in the same item; and

(ab) that item is not item 74990 or 74991; and

(b) the patient's need for the services was determined under subsection 16A (1) of the Act on the same day even if the services are rendered by an approved pathology practitioner on more than one day.

**Services to which rule 3 does not apply**

**4. (1)** Rule 3 does not apply to a pathology service described in item 65060, 65070, 65120, 65123, 65126, 65129, 65150, 65153, 65156, 66500, 66503, 66506, 66509, 66512, 66584 or 66800, if:

(a) the service is rendered in relation to one or more specimens taken on each of not more than 6 separate occasions in a period of 24 hours; and

(b) the service is rendered to an inpatient in a hospital; and

(c) each service must be rendered as soon as possible after collection and after authorization of the result of the previous specimen; and

(d) the account for the service is endorsed 'Rule 3 Exemption'.

**4. (2)** Rule 3 does not apply to any of the following pathology services:

(a) estimation of prothrombin time (INR) in respect of a patient undergoing anticoagulant therapy;

(b) quantitative estimation of lithium in respect of a patient undergoing lithium therapy;

(c) a service described in item 65070 in relation to a patient undergoing chemotherapy for neoplastic disease or immunosuppressant therapy;

(d) a service described in item 65070 in relation to clozaril, ticlopidine hydrochloride, methotrexate, gold, sulphasalazine or penicillamine therapy of a patient;

(e) a service described in item 66500 - 66512 in relation to methotrexate or leflunomide therapy of a patient;

(f) quantitative estimation of urea, creatinine and electrolytes in relation to:

(i) cis-platinum or cyclosporin therapy of a patient; or

(ii) chronic renal failure of a patient being treated in a dialysis program conducted by a recognised hospital;

(g) quantitative estimation of albumin and calcium in relation to therapy of a patient with vitamin D, its metabolites or analogues;

(h) quantitative estimation of calcium, phosphate, magnesium, urea, creatinine and electrolytes in cancer patients receiving bisphosphonate infusions.

if:

(i) under a request for a service, other than a request for a service described in paragraph (a), no more than 6 tests are requested; and

(ii) the tests are performed within 6 months of the request; and

(iii) the account for the service is endorsed "Rule 3 Exemption".

**4. (3)** Rule 3 does not apply to a pathology service described in items 65109 or 65110 if:

(a) The service is rendered on not more than 5 separate occasions in the case of item 65109 and 2 separate occasions in the case of item 65110 in a period of 24 hours; and

(b) The service is rendered in response to a written request separated in time from the previous request; and

(c) The account for the service is endorsed "Rule 3 Exemption".

**Item taken to refer only to the first service of a particular kind**

**5. (1)** For an item in Group P1 (Haematology):

(a) if pathology services of a kind referred to in item 65090 or 65093 are rendered for a patient during a period when the patient is in hospital, the item applies only to the first pathology service of that kind rendered for the patient during the period; and

(b) if:

(i) tests (except tests mentioned in item 65099, 65102, 65105 and 65108) are carried out in relation to a patient episode; and

- (ii) specimen material from the patient episode is stored; and
- (iii) in response to a request made within 14 days of the patient episode, further tests (except tests mentioned in item 65099, 65102, 65105 and 65108) are carried out on the stored material; the later tests and the earlier tests are taken to be part of one patient episode.

**5. (2)** Benefits for items 65102 and 65108 are payable only if a minimum of 6 units are issued for the patient's care in any 1 day.

**5.(3)** For items 65099 and 65102:

***compatibility tests by crossmatch*** means that, in addition to all the tests described in paragraphs (a) and (b) of the item, donor red cells from each unit must have been tested directly against the serum of the patient by 1 or more accepted crossmatching techniques.

### **Certain items not to apply to a service referred by one pathology practitioner to another**

**6. (1)** In this rule:

***designated pathology service*** means a pathology service in respect of tests relating to a single patient episode that are tests of the kind described in item 65150, 65175, 66650, 66695, 66711, 66722, 66785, 66800, 66812, 66819, 66825, 69384, 69494, 71089, 71153 or 71165.

**6. (2)** This rule applies in respect of a designated pathology service where:

- (a) an approved pathology practitioner (***practitioner A***) in an approved pathology authority:
  - (i) has been requested to render the designated pathology service; and
  - (ii) is unable, because of the lack of facilities in, or expertise or experience of the staff of, the laboratory of the authority, to render 1 or more of the tests included in the service; and
  - (iii) requests an approved pathology practitioner (***practitioner B***) in another approved pathology authority to render the test or tests that practitioner A is unable to render; and
  - (iv) renders each test (if any) included in the service, other than the test or tests in respect of which the request mentioned in subparagraph (iii) is made; and
- (b) the tests mentioned in subparagraph (a) (iv) that practitioner A renders are not tests constituting a service described in item 65156, 65179, 66653, 66712, 66734, 66788, 66806, 66815, 66822, 66828, 69496, 71093, 71159 or 71168.

**6. (3)** If this rule applies in respect of a designated pathology service:

- (a) item 65150, 65153, 65175, 65176, 65177, 65178, 66650, 66695, 66698, 66701, 66704, 66707, 66711, 66722, 66725, 66728, 66731, 66785, 66800, 66803, 66812, 66819, 66825, 69384, 69387, 69390, 69393, 69396, 69494, 69495, 71089, 71091, 71153, 71155, 71157, 71165, 71166 or 71167 (as the case requires) applies in respect of the test or tests rendered by practitioner A; and
- (b) where practitioner B renders a service under a request referred to in subparagraph (2) (a) (iii) and:
  - (i) practitioner A has rendered one or more of the tests that the service comprises - subject to subrule (4), the amount specified in item 65158, 65181, 66652, 66697, 66715, 66724, 66790, 66805, 66817, 66821, 66827, 69401, 69498, 71092, 71156 or 71170 (as the case requires) shall be taken to be the fee for each test that the service comprises; or
  - (ii) practitioner A has not rendered any of the tests that the service comprises -

(A) the amount specified in item 65157, 65180, 66651, 66696, 66714, 66723, 66789, 66804, 66816, 66820, 66826, 69400, 69497, 71090, 71154 or 71169 (as the case requires) shall be taken to be the fee for the first test that the service comprises; and

(B) subject to subrule (4), the amount specified in item 65158, 65181, 66652, 66697, 66715, 66724, 66790, 66805, 66817, 66821, 66827, 69401, 69498, 71092, 71156 or 71170 (as the case requires) shall be taken to be the fee for each subsequent test that the service comprises.

**6. (4)** For paragraph (3) (b), the maximum number of tests to which item 65158, 65181, 66652, 66697, 66715, 66724, 66790, 66805, 66817, 66821, 66827, 69401, 69498, 71092, 71156 or 71170 applies is:

(a) for item 66652, 66715, 66790, 66817, 66821 or 66827:

2 - X; and

(b) for item 65158, 66805, 69498 or 71092:

3 - X; and

(c) for item 71156 or 71170:

4 - X; and

(d) for item 65181 or 66724:

5 - X; and

where X is the number of tests rendered by practitioner A in relation to the designated pathology service in respect of which the request mentioned in that paragraph is made.

**6. (5)** Items in Group P10 (Patient episode initiation) do not apply to the second mentioned approved pathology practitioner in subrule (2).

#### **Items not to be split**

7. Except as stated in rule 6, the amount specified in an item is payable only to one approved pathology practitioner in respect of a single patient episode.

#### **Creatinine ratios - Group P2 (chemical)**

**8.** A pathology service mentioned in an item (except item 66500) in Group P2 (chemical) that:

(a) involves the measurement of a substance in urine; and

(b) requires calculation of a substance/creatinine ratio;

is taken to include the measurement of creatinine necessary for the calculation.

#### **Thyroid function testing**

**9. (1)** For item 66719:

*abnormal level of TSH* means a level of TSH that is outside the normal reference range in respect of the particular method of assay used to determine the level.

**9. (2)** Except where paragraph (a) of item 66719 is satisfied, the amount specified in the item is not payable in respect of a pathology service described in the item unless the pathologist who renders the service has a written statement from the medical practitioner who requested the service that satisfies subrule (3).

**9. (3)** The written statement from the medical practitioner must indicate:

- (a) that the tests are required for a particular purpose, being a purpose specified in paragraph (b) of item 66719; or
- (b) that the medical practitioner who requested the tests suspects the patient has pituitary dysfunction; or
- (c) that the patient is on drugs that interfere with thyroid hormone metabolism or function.

**Meaning of "serial examinations or cultures"**

**10.** For an item in Group P3 (Microbiology):

(a) *serial examinations or cultures* means a series of examinations or cultures requested on 1 occasion whether or not:

- (i) the materials are received on different days by the approved pathology practitioner; or
- (ii) the examinations or cultures were requested on 1 or more request forms by the treating practitioner; and
- (b) if:

- (i) tests are carried out in relation to a patient episode; and
- (ii) specimen material from the patient episode is stored; and

(iii) in response to a request made within 14 days of the patient episode, further tests are carried out on the stored material;

the later tests and the earlier tests are taken to be part of one patient episode.

**Investigation for hepatitis serology**

**11.** A medicare benefit is not payable in respect of more than one of items 69475, 69478 and 69481 in a patient episode.

**Tests in Group P4 (Immunology) relating to antibodies**

**12.** For items in Group P4 (Immunology), in items 71119, 71121, 71123 and 71125, if:

- (a) tests are carried out in relation to a patient episode; and
- (b) specimen material from the patient episode is stored; and
- (c) in response to a request made within 14 days of the patient episode, further tests are carried out on the stored material;

the later tests and the earlier tests are taken to be part of one patient episode.

**Tests on biopsy material - Group P5 (Tissue pathology) and Group P6 (Cytology)**

**13. (1)** For items in Group P5 (Tissue pathology):

(a) *biopsy material* means all tissue received by the Approved Pathology Practitioner:

- (i) from a medical procedure or group of medical procedures performed on a patient at the same time; or
- (ii) after being expelled spontaneously from a patient.

(b) **cytology** means microscopic examination of 1 or more stained preparations of cells separated naturally or artificially from their normal environment by methods recognised as adequate to demonstrate their structure to a degree sufficient to enable an opinion to be formed about whether they are likely to be normal, abnormal but benign, or abnormal and malignant but, in accordance with customary laboratory practice, does not include examination of a blood film and a bone marrow aspirate; and

(c) **separately identified specimen** means an individual specimen collected, identified so that it is clearly distinguished from any other specimen, and sent for testing by or on behalf of the treating practitioner responsible for the procedure in which the specimen was taken.

**13. (2)** For Groups P5 and P6 of the pathology services table, services in Group P6 include any services described in Group P5 on the material submitted for a test in Group P6.

**13. (3)** For subrule (2), any sample submitted for cytology from which a cell block is prepared does not qualify for a Group P5 item.

**13.(4)** If more than 1 of the services mentioned in items 72813, 72816, 72817, 72818, 72823, 72824, 72825, 72826, 72827, 72828, 72830, 72836 and 72838 are performed in a single patient episode, only the fee for the item performed having the highest specified fee is applicable to the services.

**13.(5)** If more than 1 histopathological examinations are performed on separate specimens, of different complexity levels, from a single patient episode, a medicare benefit is payable only for the examination that has the highest schedule fee.

**13.(6)** In items 72813, 72816, 72817, 72818, 72823, 72824, 72825, 72826, 72827, 72828, 72830, 72836 and 72838 a reference to a **complexity level** is a reference to the level given to a specimen type mentioned in Part 4 of this Table.

**13.(7)** If more than 1 of the services mentioned in items 72846, 72847, 72848; 72849 and 72850 or 73059, 73060, 73061, 73064 and 73065 are performed in a single patient episode, a medicare benefit is payable only for the item performed that has the highest scheduled fee.

**13.(8)** If more than 1 of the services mentioned in items 73049, 73051, 73062, 73063, 73066 and 73067 are performed in a single patient episode, only the fee for the item performed having the higher or highest specified fee applies to the services.

**Items in Groups P10 (Patient episode initiation) and P11 (Specimen referred) not to apply in certain circumstances**

**14. (1)** For this rule and items in Groups P10 (Patient episode initiation) and P11 (Specimen referred):

**approved collection centre** has the same meaning as in Part IIA of the Act.

**institution** means a place at which residential accommodation or day care is, or both residential accommodation and day care are, made available to:

- (a) disadvantaged children; or
- (b) juvenile offenders; or
- (c) aged persons; or
- (d) chronically ill psychiatric patients; or
- (e) homeless persons; or
- (f) unemployed persons; or

- (g) persons suffering from alcoholism; or
- (h) persons addicted to drugs; or
- (i) physically or mentally handicapped persons;

but does not include:

- (j) a hospital; or
- (k) a residential aged care home; or
- (l) accommodation for aged persons that is attached to a residential aged care home or situated within a residential aged care home.

***prescribed laboratory*** means a laboratory operated by:

- (a) the Australian Government; or
- (b) an authority of the Commonwealth; or
- (c) a State or internal Territory; or
- (d) an authority of a State or internal Territory; or
- (e) an Australian tertiary education institution.

***specimen collection centre*** has the same meaning as in Part IIA of the Act.

***treating practitioner*** has the same meaning as in paragraph 16A(1)(a) of the Act.

**14. (2)** If a service described in an item in Group P10 is rendered by, or on behalf of, an approved pathology practitioner who is a recognised pathologist, the relevant one of those items does not apply to the service if:

(a) the service is rendered upon a request made in the course of a service provided to a public patient in a recognised hospital or when attending an outpatient service of a recognised hospital.

**14. (3)** An item in Group P10 or P11 does not apply to a pathology service to which subsection 16A(7) of the Act applies.

**14. (4)** An item in Group P10 or P11 does not apply to a pathology service unless at least 1 item in Groups P1 to P8 also applies to the service.

**14. (5)** Subject to subrule (7), if one item in Group P10 applies to a patient episode, no other item in the Group applies to the patient episode.

**14. (6)** An item in Group P11 applies only to the approved pathology practitioner or approved pathology authority to whom the specimen mentioned in the item was referred.

**14. (7)** If, in respect of the same patient episode:

(a) services referred to in 1 or more items in Group P5 and 1 or more of Groups P1, P2, P3, P4, P6, P7 and P8 are rendered by an approved pathology practitioner in the laboratory of another approved pathology authority; or

(b) services referred to in 1 or more items in Group P6 and 1 or more of Groups P1, P2, P3, P4, P5, P7 and P8 are rendered by another approved pathology practitioner in the laboratory of another approved pathology authority;

the fee specified in the applicable item in Group P10 is payable to both approved pathology practitioners.

**14. (8)** If more than one specimen is collected from a person on the same day for the provision of pathology services:

- (a) in accordance with more than 1 request; and
- (b) in or by a single approved pathology authority;

the fee specified in the applicable item in Group P10 applies once only to the services unless an exemption listed in Rule 4 applies or an exemption has been granted under Rule 3 "S4B(3)".

**14. (9)** The amount specified in item 73940 is payable only once in respect of a single patient episode.

**Application of an item in Group P11 (Specimen referred) to a service excludes certain other items**

**15.** If item 73940 applies to a patient episode, none of the items in Group P10 applies to any pathology service rendered by the approved pathology authority or approved pathology practitioner who claimed item 73940 in respect of the patient episode.

**Circumstances in which an item in Group P11 (Specimen referred) does not apply**

**16. (1)** An item in Group P11 does not apply to a referral if:

- (a) a service in respect of the same patient episode has been carried out by the referring approved pathology authority; and
- (b) the approved pathology authority to which the referral is made is related to the referring approved pathology authority.

**16. (2)** An approved pathology authority is *related to* another approved pathology authority for subrule (1) if:

- (a) both approved pathology authorities are employed (including employed under contract) by the same person, whether or not the person is also an approved pathology authority; or
- (b) either of the approved pathology authorities is employed (including employed under contract) by the other; or
- (c) both approved pathology authorities are corporations and are related corporations within the meaning of the Corporations Act; or
- (d) the approved pathology authorities are partners (whether or not either or both of the approved pathology authorities are individuals and whether or not other persons are in partnership with either or both of the approved pathology authorities); or
- (e) both approved pathology authorities are operated by the Commonwealth or an authority of the Commonwealth; or
- (f) both approved pathology authorities are operated by the same State or internal Territory or an authority of the same State or internal Territory.

**16. (3)** An item in Group P11 does not apply to a referral if the following common tests are referred either singly or in combination (except if the following items are referred in combination with other items not similarly specified): 65060, 65070, 65120, 66500, 66503, 66506, 66509, 66512, 66536, 66596, 69300, 69303, 69333 or 73527.

**Abbreviations**

**17. (1)** The abbreviations in Part 4 of this table may be used to identify particular pathology services or groups of pathology services.

**17. (2)** The names of services or drugs not listed in Part 4 of this table must be written in full.

Certain pathology services to be treated as 1 service

18. (1) In this rule:

**general practitioner** means a medical practitioner who:

- (a) is not a consultant physician in any specialty; and
- (b) is not a specialist in any specialty.

**set of pathology services** means a group of pathology services:

- (a) that consists of services that are described in at least 4 different items; and
- (b) all of which are requested in a single patient episode; and
- (c) each of which relates to a patient who is not an admitted patient of a hospital; and
- (d) excludes services referred to in an item in Group P10, Group P11, Group P12 or

Group P13, items 66900, 69484, 73070, 73071, 73072, 73073, 73074, 73075 or 73076; and

- (e) excludes services described in the following items:

65079, 65082, 65157, 65158, 65166, 65180, 65181, 66606, 66610, 66639, 66642, 66651, 66652, 66663, 66666, 66696, 66697, 66714, 66715, 66723, 66724, 66780, 66783, 66789, 66790, 66792, 66804, 66805, 66816, 66817, 66820, 66821, 66826, 66827, 66832, 66834, 66837, 69325, 69328, 69331, 69379, 69383, 69400, 69401, 69451, 69500, 69484, 69489, 69492, 69497, 69498, 71076, 71090, 71092, 71096, 71148, 71154, 71156, 71169, 71170, 73309, 73312, 73315, 73318, 73321 and 73324;

where those services are performed by an approved pathology practitioner in an accredited pathology laboratory of an approved pathology authority following referral by another approved pathology practitioner in an accredited pathology laboratory of an approved pathology authority which is not **related to** the first mentioned approved pathology authority.

(1A) An approved pathology authority is **related to** another approved pathology authority for the purposes of paragraph 18(1)(e) if that approved pathology authority would be related to the other approved pathology authority for the purposes of rule 16(2).

**18. (2)** If a general practitioner requests a set of pathology services, the pathology services in the set are to be treated as individual pathology services in accordance with this rule.

**18. (3)** If the fee specified in 1 item that describes any of the services in the set of pathology services is higher than the fees specified in the other items that describe the services in the set:

(a) the pathology service described in the first-mentioned item is to be treated as 1 pathology service; and

(b) either:

(i) the pathology service in the set that is described in the item that specifies the second-highest fee is to be treated as 1 pathology service; or

(ii) if 2 or more items that describe any of those services specify the second-highest fee, the pathology service described in the item that specifies the second-highest fee, and has the lowest item number, is to be treated as 1 pathology service; and

(c) the pathology services in the set, other than the services that are to be treated as 1 pathology service under paragraphs (a) and (b), are to be treated as 1 pathology service.

**18. (4)** If the fees specified in 2 or more items that describe any of the services in the set of pathology services are the same, and higher than the fees specified in the other items that describe the services in the set:

(a) the pathology service in the set that is described in the item that specifies the highest fee, and has the lowest item number, is to be treated as 1 pathology service; and

(b) the pathology service in the set that is described in the item that specifies the highest fee, and has the second-lowest item number, is to be treated as 1 pathology service; and

(c) the pathology services in the set, other than the services that are to be treated as 1 pathology service under paragraphs (a) and (b), are to be treated as 1 pathology service.

**18. (5)** If pathology services are to be treated as 1 pathology service under paragraph (3)(c) or (4)(c), the fee for the 1 pathology service is the highest fee specified in any of the items that describe the pathology services that are to be treated as the 1 pathology service.

### **Hepatitis C viral RNA testing**

**19.** For item 69499 and 69500:

*Hepatitis C sero-positive*, for a patient, means 2 different assays of Hepatitis C antibodies are positive.

*serological status is uncertain*, for a patient, means any result where 2 different assays of Hepatitis C antibodies are inconclusive.

### **Haemochromatosis testing**

**20.** For items 73317 and 73318:

*elevated serum ferritin* for a patient, means a level of ferritin above the normal reference range in respect of the particular method of assay used to determine the level.

### **Nutritional and toxicity metals testing**

**22. (1)** For this rule:

*nutritional metals testing group* means items 66819, 66820, 66821 and 66822.

*metal toxicity testing group* means items 66825, 66826, 66827, 66828, 66831 and 66832.

**22. (2)** An item in the nutritional metals testing group or the metal toxicity testing group does not apply in relation to a service performed if medicare benefits are paid or payable for tests that are performed for the same patient in 3 patient episodes requested within 6 months before the request for that service, under any of:

(a) that item; or

(b) the other item in the same group; or

(c) an item in the other group.

### **Antineutrophil Cytoplasmic Antibody**

**23.** A request for Antineutrophil Cytoplasmic Antibody immunofluorescence test (ANCA) shall be deemed to include requests for antineutrophil proteinase 3 antibody test (PR-3 ANCA) and antimyeloperoxidase antibody test (MPO ANCA) where the immunofluorescence test for ANCA is abnormal, or has been abnormal, or those specific antibodies have been previously detected.

### **Satisfying Requirements Described in Items**

**24.** Unless stated elsewhere in these rules, where an item contains a requirement, this requirement is satisfied if:

- (a) The requirement/s as stipulated in the item descriptor are contained in the request form; or
- (b) The requirement/s as stipulated in the item descriptor were supplied previously in writing to the APA and this documentation is retained by the APA; or
- (c) The results of other laboratory tests performed in the same episode meet the requirement/s as stipulated in the item descriptor; or
- (d) The results of laboratory tests that meet the requirement/s as stipulated in the item descriptor are supplied on the request form; or

The results of laboratory tests that meet the requirement/s as stipulated in the item descriptor are contained in the APA's records.

### **Limitation on certain items**

- 25.**
- (a) For any particular patient, items 66539, 66605, 66606, 66607, 66610, 69380, 69488, 69489, 71075, 71127, 71135 or 71137 is applicable not more than twice in a 12 month period.
  - (b) For any particular patient, item 66626 is applicable not more than 36 times in a 12 month period.
  - (c) For any particular patient, items 66655, 66659, 66838, 66841, 69482, 69491, 69499 or 69500 are applicable not more than once in a 12 month period.
  - (d) For any particular patient, item 66750 or 66751 is applicable not more than once in a pregnancy.
  - (e) For any particular patient, item 69336 is applicable not more than once in each period of 7 days.
  - (f) For any particular patient, items 66551, 66660, 69445, 69451, 69483, 71079 or 73523 are applicable not more than 4 times in a 12 month period.
  - (g) For any particular patient, items 66554, 66830 and 71077 are applicable not more than 6 times in a 12 month period.
  - (h) For any particular patient, item 66819, 66820, 66821, 66822, 66825, 66826, 66827 or 66828 is applicable not more than 3 times in a 6 month period.
  - (i) For any particular patient, items 73339 and 73340 are applicable not more than once.

### **Antigen Detection - Group P3 (Microbiology)**

**26.** If the service listed in 69316, 69317, 69319, 69494, 69495, 69496, 69497 or 69498 is a pathologist determinable service the specialist pathologist is required to record the reasons for determining the need for this service.

**27.** If the service rendered in 71148, 73320 or 73321 is a pathologist determinable service, the specialist pathologist is required to record the reason for determining the need for this service including the result of the service in 71147.

### **Second Opinion morphology, limitations on items 72858 and 72859**

**28.1** Items 72858 and 72859 apply:

- (a) only to a service that is covered by:
  - (i) item 65084 or 65087; or

(ii) item 72813, 72816, 72817, 72818, 72823, 72824, 72825, 72826, 72827, 72828, 72830, 72836 or 72838; or

(iii) an item in Group P6 (other than item 73070, 73071, 73072, 73073, 73074, 73075 or 73076);  
and

(b) only if the treating practitioner and the approved pathology practitioner who provided the original opinion on the patient specimen agree that a second opinion is reasonably necessary for diagnostic purposes.

**28.2** Items 72858 and 72859 do not apply if the accredited pathology laboratory in which the second opinion is provided is the same laboratory in which the original opinion was provided.

## **PN.1.1 Pathology Services in Relation to Medicare Benefits - Outline of Arrangements**

### **Basic Requirements**

#### *Determination of Necessity of Service*

The treating practitioner must determine that the pathology service is necessary.

#### *Request for Service*

The service may only be provided:

- (i) in response to a request from the treating practitioner, including a participating midwife or a participating nurse practitioner, or from another Approved Pathology Practitioner and the request must be in writing (or, if oral, confirmed in writing within fourteen days); or
- (ii) if determined to be necessary by an Approved Pathology Practitioner who is treating the patient.

Services requested by participating midwives and participating nurse practitioners:

- (i) A participating midwife can request the following services:

Items 65060, 65070, 65090 to 65099 (inclusive), 65114, 66500 to 66512 (inclusive), 66545, 66548, 66566, 66743, 66750, 66751, 69303 to 69317 (inclusive), 69324, 69384 to 69415 (inclusive), 73070, 73071, 73075, 73076 and 73529.

- (ii) A participating nurse practitioner can request items in the range 65060 to 73529 (inclusive).

#### *Provision of Service*

The following conditions relate to provision of services:

- (i) the service has to be provided by or on behalf of an Approved Pathology Practitioner;
- (ii) the service has to be provided in a pathology laboratory accredited for that kind of service;
- (iii) the proprietor of the laboratory where the service is performed must be an Approved Pathology Authority;
- (iv) the Approved Pathology Practitioner providing the service must either be the proprietor of the laboratory or party to an agreement, either by way of contract of employment or otherwise, with the proprietor of the laboratory in which the service is provided; and
- (v) no benefit will be payable for services provided by an Approved Pathology Practitioner on behalf of an Approved Pathology Authority if they are not performed in the laboratories of that particular Approved Pathology Authority.

#### *Therapeutic Goods Act 1989*

For any service listed in the MBS to be eligible for a Medicare rebate, the service must be rendered in accordance with the provisions of the relevant Commonwealth and State and Territory laws. Approved Pathology Practitioners have the responsibility to ensure that the supply of medicines or medical devices used in the provision of pathology services is strictly in accordance with the provisions of the *Therapeutic Goods Act 1989*.

## **PN.1.2 Exemptions to Basic Requirements**

### **Satisfying requirements described in pathology service**

Unless the contrary intention appears, a requirement contained in the description of a pathology service in Part 2 is satisfied if:

- (a) for a requirement for information - the information:
  - (i) is included in the request for the service; or
  - (ii) was supplied in writing on an earlier occasion to the approved pathology authority that rendered the service, and has been kept by the approved pathology authority; or
- (b) for a requirement for laboratory test results, the results are:
  - (i) included in the request for the service; or
  - (ii) obtained from another laboratory test performed in the same patient episode; or
  - (iii) included in results from an earlier laboratory test that have been kept by the approved pathology authority.

### **Services Where Request Not Required**

- (i) a pathologist determinable service. A pathologist-determinable service is a pathology service:
  - (a) that is rendered by or on behalf of an approved pathology practitioner for a person who is a patient of that approved pathology practitioner who has determined that the service is necessary; or
  - (b) that is specified in item 73332, 73336, 73337, 73342 or only one immunohistochemistry items 72846, 72847, 72848, 72849 and 72850, or electronmicroscopy items 72851 and 72852 or immunocytochemistry items 73059, 73060 or 73061 and is considered necessary by the approved pathology practitioner as a consequence of information resulting from a pathology service contained in tissue examination items 72813 - 72838 or cytology items 73045 - 73051 respectively.

Please note: a written request is required for a service contained in items 72813 to 72838 and items 73045 to 73051.

- (c) that is specified in one of the antigen detection items 69494, 69495 or 69496 is considered necessary by the approved pathology practitioner as a consequence of information provided by the requesting practitioner or by the nature or appearance of the specimen or as a consequence of information resulting from a pathology service contained in items 69303, 69306, 69312, 69318, 69321 and 69345.

Please note: a written request is required for a service contained in items 69303, 69306, 69312, 69318, 69321 and 69345.

- (d) that is specified in item 73320, HLA-B27 typing by nucleic acid amplification, and is considered necessary by the approved pathology practitioner because the results of HLA-B27 typing described in item 71147 are unsatisfactory.
- (e) that is specified in item 73305, detection of mutation of the FMRI gene by Southern Blot analysis where the results in item 73300 are inconclusive.

## **PN.1.3 Circumstances Where Medicare Benefits Not Attracted**

### **Services Rendered by Disqualified Practitioner**

Medicare benefits are not payable for pathology services if at the time the service is rendered, the person, by or on whose behalf the service is rendered, is a person in relation to whom a determination is in force in relation to that class of services. That is, where an Approved Pathology Practitioner has breached an undertaking, and a

determination has been made that Medicare benefits should not be paid during a specified period (of up to five years) in respect of specified pathology services rendered by the practitioner.

Note: An Approved Pathology Practitioner may be disqualified for reasons other than a breach of undertaking.

### ***Certain Pathology Tests Do Not Attract Medicare Benefits***

Certain tests of public health significance do not qualify for payment of Medicare benefits. Examples of services in this category are:

- examination by animal inoculation;
- Guthrie test for phenylketonuria;
- neonatal screening for hypothyroidism (T4/TSH estimation);
- neonatal screening for Cystic Fibrosis;
- neonatal screening for Galactosemia;
- pathology services used with the intention of monitoring the performance enhancing effects of any substance;
- pathology tests carried out on specimens collected from persons occupationally exposed to sexual transmission of disease where the purpose of the collection of specimens is for testing in accordance with conditions determined by the health authority of the State or Territory in which the service is performed.

In addition to the above, certain other tests do not qualify for payment of Medicare benefits. These include:

- cytotoxic food testing;
- pathology services performed for the purposes of control estimation, repeat tests (eg. for confirmation of earlier tests on the same specimen, etc);
- preparation of autogenous vaccines;
- tissue banking and preparation procedures;
- pathology services performed on stillborn babies or cadavers;
- pathology services which are performed routinely in association with the termination of pregnancy without there being any indication for the necessity of the services.

However, benefits will be paid for the following pathology tests:

- item 65060 - haemoglobin estimation;
- item 65090 - blood grouping ABO and Rh (D antigen);
- item 65096 - examination of serum for Rh and other blood group antibodies.

## **PN.2.1 Responsibilities of Treating/Requesting Practitioners**

### ***Form of Request***

A treating practitioner may request a pathology service either orally or in writing but oral requests must be confirmed in writing within fourteen days from the day when the oral request was made.

Pathology request forms and combined pathology request/offer to assign forms which are prepared by the pathologists and distributed to requesting practitioners on or after 1 August 2012 must include the minimum information detailed under P.2.2.

All written requests for pathology services should contain the following particulars:

(i) a description of the individual pathology services, or recognised groups of pathology tests to be rendered (see P.17.4 and the Index for acceptable terms and abbreviations). The description must be sufficient to enable the item in which the service is specified to be identified;

(ii) the date of request;

(iii) the name of the requesting practitioner and their practice address or provider number;

(iv) the patient's name and address;

(v) details of the hospital status of the patient, as follows (for benefit rate assessment). That is, whether the patient was or will be, at the time of the service and when the specimen is obtained:

(a) a private patient in a private hospital, or approved day hospital facility;

(b) a private patient in a recognised hospital;

(c) a public patient in a recognised hospital;

(d) an outpatient of a recognised hospital;

#### ***Offence Not to Confirm an Oral Request***

A requesting practitioner who, without reasonable excuse, does not confirm in writing an oral request within fourteen days of making the oral request is guilty of an offence under the *Health Insurance Act 1973* punishable, upon conviction, by a fine not exceeding \$1,100 (10 Penalty Units in accordance with the Crimes Act 1914), and the request is deemed never to have been made.

The Department of Human Services (DHS) has developed a [Health Practitioner Guideline to substantiate that a valid request existed \(pathology or diagnostic imaging\)](#) which is located on the DHS website.

## **PN.2.2 Responsibilities of Approved Pathology Practitioners**

### ***Form of Request***

There is no official "request in writing" form, and the requesting practitioner's own stationery, or pre-printed forms supplied by Approved Pathology Practitioners/Authorities are acceptable.

For the purposes of Medicare eligible services, the minimum information requirements for a pre-printed pathology request and combined pathology request/offer to assign are detailed within the: *Health Insurance Act 1973*; *Health Insurance Regulations 2018*; and the *Privacy Act 1988*.

The following table presents the minimum details that pre-printed pathology request forms and combined pathology request/offer to assign forms must contain for the purposes of a subsequent Medicare claim:

|   |
|---|
| Requesting Practitioner   |
| a) name   |
| b) practice address or provider number  |
| Patient Details   |
| a) name - surname, first name   |
| b) address  |
| c) date of birth  |
| d) sex  |
| e) Medicare card number   |
| f) hospital status<br>Two acceptable versions are as follows:<br>State the patient's status at the time of the service or when the specimen was collected:<br>OR cross out the statements that do not apply<br>Was or will the patient be, at the time of the service or when the specimen is obtained:<br>(a) a private patient in a private hospital or approved day hospital facility<br>(b) a private patient in a recognised hospital<br>(c) a public patient in a recognised hospital<br>(d) an outpatient of a recognised hospital   |
| Tests Requested   |
| a) an area titled "Tests Requested"   |
| Self Determined (SD)  |
| A tick box is required for SD. This is used when the APP determines that pathologist-determinable tests are necessary. This tick box can be put in the Clinical Notes area.   |
| Mandatory patient advisory statement  |
| One of the following statements:<br>'Your doctor has recommended that you use (insert name of pathology provider). You are free to choose your own pathology provider. However, if your doctor has specified a particular pathologist on clinical grounds, a Medicare rebate will only be payable if that pathologist performs the service. You should discuss this with your doctor.'<br>'Your treating practitioner has recommended that you use (insert name of pathology provider). You are free to choose your own pathology provider. However, if your treating practitioner has specified a particular pathologist on clinical grounds, a Medicare rebate will only be payable if that pathologist performs the service. You should discuss this with your treating practitioner.' |
| Privacy Note  |
| The wording of the note must be:<br>"Privacy Note: The information provided will be used to assess any Medicare benefit payable for the services rendered and to facilitate the proper administration of government health programs, and may be used to update enrolment records. Its collection is authorised by the provisions of the <i>Health Insurance Act 1973</i> . The information may be disclosed to the Department of Health or to a person in the medical practice associated with this claim, or as authorised/required by law." The placement of the note is only necessary on the patient's copy and could be incorporated into the clinical notes area. Alternatively, the back of the patient copy could be used if that is more practicable.                            |

The Department of Human Services (DHS) has developed a [Health Practitioner Guideline to substantiate that a valid request existed \(pathology or diagnostic imaging\)](#) which is located on the DHS website.

|   |
|---|
| Combined Request/Assignment form only   |
| Offer to Assign and Reference to Section 20A  |
| An example of a Section 20A Offer to Assign is as follows:<br>"Medicare Agreement (Section 20A of the Health Insurance Act 1973)<br>I offer to assign my right to benefits to the approved pathology practitioner who will render the requested pathology service(s) and any eligible pathologist determinable service(s) established as necessary by the practitioner.<br>Patient signature _____ Date / / |
| Practitioners Use Only  |
| A text box is also required for 'Practitioner's Use Only' this section is used where the patient is unable to sign and an appropriate person endorses on behalf of patient, eg.<br>Practitioner's Use Only<br>_____<br>(Reason patient cannot sign)   |

An Approved Pathology Practitioner or Approved Pathology Authority who, without reasonable excuse, provides to practitioners (directly or indirectly) combined request/assignment forms which are not in accordance with the legislation is guilty of an offence under the *Health Insurance Act 1973* punishable, upon conviction, by a fine not exceeding \$1,100 (10 Penalty Units in accordance with the Crimes Act 1914).

***Patient Copy***

Assignment of benefits requires the patient to receive a copy of the request. The doctor must cause the particulars relating to the professional service (tests requested) to be set out on the assignment form, before the patient signs the form and cause the patient to receive a copy of the form as soon as practicable after the patient signs it.

***Authority to lodge a Patient Claim electronically***

Where an Approved Pathology Practitioner or Approved Pathology Authority renders a service and the patient has not assigned the benefit the Approved Pathology Practitioner or Approved Pathology Authority can lodge a claim electronically to the Department of Human Services on behalf of the patient where consent is provided. This consent can be provided verbally.

***Combined Online Patient Claiming Authority***

*Authority for APP/APA to submit an electronic patient claim on behalf of the claimant*

An example of wording that could be used is:

'I authorise the approved pathology practitioner who will render the requested pathology services, and any further pathology services which the practitioner determines to be necessary, to submit my unpaid account to Medicare, so that Medicare can assess my claim and issue me a cheque made payable to the practitioner, for the Medicare benefit.'

Patient Signature \_\_\_\_\_ Date \_\_\_\_/\_\_\_\_/\_\_\_\_

Verbal consent was provided by patient to submit unpaid account to Medicare. No signature available.

***Request to Approved Pathology Authority***

It is acceptable for a request to be made to an Approved Pathology Authority who is the proprietor or one of the proprietors of a laboratory instead of making the request to the Approved Pathology Practitioner who renders the service or on whose behalf the service is rendered.

### ***Holding, Retention, Recording and Production of Request Forms***

Approved Pathology Practitioners must hold a request in writing for all services requested by any other practitioner before billing patients. An Approved Pathology Practitioner is required to retain written requests/confirmation of requests for pathology services for 2 years from the day when the service was rendered. This also applies to requests which an Approved Pathology Practitioner receives of which only some tests are referred to another Approved Pathology Practitioner (the first Approved Pathology Practitioner would retain the request for 2 years). If all tests were referred, the second pathologist would retain the original request.

If the written request or written confirmation has been recorded on film or other magnetic medium approved by the Minister for Health and Ageing, for the purposes of storage and subsequent retrieval, the record so made shall be deemed to be a retention of the request or confirmation. The production or reproduction of such a record shall be deemed to be a production of the written request or written confirmation.

An Approved Pathology Practitioner or an Approved Pathology Authority is required to produce, on request from the Department of Human Services CEO, no later than the end of the day following the request from the CEO, a written request or written confirmation retained pursuant to the above paragraphs. An employee of the Department of Human Services is authorised to make and retain copies of or take and retain extracts from written requests or written confirmations.

### ***Offences in Relation to Retaining and Producing Request Forms***

The following offences are punishable upon conviction by a fine not exceeding \$1000:

- an Approved Pathology Practitioner who, without reasonable excuse, does not keep request forms for 18 months;
- an Approved Pathology Practitioner who, without reasonable excuse, does not produce a request form to an employee of the Department of Human Services before the end of the day following the day of the Department of Human Services CEO's request.

### ***Referral From An Approved Pathology Practitioner To Another Approved Pathology Practitioner***

Where an Approved Pathology Practitioner refers some or all services requested to another Approved Pathology Practitioner not associated with the same Approved Pathology Authority the following apply:

- where all the services are referred, the first Approved Pathology Practitioner should forward the original request to the second Approved Pathology Practitioner, and the document bearing the patient's assignment voucher so that the second Approved Pathology Authority can direct-bill Medicare;
- where some of the services which are listed in different items in the Schedule are referred, the first Approved Pathology Practitioner must issue his/her own request in writing listing the tests to be performed, and when necessary, forward a photocopy of the patient's assignment voucher so that the second Approved Pathology Authority can direct-bill Medicare

in addition to the details of the first Approved Pathology Practitioner, the second Approved Pathology Practitioner must show on the account/receipt/assignment form:

- name and provider number of the original requesting practitioner; and
- date of original request;
- under the item coning rules (which limit benefits for multiple services) only one Medicare benefit is payable for services included in coned items except for estimations covered by Rule 6 entitled "designated pathology services". The exemption allows payment of more than one Medicare benefit where various components of the one item number from the same request e.g. drug assays (items 66800 and 66812) are performed by two Approved Pathology Authorities.

Although the provisions concerning designated pathology services in Rule 6 permit similar services (e.g. hormone estimations) to be performed by 2 or more laboratories, with different Approved Pathology Authorities, the sum of

the Medicare benefit payable for services provided by the laboratories concerned will not exceed the maximum amount payable under the item coning rules when a single laboratory performs all the estimations.

Notes:

- the patient should be billed by each Approved Pathology Practitioner only for those services rendered by or on his/her behalf;
- photocopies of requests are not acceptable;
- in the case of "designated pathology services" 65150, 65175, 66650, 66695, 66711, 66722, 66785, 66800, 66812, 66819, 66825, 69384, 69494, 71089, 71153 or 71165 a patient episode initiation fee (PEI) is payable for the services provided by the laboratory which receives the original request and performs one or more of the estimations. However, no PEI is payable for services provided by the other laboratory which performs the remainder of the estimations. A "specimen referred fee" is payable instead. One Approved Pathology Practitioner cannot claim both a PEI and a "specimen referred fee" in relation to the same patient episode.

### ***Offence Not To Confirm An Oral Request***

An Approved Pathology Practitioner who, without reasonable excuse, does not confirm in writing an oral request to another Approved Pathology Practitioner within fourteen days of making the oral request is guilty of an offence under the *Health Insurance Act 1973* punishable, upon conviction, by a fine not exceeding \$1000, and the request is deemed never to have been made.

### **PN.2.3 Pathology Tests not Covered by Request**

An Approved Pathology Practitioner, who has been requested to perform one or more pathology services, may consider it necessary, in the interest of the patient, that additional tests to those requested be carried out. The Approved Pathology Practitioner must discuss this need with the requesting practitioner, and if the requesting practitioner determines that additional tests are necessary, the Approved Pathology Practitioner must arrange with the requesting practitioner to forward an amended or second request for those services. The account will then be issued in the ordinary way and the additional services will attract benefits providing the Approved Pathology Practitioner is a recognised specialist pathologist.

### **PN.3.1 Details Required on Accounts, Receipts or Assignment Forms**

#### **General**

Medicare benefit is not payable in respect of a pathology service unless specified details are provided, by the practitioner rendering the service, on his or her account, receipt or assignment form.

### **PN.3.2 Approved Pathology Practitioners**

In addition to holding a request in writing from the treating medical or dental practitioner or from another Approved Pathology Practitioner, the following additional details must be recorded on the account, receipt or assignment form of the Approved Pathology Practitioner providing the service:

- (i) the surname and initials of the Approved Pathology Practitioner who performed the service and either his/her practice address or the provider number for the address;
- (ii) the name of the person to whom the service was rendered;
- (iii) the date on which the service was rendered;
- (iv) the name of the requesting practitioner; or in the case of a referred test, the name of the original requesting practitioner;
- (v) the date on which the request was made; or in the case of a referred test, the date on which the original request was made;

- (vi) the requesting practitioner's provider number;
- (vii) a description of the pathology service in words which are derived from the item description in the Schedule and are of sufficient detail to identify the specific test in the Schedule that was rendered. Instead of such a full description, the abbreviations contained in the index and the group abbreviations listed at PQ.4 are acceptable alternatives (see PQ.1);
- (viii) where the Approved Pathology Practitioner determines or provides a pathology service on his/her own patient, the account must be endorsed "sd"; and
- (ix) provide collection centre identification number if the specimen was collected in a licensed collection centre (or approved pathology collection centre).

Where some services are referred from one Approved Pathology Practitioner to another Approved Pathology Practitioner, the request details to be shown on the second Approved Pathology Practitioner's account, receipt or assignment form must be identical to those of the original requesting practitioner including the date of request.

### **PN.3.3 Prescribed Pathology Services**

For Prescribed Pathology Services (that is, pathology items in Group P9) the medical practitioner who renders the service must ensure his or her account, receipt or assignment form includes his or her name, address or provider number, the date of the service, and a description to clearly identify the service in the Schedule that was rendered.

If the service was determined necessary by another medical practitioner who is a member of the same group practice as the practitioner who rendered the service, the name of the requesting practitioner, sufficient to identify the practitioner from other practitioners in the same group practice with the same surname, must also be included together with the date on which the request was made.

### **PN.3.4 Interferon Gamma Release Assay (IGRA) for detection of latent tuberculosis - (Item 69471)**

Before undertaking testing it is advisable to consult with a medical practitioner experienced in the management of tuberculosis. Neither IGRA tests or the tuberculin skin test (Mantoux) can absolutely exclude latent tuberculosis and following close contact exposure preventative therapy should always be considered in young children and immunosuppressed patients.

IGRA testing for the diagnosis of latent tuberculosis should be requested in compliance with recommendations made by the National Tuberculosis Advisory Committee in 2016 or later.

<http://www.health.gov.au/internet/main/publishing.nsf/Content/cdna-ntac-pubs.htm> including:

- IGRAs have no place in the initial investigation of active TB disease and cannot and should not be used to exclude suspected TB disease.
- IGRA should not be used for the purpose of screening prior to BCG vaccination.
- While IGRA tests can be used in children less than 5 years of age, there may be a higher proportion of indeterminate test results and tuberculin skin testing is preferred, unless there is a history of BCG.

At least eight weeks should elapse following last possible TB exposure before testing of a contact of a confirmed case of active tuberculosis – testing of contacts should be performed only after discussion with appropriate State or Territory public health authorities.

### **PN.4.1 Inbuilt Multiple Services Rule**

The term "Multiple Services Rule" (Rule 3 of the Pathology Services Table) describes an arrangement which places limits on the benefits payable for items in the Pathology Services Table depending on the range of services performed during a single patient episode. A patient episode is defined in PO.4 of these notes.

## **PN.4.2 Exemptions**

Under Rule 4 of the Pathology Services Table, exemptions to the multiple services rule have been granted for certain specified tests. In some circumstances tests which are repeated up to 6 times over a 24 hour period, or tests which are requested up to 6 times on a single request form and are performed within 6 months of the date of request may be eligible for separate Medicare benefits. The services to which the exemptions apply are listed under Rule 4.(1 and 2) and cover seriously or chronically ill patients who require particular tests under specified circumstances. In order to claim the exemptions, accounts should be endorsed "Rule 3 Exemption".

Where a practitioner seeks an exemption to the multiple services rule for a patient whose condition requires a series of pathology investigations at various times throughout any one day or over a longer period of time, and the services required are not exempted under Rule 4, an application for exemption can be made which is endorsed "S4B(3)". Some factors that the delegate of the Minister may take into consideration in approving an exemption are: the patient is seriously ill; there are distinct and separate collections and performances of tests; and the services involve substantial additional expenses for the Approved Pathology Practitioner. These, and other clinical details, should be supplied by the practitioner when seeking an S4B(3) exemption.

If Rule 3 exemptions are endorsed "S4B(3)", claim assessment could take longer as all S4B(3) claims are passed to the delegate for assessment. S4B(3) covers all exemptions to the multiple services rule but, where applicable, specific "Rule 3 exemption" endorsements will speed up the payment of claims. Rule 3 and S4B(3) exemptions cannot be used to overcome time based restrictions within items e.g. "-. each test to a maximum of 4 tests in a 12 month period".

## **PN.5.1 Episode Cone**

### **Description of Rule 18**

The term "Episode Cone" describes an arrangement under which Medicare benefits payable in a patient episode for a set of pathology services, containing more than three items, ordered by a general practitioner for a non-hospitalised patient, will be equivalent to the sum of the benefits for the three items with the highest Schedule fees. Further information on the episode coning arrangements is provided in PO.5 of these notes.

## **PN.5.2 Exemptions**

Some items are not included in the count of the items performed when applying episode coning. The items which have been exempted from the cone include all the items identified in Rule 18.(1)(d) and (e).

## **PN.6.1 Bulk Billing Incentives for Episodes Consisting of a P10 Service**

P19.1

Pathology Services Table

### **Rules for the Interpretation of the Pathology Services Table**

Please note that in the Health Insurance (Pathology Services Table) Regulations 2010 (effective 1 November 2010) rules and sub-rules are referred to as clauses and sub-clauses. In addition in the Regulations a rule that refers to specific items within a pathology group, for example Group P1 Haematology, is listed directly above the Schedule of Services for that group. A table cross referencing the following rules with the clauses in the Regulations is at the end of this section.

- (1) In this table

*patient episode* means:

(a) a pathology service or pathology services (other than a pathology service to which paragraph 1 (1) (b) refers) provided for a single patient whose need for the service or services was determined under section 16A of the Act:

- (i) on the same day; or

(ii) if more than 1 test is performed on the 1 specimen within 14 days - on the same or different days;

whether the services:

(iii) are requested by 1 or more practitioners; or

(iv) are described in a single item or in more than 1 item; or

(v) are rendered by 1 approved pathology practitioner or more than 1 approved pathology practitioner; or

(vi) are rendered on the same or different days; or

(b) a pathology service to which rule 4 refers that is provided in the circumstances set out in that rule that relates to the service.

**receiving APP** means an approved pathology practitioner in an approved pathology authority who performs one or more pathology services in respect of a single patient episode following receipt of a request for those services from a referring APP.

**recognised pathologist** means a medical practitioner recognised as a specialist in pathology by a determination under section 3D, 3DB or 3E of the Act.

**referring APP** means an approved pathology practitioner in an approved pathology authority who:

(i) has been requested to render 1 or more pathology services, all of which are requested in a single patient episode; and

(ii) is unable, because of the lack of facilities in, or expertise or experience of the staff of, the laboratory of the authority, to render 1 or more of the pathology services; and

(iii) requests an approved pathology practitioner (the **receiving APP**) in another approved pathology authority to render the pathology service or services that the referring APP is unable to render; and

(iv) renders each pathology service (if any) included in that patient episode, other than the pathology service or services in respect of which the request mentioned in subparagraph (iii) is made.

**serial examinations** means a series of examinations requested on 1 occasion whether or not:

(a) the materials are received on different days by the approved pathology practitioner; or

(b) the examinations or cultures were requested on 1 or more request forms by the treating practitioner.

**the Act** means the *Health Insurance Act 1973*.

k. (2) In these rules, a reference to a request to an approved pathology practitioner includes a reference to a request for a pathologist-determinable service to which subsection 16A (6) of the Act applies.

l. (3) A reference in this table by number to an item that is not included in this table is a reference to the item that has that number in the general medical services table or the diagnostic imaging services table, as the case requires.

v. (4) A reference to a **Group** in the table includes every item in the Group and a reference to a **Subgroup** in the table includes every item in the Subgroup.

#### **Precedence of items**

iv. (1) If a service is described:

(a) in an item in general terms; and

(b) in another item in specific terms;

only the item that describes the service in specific terms applies to the service.

k. (2) Subject to subrule (3), if:

(a) subrule (1) does not apply; and

(b) a service is described in 2 or more items;

only the item that provides the lower or lowest fee for the service applies to the service.

vi. (3) If an item is expressed to include a pathology service that is described in another item, the other item does not apply to the service in addition to the first-mentioned item, whether or not the services described in the 2 items are requested separately.

#### **Application of item 74990 and 74991**

vi. (4) Despite subrules (1), (2) and (3):

(a) if the pathology service described in item 74991 is provided to a person, either that item or item 74990, but not both those items, applies to the service; and

(b) if item 74990 or 74991 applies to a pathology service, the fee specified in that item applies in addition to the fee specified in any other item in the table that applies to the service.

g. (5) For items 74990 and 74991:

**bulk-billed**, in relation to a pathology service, means:

(a) a medicare benefit is payable to a person in respect of the service; and

(b) under an agreement entered into under section 20A of the Act:

(i) the person assigns to the practitioner by whom, or on whose behalf, the service is provided, his or her right to the payment of the medicare benefit; and

(ii) the practitioner accepts the assignment in full payment of his or her fee for the service provided.

**Commonwealth concession card holder** means a person who is a concessional beneficiary within the meaning given by subsection 84 (1) of the *National Health Act 1953*.

**unreferred service** means a pathology service that:

(a) is provided to a person by, or on behalf of, a medical practitioner, being a medical practitioner who is not a consultant physician, or specialist, in any speciality (other than a medical practitioner who is, for the purposes of the Act, both a general practitioner and a consultant physician, or specialist, in a particular speciality); and

(b) has not been referred to the medical practitioner by another medical practitioner or person with referring rights.

n. (6) For item 74991:

**ASGC** means the document titled Australian Standard Geographical Classification (ASGC) 2002, published by the Australian Bureau of Statistics, as in force on 1 July 2002.

**practice location**, in relation to the provision of a pathology service, means the place of practice in respect of which the practitioner by whom, or on whose behalf, the service is provided, has been allocated a provider number by the Commission.

**Regional, rural or remote area** means an area classified as RRMA 3-7 under the Rural, Remote and Metropolitan Areas Classification.

**Rural, Remote and Metropolitan Areas Classification** has the meaning given by subrule 3 (1) of Part 2 of Schedule 1 to the general medical services table.

**SLA** means a Statistical Local Area specified in the ASGC.

**SSD** mean a Statistical Subdivision specified in the ASGC.

**Circumstances in which services rendered following 2 requests to be taken to have been rendered following 1 request**

- i. (1) In subrule 3(2), *service* includes assay, estimation and test.
- vi. (2) Two or more pathology services (other than services to which, under rule 4, this rule does not apply) rendered for a patient following 2 or more requests are taken to have been rendered following a single request if:
  - (a) the services are listed in the same item; and
  - (ab) that item is not item 74990 or 74991; and
  - (b) the patient's need for the services was determined under subsection 16A (1) of the Act on the same day even if the services are rendered by an approved pathology practitioner on more than one day.

**Services to which rule 3 does not apply**

- vi. (1) Rule 3 does not apply to a pathology service described in item 65060, 65070, 65120, 65123, 65126, 65129, 65150, 65153, 65156, 66500, 66503, 66506, 66509, 66512, 66584 or 66800, if:
  - (a) the service is rendered in relation to one or more specimens taken on each of not more than 6 separate occasions in a period of 24 hours; and
  - (b) the service is rendered to an inpatient in a hospital; and
  - (c) each service must be rendered as soon as possible after collection and after authorization of the result of the previous specimen; and
  - (d) the account for the service is endorsed 'Rule 3 Exemption'.
- ix. (2) Rule 3 does not apply to any of the following pathology services:
  - (a) estimation of prothrombin time (INR) in respect of a patient undergoing anticoagulant therapy;
  - (b) quantitative estimation of lithium in respect of a patient undergoing lithium therapy;
  - (c) a service described in item 65070 in relation to a patient undergoing chemotherapy for neoplastic disease or immunosuppressant therapy;
  - (d) a service described in item 65070 in relation to clozaril, ticlopidine hydrochloride, methotrexate, gold, sulphasalazine or penicillamine therapy of a patient;
  - (e) a service described in item 66500 - 66512 in relation to methotrexate or leflunomide therapy of a patient;
  - (f) quantitative estimation of urea, creatinine and electrolytes in relation to:
  - (i) cis-platinum or cyclosporin therapy of a patient; or

- (ii) chronic renal failure of a patient being treated in a dialysis program conducted by a recognised hospital;
- (g) quantitative estimation of albumin and calcium in relation to therapy of a patient with vitamin D, its metabolites or analogues;
- (h) quantitative estimation of calcium, phosphate, magnesium, urea, creatinine and electrolytes in cancer patients receiving bisphosphonate infusions.

if:

- (i) under a request for a service, other than a request for a service described in paragraph (a), no more than 6 tests are requested; and
- (ii) the tests are performed within 6 months of the request; and
- (iii) the account for the service is endorsed "Rule 3 Exemption".

k. (3) Rule 3 does not apply to a pathology service described in items 65109 or 65110 if:

- (a) The service is rendered on not more than 5 separate occasions in the case of item 65109 and 2 separate occasions in the case of item 65110 in a period of 24 hours; and
- (b) The service is rendered in response to a written request separated in time from the previous request; and
- (c) The account for the service is endorsed "Rule 3 Exemption".

**Item taken to refer only to the first service of a particular kind**

j. (1) For an item in Group P1 (Haematology):

- (a) if pathology services of a kind referred to in item 65090 or 65093 are rendered for a patient during a period when the patient is in hospital, the item applies only to the first pathology service of that kind rendered for the patient during the period; and
- (b) if:
  - (i) tests (except tests mentioned in item 65099, 65102, 65105 and 65108) are carried out in relation to a patient episode; and
  - (ii) specimen material from the patient episode is stored; and
  - (iii) in response to a request made within 14 days of the patient episode, further tests (except tests mentioned in item 65099, 65102, 65105 and 65108) are carried out on the stored material; the later tests and the earlier tests are taken to be part of one patient episode.

n. (2) Benefits for items 65102 and 65108 are payable only if a minimum of 6 units are issued for the patient's care in any 1 day.

5.(3) For items 65099 and 65102:

*compatibility tests by crossmatch* means that, in addition to all the tests described in paragraphs (a) and (b) of the item, donor red cells from each unit must have been tested directly against the serum of the patient by 1 or more accepted crossmatching techniques.

**Certain items not to apply to a service referred by one pathology practitioner to another**

f. (1) In this rule:

*designated pathology service* means a pathology service in respect of tests relating to a single patient episode that are tests of the kind described in item 65150, 65175, 66650, 66695, 66711, 66722, 66785, 66800, 66812, 66819, 66825, 69384, 69494, 71089, 71153 or 71165.

f. (2) This rule applies in respect of a designated pathology service where:

(a) an approved pathology practitioner (*practitioner A*) in an approved pathology authority:

(i) has been requested to render the designated pathology service; and

(ii) is unable, because of the lack of facilities in, or expertise or experience of the staff of, the laboratory of the authority, to render 1 or more of the tests included in the service; and

(iii) requests an approved pathology practitioner (*practitioner B*) in another approved pathology authority to render the test or tests that practitioner A is unable to render; and

(iv) renders each test (if any) included in the service, other than the test or tests in respect of which the request mentioned in subparagraph (iii) is made; and

(b) the tests mentioned in subparagraph (a) (iv) that practitioner A renders are not tests constituting a service described in item 65156, 65179, 66653, 66712, 66734, 66788, 66806, 66815, 66822, 66828, 69496, 71093, 71159 or 71168.

g. (3) If this rule applies in respect of a designated pathology service:

(a) item 65150, 65153, 65175, 65176, 65177, 65178, 66650, 66695, 66698, 66701, 66704, 66707, 66711, 66722, 66725, 66728, 66731, 66785, 66800, 66803, 66812, 66819, 66825, 69384, 69387, 69390, 69393, 69396, 69494, 69495, 71089, 71091, 71153, 71155, 71157, 71165, 71166 or 71167 (as the case requires) applies in respect of the test or tests rendered by practitioner A; and

(b) where practitioner B renders a service under a request referred to in subparagraph (2) (a) (iii) and:

(i) practitioner A has rendered one or more of the tests that the service comprises - subject to subrule (4), the amount specified in item 65158, 65181, 66652, 66697, 66715, 66724, 66790, 66805, 66817, 66821, 66827, 69401, 69498, 71092, 71156 or 71170 (as the case requires) shall be taken to be the fee for each test that the service comprises; or

(ii) practitioner A has not rendered any of the tests that the service comprises -

(A) the amount specified in item 65157, 65180, 66651, 66696, 66714, 66723, 66789, 66804, 66816, 66820, 66826, 69400, 69497, 71090, 71154 or 71169 (as the case requires) shall be taken to be the fee for the first test that the service comprises; and

(B) subject to subrule (4), the amount specified in item 65158, 65181, 66652, 66697, 66715, 66724, 66790, 66805, 66817, 66821, 66827, 69401, 69498, 71092, 71156 or 71170 (as the case requires) shall be taken to be the fee for each subsequent test that the service comprises.

g. (4) For paragraph (3) (b), the maximum number of tests to which item 65158, 65181, 66652, 66697, 66715, 66724, 66790, 66805, 66817, 66821, 66827, 69401, 69498, 71092, 71156 or 71170 applies is:

(a) for item 66652, 66715, 66790, 66817, 66821 or 66827:

2 - X; and

(b) for item 65158, 66805, 69498 or 71092:

3 - X; and

(c) for item 71156 or 71170:

4 - X; and

(d) for item 65181 or 66724:

5 - X; and

where X is the number of tests rendered by practitioner A in relation to the designated pathology service in respect of which the request mentioned in that paragraph is made.

- k. (5) Items in Group P10 (Patient episode initiation) do not apply to the second mentioned approved pathology practitioner in subrule (2).

#### **Items not to be split**

- l. Except as stated in rule 6, the amount specified in an item is payable only to one approved pathology practitioner in respect of a single patient episode.

#### **Creatinine ratios - Group P2 (chemical)**

- A pathology service mentioned in an item (except item 66500) in Group P2 (chemical) that:

(a) involves the measurement of a substance in urine; and

(b) requires calculation of a substance/creatinine ratio;

is taken to include the measurement of creatinine necessary for the calculation.

#### **Thyroid function testing**

- (1) For item 66719:

**abnormal level of TSH** means a level of TSH that is outside the normal reference range in respect of the particular method of assay used to determine the level.

- (2) Except where paragraph (a) of item 66719 is satisfied, the amount specified in the item is not payable in respect of a pathology service described in the item unless the pathologist who renders the service has a written statement from the medical practitioner who requested the service that satisfies subrule (3).

c. (3) The written statement from the medical practitioner must indicate:

(a) that the tests are required for a particular purpose, being a purpose specified in paragraph (b) of item 66719; or

(b) that the medical practitioner who requested the tests suspects the patient has pituitary dysfunction; or

(c) that the patient is on drugs that interfere with thyroid hormone metabolism or function.

#### **Meaning of "serial examinations or cultures"**

c. For an item in Group P3 (Microbiology):

(a) **serial examinations or cultures** means a series of examinations or cultures requested on 1 occasion whether or not:

- (i) the materials are received on different days by the approved pathology practitioner; or
- (ii) the examinations or cultures were requested on 1 or more request forms by the treating practitioner; and
- (b) if:
  - (i) tests are carried out in relation to a patient episode; and
  - (ii) specimen material from the patient episode is stored; and
  - (iii) in response to a request made within 14 days of the patient episode, further tests are carried out on the stored material;

the later tests and the earlier tests are taken to be part of one patient episode.

#### **Investigation for hepatitis serology**

- x. A medicare benefit is not payable in respect of more than one of items 69475, 69478 and 69481 in a patient episode.

#### **Tests in Group P4 (Immunology) relating to antibodies**

- For items in Group P4 (Immunology), in items 71119, 71121, 71123 and 71125, if:
  - (a) tests are carried out in relation to a patient episode; and
  - (b) specimen material from the patient episode is stored; and
  - (c) in response to a request made within 14 days of the patient episode, further tests are carried out on the stored material;

the later tests and the earlier tests are taken to be part of one patient episode.

#### **Tests on biopsy material - Group P5 (Tissue pathology) and Group P6 (Cytology)**

- (1) For items in Group P5 (Tissue pathology):
  - (a) **biopsy material** means all tissue received by the Approved Pathology Practitioner:
    - (i) from a medical procedure or group of medical procedures performed on a patient at the same time; or
    - (ii) after being expelled spontaneously from a patient.
  - (b) **cytology** means microscopic examination of 1 or more stained preparations of cells separated naturally or artificially from their normal environment by methods recognised as adequate to demonstrate their structure to a degree sufficient to enable an opinion to be formed about whether they are likely to be normal, abnormal but benign, or abnormal and malignant but, in accordance with customary laboratory practice, does not include examination of a blood film and a bone marrow aspirate; and
  - (c) **separately identified specimen** means an individual specimen collected, identified so that it is clearly distinguished from any other specimen, and sent for testing by or on behalf of the treating practitioner responsible for the procedure in which the specimen was taken.
- (2) For Groups P5 and P6 of the pathology services table, services in Group P6 include any services described in Group P5 on the material submitted for a test in Group P6.
- (3) For subrule (2), any sample submitted for cytology from which a cell block is prepared does not qualify for a Group P5 item.

**13.(4)** If more than 1 of the services mentioned in items 72813, 72816, 72817, 72818, 72823, 72824, 72825, 72826, 72827, 72828, 72830, 72836 and 72838 are performed in a single patient episode, only the fee for the item performed having the highest specified fee is applicable to the services.

**13.(5)** If more than 1 histopathological examinations are performed on separate specimens, of different complexity levels, from a single patient episode, a medicare benefit is payable only for the examination that has the highest schedule fee.

**13.(6)** In items 72813, 72816, 72817, 72818, 72823, 72824, 72825, 72826, 72827, 72828, 72830, 72836 and 72838 a reference to a **complexity level** is a reference to the level given to a specimen type mentioned in Part 4 of this Table.

**13.(7)** If more than 1 of the services mentioned in items 72846, 72847, 72848; 72849 and 72850 or 73059, 73060, 73061, 73064 and 73065 are performed in a single patient episode, a medicare benefit is payable only for the item performed that has the highest scheduled fee.

**13.(8)** If more than 1 of the services mentioned in items 73049, 73051, 73062, 73063, 73066 and 73067 are performed in a single patient episode, only the fee for the item performed having the higher or highest specified fee applies to the services.

**Items in Groups P10 (Patient episode initiation) and P11 (Specimen referred) not to apply in certain circumstances**

- **(1)** For this rule and items in Groups P10 (Patient episode initiation) and P11 (Specimen referred):

**approved collection centre** has the same meaning as in Part IIA of the Act.

**institution** means a place at which residential accommodation or day care is, or both residential accommodation and day care are, made available to:

- (a) disadvantaged children; or
- (b) juvenile offenders; or
- (c) aged persons; or
- (d) chronically ill psychiatric patients; or
- (e) homeless persons; or
- (f) unemployed persons; or
- (g) persons suffering from alcoholism; or
- (h) persons addicted to drugs; or
- (i) physically or mentally handicapped persons;

but does not include:

- (j) a hospital; or
- (k) a residential aged care home; or
- (l) accommodation for aged persons that is attached to a residential aged care home or situated within a residential aged care home.

**prescribed laboratory** means a laboratory operated by:

- (a) the Australian Government; or
- (b) an authority of the Commonwealth; or
- (c) a State or internal Territory; or
- (d) an authority of a State or internal Territory; or
- (e) an Australian tertiary education institution.

*specimen collection centre* has the same meaning as in Part IIA of the Act.

*treating practitioner* has the same meaning as in paragraph 16A(1)(a) of the Act.

- **(2)** If a service described in an item in Group P10 is rendered by, or on behalf of, an approved pathology practitioner who is a recognised pathologist, the relevant one of those items does not apply to the service if:

(a) the service is rendered upon a request made in the course of a service provided to a public patient in a recognised hospital or when attending an outpatient service of a recognised hospital.

- **(3)** An item in Group P10 or P11 does not apply to a pathology service to which subsection 16A (7) of the Act applies.
- **(4)** An item in Group P10 or P11 does not apply to a pathology service unless at least 1 item in Groups P1 to P8 also applies to the service.
- **(5)** Subject to subrule (7), if one item in Group P10 applies to a patient episode, no other item in the Group applies to the patient episode.
- **(6)** An item in Group P11 applies only to the approved pathology practitioner or approved pathology authority to whom the specimen mentioned in the item was referred.
- **(7)** If, in respect of the same patient episode:

(a) services referred to in 1 or more items in Group P5 and 1 or more of Groups P1, P2, P3, P4, P6, P7 and P8 are rendered by an approved pathology practitioner in the laboratory of another approved pathology authority; or

(b) services referred to in 1 or more items in Group P6 and 1 or more of Groups P1, P2, P3, P4, P5, P7 and P8 are rendered by another approved pathology practitioner in the laboratory of another approved pathology authority;

the fee specified in the applicable item in Group P10 is payable to both approved pathology practitioners.

- **(8)** If more than one specimen is collected from a person on the same day for the provision of pathology services:

(a) in accordance with more than 1 request; and

(b) in or by a single approved pathology authority;

the fee specified in the applicable item in Group P10 applies once only to the services unless an exemption listed in Rule 4 applies or an exemption has been granted under Rule 3 "S4B(3)".

- **(9)** The amount specified in item 73940 is payable only once in respect of a single patient episode.

### **Application of an item in Group P11 (Specimen referred) to a service excludes certain other items**

- If item 73940 applies to a patient episode, none of the items in Group P10 applies to any pathology service rendered by the approved pathology authority or approved pathology practitioner who claimed item 73940 in respect of the patient episode.

### **Circumstances in which an item in Group P11 (Specimen referred) does not apply**

- (1) An item in Group P11 does not apply to a referral if:

(a) a service in respect of the same patient episode has been carried out by the referring approved pathology authority; and

(b) the approved pathology authority to which the referral is made is related to the referring approved pathology authority.

- (2) An approved pathology authority is *related to* another approved pathology authority for subrule (1) if:

(a) both approved pathology authorities are employed (including employed under contract) by the same person, whether or not the person is also an approved pathology authority; or

(b) either of the approved pathology authorities is employed (including employed under contract) by the other; or

(c) both approved pathology authorities are corporations and are related corporations within the meaning of the Corporations Act; or

(d) the approved pathology authorities are partners (whether or not either or both of the approved pathology authorities are individuals and whether or not other persons are in partnership with either or both of the approved pathology authorities); or

(e) both approved pathology authorities are operated by the Commonwealth or an authority of the Commonwealth; or

(f) both approved pathology authorities are operated by the same State or internal Territory or an authority of the same State or internal Territory.

- (3) An item in Group P11 does not apply to a referral if the following common tests are referred either singly or in combination (except if the following items are referred in combination with other items not similarly specified): 65060, 65070, 65120, 66500, 66503, 66506, 66509, 66512, 66536, 66596, 69300, 69303, 69333 or 73527.

### **Abbreviations**

- (1) The abbreviations in Part 4 of this table may be used to identify particular pathology services or groups of pathology services.
- (2) The names of services or drugs not listed in Part 4 of this table must be written in full.

Certain pathology services to be treated as 1 service

- (1) In this rule:

*general practitioner* means a medical practitioner who:

- (a) is not a consultant physician in any specialty; and
- (b) is not a specialist in any specialty.

*set of pathology services* means a group of pathology services:

- (a) that consists of services that are described in at least 4 different items; and
- (b) all of which are requested in a single patient episode; and
- (c) each of which relates to a patient who is not an admitted patient of a hospital; and
- (d) excludes services referred to in an item in Group P10, Group P11, Group P12 or

Group P13, items 66900, 69484, 73053, 73055 and 73069; and

- (e) excludes services described in the following items:

65079, 65082, 65157, 65158, 65166, 65180, 65181, 66606, 66610, 66639, 66642, 66651, 66652, 66663, 66666, 66696, 66697, 66714, 66715, 66723, 66724, 66780, 66783, 66789, 66790, 66792, 66804, 66805, 66816, 66817, 66820, 66821, 66826, 66827, 66832, 66834, 66837, 69325, 69328, 69331, 69379, 69383, 69400, 69401, 69451, 69500, 69484, 69489, 69492, 69497, 69498, 71076, 71090, 71092, 71096, 71148, 71154, 71156, 71169, 71170, 73309, 73312, 73315, 73318, 73321 and 73324;

where those services are performed by an approved pathology practitioner in an accredited pathology laboratory of an approved pathology authority following referral by another approved pathology practitioner in an accredited pathology laboratory of an approved pathology authority which is not **related to** the first mentioned approved pathology authority.

(1A) An approved pathology authority is **related to** another approved pathology authority for the purposes of paragraph 18(1)(e) if that approved pathology authority would be related to the other approved pathology authority for the purposes of rule 16(2).

- (2) If a general practitioner requests a set of pathology services, the pathology services in the set are to be treated as individual pathology services in accordance with this rule.
- (3) If the fee specified in 1 item that describes any of the services in the set of pathology services is higher than the fees specified in the other items that describe the services in the set:

- (a) the pathology service described in the first-mentioned item is to be treated as 1 pathology service;

and

- (b) either:

- (i) the pathology service in the set that is described in the item that specifies the second-highest fee is to be treated as 1 pathology service; or

- (ii) if 2 or more items that describe any of those services specify the second-highest fee  $\zeta$ , the pathology service described in the item that specifies the second-highest fee, and has the lowest item number, is to be treated as 1 pathology service; and

- (c) the pathology services in the set, other than the services that are to be treated as 1 pathology service under paragraphs (a) and (b), are to be treated as 1 pathology service.

- (4) If the fees specified in 2 or more items that describe any of the services in the set of pathology services are the same, and higher than the fees specified in the other items that describe the services in the set:

- (a) the pathology service in the set that is described in the item that specifies the highest fee, and has the lowest item number, is to be treated as 1 pathology service; and

- (b) the pathology service in the set that is described in the item that specifies the highest fee, and has the second-lowest item number, is to be treated as 1 pathology service; and

(c) the pathology services in the set, other than the services that are to be treated as 1 pathology service under paragraphs (a) and (b), are to be treated as 1 pathology service.

- (5) If pathology services are to be treated as 1 pathology service under paragraph (3) (c) or (4) (c), the fee for the 1 pathology service is the highest fee specified in any of the items that describe the pathology services that are to be treated as the 1 pathology service.

### **Hepatitis C viral RNA testing**

- For item 69499 and 69500:

*Hepatitis C sero-positive*, for a patient, means 2 different assays of Hepatitis C antibodies are positive.

*serological status is uncertain*, for a patient, means any result where 2 different assays of Hepatitis C antibodies are inconclusive.

### **Haemochromatosis testing**

- For items 73317 and 73318:

*elevated serum ferritin* for a patient, means a level of ferritin above the normal reference range in respect of the particular method of assay used to determine the level.

### **Nutritional and toxicity metals testing**

- (1) For this rule:

*nutritional metals testing group* means items 66819, 66820, 66821 and 66822.

*metal toxicity testing group* means items 66825, 66826, 66827, 66828, 66831 and 66832.

- (2) An item in the nutritional metals testing group or the metal toxicity testing group does not apply in relation to a service performed if medicare benefits are paid or payable for tests that are performed for the same patient in 3 patient episodes requested within 6 months before the request for that service, under any of:

- (a) that item; or
- (b) the other item in the same group; or
- (c) an item in the other group.

### **Antineutrophil Cytoplasmic Antibody**

- A request for Antineutrophil Cytoplasmic Antibody immunofluorescence test (ANCA) shall be deemed to include requests for antineutrophil proteinase 3 antibody test (PR-3 ANCA) and antimyeloperoxidase antibody test (MPO ANCA) where the immunofluorescence test for ANCA is abnormal, or has been abnormal, or those specific antibodies have been previously detected.

### **Satisfying Requirements Described in Items**

- Unless stated elsewhere in these rules, where an item contains a requirement, this requirement is satisfied if:

- (a) The requirement/s as stipulated in the item descriptor are contained in the request form; or
- (b) The requirement/s as stipulated in the item descriptor were supplied previously in writing to the APA and this documentation is retained by the APA; or

(c) The results of other laboratory tests performed in the same episode meet the requirement/s as stipulated in the item descriptor; or

(d) The results of laboratory tests that meet the requirement/s as stipulated in the item descriptor are supplied on the request form; or

The results of laboratory tests that meet the requirement/s as stipulated in the item descriptor are contained in the APA's records.

#### **Limitation on certain items**

- (a) For any particular patient, items 66539, 66605, 66606, 66607, 66610, 69380, 69488, 69489, 71075, 71127, 71135 or 71137 is applicable not more than twice in a 12 month period.
  - (b) For any particular patient, item 66626 is applicable not more than 36 times in a 12 month period.
  - (c) For any particular patient, items 66655, 66659, 66838, 66841, 69482, 69491, 69499 or 69500 are applicable not more than once in a 12 month period.
  - (d) For any particular patient, item 66750 or 66751 is applicable not more than once in a pregnancy.
  - (e) For any particular patient, item 69336 is applicable not more than once in each period of 7 days.
  - (f) For any particular patient, items 66551, 66660, 69445, 69451, 69483, 71079 or 73523 are applicable not more than 4 times in a 12 month period.
  - (g) For any particular patient, items 66554, 66830 and 71077 are applicable not more than 6 times in a 12 month period.
  - (h) For any particular patient, item 66819, 66820, 66821, 66822, 66825, 66826, 66827 or 66828 is applicable not more than 3 times in a 6 month period.
  - (i) For any particular patient, items 73339 and 73340 are applicable not more than once.

#### **Antigen Detection - Group P3 (Microbiology)**

- If the service listed in 69316, 69317, 69319, 69494, 69495, 69496, 69497 or 69498 is a pathologist determinable service the specialist pathologist is required to record the reasons for determining the need for this service.
- If the service rendered in 71148, 73320 or 73321 is a pathologist determinable service, the specialist pathologist is required to record the reason for determining the need for this service including the result of the service in 71147.

#### **Second Opinion morphology, limitations on items 72858 and 72859**

**28.1** Items 72858 and 72859 apply:

- (a) only to a service that is covered by:
    - (i) item 65084 or 65087; or
    - (ii) item 72813, 72816, 72817, 72818, 72823, 72824, 72825, 72826, 72827, 72828, 72830, 72836 or 72838; or
    - (iii) an item in Group P6 (other than item 73070, 73071, 73072, 73073, 73074, 73075 or 73076);
- and

(b) only if the treating practitioner and the approved pathology practitioner who provided the original opinion on the patient specimen agree that a second opinion is reasonably necessary for diagnostic purposes.

**28.2** Items 72858 and 72859 do not apply if the accredited pathology laboratory in which the second opinion is provided is the same laboratory in which the original opinion was provided.

### **PN.6.2 Patient Episode Initiation Fees (PEIs)**

Items in Groups P10 of the Pathology Services Table are only applicable to services performed:

- (i) by or on behalf of an Approved Pathology Practitioner who is a recognised specialist pathologist; and
- (ii) in private practice.

Accordingly, these fees are not payable for pathology services rendered by an Approved Pathology Practitioner, being a specialist pathologist when requested for a privately referred out-patient of a recognised hospital.

The patient episode initiation fees (PEIs) will be applicable on an episodic basis i.e. a claim may be made for the provision of pathology services requested by a practitioner in respect of one individual on the same day. For example, if a practitioner orders three pathology tests for a person on the one day, Medicare benefits will be payable for each of those tests but only one PEI will be applicable.

This Rule applies even when the treating practitioner has requested pathology tests from two or more Approved Pathology Practitioners. Thus a PEI will only be paid for the first account submitted unless an exemption listed in Rule 4 or 14.(7) applies or an exemption has been granted under "S4B(3)".

Under Rule 14.(7) two PEIs are payable in relation to the same patient episode where a referring practitioner refers two different specimens to two different Approved Pathology Authorities in the following circumstances:

- a tissue pathology specimen and any other non-tissue pathology specimen; or
- a cytopathology specimen and any other non-cytopathology specimen.

Rule 14.(8) also provides that only one PEI will be paid for the collection of specimens from a patient on one day in or by a single Approved Pathology Authority.

The patient episode initiation benefits are two-tiered. Higher benefits are paid for the collection of specimens from patients who are not private inpatients or private outpatients of a recognised hospital where the specimens are tested in a private laboratory.

A lower and uniform PEI benefit is paid where patients are private patients associated with a recognised hospital and the specimens are tested in a private laboratory or where the testing is performed by a prescribed laboratory on specimen collected from a patient eligible to claim Medicare benefits.

### **PN.6.3 Patient Episode Initiation Fees for Certain Tissue Pathology and Screening Items**

Tissue Pathology items 72813, 72816, 72817, 72818, 72823, 72824, 72825, 72826, 72830 and 72836 and Cervical screening items 73070, 73071, 73072, 73073, 73074, 73075, 73076 will be subject to a different patient episode initiation fee structure - items 73922 to 73939 refer.

### **PN.6.4 Hospital, Government etc Laboratories**

The following laboratories have been prescribed for the purposes of payment of Medicare benefits as outlined in paragraphs PF.2 and PF.3:

- (i) laboratories operated by the Australian Government (these include health laboratories operated by the Australian Government Department of Health as well as the laboratories operated by other Departments, e.g. the Departments of Defence and Veterans' Affairs operate laboratories from which pathology services are provided);

- (ii) laboratories operated by a State Government or authority of a State (laboratories operated or associated with recognised hospitals are also included);
- (iii) laboratories operated by the Northern Territory and the Australian Capital Territory; and
- (iv) laboratories operated by Australian tertiary education institutions eg Universities.

### **PN.7.1 Assignment of Medicare Benefits - Patient Assignment**

In addition to the general arrangements relating to the assignment of benefits, as outlined at paragraph 7 of the "General Explanatory Notes" in Section 1 of this book, it should be noted that, where the treating practitioner requests pathology services but the patient does not physically attend the Approved Pathology Practitioner, the patient may complete an assignment voucher at the time of the visit to the requesting doctor offering to assign benefits for the Approved Pathology Practitioner's services.

If an Approved Pathology Practitioner refers some of the tests requested by the treating practitioner to another Approved Pathology Authority, he/she should provide the second Approved Pathology Authority with a photocopy of the patient's assignment voucher so that the second Approved Pathology Authority can also direct-bill Medicare.

### **PN.7.2 Approved Pathology Practitioner Eligibility**

If a practitioner requests an Approved Pathology Practitioner to perform a necessary pathology service, that Approved Pathology Practitioner must personally perform the service or have it performed on his/her behalf in order to be eligible to receive benefits by way of assignment. If, however, the first Approved Pathology Practitioner arranges for the service to be rendered by a second Approved Pathology Practitioner with the same Approved Pathology Authority, the second Approved Pathology Practitioner and not the first, is eligible to receive an assignment of the Medicare benefit for the service in question.

### **PN.7.3 Cystic fibrosis gene testing**

- (1) For any particular patient, item 73345, 73347, 73348 and 73349 is applicable not more than once in a lifetime.
- (2) For any particular patient, item 73346 and 73350 is applicable not more than once in a pregnancy.
- (3) The testing laboratory used to undertake tests for items 73345, 73346, 73347, 73348, 73349 and 73350 must use a cystic fibrosis transmembrane conductance regulator methodology appropriate to the clinical setting with:
  - (a) sufficient diagnostic range and sensitivity to detect at least 95% of pathogenic cystic fibrosis transmembrane conductance regulator variants likely to be present in the patient; and
  - (b) with at least 25 of the most frequently encountered cystic fibrosis transmembrane conductance regulator variants in the Australian population.

### **PN.8.1 Accredited Pathology Laboratories - Need for Accreditation**

A pathology service will not attract Medicare benefits unless that service is provided in a pathology laboratory which is accredited for that kind of service. Details of the administration of the pathology laboratory accreditation arrangements are set out below.

### **PN.8.2 Applying for Accreditation**

To become an Accredited Pathology Laboratory it is necessary to lodge a completed application form with the Manager, Pathology Section, the Department of Human Services, PO Box 1001, TUGGERANONG ACT 2901. The prescribed fees for Approved Pathology Laboratories are:

- \$2500 for Category GX labs
- \$2000 for Category GY labs

- \$1500 for Category B labs
- \$ 750 for Category M & S labs.

It is necessary for an application for inspection be made to the National Association of Testing Authorities (NATA) NATA is the independent body chosen to act on the Australian Government's behalf as the primary inspection agency. The Royal Australian College of General Practitioners (RACGP) has also been appointed to inspect laboratories in Category M (general practitioner) in Victoria only.

Details of laboratory categories and associated supervisory requirements can be found on the Department's internet site ([www.health.gov.au/pathology](http://www.health.gov.au/pathology)).

### **PN.8.3 Effective Period of Accreditation**

Accreditation takes effect from the date of approval by the Minister for Health and Ageing. The Minister has no power to backdate an approval. Transitional accreditation may be given pending full accreditation. An application and fee are required annually.

### **PN.8.4 Assessment of Applications for Accreditation**

The principles of accreditation for pathology laboratories as determined by the Minister are used to assess applications for accreditation. These principles also require pathology laboratories to address National Pathology Accreditation Advisory Council standards. Copies of the principles and standards are available from the Secretariat, National Pathology Accreditation Advisory Council (see PH.6) on (02) 6289 4017 or email [npaac@health.gov.au](mailto:npaac@health.gov.au).

### **PN.8.5 Refusal of Accreditation and Right of Review**

An applicant who has been notified of the intention to refuse accreditation may, within 28 days of being notified, provide further information to the Minister which may be taken into consideration prior to a final decision being made.

Applicants refused accreditation or any person affected by the decision have the right to appeal to the Administrative Appeals Tribunal.

### **PN.8.6 National Pathology Accreditation Advisory Council (NPAAC)**

NPAAC was established in 1979. Its functions are to develop policy for accreditation of pathology laboratories, introduce and maintain uniform standards of practice in pathology services throughout Australia and initiate and coordinate educational programs in relation to pathology practice. The agencies used to inspect laboratories on the Australian Government's behalf are required to conduct inspections using the standards set down by NPAAC. For further information the NPAAC Secretariat can be contacted on (02) 6289 4017 or email [npaac@health.gov.au](mailto:npaac@health.gov.au).

### **PN.8.7 Change of Address/Location**

Laboratories are accredited for the particular premises given on the application form. Where a laboratory is relocated to other premises, any previously issued approvals for that Accredited Pathology Laboratory lapse. Medicare benefits are not payable for any pathology services performed at the new location until a new application has been approved by the Minister for Health and Ageing. Paragraph PH.2 sets out the method for applying for accreditation.

### **PN.8.8 Change of Ownership of a Laboratory**

Part of the assessment of an application for an Accredited Pathology Laboratory relates to the Approved Pathology Authority status. Where the ownership, or some other material change occurs affecting the laboratory, the Minister for Health and Ageing must be provided with those changed details. Medicare benefits will not be payable for any pathology services performed on any premises other than those premises for which approval has been given.

### **PN.8.9 Approved Collection Centres (ACC)**

New arrangements for specimen collection centres commenced on 1 December 2001 and replaced the Licensed Collection Centre (LCC) Scheme.

To enable the payment of Medicare benefits for pathology services performed on pathology specimens collected in a collection centre, the centre must first be approved. The exception to this rule is collection centres on the premises of recognised hospitals (recognised hospital in this context means the same as "recognized hospital" in Part 1 Section 3 of the Health Insurance Act 1973) as they do not need approval.

In order for a collection centre to be approved, a public or private Approved Pathology Authority must submit a completed application form to the Department of Human Services including details of the type of application (renewal, new or cancellation of collection centre), the location of the premises, the owner, and any leasing arrangements.

Application forms can be accessed by going to the [Department of Human Services website](#). Completed application forms and any enquiries should be forwarded to Pathology Registration, PO Box 9822 MELBOURNE VIC 3001.

### **PN.9.1 Approved Pathology Practitioners**

#### **Introduction**

A pathology service will not attract Medicare benefits unless that service is provided by or on behalf of an Approved Pathology Practitioner. (Approved Pathology Practitioners must be registered medical practitioners.) Set out below is information which relates to Approved Pathology Practitioner requirements.

### **PN.9.2 Applying for Acceptance of the Approved Pathology Practitioner Undertaking**

To apply for acceptance of an Approved Pathology Practitioner Undertaking, it is necessary to send:

- (i) a completed application for acceptance of an Approved Pathology Practitioner Undertaking; and
- (ii) a signed Approved Pathology Practitioner Undertaking to the Pathology Registration, the Department of Human Services,

PO Box 9822, Melbourne Victoria 3001.

An application form, undertaking and associated literature can be obtained from the Pathology Registration Coordinator.

#### **Payment of Acceptance Fee**

On receipt of advice that the Minister has accepted an undertaking, a cheque for \$500 should be sent to the Pathology Registration Coordinator. Applicants are required to pay this fee within 14 days of the notice being given. As there is no discretion under the *Health Insurance Act 1973* to accept late payments, failure to pay the fee within the required time means that:

- (i) acceptance of the undertaking will be revoked;
- (ii) a new application must be completed;
- (iii) acceptance of the new undertaking cannot be backdated; and
- (iv) there will therefore be a period during which Medicare benefits cannot be paid.

### **PN.9.3 Undertakings**

#### Consideration of Undertakings

The Minister is unable to accept an undertaking from a person in respect of whom there is a determination in force that the person has breached the undertaking, or from a person who, if the undertaking were accepted, would be likely to carry on the business of a prescribed person or would enable a person to avoid the financial consequences of the disqualification (or likely disqualification) of that prescribed person. A 'prescribed person' includes, amongst other things, fully or partially disqualified persons (or persons likely to be so disqualified).

Similarly an undertaking cannot be accepted unless the Minister is satisfied that the person giving such undertaking is a fit and proper person to be an Approved Pathology Practitioner.

When an undertaking has been given, the Minister may require the person giving the undertaking to provide additional information within a fixed period of time and if the person does not comply the Minister may refuse to accept the undertaking.

#### Refusal of Undertaking and Rights of Review

Where the Minister refuses to accept an undertaking, for any of the reasons shown above, the Minister must notify the person of the decision. The notification must include advice of a right of internal review of the decision and a right of further appeal to the Administrative Appeals Tribunal if the internal review upholds the original decision to refuse the undertaking.

#### Effective Period of Undertaking

The following applies:

- (i) **Date of Effect** the earliest day from which the Minister or delegate can accept an undertaking is the day of the decision in respect of the undertaking. The day the undertaking is signed is to be the day it is actually signed and must not be backdated;
- (ii) **Period of Effect** in determining the period of effect of the undertaking the Minister shall, unless the Minister considers that special circumstances exist, determine that the period of effect shall be twelve months from the day on which the undertaking comes into force. There is a requirement for the Minister to notify persons giving undertakings of the period of time for which the undertaking is to have effect, and the notice is to advise persons whose interests are affected by the decision of their rights of appeal to the Administrative Appeals Tribunal against the Minister's decision;
- (iii) **Renewals** when an undertaking is given and accepted by the Minister while a former undertaking is current, the new undertaking does not take effect until the former undertaking ceases to be in force. When an undertaking is given while a former undertaking is current and the date on which the former undertaking is to expire passes without the Minister giving notice to accept or reject the new undertaking, the former undertaking remains in force until the Minister gives such notification. This provision does not apply when the renewal application is not received by the Department of Human Services until after the expiry of the existing undertaking. Under these circumstances there will be a period during which Medicare benefits cannot be paid unless the new application can be backdated to the expiry of the previous undertaking. This is a limited discretion for periods up to one month and special conditions apply; and
- (iv) **Cessation of Undertaking** the undertaking ceases to be in force if it is terminated, if the Minister revokes acceptance of the undertaking, or if the period of effect for the undertaking expires whichever event first occurs.

An Approved Pathology Practitioner may terminate an undertaking at any time providing that the practitioner gives at least 30 days notice of his/her intention to do so.

### **PN.9.4 Obligations and Responsibilities of Approved Pathology Practitioners**

The requirements of the legislation and the undertaking impose a number of obligations and responsibilities on Approved Pathology Practitioners and the Minister. The more complex of these not already dealt with are

considered in PK, PL and PM dealing with Breaches of Undertakings, Excessive Pathology Services and Personal Supervision.

### **PN.10.1 Approved Pathology Authorities**

#### **Introduction**

A pathology service will not attract Medicare benefits unless the proprietor of the laboratory in which the pathology service is performed is an Approved Pathology Authority. Following is information which relates to Approved Pathology Authority requirements.

### **PN.10.2 Applying for Acceptance of an Approved Pathology Authority Undertaking**

To apply for acceptance of an Approved Pathology Authority Undertaking, it is necessary to send:

- (i) a completed application for acceptance of an Approved Pathology Authority Undertaking; and
- (ii) a signed Approved Pathology Authority Undertaking to the Pathology Registration, the Department of Human Services,

PO Box 9822, Melbourne Victoria 3001.

An application form, undertaking and associated literature can be obtained from the Pathology Registration Coordinator.

#### **Payment of Acceptance Fee**

On receipt of advice that the Minister has accepted an undertaking, a cheque for \$1,500 should be sent to the Pathology Registration Coordinator. Applicants are required to pay this fee within 14 days of the notice being given. As there is no discretion under the *Health Insurance Act 1973* to accept late payments, failure to pay the fee within the required time means that:

- (i) acceptance of the undertaking will be revoked;
- (ii) a new application must be completed;
- (iii) acceptance of the new undertaking cannot be backdated; and
- (iv) there will therefore be a period during which Medicare benefits cannot be paid.

### **PN.10.3 Undertakings**

#### **Consideration of Undertakings**

The Minister is unable to accept undertakings from a person in respect of whom there is a determination in force that the person has breached the undertaking, or from a person who, if the undertaking were accepted, would be likely to carry on the business of a prescribed person or would enable a person to avoid the financial consequences of the disqualification (or likely disqualification) of that prescribed person. A 'prescribed person' includes, inter alia, fully or partially disqualified persons (or persons likely to be so disqualified).

Similarly an undertaking cannot be accepted unless the Minister is satisfied that the person giving such undertaking is a fit and proper person to be an Approved Pathology Authority.

When an undertaking has been given the Minister may require the person giving the undertaking to provide additional information within a specified period of time and if the person does not comply the Minister may refuse to accept the undertaking.

#### **Refusal of Undertaking and Rights of Review**

Where the Minister refuses to accept an undertaking, the Minister must notify the person of the decision. The notification must include advice of a right of internal review of the decision and a right of further appeal to the Administrative Appeals Tribunal if the internal review upholds the original decision to refuse the undertaking.

#### Effective Period of Undertaking

The following applies:

- (i) **Date of Effect** the earliest day from which the Minister or delegate can accept an undertaking is the day of the decision in respect of the undertaking. The day the undertaking is signed is to be the day it is actually signed and must not be backdated;
- (ii) **Period of Effect** in determining the period of effect of the undertaking the Minister shall, unless the Minister considers that special circumstances exist, determine that the period of effect shall be twelve months from the day on which the undertaking comes into force. There is a requirement for the Minister to notify persons giving an undertaking of the period of time for which the undertaking is to have effect, and the notice is to advise persons whose interests are affected by the decision of their rights of appeal to the Administrative Appeals Tribunal against the Minister's decision;
- (iii) **Renewals** when an undertaking is given and accepted by the Minister while a former undertaking is current, the new undertaking does not take effect until the former undertaking ceases to be in force. When an undertaking is given while a former undertaking is current and the date on which the former undertaking is to expire passes without the Minister giving notice to accept or reject the new undertaking, the former undertaking remains in force until the Minister gives such notification. This provision does not apply when the renewal application is not received by the Department of Human Services until after the expiry of the existing undertaking. Under these circumstances there will be a period during which Medicare benefits cannot be paid unless the new application can be backdated to the expiry of the previous undertaking. This is a limited discretion for periods up to one month and special conditions apply; and
- (iv) **Cessation of Undertaking** the undertaking ceases to be in force if it is terminated, if the Minister revokes acceptance of the undertaking, or if the period of effect for the undertaking expires whichever event first occurs.

An Approved Pathology Authority may terminate an undertaking at any time providing that at least 30 days notice of the intention to terminate the undertaking is given.

### **PN.10.4 Obligations and Responsibilities of Approved Pathology Authorities**

The requirements of the legislation and the undertaking impose a number of obligations and responsibilities on Approved Pathology Authorities and the Minister. The more complex of these which have not already been covered are considered in paragraphs PK and PL dealing with Breaches of Undertakings and Excessive Pathology Services.

#### **PN.11.1 Breaches of Undertakings**

##### **Notice Required**

Where the Minister has reasonable grounds for believing that an Approved Pathology Practitioner or an Approved Pathology Authority has breached the undertaking, the Minister is required to give notice in writing to the person explaining the grounds for that belief and inviting the person to put a submission to the Minister to show cause why no further action should be taken in the matter.

#### **PN.11.2 Decisions by Minister**

Where a person provides a submission, the Minister may decide to take no further action against the person. Alternatively the Minister may refer the matter to a Medicare Participation Review Committee, notifying the grounds for believing that the undertaking has been breached. If after 28 days no submission has been received from the person, the Minister must refer that matter to the Committee.

### **PN.11.3 Appeals**

The Minister is empowered to suspend an undertaking where notice has been given to a Medicare Participation Review Committee of its possible breach, pending the outcome of the Committee's proceedings. The Minister must give notice in writing to the person who provided the undertaking of the determination to suspend it, and the notice shall inform the person of a right of appeal against the determination to the Administrative Appeals Tribunal. The Minister may also publish a notice of a determination in the Public Service Gazette. Rights of appeal to the Administrative Appeals Tribunal also exist in respect of any determination made by a Medicare Participation Review Committee.

### **PN.12.1 Initiation of Excessive Pathology Services Notice Required**

Where the Minister has reasonable grounds for believing that a person, of a specified class of persons, has initiated, or caused or permitted the initiation of excessive pathology services the Minister is required to give notice in writing to the person explaining the grounds for the belief and inviting the person to put a submission to the Minister to show cause why no further action should be taken in the matter.

### **PN.12.2 Classes of Persons**

The classes of persons are:

- (i) the practitioner who initiated the services;
- (ii) the employer of the practitioner who caused or permitted the practitioner to initiate the services; or
- (iii) an officer of the body corporate employing the practitioner who caused or permitted the practitioner to initiate the services.

### **PN.12.3 Decisions by Minister for Health and Ageing**

Where a person provides a submission, the Minister may decide to take no further action against the person. Alternatively, the Minister may refer the matter to a Professional Services Review (PSR) Committee, notifying the grounds for believing that excessive pathology services have been initiated. If after 28 days no submission has been received from the person, the Minister must refer the matter to the Committee. The Minister must give to the person notice in writing of the decision.

### **PN.12.4 Appeals**

Unlike the procedures relating to breaches of undertaking there is no power given to the Minister to determine a penalty. The Minister's role is either deciding to take no further action or referring the matter to a PSR Committee. Accordingly, there are no rights of appeal to the Administrative Appeals Tribunal applicable to the above procedures. However, rights of appeal to the Administrative Appeals Tribunal exist in respect of any determination made by a Medicare Participation Review Committee.

### **PN.13.1 Personal Supervision Introduction**

The *Health Insurance Act 1973* provides that the form of undertaking to be given by an Approved Pathology Practitioner may make provision for pathology services carried out under the personal supervision of the Approved Pathology Practitioner.

### **PN.13.2 Extract from Undertaking**

The following is an extract from the Approved Pathology Practitioner (APP) undertaking:

Part 2 - Personal supervision

2.1 I acknowledge that it is my obligation, subject to Parts 2.2 and 2.4, personally to supervise any person who renders any service on my behalf and I undertake to accept personal responsibility for the rendering of that service under the following conditions of personal supervision:

(i) Subject to the following conditions, I will usually be physically available in the laboratory while services are being provided at the laboratory;

(ii) I may, subject to paragraph (vi) below, be physically absent from the laboratory while services are being rendered outside its normal hours of operation but in that event I will leave with the person rendering the service particulars of the manner in which I may be contacted while the service is being rendered and I must be able to personally attend at the laboratory while the service is being rendered or formally designate another APP present while I am absent;

(iii) I may, subject to paragraph (vi) below, be absent from the laboratory for brief periods due to illness or other personal necessity, or to take part in activities which, in accordance with normal and accepted practice, relate to the provision of services by that laboratory;

(iv) I will personally keep a written log of my absences from the laboratory that extend beyond one workday in respect of that laboratory and will retain that log in the laboratory for 18 months from date of last entry;

(v) If I am to be absent from the laboratory for more than 7 consecutive workdays, I will arrange for another APP to personally supervise the rendering of services in the laboratory. That arrangement shall be recorded in writing and retained in the laboratory for 18 months from date of last entry. Until such person is appointed, and his or her appointment is recorded in writing, I will remain personally responsible to comply with this undertaking;

(vi) If a service is being rendered on my behalf by a person who is not:

(a) a medical practitioner;

(b) a scientist; or

(c) a person having special qualifications or skills relevant to the service being rendered;

and no person in the above groups is physically present in the laboratory, then I must be physically present in the laboratory and closely supervise the rendering of the service;

(vii) I accept responsibility for taking all reasonable steps to ensure that in regard to services rendered by me or on my behalf:

(a) all persons who render services are adequately trained;

(b) all services which are to be rendered in the laboratory are allocated to persons employed by the APA and, these persons shall have appropriate qualifications and experience to render the services;

(c) the methods and procedures in operation in the laboratory for the purpose of rendering services are in accordance with proper and correct practices;

(d) for services rendered, proper quality control methods are established and reviewed to ensure their reliability and effectiveness; and

(e) results of services and tests rendered are accurately recorded and sent to the treating practitioner and, where applicable, a referring practitioner;

(viii) If I perform, or there is performed on my behalf, a service which consists of the analysis of a specimen which I know, or have reason to believe, has been taken other than in accordance with the provisions of section 16A(5AA) of the Act I will endorse, or cause to be endorsed, on the assignment form or the account for that service, as the case may be, particulars of the circumstances in which I believe, or have reason to believe, the specimen was taken.

2.2 Where services are to be rendered on my behalf in a Category B laboratory as defined in the Health Insurance (Accredited Pathology Laboratories - Approval) Principles 2002, I undertake to take all reasonable measures to ensure that the service is rendered under the supervision of an appropriate person as required by those Principles as in force from time to time.

2.3 I acknowledge to the best of my ability that any act or omission by a person, when acting with my authority, whether express or implied, that would, had it been done by me, have resulted in a breach of this undertaking, constitutes a breach of this undertaking by me.

2.4 Parts 2.1(i) to 2.1(vi) and 2.2 of this undertaking do not apply where a laboratory is limited to services (and associated equipment for those services) as detailed in Schedule 3.

### **PN.13.3 Notes on the Above**

Part 2 of the APP Undertaking outlines the requirements for the personal supervision by an Approved Pathology Practitioner where a pathology service is rendered by another person on behalf of the APP. It should be noted that "on behalf of" does not relieve an Approved Pathology Practitioner of professional responsibility for the service or from being personally involved in the supervision of services in the laboratory.

### **PR.5.1 Limitation of item 72860**

Item 72860 does not apply if the service is performed in the accredited pathology laboratory in which the subsequent test(s) is performed.

If the subsequent test(s) is performed in a separate accredited pathology laboratory to where the service to which item 72860 is performed, item 72860 does not apply if the proprietors of the accredited pathology laboratories are:

- the same approved pathology authority; or
- a related approved pathology authority.

Item 72860 does not apply if the service is performed in association with:

- a service to which item 72858 or 72859 of the pathology services table applies; or
- a service to which an item in Groups P6, P10 or P11 of the pathology services table applies, as part of the subsequent patient episode.

For any particular patient, item 72860 is applicable for a maximum of one retrieval per subsequent patient episode.

An approved pathology authority is related to another approved pathology authority for the purposes of subsection 7(2) if:

(a) both approved pathology authorities are employed (including employed under contract) by the same person, whether or not the person is also an approved pathology authority; or

(b) either of the approved pathology authorities is employed (including employed under contract) by the other; or

(c) both approved pathology authorities are corporations and are connected entities within the meaning of the Corporations Act 2001; or

(d) the approved pathology authorities are partners (whether or not either or both of the approved pathology authorities are individuals and whether or not other persons are in partnership with either or both of the approved pathology authorities); or

(e) both approved pathology authorities are operated by the Commonwealth or an authority of the Commonwealth; or

(f) both approved pathology authorities are operated by the same State or internal Territory or an authority of the same State or internal Territory.

### **PR.6.1 Episode Cone**

The episode cone is an arrangement, described in Rule 18, which effectively places an upper limit on the number of items for which Medicare benefits are payable in a patient episode. This cone only applies to services requested by general practitioners for their non-hospitalised patients. Pathology services requested for hospital in-patients, or ordered by specialists, are not subject to these coning arrangements.

When more than 3 items are requested by a general practitioner in a patient episode, the benefits payable will be equivalent to the sum of the benefits for the three items with the highest Schedule fees. Rule 18 provides that for the two items with the highest Schedule fees, Medicare benefits will be payable for each item. The remaining items are regarded as one service for which the benefit payable will be equivalent to that for the item with the third highest Schedule fee. Where items have the same Schedule fee, their item numbers are used as an artificial means to rank them.

The episode cone will apply even when the pathology services in a patient episode are performed by 2 or more Approved Pathology Authorities, with the exception of the services listed below.

The following items are not included in the count of the items performed when applying the episode cone:

- (i) all the items in Groups P10, P11, P12 and P13;
- (ii) Cervical Screening (items 73070, 73071, 73072, 73073, 73074, 73075, 73076);
- (iii) all the items detailed at Rule 18 (e) (items 65079, 65082, 65157, 65158, 65166, 65180, 65181, 66606, 66609, 66639, 66642, 66651, 66652, 66663, 66666, 66696, 66697, 66714, 66715, 66723, 66724, 66780, 66783, 66789, 66790, 66792, 66804, 66805, 66816, 66817, 66820, 66821, 66826, 66827, 69325, 69328, 69331, 69379, 69383, 69400, 69401, 69451, 69500, 69489, 69492, 69497, 69498, 71076, 71090, 71092, 71096, 71148, 71154, 71156, 71169, 71170, 73309, 73312, 73315, 73318);
- (iv) supplementary test for Hepatitis B and Hepatitis C (item 69484); and
- (v) the carbon-labelled urea breath test to confirm or monitor *Helicobacter pylori* (item 66900).

### **PR.9.1 Quality Assurance in Aboriginal Medical Services (QAAMS) Program items**

Item numbers 73839, 73840 and 73844 can only be performed in the following circumstances:

- a) the service is rendered by or on behalf of a medical practitioner;
- b) the practitioner referred to in paragraph (a), or the organisation for which the practitioner works, is participating in the Quality Assurance in Aboriginal Medical Services Program; and
- c) the service is provided in accordance with that Program; and
- d) the practitioner referred to in paragraph (a) has determined the service to be necessary for his or her patient.

## COMPLEXITY LEVELS FOR HISTOPATHOLOGY ITEMS

| Specimen Type  | Complexity level |
|--|------------------|
| Adrenal resection, neoplasm  | 5                |
| Adrenal resection, not neoplasm  | 4                |
| Anus, all specimens not otherwise specified  | 3                |
| Anus, neoplasm, biopsy   | 4                |
| Anus, neoplasm, radical resection  | 6                |
| Anus, submucosal resection – neoplasm  | 5                |
| Appendix   | 3                |
| Artery, all specimens not otherwise specified  | 3                |
| Artery, biopsy   | 4                |
| Bartholin's gland - cyst   | 3                |
| Bile duct, resection - all specimens   | 6                |
| Bone, biopsy, curettings or fragments - lesion   | 5                |
| Bone, biopsy or curettings quantitation - metabolic disease  | 6                |
| Bone, femoral head   | 4                |
| Bone, resection, neoplasm - all sites and types  | 6                |
| Bone marrow, biopsy  | 4                |
| Bone - all specimens not otherwise specified   | 4                |
| Brain neoplasm, resection - cerebello-pontine angle  | 4                |
| Brain or meninges, biopsy - all lesions  | 5                |
| Brain or meninges, not neoplasm - temporal lobe  | 6                |
| Brain or meninges, resection - neoplasm (intracranial)   | 5                |
| Brain or meninges, resection - not neoplasm  | 4                |
| Branchial cleft, cyst  | 4                |
| Breast, excision biopsy, guidewire localisation - non-palpable lesion  | 6                |
| Breast, excision biopsy, or radical resection, malignant neoplasm or atypical proliferative disease - all specimen types | 6                |
| Breast, incision biopsy or needle biopsy, malignant neoplasm - all specimen types  | 4                |
| Breast – microdochoectomy  | 6                |
| Breast, orientated wide local excision for carcinoma, with margin assessment   | 7                |
| Breast tissue - all specimens not otherwise specified  | 4                |
| Bronchus, biopsy   | 4                |
| Carotid body - neoplasm  | 5                |
| Cholesteatoma  | 3                |
| Digits, amputation - not traumatic   | 4                |
| Digits, amputation - traumatic   | 2                |
| Ear, middle and inner - not cholesteatoma  | 4                |
| Endocrine neoplasm - not otherwise specified   | 5                |
| Extremity, amputation or disarticulation – neoplasm  | 6                |

| <b>Specimen Type</b>  | <b>Complexity level</b> |
|---|-------------------------|
| Extremity, amputation - not otherwise specified   | 4                       |
| Eye, conjunctiva - biopsy or pterygium  | 3                       |
| Eye, cornea   | 4                       |
| Eye, enucleation or exenteration - all lesions  | 6                       |
| Eye - not otherwise specified   | 4                       |
| Fallopian tube, biopsy  | 4                       |
| Fallopian tube, ectopic pregnancy   | 4                       |
| Fallopian tube, sterilization   | 2                       |
| Fetus with dissection   | 6                       |
| Foreskin - new born   | 2                       |
| Foreskin - not new born   | 3                       |
| Gallbladder   | 3                       |
| Gallbladder and porta hepatis-radical resection   | 6                       |
| Ganglion cyst, all sites  | 3                       |
| Gum or oral mucosa, biopsy  | 4                       |
| Heart valve   | 4                       |
| Heart - not otherwise specified   | 5                       |
| Hernia sac  | 2                       |
| Hydrocele sac   | 2                       |
| Jaw, upper or lower, including bone, radical resection for neoplasm                             | 6                       |
| Joint and periarticular tissue, without bone - all specimens                                    | 3                       |
| Joint tissue, including bone - all specimens  | 4                       |
| Kidney, biopsy including transplant   | 5                       |
| Kidney, nephrectomy transplant  | 5                       |
| Kidney, partial or total nephrectomy or nephroureterectomy - neoplasm                           | 6                       |
| Kidney, partial or total nephrectomy - not neoplasm   | 4                       |
| Large bowel (including rectum), biopsy - all sites  | 4                       |
| Large bowel, colostomy - stoma  | 3                       |
| Large bowel (including rectum), biopsy, for confirmation or exclusion of Hirschsprung's Disease | 5                       |
| Large bowel (including rectum), polyp   | 4                       |
| Large bowel, segmental resection - colon, not neoplasm  | 5                       |
| Large bowel (including rectum), segmental resection, neoplasm                                   | 6                       |
| Large bowel (including rectum), submucosal resection – neoplasm                                 | 5                       |
| Larynx, biopsy  | 4                       |
| Larynx, partial or total resection  | 5                       |
| Larynx, resection with nodes or pharynx or both   | 6                       |
| Lip, biopsy - all specimens not otherwise specified   | 3                       |
| Lip, wedge resection or local excision with orientation   | 4                       |
| Liver, hydatid cyst or resection for trauma   | 4                       |
| Liver, total or subtotal hepatectomy - neoplasm   | 6                       |
| Liver - all specimens not otherwise specified   | 5                       |

| <b>Specimen Type</b>  | <b>Complexity level</b> |
|---|-------------------------|
| Lung, needle or transbronchial biopsy                               | 4                       |
| Lung, resection - neoplasm  | 6                       |
| Lung, wedge biopsy  | 5                       |
| Lung segment, lobar or total resection                              | 6                       |
| Lymph node, biopsy - all sites                                      | 4                       |
| Lymph node, biopsy – for lymphoma or lymphoproliferative disorder   | 5                       |
| Lymph nodes, regional resection - all sites                         | 5                       |
| Mediastinum mass  | 5                       |
| Muscle, biopsy  | 6                       |
| Nasopharynx or oropharynx, biopsy                                   | 4                       |
| Nerve, biopsy neuropathy  | 5                       |
| Nerve, neurectomy or removal of neoplasm                            | 4                       |
| Nerve - not otherwise specified                                     | 3                       |
| Nose, mucosal biopsy  | 4                       |
| Nose or sinuses, polyps   | 3                       |
| Odontogenic neoplasm  | 5                       |
| Odontogenic or dental cyst  | 4                       |
| Oesophagus, biopsy  | 4                       |
| Oesophagus, diverticulum  | 3                       |
| Oesophagus, partial or total resection                              | 6                       |
| Oesophagus, submucosal resection – neoplasm                         | 5                       |
| Omentum, biopsy   | 4                       |
| Ovary with or without tube - neoplasm                               | 5                       |
| Ovary with or without tube - not neoplasm                           | 4                       |
| Pancreas, biopsy  | 5                       |
| Pancreas, cyst  | 4                       |
| Pancreas, subtotal or total with or without splenectomy             | 6                       |
| Parathyroid gland(s)  | 4                       |
| Penisectomy with node dissection                                    | 5                       |
| Penisectomy - simple  | 4                       |
| Peritoneum, biopsy  | 4                       |
| Pituitary neoplasm  | 4                       |
| Placenta - not third trimester                                      | 4                       |
| Placenta - third trimester, abnormal pregnancy or delivery          | 4                       |
| Pleura or pericardium, biopsy or tissue                             | 4                       |
| Products of conception, spontaneous or missed abortion              | 4                       |
| Products of conception, termination of pregnancy                    | 3                       |
| Prostate, radical prostatectomy or cystoprostatectomy for carcinoma | 7                       |
| Prostate, radical resection   | 6                       |
| Prostate - all types of specimen not otherwise specified            | 4                       |
| Retroperitoneum, neoplasm   | 5                       |
| Salivary gland, Mucocele  | 3                       |
| Salivary gland, neoplasm - all sites                                | 5                       |

| <b>Specimen Type</b>   | <b>Complexity level</b> |
|--|-------------------------|
| Salivary gland - all specimens not otherwise specified   | 4                       |
| Sinus, paranasal, biopsy   | 4                       |
| Sinus, paranasal, resection - neoplasm   | 6                       |
| Skin, biopsy - blistering skin diseases  | 4                       |
| Skin biopsy - for investigation of alopecia other than for male pattern baldness, where serial horizontal sections are taken | 5                       |
| Skin, biopsy - for investigation of lymphoproliferative disorder   | 5                       |
| Skin, biopsy - inflammatory dermatosis   | 4                       |
| Skin, eyelid, wedge resection  | 4                       |
| Skin, local resection - orientation  | 4                       |
| Skin, resection of malignant melanoma or melanoma in-situ  | 5                       |
| Skin - all specimens not otherwise specified including all neoplasms and cysts   | 3                       |
| Small bowel - biopsy, all sites  | 4                       |
| Small bowel, diverticulum  | 3                       |
| Small bowel, resection - neoplasm  | 6                       |
| Small bowel – resection, all specimens   | 5                       |
| Small bowel, submucosal resection – neoplasm   | 5                       |
| Soft tissue, infiltrative lesion, extensive resections at least 5cm in maximal dimension                                     | 6                       |
| Soft tissue, lipoma and variants   | 3                       |
| Soft tissue, neoplasm, not lipoma - all specimens  | 5                       |
| Soft tissue - not otherwise specified  | 4                       |

| Stomach, endoscopic biopsy or endoscopic polypectomy   | 4                       |
| Stomach, resection, neoplasm - all specimens   | 6                       |
| Stomach, submucosal resection – neoplasm   | 5                       |
| Stomach - all specimens not otherwise specified  | 4                       |
| Tendon or tendon sheath, giant cell neoplasm   | 4                       |
| Tendon or tendon sheath - not otherwise specified  | 3                       |
| Testis, biopsy   | 5                       |
| Testis and adjacent structures, castration   | 2                       |
| Testis and adjacent structures, neoplasm with or without nodes   | 5                       |
| Testis and adjacent structures, vas deferens sterilization   | 2                       |
| Testis and adjacent structures - not otherwise specified   | 3                       |
| Thymus - not otherwise specified   | 5                       |
| Thyroglossal duct - all lesions  | 4                       |
| Thyroid - all specimens  | 5                       |
| Tissue or organ not otherwise specified, abscess   | 3                       |
| Tissue or organ not otherwise specified, haematoma   | 3                       |
| Tissue or organ not otherwise specified, malignant neoplasm with regional nodes  | 6                       |
| Tissue or organ not otherwise specified, neoplasm local  | 4                       |

| <b>Specimen Type</b>   | <b>Complexity level</b> |
|--|-------------------------|
| Tissue or organ not otherwise specified, pilonidal cyst or sinus                               | 3                       |
| Tissue or organ not otherwise specified, thrombus or embolus                                   | 3                       |
| Tissue or organ not otherwise specified, veins varicosity                                      | 3                       |
| Tissue or organ - all specimens not otherwise specified  | 3                       |
| Tongue, biopsy   | 4                       |
| Tongue or tonsil, neoplasm local   | 5                       |
| Tongue or tonsil, neoplasm with nodes  | 6                       |
| Tonsil, biopsy - excluding resection of whole organ  | 4                       |
| Tonsil or adenoids or both   | 2                       |
| Trachea, biopsy  | 4                       |
| reter, biopsy  | 4                       |
| Ureter, resection  | 5                       |
| Urethra, biopsy  | 4                       |
| Urethra, resection   | 5                       |
| Urinary bladder, partial or total with or without prostatectomy                                | 6                       |
| Urinary bladder, transurethral resection of neoplasm   | 5                       |
| Urinary bladder - all specimens not otherwise specified  | 4                       |
| Uterus, cervix, curettings or biopsy   | 4                       |
| Uterus, cervix cone, biopsy (including LLETZ or LEEP biopsy)                                   | 5                       |
| Uterus, endocervix, polyp  | 3                       |
| Uterus, endometrium, polyp   | 3                       |
| Uterus with or without adnexa, malignant neoplasm - all specimen types not otherwise specified | 6                       |
| Uterus with or without adnexa, neoplasm, Wertheim's or pelvic clearance                        | 6                       |
| Uterus and/or cervix - all specimens not otherwise specified                                   | 4                       |
| Vagina, biopsy   | 4                       |
| Vagina, radical resection  | 6                       |
| Vaginal mucosa, incidental   | 3                       |
| Vulva or labia, biopsy   | 4                       |
| Vulval, subtotal or total with or without nodes  | 6                       |

# **CATEGORY 7: CLEFT LIP AND CLEFT PALATE SERVICES**

## SUMMARY OF CHANGES FROM 14/09/2019

The 14/09/2019 changes to the MBS are summarised below and are identified in the Schedule pages by one or more of the following words appearing above the item number:

- |                         |       |
|-------------------------|-------|
| (a) new item            | New   |
| (b) amended description | Amend |
| (c) fee amended         | Fee   |
| (d) item number changed | Renum |
| (e) EMSN changed        | EMSN  |

There are no changes to this Category for 14/09/2019.

## **CLEFT LIP AND CLEFT PALATE SERVICES NOTES**

### **CN.0.1 Schedule Fees and Medicare Benefits**

Medicare benefits are based on fees determined for each Schedule service. The fee is referred to in these notes as the "Schedule fee". The fee for any item listed in the Schedule is that which is regarded as being reasonable on average for that service having regard to usual and reasonable variations in the time involved in performing the service on different occasions and to reasonable ranges of complexity and technical difficulty encountered.

The Schedule fee and Medicare benefit levels for the medical services contained in the Schedule are located with the item descriptions. Where appropriate, the calculated benefit has been rounded to the nearest higher 5 cents. However, in no circumstances will the Medicare benefit payable exceed the fee actually charged.

There are presently two levels of Medicare benefit payable for cleft lip and cleft palate services:

(a) **75% of the Schedule fee:**

for professional services rendered to a patient as part of an episode of hospital treatment (other than public patients). Medical practitioners must indicate on their accounts if a medical service is rendered in these circumstances by placing an asterisk '\*' or the letter 'H' directly after an item number where used; or a description of the professional service and an indication the service was rendered as an episode of hospital treatment (for example, 'in hospital', 'admitted' or 'in patient');

for professional services rendered as part of an episode of hospital-substitute treatment, and the patient who receives the treatment chooses to receive a benefit from a private health insurer. Medical practitioners must indicate on their accounts if a medical service is rendered in these circumstances by placing the words 'hospital-substitute treatment' directly after an item number where used; or a description of the professional service, preceded by the words 'hospital-substitute treatment'.

(b) **85% of the Schedule fee**, or the Schedule fee less \$83.40 (indexed annually), whichever is the greater, for all other professional services.

It should be noted that the Health Insurance Act makes provision for private medical insurance to cover the "patient gap" (ie, the difference between the Medicare benefit and the Schedule fee) for services attracting benefit at the 75% level. Patients may insure with private health insurance organisations for the gap between the 75% Medicare benefit and the Schedule fee or for amounts in excess of the Schedule fee where the patient has an agreement with their health fund.

### **CN.0.2 Where Medicare Benefits are not Payable**

Medicare benefits are not payable in respect of a professional service where the medical expenses for the service:-

- (a) are paid/payable to a public hospital;
- (b) are for a compensable injury or illness for which the patient's insurer or compensation agency has accepted liability. (Please note that if the medical expenses relate to a compensable injury/illness for which the insurer/compensation agency is disputing liability, then Medicare benefits are payable until the liability is accepted);
- (c) are for a medical examination for the purposes of life insurance, superannuation, a provident account scheme, or admission to membership of a friendly society; or
- (d) are incurred in mass immunisation.

Unless the Minister otherwise directs, Medicare benefits are not payable where:

- (a) the service is rendered by or on behalf of, or under an arrangement with the Australian Government, a State or Territory, a local government body or an authority established under Commonwealth, State or Territory law;
- (b) the medical expenses are incurred by the employer of the person to whom the service is rendered;

- (c) the person to whom the service is rendered is employed in an industrial undertaking and that service is rendered for the purposes related to the operation of the undertaking; or
- (d) the services is a health screening service.

Benefits are not payable for items 75150 to 75621 unless the patient was referred by letter of Referral by an eligible orthodontist.

### **CN.0.3 Limiting Rule**

In no circumstances will the benefit payable for a professional service exceed the fee charged for the service.

### **CN.0.4 Penalties**

Penalties of up to \$10,000 or imprisonment for up to five years, or both, may be imposed on any person who makes a statement (oral or written) or who issues or presents a document that is false or misleading in a material particular and which is capable of being used with a claim for benefits. In addition, any practitioner who is found guilty of such offences by a court shall be subject to examination by a Medicare Participation Review Committee and may be counselled or reprimanded or may have services wholly or partially disqualified from the Medicare benefit arrangements.

A penalty of up to \$1,000 or imprisonment for up to three months, or both, may be imposed on any person who obtains a patient's signature on a direct-billing form without the obligatory details having been entered on the form before the person signs, or who fails to cause a patient to be given a copy of the completed form.

### **CN.0.5 Billing of the Patient**

Where the practitioner bills the patient for medical services rendered, the patient needs a properly itemised account/receipt to enable a claim to be made for Medicare benefits.

Under the provisions of the Health Insurance Act and Regulations, Medicare benefits are not payable in respect of a professional service unless there is recorded on the account setting out the fee for the service or on the receipt for the fee in respect of the service, the following particulars:-

- (a) Patient's name;
- (b) The date on which the professional service was rendered;
- (c) A description of the professional service sufficient to identify the item that relates to that service, including an indication where the service is rendered to a person while hospital treatment is provided in a hospital or day-hospital facility (other than a Medicare hospital patient), that is, the words (ie, accommodation and nursing care) "admitted patient" immediately preceding the description of the service or an asterisk "\*" directly after an item number where used;
- (d) The name and practice address or name and provider number of the practitioner who actually rendered the service; (Where the practitioner has more than one practice location recorded with the Department of Human Services, the provider number used should be that which is applicable to the practice location at or from which the service was given).

A medical or dental practitioner must notate 'certified dental patient' on the patient's account or include 'certified dental patient' in the text field when submitting a Medicare claim for benefits.

Where a practitioner wishes to apportion the total fee between the appropriate professional fee for the particular service and any balance outstanding in respect of services rendered previously, the practitioner should ensure that the balance is described in such a way (eg balance of account) that it cannot be mistaken as being a separate service. In particular no item number should be shown against the balance.

Only one original itemised account should be issued in respect of any one medical service and any duplicates of accounts or receipts should be clearly marked "duplicate" and should be issued only where the original has been lost. Duplicates should not be issued as a routine system for "accounts rendered".

## **CN.0.6 Claiming of Benefits**

### **Claiming Benefits**

The patient, upon receipt of a practitioner's account, has three courses open for paying the account and receiving benefits as outlined below.

#### **Paid Accounts**

The patient may pay the account and subsequently present the receipt at a Medicare customer service centre for assessment and payment of the Medicare benefit in cash. In these circumstances, where a claimant personally attends a customer service centre, the claimant is not required to complete a Medicare Patient Claim Form (PC1).

In circumstances where the claimant is seeking a cheque payment of the Medicare benefit or is arranging for an agent to receive the Medicare benefit on the claimant's behalf, completion of a Medicare Patient Claim Form (PC1) is still required.

#### **Unpaid and Partially Paid Accounts**

Where the patient has not paid the account, the unpaid account may be presented to Medicare with a Medicare claim form. In this case Medicare will forward to the claimant a benefit cheque made payable to the practitioner.

It will be the patient's responsibility to forward the cheque to the practitioner and make arrangements for payment of the balance of the account if any. "Pay doctor" cheques involving Medicare benefits cannot be sent direct to practitioners or to patients at a practitioner's address (even if requested by the patient to do so). "Pay doctor" cheques will be forwarded to the claimant's last known address.

When issuing a receipt to a patient in respect of an account that is being paid wholly or in part by a Medicare "pay doctor" cheque the practitioner should indicate on the receipt that a "Medicare" cheque for \$.....was involved in the payment of the account.

#### **Assignment of Benefits (Direct-Billing) Arrangements**

Under the Health Insurance Act the Assignment of Benefit (direct-billing) facility for professional services is available to all persons in Australia who are eligible for benefit under the Medicare program. This facility is NOT confined to pensioners or people in special need. If a practitioner direct-bills, the practitioner undertakes to accept the relevant Medicare benefit as full payment for the service. Additional charges for that service (irrespective of the purpose or title of the charge) cannot be raised against the patient. Under these arrangements:-

- The patient's Medicare card number must be quoted on all direct-bill forms for that patient.
- The basic forms provided are loose leaf to enable the patient details to be imprinted from the Medicare card.
- The forms include information required by Regulations under Subsection 19(6) of the Health Insurance Act.
- The practitioner must cause the particulars relating to the professional service to be set out on the assignment form before the patient signs the form and cause the patient to receive a copy of the form as soon as practicable after the patient signs it.

Where a patient is unable to sign the assignment form:

- the signature of the patient's parent, guardian or other responsible person (other than the doctor, doctor's staff, hospital proprietor, hospital staff, residential aged care facility proprietor or residential aged care facility staff) is acceptable; or

- In the absence of a "responsible person" the patient signature section should be left blank.

Where the signature space is either left blank or another person signs on the patient's behalf, the form **must** include:

- the notation "Patient unable to sign" and
- in the section headed 'Practitioner's Use', an explanation should be given as to why the patient was unable to sign (e.g. unconscious, injured hand etc.) and this note should be signed or initialled by the doctor. If in the opinion of the practitioner the reason is of such a "sensitive" nature that revealing it would constitute an unacceptable breach of patient confidentiality or unduly embarrass or distress the recipient of the patient's copy of the assignment of benefits form, a concessional reason "due to medical condition" to signify that such a situation exists may be substituted for the actual reason. However, this should not be used routinely and in most cases it is expected that the reason given will be more specific.

The administration of the direct-billing arrangements under Medicare as well as the payment of Medicare benefits on patient claims is the responsibility of **the Department of Human Services**. Any enquiries in regard to these matters should therefore be directed to Medicare offices or enquiry points.

Under Medicare any eligible dental practitioner can accept assignment of benefit and direct-bill for any eligible person.

### **Use of Medicare Cards in Direct Billing**

An eligible person who applies to enrol for Medicare benefits (using a Medicare Enrolment/Amendment Application) will be issued with a uniquely numbered Medicare card which shows the Medicare card number, the patient identification number (reference number), the applicant's first given name, initial of second given name, surname and an effective "valid to" date. These cards may be issued on an individual or family basis. Up to 5 persons may be listed on the one Medicare card, and up to 9 persons may be listed under the one Medicare card number.

The Medicare card plays an important part in direct billing as it can be used to imprint the patient details (including Medicare number) on the basic direct-billing forms. A special Medicare imprinter has been developed for this purpose and is available free of charge, on request, from Medicare.

The patient details can of course be entered on the direct-bill forms by hand, but the use of a card to imprint patient details assists practitioners and ensures accuracy of information. The latter is essential to ensure that the processing of a claim by Medicare is expedited.

The Medicare card number must be quoted on direct-bill forms. If the number is not available, then the assignment of benefit facility should not be used. To do so would incur a risk that the patient is not eligible and Medicare benefits not payable.

Where a patient presents without a Medicare card and indicates that he/she has been issued with a card but does not know the details, the practitioner may contact a Medicare telephone enquiry number to obtain the number.

### **Assignment of Benefit Forms**

To meet varying requirements the following types of stationery are available from Medicare. Note that these forms are approved forms under the Health Insurance Act, and no other forms can be used to assign benefits without the approval of the Department of Human Services.

(a) *Form DB2*. This form is used to assign benefits for services other than requested pathology. It is loose leaf for imprinting and comprises a throw away cover sheet (after imprinting), a Medicare copy, a Patient copy and a Practitioner copy.

(b) *Form DB4*. Is a continuous stationery version of Form DB2, and has been designed for use on most office accounting machines.

### **The Claim for Assigned Benefits (Form DB1N, DB1H)**

Practitioners who accept assigned benefits must claim from Medicare using either Claim for Assigned Benefits form DB1N or DB1H. The DB1N form should be used where services are rendered to persons for treatment provided out of hospital or day hospital treatment. The DB1H form should be used where services are rendered to persons while hospital treatment is provided in a hospital or day hospital facility (other than public patients). Both forms have been designed to enable benefit for a claim to be directed to a practitioner other than the one who rendered the services. The facility is intended for use in situations such as where a short term locum is acting on behalf of the principal doctor and setting the locum up with a provider number and pay-group link for the principal doctor's practice is impractical. Practitioners should note that this facility cannot be used to generate payments to or through a person who does not have a provider number.

The DB1N and DB1H are also loose leaf to enable imprinting of practitioner details using the special Medicare imprinter. For this purpose, practitioner cards, showing the practitioner's name, practice address and provider numbers are available from Medicare on request.

### **Direct-Bill Stationery**

Medical practitioners and eligible dental practitioners wishing to direct-bill may obtain information on direct-bill stationery by telephoning **132150**. Information on the completion of the forms and direct-bill procedures are provided with the forms. Information on direct-billing is available from any Medicare office.

### **Time Limits Applicable to Lodgement of Claims for Assigned Benefits**

A time limit of two years applies to the lodgement of claims with Medicare under the direct-billing (assignment of benefit) arrangements. This means that Medicare benefits are not payable for any service where the service was rendered more than two years earlier than the date the claim was lodged with Medicare.

Provision exists whereby in certain circumstances (eg hardship cases), the Minister may waive the time limits. Special forms for this purpose are available, if required, from the processing centre to which assigned claims are directed.

### **CN.0.7 Interpretation of the Cleft Lip and Cleft Palate Scheme**

The prescribed services in this section have been grouped according to the general nature of the services: orthodontic, oral surgical and general and prosthodontic.

Each professional service listed in the Schedule is a complete medical service in itself. Where a service is rendered partly by one practitioner and partly by another, only the one amount of benefit is payable.

### **CN.0.8 Multiple Operation Rule**

The Schedule fee for two or more operations performed on a patient on the one occasion is calculated by the following rule:-

· 100% for the item with the greatest Schedule fee, plus 50% for the item with the next greatest Schedule fee, plus 25% for each other item.

**NOTE:** 1. Fees so calculated which result in a sum which is not a multiple of 5 cents are taken to the next higher multiple of 5 cents.

2. Where two or more operations performed on the one occasion have fees which are equal, one of these amounts shall be treated as being greater than the other or others of those amounts.

3. The Schedule fee for benefits purposes is the aggregate of the fees calculated in accordance with the above formula.

The above rule does not apply to an operation which is one of two or more operations performed under the one anaesthetic on the same patient by different dental practitioners unless either practitioner assists the other. In this case, the fees and benefits specified in the Schedule apply. For these purposes the term "operation" includes items 75200- 75615.

If the operation comprises a combination of procedures which are commonly performed together and for which a specific combined item is provided in the Schedule, it is regarded as the one item and service in applying the multiple operation rule.

### **CN.0.9 Administration of Anaesthetics**

When a medical practitioner administers an anaesthetic in connection with a dental procedure prescribed for the payment of Medicare benefits (and the procedure has been performed by an eligible dental practitioner), Medicare benefits are payable for the administration of the anaesthetic on the same basis as if the procedure had been rendered by a medical practitioner.

To ascertain the Schedule fee for the anaesthetic, medical practitioners should refer to Group T10 - Relative Value Guide for Anaesthesia - of the Medicare Benefits Schedule Book.

### **CN.0.10 Definitions**

#### ***Orthodontic treatment planning***

Orthodontic treatment planning is defined as the measurement and analysis of the face and jaws and occlusion providing a diagnosis and planned prescription of appliances and treatment required.

#### ***Study models***

Study models are defined as orthodontic plaster casts of the upper and lower teeth and alveolar processes.

### **CN.0.11 Referral of Oral and Maxillofacial Surgical Services - (Items 75150 to 75621)**

Benefits are payable for items 75150 to 75621 only where the service has been rendered to a patient who has been referred by letter of Referral by an eligible orthodontist.

Item 75621 may be claimed in association with items 45720 to 45754 where the service is performed by a practitioner holding a FRACDS (OMS) qualification with access to Category 3 of the MBS.

### **CN.0.12 General and Prosthodontic Services - (Item 75800)**

Item number 75800 refers to a consultation by a dentist for prevention and prophylaxis and includes such services as dietary advice, oral hygiene and fluoride treatment.

### **CN.0.13 Over-servicing**

Over-servicing must be avoided. In the case of denture services, examples of over-servicing might be:-

- Unjustifiably frequent replacement of dentures;
- Provision of new dentures when relining or re-modelling of an existing prosthesis would meet the clinical need;
- Provision of metal dentures where an acrylic denture would meet the clinical need.

The Schedule includes an item for metal dentures to allow for the provision of a precise, long-term prosthesis. The item is not intended for use during the period of growth, where prostheses must be replaced or altered frequently, unless there is some definite and extraordinary clinical requirement.

### **CN.1.1 Introduction - Medicare Benefits**

The Medicare Benefits Schedule includes certain professional services in respect of the treatment of cleft lip and cleft palate conditions for which Medicare benefits are payable. These services are normally described as dental services. However, for the purposes of these Notes the word "medical" is to be interpreted to include "dental". The definition of professional service as contained in the Health Insurance Act provides that such a service must be "clinically relevant". A clinically relevant service means a service rendered by a medical or dental practitioner or optometrist that is generally accepted in the medical, dental or optometrical profession (as the case may be) as being necessary for the appropriate treatment of the patient to whom it is rendered.

Medicare benefits are payable in respect of services listed in the Schedule, when the services are rendered by eligible dental practitioners to prescribed dental patients.

The Schedule lists three categories of professional services:

- (Group C1) Orthodontic Services
- (Group C2) Oral and Maxillofacial Surgical Services
- (Group C3) General and Prosthodontic Services

### **CN.2.1 Dental Practitioner Eligibility**

In order to attract Medicare benefits, all treatment must be carried out by eligible dental practitioners who are resident in Australia.

All registered dental practitioners are entitled to perform simple extraction services covered by Items 75200-75206 listed in Group C2 of the Schedule and the general and prosthodontic services listed in Group C3 of the Schedule.

Dental practitioners who wish to perform those orthodontic services listed in Group C1 of the Schedule must be registered in the specialty of orthodontics.

Dental practitioners who were previously accredited to provide Cleft Lip and Cleft Palate services who do not meet the registration requirements as a dental specialist will be grandfathered under legislative arrangements that came into force on 1 November 2012.

Oral and maxillofacial services listed in Group C2 may be performed by:

- Medical practitioners who are specialists in the practice of their specialty of oral and maxillofacial surgery; and
- Dental practitioners who were approved by the Minister prior to 1 November 2004 for the purposes of Subsection 3 (1) of the Act to carry out prescribed medical services (oral and maxillofacial surgery) contained in the Medicare Benefits Schedule.
- Following a referral from an eligible orthodontist.

### **CN.3.1 Patient Eligibility**

To be eligible to claim benefits for Schedule services performed by eligible dental practitioners, a patient must satisfy the following criteria:

- The patient must be an Australian resident or any other person or class of persons whom the Minister declares to be eligible. All eligible persons will be issued with a Medicare card on application as evidence of their eligibility.
- Under the provisions of Section 3BA of the Health Insurance Act a patient must be a prescribed dental patient, ie
  - a person aged up to 22 years, in respect of whom, has been certified as a prescribed dental patient by a medical practitioner or dental practitioner approved by the Minister, that the person is suffering from a cleft lip or cleft palate condition\*;
  - a person aged up to 28 years, in respect of whom, prior to turning 22 years,
    - has been certified as a prescribed dental patient by a medical practitioner or dental practitioner approved by the Minister, that the person is suffering from a cleft lip or cleft palate condition\*, and
    - that person commenced treatment for a cleft lip or cleft palate condition;
  - a person aged 28 and over requiring a specific course of treatment for the repair of previous reconstructive surgery, provided that:
    - i. prior to turning 22 years, in respect of whom, has been certified as a prescribed dental patient by a medical practitioner or dental practitioner approved by the Minister, that the person is suffering from a cleft lip or cleft palate condition\*, and
    - ii. the person received treatment for a cleft lip or cleft palate condition prior to turning 28 years, and
    - iii. if the Minister has declared in writing that he or she is satisfied that:
      - 1. because of exceptional circumstances, the person required repair of previous reconstructive surgery in connection with the condition, and
      - 2. the person therefore needs to undergo that course of treatment; and
  - a person aged up to 22 years who has been certified as a prescribed dental patient by a medical practitioner or dental practitioner approved by the Minister, that the person is suffering from a condition determined by the Minister to be a condition to which the definition of a prescribed dental patient under Section 3BA of the Act applies.

In consultation with the professions, the Department of Health has completed a review of the conditions described as 'other' underpinning the Cleft Lip and Cleft Palate Scheme. A Ministerial Determination is now in place for these 'other' conditions, enabling the payment of Medicare benefits for the conditions listed below:

| <b>1. Oral and/or facial clefting</b>   |  |
|---|--|
| <i>Limited to</i>   | Cleft lip, alveolus and/or palate  |
|   | Tessier facial cleft   |
| <b>2. Congenital or hereditary craniofacial malformation, deformation or disruption</b> |  |
| <i>Limited to</i>   | Achondroplasia   |
|   | Branchial arch disorders including: Hemifacial/craniofacial microsomia, Goldenhar syndrome, DiGeorge syndrome, Velocardiofacial syndrome                     |
|   | CHARGE syndrome  |
|   | Congenital hemifacial hyperplasia  |
|   | Congenital lymphatic and/or vascular malformations of the head & neck, cystic hygroma, Sturge-Weber syndrome, excluding haemangiomas, birth marks and naevi. |
|   | Craniofacial Neurofibromatosis Type 1  |
|   | Craniometaphyseal dysplasia  |
|   | Ectodermal dysplasia   |
|   | Hemifacial atrophy (Parry Romberg syndrome)  |

|   |  |
|---|--|
|   | Mandibulofacial dysostosis (Treacher Collins syndrome)   |
|   | Maxillonasal dysplasia (Binder syndrome)   |
|   | Oral-facial digital syndrome Type 1  |
|   | Pierre Robin sequence  |
|   | Rubinstein-Taybi syndrome  |
|   | Sphrintzen-Goldberg syndrome   |
|   | Solitary median maxillary central incisor syndrome   |
|   | Stickler syndrome  |
|   | Syndromic craniosynostoses including:<br>Apert, Crouzon, Pfeiffer, Saethre Chotzen, and Muenke syndromes |
|   | Trichorhinophalangeal syndrome Type 1  |
| <b>3. Hereditary conditions presenting with the absence of 6 (six) or more permanent teeth, excluding 3<sup>rd</sup> molars</b> |  |
| <b>4. Hereditary conditions where the presence of supernumerary teeth is a major feature</b>                                    |  |
| <b>5. Hereditary conditions affecting the formation of enamel and/or dentine of all teeth</b>                                   |  |
| <i>Limited to</i>   | Amelogenesis imperfecta  |
|   | Dentinogenesis imperfecta  |
|   | Regional odontodysplasia   |

\*Note: The above conditions have been listed in the terminology that they are generally known under. Some conditions are similar to, or otherwise known as, other conditions on the list.

Please contact the Department of Human Services on 132 150 if the condition is not listed here.

Application for special consideration of a condition not listed above:

Applications for special consideration of a condition not approved by the Minister should include the following:

- m. a clinical report from the treating professional, describing the nature of the condition and an outline of the treatment to be undertaken;
- n. a treatment plan devised by the treating professional, including:
  - i. an indicative time period for which the patient requires treatment
  - ii. date/s the treatment is expected to commence and
  - iii. date/s the treatment is expected to be completed.
- o. Imaging reports should also be provided, where available.

This information can be forwarded to the Department of Human Services (DHS) for special consideration of a condition by the Department of Health.

### **CN.3.2 Application for approval for repairs to previous reconstructive work**

Applicants aged 28 and over seeking approval for repairs to previous reconstructive work under the Cleft Lip and Cleft Palate Scheme will be required to provide clinical details outlining the need for the repair of previous reconstructive surgery.

**NOTE:** *Patients aged over 28 years of age are not eligible to receive Medicare payments for treatment until approval from the Minister's delegate has been obtained.*

Applications should include the following:

- proof that the patient has been certified as a prescribed dental patient;
- a treatment plan devised by the treating professional, for the repair of the reconstructive surgery to be performed, including:
  - o an indicative time period for which patient eligibility for claiming related treatments should be reinstated
  - o date/s the treatment is expected to commence and
  - o date/s the treatment is expected to be completed.
- proof of previous eligibility and treatment under the Cleft Lip and Cleft Palate Scheme. This should take the form of a letter from the treating practitioner, which lists the patient details as follows:
  - o full name
  - o date of birth
  - o address
  - o condition
  - o date (or approximate) of original surgery
- a clinical report from the treating professional, describing the nature of the repair, information detailing the previous reconstructive surgery provided and an outline of the work to be undertaken.

This information will be forwarded to the Department of Human Services (DHS) for confirmation of eligibility.

Further information about the Scheme is available on the DHS' website at:

<http://www.humanservices.gov.au/customer/services/medicare/cleft-lip-and-cleft-palate-scheme>

### **Assessment of Applications**

Assessment will take into account the information provided by the applicant and consider the circumstances surrounding each individual application. In the assessment, "previous reconstructive surgery" means surgery undertaken to repair structural defects in connection with a cleft lip or cleft palate condition. Repairs to this surgery must be in relation to the failure or deterioration of this surgery and due to that failure or deterioration, the patient requires further surgical intervention to restore optimal function.

Repair to previous reconstructive surgery may involve items in both the main Medicare Benefits Schedule, and items in the Cleft Lip and Cleft Palate Schedule. Under Section 3BA (2A), upon gaining the Minister's approval, applicants will have full access to items in the Cleft Lip and Cleft Palate Schedule that are necessary for the restoration of optimal function (provided the items are rendered by suitably qualified / approved practitioners).

Patients are eligible for Medicare benefits for treatment under the scheme once they are certified by a medical or dental practitioner as a prescribed dental patient.

### **CN.3.3 Visitors to Australia**

Medicare benefits for the Cleft Lip and Cleft Palate Scheme are generally not payable to visitors to Australia or temporary residents.

### **CN.3.4 Health Care Expenses Incurred Overseas**

Medicare does not cover medical or hospital expenses incurred outside Australia.

**CLEFT LIP AND CLEFT PALATE SERVICES ITEMS**

# **CATEGORY 8: MISCELLANEOUS SERVICES**

## SUMMARY OF CHANGES FROM 14/09/2019

The 14/09/2019 changes to the MBS are summarised below and are identified in the Schedule pages by one or more of the following words appearing above the item number:

- |                         |       |
|-------------------------|-------|
| (a) new item            | New   |
| (b) amended description | Amend |
| (c) fee amended         | Fee   |
| (d) item number changed | Renum |
| (e) EMSN changed        | EMSN  |

There are no changes to this Category for 14/09/2019.

## MISCELLANEOUS SERVICES NOTES

### **MN.1.1 Additional Bulk Billing Payment for General Medical Services - (Items 10990 and 10991)**

Item 10990 can only be claimed where all of the conditions set out in paragraphs (a) to (d) of item 10990 have been met.

Item 10991 can only be claimed where all of the conditions set out in paragraphs (a) to (e) of item 10991 have been met.

- Item 10991 can only be used where the service is provided at, or from, a practice location that is listed in item 10991. This includes all regional, rural and remote areas (RRMA 3 to 7 under the Rural Remote Metropolitan Areas classification system), all of Tasmania and those areas covered by a Statistical Subdivision (SSD) or Statistical Local Areas (SLA) listed in item 10991 (SSDs and SLAs are specified in the Australian Standard Geographical Classification (ASGC) 2002). If you are not sure whether your practice location is in an eligible area, you can call the Department of Human Services on 132 150.

- Practice location is the place associated with the medical practitioner's provider number from which the service has been provided. This includes services performed either at the medical practitioner's surgery, or those services performed away from the surgery using the provider number for that surgery (eg home visits or visits to aged care facilities).

- Where a medical practitioner has a practice location in both an eligible and ineligible area, item 10991 can only be claimed in respect of those services provided at, or from, the eligible practice location.

Item 10990 and item 10991 can only be used in conjunction with items in the General Medical Services Table of the MBS. There are similar items to be used in conjunction with diagnostic imaging services (item 64990 or 64991) or pathology services (item 74990 or 74991).

Item 10990 or item 10991 can be claimed for each item of service claimable under the MBS (other than diagnostic imaging services and pathology services), provided the conditions of the relevant item, 10990 or 10991, are satisfied. For example, item 10990 or 10991 can be claimed in conjunction with attendance items, procedural items (other than diagnostic imaging or pathology items) or services provided by a practice nurse on behalf of a medical practitioner (items 10983, 10984, 10986, 10987 and 10997). In some cases, this will mean that item 10990 or 10991 can be claimed more than once in respect of a patient visit.

Item 10990 or 10991 can not be claimed in conjunction with each other.

Where a Medicare benefit is not payable for a particular service (eg because the patient has exceeded the number of allowable services in a period of time), the additional bulk billing payment will not be paid for that service.

All GPs whether vocationally registered or not are eligible to claim the additional bulk billing payment.

Commonwealth concession card holder means a person listed on a Pensioner Concession Card, Health Care Card or Commonwealth Seniors Health Card issued by either Centrelink or the Department of Veterans' Affairs. Gold or White Cards issued by the Department of Veterans' Affairs do not attract the additional bulk billing payment. However, if a Gold or White Card holder also holds a recognised Commonwealth concession card and chooses to be treated under the Medicare arrangements, then that patient is an eligible concession card holder.

Unreferred service means a medical service provided to a patient by, or on behalf of, a medical practitioner, being a service that has not been referred to that practitioner by another medical practitioner or person with referring rights.

The Department of Human Services will undertake regular post payment auditing to ensure that the additional bulk billing payment is being claimed correctly. Centrelink data will be used to verify concessional status and Medicare records will be used to confirm patient age.

## **MN.1.2 After-hours services provided in areas eligible for the higher bulk billing payment - (Item 10992)**

### **After-hours services provided in areas eligible for the higher bulk billing payment - (Item 10992)**

Item 10992 can only be claimed where all of the conditions set out in paragraphs (a) to (g) of item 10992 have been met:

- Item 10992 must be claimed in conjunction with one of the items 585, 588, 591, 594, 599, 600, 761, 763, 766, 769, 772, 776, 788, 789, 5003, 5010, 5023, 5028, 5043, 5049, 5063, 5067, 5220, 5223, 5227, 5228, 5260, 5263 5265, or 5267. These items are for services provided after-hours outside of consulting rooms or hospital.
- Item 10992 can only be used where the service is provided in one of the eligible areas listed in item 10992 by a medical practitioner whose practice location (i.e. the location associated with the medical practitioner's provider number) is not in one of these areas.

Medical practitioners whose practice location is inside one of these listed locations should claim item 10991 for eligible services.

Item 10992 cannot be claimed in conjunction with item 10990 or 10991.

Where a Medicare benefit is not payable for a particular service the payment for item 10992 will not be paid for that service.

All GPs, whether vocationally recognised or not, are eligible to claim the additional bulk billing payment.

*Commonwealth concession card holder* means a person listed on a Pensioner Concession Card, Health Care Card or Commonwealth Seniors Health Card issued by either Centrelink or the Department of Veterans' Affairs. Gold or White Cards issued by the Department of Veterans' Affairs do not attract the additional bulk billing payment. However, if a Gold or White Card holder also holds a recognised Commonwealth concession card and chooses to be treated under the Medicare arrangements, then that patient is an eligible concession card holder.

*Unreferred service* means a medical service provided to a patient by, or on behalf of, a medical practitioner, being a service that has not been referred to that practitioner by another medical practitioner or person with referring rights.

The Department of Human Services will undertake regular post payment auditing to ensure that the additional bulk billing payment is being claimed correctly. Centrelink data will be used to verify concessional status and Medicare records will be used to confirm patient age.

## **MN.3.1 Individual Allied Health Services (Items 10950 to 10970) for Chronic Disease Management - Eligible Patients**

### **ELIGIBLE PATIENTS**

Medicare benefits are available for certain services provided by eligible allied health professionals to people with chronic conditions and complex care needs who are being managed by a GP or medical practitioner using certain Chronic Disease Management (CDM) Medicare items or are enrolled in a Health Care Home. The allied health services must be recommended in the patient's plan as part of the management of their chronic condition.

### **Chronic medical conditions and complex care needs**

A chronic medical condition is one that has been or is likely to be present for at least six months, e.g. asthma, cancer, cardiovascular illness, diabetes mellitus, musculoskeletal conditions and stroke. A patient is considered to have complex care needs if they require ongoing care from a multidisciplinary team consisting of their GP or medical practitioner and at least two other health or care providers.

### **Prerequisite CDM services**

Patients must have received the following MBS CDM services:

- GP Management Plan - MBS GP item 721 or medical practitioner item 229 (or GP review item 732 or medical practitioner review item 233 for a review of a GPMP); and

- Team Care Arrangements - MBS GP item 723 or medical practitioner item 230 (or GP review items 732 or medical practitioner review item 233 for a review of TCAs)

Alternatively, for patients who are permanent residents of an aged care facility, their GP or medical practitioner must have contributed to, or contributed to a review of, a multidisciplinary care plan prepared for them by the aged care facility (MBS GP item 731 or medical practitioner item 232).

Alternatively, for patients who are enrolled with a Health Care Home, a shared care plan must have been prepared by the medical practitioner who is leading the patient's care.

For more information on the CDM planning items, refer to the explanatory notes for these items.

### **Allied health membership of a TCAs team**

The allied health professional providing the service may be a member of the TCAs team convened by the GP or medical practitioner to manage a patient's chronic condition and complex care needs. However, the service may also be provided by an allied health professional who is not a member of the TCAs team, provided that the service has been identified as necessary by the patient's GP or medical practitioner and recommended in the patient's care plan/s.

### **Group services**

In addition to individual services, patients who have type 2 diabetes may also access MBS items 81100 to 81125 which provide group allied health services. Patients only need to have MBS GP items 721 or 723 or medical practitioner items 229 or 230 or a Health Care Home shared care plan in place to be eligible for the group services.

## **MN.3.2 Individual Allied Health Services (Items 10950 to 10970) for Chronic Disease Management - Referral Requirements**

### **Referral form**

For Medicare benefits to be payable, the patient must be referred to an eligible allied health professional by their GP or medical practitioner using a referral form that has been issued by the Australian Government Department of Health or a form that contains all the components of this form.

The form issued by the department is available at [www.health.gov.au/mbsprimarycareitems](http://www.health.gov.au/mbsprimarycareitems) (click on the link for allied health individual services).

GPs and medical practitioners are encouraged to attach a copy of the relevant part of the patient's care plan to the referral form.

GPs and medical practitioners may use one referral form to refer patients for single or multiple services of the same service type (e.g. five chiropractic services). If referring a patient for single or multiple services of different service types (e.g. two dietetic services and three podiatry services), a separate referral form will be needed for each service type.

The patient will need to present the referral form to the allied health professional at the first consultation, unless the GP or medical practitioner has previously provided it directly to the allied health professional.

It is required that allied health professionals retain the referral form for 2 years from the date the service was rendered (for the Department of Human Services auditing purposes).

A copy of the referral form is not required to accompany Medicare claims, and allied health professionals do not need to attach a signed copy of the form to patients' itemised accounts/receipts or assignment of benefit forms.

Completed forms do not have to be sent to the Department of Health.

### **Health Care Home shared care plan**

A Health Care Home shared care plan means a written plan that is prepared for a patient enrolled at a Health Care Home trial site; is prepared by a medical practitioner (including a general practitioner but not including a specialist or consultant physician) who is leading the patient's care at the Health Care Home trial site; and includes: an outline of the patient's agreed current and long-term goals; the person or people responsible for each activity; arrangements to review the plan by a day mentioned in the plan; and if authorised by the patient, arrangements for the transfer of information between the medical practitioner and other health care providers supporting patient care about the patient's condition or conditions and treatment. A Health Care Home Shared care plan must be kept for 2 years after the date it was created.

### **Referral validity**

Medicare benefits are available for up to five allied health services per patient per calendar year. Where a patient receives more than the limit of five services in a calendar year, the additional service/s will not attract a Medicare benefit and the MBS Safety Net arrangements will not apply to costs incurred by the patient for the service/s.

If a patient has not used all of their allied health services under a referral in a calendar year, it is not necessary to obtain a new referral for the "unused" services. However, any "unused" services received from 1 January in the following year under that referral will count as part of the total of five services for which the patient is eligible in that calendar year.

When patients have used all of their referred services, or require a referral for a different type of allied health service recommended in their CDM plan/s or Health Care Home shared care plan, they will need to obtain a new referral from their GP or medical practitioner. GPs and medical practitioners may choose to use this visit to undertake a review of the patient's CDM plan/s or, where appropriate, to manage the process using a GP/medical practitioner consultation item.

It is not necessary to have a new CDM plan/s prepared each calendar year in order to access a new referral/s for eligible allied health services. Patients continue to be eligible for rebates for allied health services while they are being managed under the prerequisite CDM items or Health Care Home shared care plan as long as the need for eligible services continues to be recommended in their plan. However, regular reviews using MBS GP item 732 or medical practitioner item 233 are encouraged.

## **MN.3.3 Individual Allied Health Services - (Items 10950 to 10970) for Chronic Disease Management - Eligible Providers and Services**

### **Eligible allied health providers**

The following allied health professionals are eligible to provide services under Medicare for patients with a chronic or terminal medical condition and complex care needs when they meet the provider eligibility requirements set out the next section and are registered with the Department of Human Services.

- Aboriginal and Torres Strait Islander health practitioners
- Aboriginal health workers
- Audiologists
- Chiropractors
- Diabetes educators
- l. Dietitians
- p. Exercise physiologists

- vi. Mental health workers
- v. Occupational therapists
  - l. Osteopaths
- vii. Physiotherapists
- vii. Podiatrists
  - h. Psychologists
  - o. Speech pathologists

### **Number of services per year**

Medicare benefits are available for up to five allied health services per eligible patient, per calendar year. The five allied health services can be made up of one type of service (e.g. five physiotherapy services) or a combination of different types of services (e.g. one dietetic and four podiatry services). Five services per calendar year are the legal maximum per patient and exemptions to this are not possible.

### **Checking patient eligibility for allied health services**

Patients seeking Medicare rebates for allied health services will need to have a valid referral form. If there is any doubt about a patient's eligibility, the Department of Human Services will be able to confirm the number of allied health services already claimed by the patient during the calendar year. The allied health professional or the patient can call the Department of Human Services to check this information (132 150 for provider enquiries; 132 011 for public enquiries).

### **Service length and type**

Individual allied health services under Medicare for patients with a chronic medical condition and complex care needs (items 10950 to 10970) must be of at least 20 minutes duration and provided to an individual patient, not to a group. The allied health professional must personally attend the patient.

### **Reporting back to the Practitioner**

Where an allied health professional provides a single service to the patient under a referral, they must provide a written report back to the referring GP or medical practitioner after each service.

Where an allied health professional provides multiple services to the same patient under the one referral, they must provide a written report back to the referring GP or medical practitioner after the first and last service only, or more often if clinically necessary. Written reports should include:

- j. any investigations, tests, and/or assessments carried out on the patient;
- vii. any treatment provided; and
- vii. future management of the patient's condition or problem.

The report to the Practitioner must be kept for 2 years from the date of service.

### **Out-of-pocket expenses and Medicare Safety Net**

Allied health professionals can determine their own fees for the professional service. Charges in excess of the Medicare benefit are the responsibility of the patient. However, out-of-pocket costs will count toward the Medicare Safety Net for that patient. Allied health services in excess of five in a calendar year will not attract a Medicare benefit and the Safety Net arrangements will not apply to costs incurred by the patient for such services.

## **Publicly funded services**

Items 10950 to 10970 do not apply for services that are provided by any Commonwealth or state funded services or provided to an admitted patient of a hospital. However, where an exemption under subsection 19(2) of the Health Insurance Act 1973 has been granted to an Aboriginal Community Controlled Health Service or state/territory government health clinic, items 10950 to 10970 can be claimed for services provided by eligible allied health professionals salaried by, or contracted to, the service or health clinic. All requirements of the relevant item must be met, including registration of the allied health professional with the Department of Human Services. Medicare services provided under a subsection 19(2) exemption must be bulk billed (i.e. the Medicare rebate is accepted as full payment for services).

## **Private health insurance**

Patients need to decide if they will use Medicare or their private health insurance ancillary cover to pay for these services. Patients cannot use their private health insurance ancillary cover to 'top up' the Medicare rebate paid for the services.

## **MN.3.4 Individual Allied Health Services - (Items 10950 to 10970) for Chronic Disease Management - Professional Eligibility**

The individual allied health items (10950 to 10970) can only be claimed for services provided by eligible allied health professionals who are registered with the Department of Human Services. To be eligible to register with the Department of Human Services to provide these services, allied health professionals must meet the specific eligibility requirements detailed below.

**Aboriginal and Torres Strait Islander health** practitioners must be registered with the Aboriginal and Torres Strait Islander Health Practice Board of Australia. Aboriginal and Torres Strait Islander health practitioners may use any of the titles authorised by the Aboriginal and Torres Strait Islander Health Practice Board: Aboriginal health practitioners; Aboriginal and Torres Strait Islander health practitioners; or Torres Strait Islander health practitioners.

**Aboriginal health workers** in a State or Territory other than the Northern Territory must have been awarded either:

- a. a Certificate III in Aboriginal and/or Torres Strait Islander Primary Health Care (or an equivalent or higher qualification) by a registered training organisation; or
- b. a Certificate III in Aboriginal and Torres Strait Islander Health (or an equivalent or higher qualification) by a registered training organisation before 1 July 2012.

Note: Where individuals consider their qualification to be equivalent to or higher than the qualifications listed above, they will need to contact a registered training organisation in their State or Territory to have the qualification assessed as such before they can register with the Department of Human Services. In the Northern Territory, a practitioner must be registered with the Aboriginal and Torres Strait Islander Health Practice Board of Australia.

**Audiologists** must be either a 'Full Member' of the Audiological Society of Australia Inc (ASA), who holds a 'Certificate of Clinical Practice' issued by the ASA; or an 'Ordinary Member - Audiologist' or 'Fellow Audiologist' of the Australian College of Audiology (ACAud).

**Diabetes educators** must be a Credentialed Diabetes Educator (CDE) as credentialed by the Australian Diabetes Educators Association (ADEA).

**Chiropractors** must be registered with the Chiropractic Board of Australia.

**Dietitians** must be an 'Accredited Practising Dietitian' as recognised by the Dietitians Association of Australia (DAA).

**Exercise physiologists** must be an 'Accredited Exercise Physiologist' as accredited by Exercise and Sports Science Australia (ESSA).

## **Mental health workers**

'Mental health' can include services provided by members of five different allied health professional groups. 'Mental health workers' are drawn from the following:

- psychologists;
- mental health nurses;
- occupational therapists;
- social workers;
- Aboriginal and Torres Strait Islander health practitioners; and
- Aboriginal health workers.

Psychologists, occupational therapists, Aboriginal and Torres Strait Islander health practitioners and Aboriginal health workers are eligible in separate categories for these items.

**Mental health nurses** must be a credentialed mental health nurse, as certified by the Australian College of Mental Health Nurses.

Mental health nurses who were registered in the ACT or Tasmania prior to the introduction of the National Registration and Accreditation Scheme (NRAS) on 1 July 2010, will have until 31 December 2010 to be certified by the Australian College of Mental Health Nurses.

**Social workers** must be a 'Member' of the Australian Association of Social Workers (AASW) and be certified by AASW as meeting the standards for mental health set out in the document published by AASW titled 'Practice Standards for Mental Health Social Workers' as in force on 8 November 2008.

**Occupational therapists** must be registered with the Occupational Therapy Board of Australia.

**Osteopaths** must be registered with the Osteopathy Board of Australia.

**Physiotherapists** must be registered with the Physiotherapy Board of Australia.

**Podiatrists** must be registered with the Podiatry Board of Australia.

**Psychologists** must hold general registration in the health profession of psychology under the applicable law in force in the State or Territory in which the service is provided.

**Speech pathologists** must be a 'Practising Member' of Speech Pathology Australia.

## **Registering with the Department of Human Services**

Provider registration forms may be obtained from the [Department of Human Services](#) on 132 150 or at the Department of Human Services website.

Chiropractors, osteopaths, physiotherapists and podiatrists who were already registered with the Department of Human Services on 1 July 2004 to order diagnostic imaging under Medicare, do not need to re-register to provide services under this initiative. Allied health professionals registering with the Department of Human Services for the first time only need to fill in one application form which will give them rights to provide services under this initiative and order diagnostic imaging tests etc., where appropriate, under Medicare.

## **Changes to provider details**

Allied health providers must notify the Department of Human Services in writing of all changes to mailing details to ensure that they continue to receive information about Medicare rebateable allied health services.

The individual allied health items (10950 to 10970) can only be claimed for services provided by eligible allied health professionals who are registered with the Department of Human Services. To be eligible to register with the Department of Human Services to provide these services, allied health professionals must meet the specific eligibility requirements detailed below.

### **MN.3.5 Individual Allied Health Services (10950 to 10970) for Chronic Disease Management - Further Information**

Further information about Medicare Benefits Schedule items is available on the Department of Health's website at [www.health.gov.au/mbsprimarycareitems](http://www.health.gov.au/mbsprimarycareitems)

### **MN.6.1 Provision of Psychological Therapy Services by Clinical Psychologists - (Items 80000 TO 80021)**

#### **OVERVIEW**

The Better Access to Psychiatrists, Psychologists and General Practitioners through the Medicare Benefits Schedule initiative commenced on 1 November 2006. Under the Better Access initiative MBS items provide Medicare benefits for the following allied mental health services:

- x. psychological therapy (items 80000 to 80021) - provided by eligible clinical psychologists; and
- xi. focussed psychological strategies - allied mental health (items 80100 to 80171) - provided by eligible psychologists, occupational therapists and social workers.

### **MN.6.2 Psychological Therapy Services Attracting Medicare Rebates**

#### **Eligible psychological therapy services**

There are eight MBS items for the provision of psychological therapy services to eligible patients by a clinical psychologist, including five items for face-to-face consultations and three items for video conference consultations. Clinical psychologists must meet the provider eligibility requirements set out below and be registered with the Department of Human Services.

In these notes, 'GP' means a medical practitioner, including a general practitioner, but not including a specialist or consultant physician.

#### **Referrals and Referral Validity**

Services provided under the Psychological Therapy items will not attract a Medicare rebate unless:

- l. a referral has been made by a GP or medical practitioner who is managing the patient under a GP Mental Health Treatment Plan (GP items 2700, 2701, 2715, 2717 or medical practitioner items 272, 276, 281, 282);
- m. a referral has been made by a medical practitioner (including a general practitioner, but not a specialist or consultant physician) who is managing the patient under a referred psychiatrist assessment and management plan (item 291);
- n. a referral has been made by a psychiatrist or paediatrician from an eligible psychiatric or paediatric service (see Referral Requirements for further details regarding psychiatrist and paediatrician referrals); or
- o. a referral has been made by a medical practitioner (including a general practitioner, but not a specialist or consultant physician) under a Health Care Home shared care plan.

#### **Health Care Home shared care plan**

A Health Care Home shared care plan means a written plan that is prepared for a patient enrolled at a Health Care Home trial site; is prepared by a medical practitioner (including a general practitioner but not including a specialist or consultant physician) who is leading the patient's care at the Health Care Home trial site; and includes: an outline of the patient's agreed current and long-term goals; the person or people responsible for each activity; arrangements to review the plan by a day mentioned in the plan; and if authorised by the patient, arrangements for the transfer of

information between the medical practitioner and other health care providers supporting patient care about the patient's condition or conditions and treatment.

### **Number of services per year**

Medicare rebates are available for up to 10 individual allied mental health services in a calendar year. The 10 services may consist of: GP/medical practitioner focussed psychological strategies services (GP items 2721 to 2727 or medical practitioner items 283 to 287); and/or psychological therapy services (items 80000 to 80015); and/or focussed psychological strategies - allied mental health services (items 80100 to 80115; 80125 to 80140; 80150 to 80165).

Referrals should be provided, as required, for an initial course of treatment (a maximum of six services but may be less depending on the referral and patient need) to a maximum of 10 services per calendar year. For the purposes of these services, a course of treatment will consist of the number of services stated in the patient's referral (up to a maximum of six in any one referral).

Patients will also be eligible to claim up to 10 separate services within a calendar year for group therapy services involving 6-10 patients to which items 80020 (psychological therapy - clinical psychologist), 80021 (psychological therapy by video conference - clinical psychologist), 80120 (focussed psychological strategies - psychologist), 80121 (focussed psychological strategies by video conference - psychologist), 80145 (focussed psychological strategies - occupational therapist), 80146 (focussed psychological strategies by video conference - occupational therapist), 80170 (focussed psychological strategies - social worker) and 80171 (focussed psychological strategies by video conference - social worker) apply. These group services are separate from the individual services and do not count towards the 10 individual services per calendar year maximum associated with those items.

In the instance where a patient has received the 10 psychological therapy services (items 80000 to 80021), focussed psychological services -allied mental health services (items 80100 to 80171) or GP/medical practitioner focussed psychological strategies services (GP items 2721 to 2727 or medical practitioner items 283 to 287) available under the Better Access to Psychiatrists, Psychologists and General Practitioners through the Medicare Benefits Schedule initiative per calendar year and is considered to clinically benefit from some additional services, the patient may be eligible for Primary Health Networks (PHNs) funded psychological therapies if they meet relevant eligibility criteria for the PHN commissioned services. It is recommended that providers refer to their PHN for further guidance.

### **Service length and type**

Services provided by eligible clinical psychologists under these items must be within the specified time period within the item descriptor. The clinical psychologist must personally attend the patient face-to-face, or by video conference for items 80001, 80011, 80021, 80101, 80111, 80121, 80126, 80136, 80146, 80151, 80161 and 80171.

It is expected that professional attendances at places other than consulting rooms would be provided where treatment in other environments is necessary to achieve therapeutic outcomes.

In addition to psycho-education, it is recommended that cognitive-behaviour therapy be provided. However, other evidence-based therapies — such as interpersonal therapy — may be used if considered clinically relevant.

### **Course of treatment and reporting back to the referring medical practitioner**

Patients are eligible to receive up to 10 individual services and up to 10 group sessions in a calendar year.

Within this maximum service allocation, the clinical psychologist can provide one or more courses of treatment. For the purposes of these services, a course of treatment consists of the number of services stated in the patient's referral (up to a maximum of six in any one referral). This enables the referring medical practitioner to consider a report from the clinical psychologist on the services provided to the patient, and the need for further treatment.

On completion of the initial course of treatment, the clinical psychologist must provide a written report to the referring GP or medical practitioner, which includes information on:

- k. assessments carried out on the patient;

- l. treatment provided; and
- m. recommendations on future management of the patient's disorder.

A written report must also be provided to the referring GP or medical practitioner at the completion of any subsequent course(s) of treatment provided to the patient.

### **Out of pocket expenses and Medicare safety net**

Charges in excess of the Medicare benefit for these items are the responsibility of the patient. However, if a service was provided out-of-hospital, any out-of-pocket costs will count towards the Medicare safety net for that patient. The out-of-pocket costs for mental health services which are not Medicare eligible do not count towards the Medicare safety net.

### **Eligible patients**

Items 80000 to 80021 (inclusive) apply to people with an assessed mental disorder and where the patient is referred by a GP or medical practitioner who is managing the patient under a GP Mental Health Treatment Plan (GP items 2700, 2701, 2715, 2717 or medical practitioner items 272, 276, 281, 282), under a Health Care Home shared care plan, under a referred psychiatrist assessment and management plan (item 291), or on referral from an eligible psychiatrist or paediatrician.

The conditions classified as mental disorders for the purposes of these services are informed by the World Health Organisation, 1996, Diagnostic and Management Guidelines for Mental Disorders in Primary Care: ICD-10 Chapter V Primary Care Version. For the purposes of these items, dementia, delirium, tobacco use disorder and mental retardation are not regarded as a mental disorder.

### **Checking patient eligibility for psychological therapy services**

Patients seeking Medicare rebates for psychological therapy services will need to have a referral from a GP, medical practitioner, psychiatrist or paediatrician. If there is any doubt about a patient's eligibility, the Department of Human Services will be able to confirm whether a GP Mental Health Treatment Plan; shared care plan and/or a psychiatrist assessment and management plan is in place and claimed; or an eligible psychiatric or paediatric service has been claimed, as well as the number of allied mental health services already claimed by the patient during the calendar year.

Clinical psychologists can call the Department of Human Services on 132 150 to check this information, while unsure patients can seek clarification by calling 132 011.

The patient will not be eligible if they have not been appropriately referred and a relevant Medicare service provided to them. If the referring service has not yet been claimed, the Department of Human Services will not be aware of the patient's eligibility. In this case the clinical psychologist should, with the patient's permission, contact the referring practitioner to ensure the relevant service has been provided to the patient.

### **Publicly funded services**

Psychological therapy items 80000 to 80021 do not apply for services that are provided by any other Commonwealth or State funded services or provided to an admitted patient of a hospital. However, where an exemption under subsection 19(2) of the *Health Insurance Act 1973* has been granted to an Aboriginal Community Controlled Health Service or state/territory clinic, the items apply for services that are provided by eligible clinical psychologists salaried by, or contracted to, the service as long as all requirements of the items are met, including registration with the Department of Human Services. These services must be direct billed (that is, the Medicare rebate is accepted as full payment for services).

## **Private health insurance**

Patients need to decide if they will use Medicare or their private health insurance ancillary cover to pay for these services. Patients cannot use their private health insurance ancillary cover to 'top up' the Medicare rebate paid for the services.

### **MN.6.3 Referral Requirements (GPs, Medical Practitioners, Psychiatrists or Paediatricians to Clinical Psychologists for Psychological Therapy)**

#### **Referrals**

Patients must be referred for psychological therapy services by a GP or medical practitioner managing the patient under a GP Mental Health Treatment Plan (GP items 2700, 2701, 2715, 2717 or medical practitioner items 272, 276, 281, 282), or a referred psychiatrist assessment and management plan (item 291); on referral from a psychiatrist or a paediatrician; or a Health Care Home shared care plan.

Referrals from psychiatrists and paediatricians must be made from eligible Medicare services. For specialist psychiatrists and paediatricians these services include any of the specialist attendance items 104 through 109. For consultant physician psychiatrists the relevant eligible Medicare services cover any of the consultant psychiatrist items 293 through 370; while for consultant physician paediatricians the eligible services are consultant physician attendance items 110 through 133.

Referring practitioners are not required to use a specific form to refer patients for these services. The referral may be a letter or note to an eligible clinical psychologist signed and dated by the referring practitioner.

The clinical psychologist must be in receipt of the referral at the first allied mental health consultation. It is recommended that the clinical psychologist retain the referral for 24 months from the date the service was rendered (for the Department of Human Services auditing purposes).

#### **Health Care Home shared care plan**

A Health Care Home shared care plan means a written plan that is prepared for a patient enrolled at a Health Care Home trial site; is prepared by a medical practitioner (including a general practitioner but not including a specialist or consultant physician) who is leading the patient's care at the Health Care Home trial site; and includes: an outline of the patient's agreed current and long-term goals; the person or people responsible for each activity; arrangements to review the plan by a day mentioned in the plan; and if authorised by the patient, arrangements for the transfer of information between the medical practitioner and other health care providers supporting patient care about the patient's condition or conditions and treatment.

The Health Care Home shared care plan should also include a record of the patient's agreement to mental health services; an outline of assessment of the patient's mental disorder, including the mental health formulation and diagnosis or provisional diagnosis; and if appropriate, a plan for one or more of crisis intervention and relapse prevention.

#### **Referral validity**

Medicare benefits are available for up to 10 individual and/or 10 group psychological therapy services and/or focussed psychological strategies services per patient per calendar year.

Referrals should be provided, as required, for an initial course of treatment (a maximum of six services but may be less depending on the referral and the patient's clinical need) to a maximum of 10 services per calendar year. For the purposes of these services, a course of treatment will consist of the number of services stated in the patient's referral (up to a maximum of six in any one referral).

If a patient has not used all of their psychological therapy services and/or focussed psychological strategies services under a referral in a calendar year, it is not necessary to obtain a new referral for the "unused" services. However, any "unused" services received from 1 January in the following year under that referral will count as part of the total of 10 services for which the patient is eligible in that calendar year.

When patients have used all of their referred services they will need to obtain a new referral from the referring practitioner if they are eligible for further services. Where the patient's care is being managed by a GP or medical practitioner, the GP/medical practitioner may choose to use this visit to undertake a review of the patient's GP Mental Health Treatment Plan, Health Care Home shared care plan, and/or psychiatrist assessment and management plan.

It is not necessary to have a new GP Mental Health Treatment Plan, Health Care Home shared care plan, and/or psychiatrist assessment and management plan prepared each calendar year in order to access a new referral(s) for eligible psychological therapy services and/or focussed psychological strategies services. Patients continue to be eligible for rebates for psychological therapy services and/or focussed psychological strategies services while they are being managed under a GP Mental Health Treatment Plan, Health Care Home shared care plan, and/or a psychiatrist assessment and management plan as long as the need for eligible services continues to be recommended in their plan.

#### **MN.6.4 Clinical Psychologist Professional Eligibility**

##### **Eligible clinical psychologists**

A person is an allied health professional in relation to the provision of a psychological therapy health service if the person:

- o. holds general registration in the health profession of psychology under the applicable law in force in the state or territory in which the service is provided; and
- p. is endorsed by the Psychology Board of Australia to practice in clinical psychology.

Until 31 October 2015, a person was also an allied health professional in relation to the provision of a psychological therapy health service if the person:

- g. holds general registration in the health profession of psychology under the applicable law in force in the state or territory in which the service is provided; and
- h. on 31 October 2015 was an allied health professional in relation to the provision of a psychological therapy health service because the person:
  - i. was a member of the College of Clinical Psychologists of the Australian Psychological Society; or
  - ii. had been assessed by the College of Clinical Psychologists of the Australian Psychological Society as meeting the requirements for membership of that College.

The clinical psychologist must be registered with the Department of Human Services.

#### **Registering with the Department of Human Services**

Advice about registering with the Department of Human Services to provide psychological therapy services using items 80000-80021 inclusive is available from the Department of Human Services provider inquiry line on 132 150.

#### **Further information**

For further information about Medicare Benefits Schedule items, please go to the Department of Health's website at [www.health.gov.au/mbsonline](http://www.health.gov.au/mbsonline).

For providers, further information is also available for providers from the Department of Human Services provider inquiry line on 132 150.

#### **MN.6.5 Telehealth Psychological Therapy Services**

These notes provide information on the telehealth psychological therapy MBS video consultation items by clinical psychologists. A video consultation involves a single clinical psychologist attending a patient, or a group of 6 to 10 patients.

MBS item numbers 80001 and 80011 provide for attendance via videoconferencing by a clinical psychologist to an individual patient. MBS item number 80021 provide for attendance via videoconferencing by a clinical psychologist to a group of 6 to 10 patients. The items are stand-alone items and do not have a derived fee.

These therapies are time limited, being deliverable in up to 10 planned sessions in a calendar year (including services to which items 80001, 80011, 80101, 80111, 80126, 80136, 80151 and 80161 apply).

Patients will also be eligible to claim up to 10 separate services within a calendar year for group therapy services involving 6-10 patients to which items 80021 (psychological therapy via video conference – clinical psychologist), 80121 (focussed psychological strategies via video conference – psychologist), 80146 (focussed psychological strategies via video conference – occupational therapist) and 80171 (focussed psychological strategies via video conference – social worker) apply. These group services are separate from the individual services and do not count towards the 10 individual services per calendar year maximum associated with those items.

### **Clinical indications**

The clinical psychologist must be satisfied that it is clinically appropriate to provide a video consultation to a patient, or a group of 6 to 10 patients.

### **Restrictions**

The MBS telehealth attendance items are not payable for services to an admitted hospital patient (this includes hospital in the home patients). Benefits are not payable for telephone or email consultations. In order to fulfil the item descriptor there must be a visual and audio link between the patient and the remote clinical psychologist. If the remote clinical psychologist is unable to establish both a video and audio link with the patient, a MBS rebate for a telehealth attendance is not payable.

### **Billing Requirements**

All video consultations provided by clinical psychologists must be separately billed. That is, only the relevant telehealth MBS consultation item is to be itemised on the account/bill/voucher. Any other service/item billed should be itemised on a separate account/bill/voucher. This will ensure the claim is accurately assessed as being a video consultation and paid accordingly.

Clinical psychologists should not use the notation ‘telehealth’, ‘verbal consent’ or ‘Patient unable to sign’ to overcome administrative difficulties to obtaining a patient signature for bulk-billed claims (for further information see [mbsonline.gov.au/telehealth](http://mbsonline.gov.au/telehealth)).

### **Eligible Geographical Areas**

Geographic eligibility for psychological telehealth services funded under Medicare (in Groups M6 and M7) is determined according to the Modified Monash Model (MMM) classifications. Telehealth Eligible Areas are those areas that are within MMM classifications 4 to 7. Patients and providers are able to check their eligibility using the Modified Monash Model locator on the Department of Health’s website ([http://www.health.gov.au/internet/otd/publishing.nsf/Content/MMM\\_locator](http://www.health.gov.au/internet/otd/publishing.nsf/Content/MMM_locator)).

There is a requirement for the patient and clinical psychologist to be located a minimum of 15 kilometres apart at the time of the consultation. Minimum distance between clinical psychologist and patient video consultations are measured by the most direct (ie least distance) route by road. The patient or the clinical psychologist is not permitted to travel to an area outside the minimum 15 kilometres distance in order to claim a video consultation.

### **Record Keeping**

Participating telehealth clinical psychologists must keep contemporaneous notes of the consultation including documenting that the service was performed by video conference, the date, time and the people who participated.

Only clinical details recorded at the time of the attendance count towards the time of the consultation. It does not include information added at a later time, such as reports of investigations.

## **Extended Medicare Safety Net (EMSN)**

All telehealth consultations (with the exception of the participating optometrist telehealth items) are subject to EMSN caps. The EMSN caps for telehealth consultation items in Groups M6 and M7 are equal to 300% of the schedule fee (to a maximum of \$500).

## **Aftercare Rule**

Video consultations are subject to the same aftercare rules as clinical psychologists providing face-to-face consultations.

## **Multiple attendances on the same day**

In some situations a patient may receive a consultation via video conference and a face-to-face consultation by the same or different clinical psychologist on the same day.

Medicare benefits may be paid for more than one video consultation on a patient on the same day by the same clinical psychologist, provided the second (and any following) video consultations are not a continuation of the initial or earlier video consultations. Clinical psychologists will need to provide the times of each consultation on the patient's account or bulk-billing voucher.

## **Referrals**

The referral procedure for a video consultation is the same as for conventional face-to-face consultations.

## **Technical requirements**

In order to fulfil the item descriptor there must be a visual and audio link between the patient and the remote clinical psychologist. If the remote clinical psychologist is unable to establish both a video and audio link with the patient, a MBS rebate for a telehealth attendance is not payable.

Individual clinicians must be confident that the technology used is able to satisfy the item descriptor and that software and hardware used to deliver a videoconference meets the applicable laws for security and privacy.

## **MN.7.1 Provision of Focussed Psychological Strategies Services by Allied Health Providers - (Items 80100 to 80170)**

### **OVERVIEW**

The Better Access to Psychiatrists, Psychologists and General Practitioners through the Medicare Benefits Schedule initiative commenced on 1 November 2006. Under the Better Access initiative MBS items provide Medicare benefits for the following allied mental health services:

- g. psychological therapy (items 80000 to 80021) - provided by eligible clinical psychologists; and
- h. focussed psychological strategies – allied mental health (items 80100 to 80171) - provided by eligible psychologists, occupational therapists and social workers.

### **FOCUSSED PSYCHOLOGICAL STRATEGIES – ALLIED MENTAL HEALTH SERVICES ATTRACTING MEDICARE REBATES**

#### **Eligible focussed psychological strategies services**

There are 24 MBS items for the provision of focussed psychological strategies (FPS) - allied mental health services to eligible patients by allied health professionals:

- h. 80100, 80105, 80110, 80115 and 80120 for provision of FPS services by a psychologist;
- i. 80101, 80111 and 80121 for provision of video conference FPS services by a psychologist;
- j. 80125, 80130, 80135, 80140 and 80145 for provision of FPS services by an occupational therapist;

- k. 80126, 80136 and 80146 for provision of video conference FPS services by an occupational therapist;
- l. 80150, 80155, 80160, 80165 and 80170 for provision of FPS services by a social worker; and
- m. 80151, 80161 and 80171 for provision of video conference FPS services by a social worker.

The allied health professional must meet the provider eligibility requirements set out below and be registered with the Department of Human Services.

In these notes, 'GP' means a medical practitioner, including a general practitioner, but not including a specialist or consultant physician.

### **Referrals and Referral Validity**

Services provided under the focussed psychological strategies – allied mental health items will not attract a Medicare rebate unless:

- h. a referral has been made by a GP or medical practitioner who is managing the patient under a GP Mental Health Treatment Plan (GP items 2700, 2701, 2715, 2717 or medical practitioner items 272, 276, 281, 282);
- i. a referral has been made by a medical practitioner (including a general practitioner, but not a specialist or consultant physician) under a shared care plan;
- j. a referral has been made by a medical practitioner (including a general practitioner, but not a specialist or consultant physician) who is managing the patient under a referred psychiatrist assessment and management plan (item 291); or
- k. a referral has been made by a psychiatrist or paediatrician from an eligible psychiatric or paediatric service (see Referral Requirements for further details regarding psychiatrist and paediatrician referrals).

### **Number of services per year**

Medicare rebates are available for up to 10 individual allied mental health services in a calendar year. The 10 services may consist of: GP or medical practitioner focussed psychological strategies services (GP items 2721 to 2727 or medical practitioner items 283 to 287); and/or psychological therapy services (items 80000 to 80015); and/or focussed psychological strategies - allied mental health services (items 80100 to 80115; 80125 to 80140; 80150 to 80165).

Referrals should be provided, as required, for an initial course of treatment (a maximum of six services but may be less depending on the referral and patient need) to a maximum of 10 services per calendar year. For the purposes of these services, a course of treatment will consist of the number of services stated in the patient's referral (up to a maximum of six in any one referral).

Patients will also be eligible to claim up to 10 separate services within a calendar year for group therapy services involving 6-10 patients to which items 80020 (psychological therapy – clinical psychologist), 80021 (psychological therapy via video conference – clinical psychologist), 80120 (focussed psychological strategies – psychologist), 80121 (focussed psychological strategies via video conference – psychologist), 80145 (focussed psychological strategies – occupational therapist), 80146 (focussed psychological strategies via video conference – occupational therapist), 80170 (focussed psychological strategies - social worker) and 80171 (focussed psychological strategies via video conference – social worker) apply. These group services are separate from the individual services and do not count towards the 10 individual services per calendar year maximum associated with those items.

In the instance where a patient has received the 10 psychological therapy services (items 80000 to 80021), focussed psychological services-allied mental health services (items 80100 to 80171) or GP or medical practitioner focussed psychological strategies services (GP items 2721 to 2727 or medical practitioner items 283 to 287) available under the Better Access to Psychiatrists, Psychologists and General Practitioners through the Medicare Benefits Schedule initiative per calendar year and is considered to clinically benefit from some additional services, the patient may be eligible for Primary Health Networks (PHNs) funded psychological therapies if they meet relevant eligibility criteria for the PHN commissioned services. It is recommended that providers refer to their PHN for further guidance.

## **Service length and type**

Services provided by eligible allied health professionals under these items must be within the specified time period within the item descriptor. The allied mental health professional must personally attend the patient the patient face to face, or via video conference for items 80001, 80011, 80021, 80101, 80111, 80121, 80126, 80136, 80146, 80151, 80161 and 80171.

It is expected that professional attendances at places other than consulting rooms would be provided where treatment in other environments is necessary to achieve therapeutic outcomes.

A range of acceptable strategies has been approved for use by allied mental health professionals utilising the FPS items.

These are:

### **1. Psycho-education**

(including motivational interviewing)

### **2. Cognitive-behavioural therapy including:**

#### **• Behavioural interventions**

- Behaviour modification
- Exposure techniques
- Activity scheduling

#### **• Cognitive interventions**

- Cognitive therapy

### **3. Relaxation strategies**

- Progressive muscle relaxation
- Controlled breathing

### **4. Skills training**

- Problem solving skills and training
- Anger management
- Social skills training
- Communication training
- Stress management
- Parent management training

### **5. Interpersonal therapy** (especially for depression)

### **6. Narrative therapy** (for Aboriginal and Torres Strait Islander people).

## **Course of treatment and reporting back to the referring medical practitioner**

Patients are eligible to receive up to 10 individual services and up to 10 group sessions in a calendar year.

Within this maximum service allocation, the allied mental health professional can provide one or more courses of treatment. For the purposes of these services, a course of treatment consists of the number of services stated in the patient's referral (up to a maximum of six services in any one referral). This enables the referring medical practitioner to consider a report from the allied mental health professional on the services provided to the patient, and the need for further treatment.

On completion of the initial course of treatment, the allied mental health professional must provide a written report to the referring medical practitioner, which includes information on:

- l. assessments carried out on the patient;
- m. treatment provided; and
- n. recommendations on future management of the patient's disorder.

A written report must also be provided to the referring medical practitioner at the completion of any subsequent course(s) of treatment provided to the patient.

## **Out-of-pocket expenses and Medicare safety net**

Charges in excess of the Medicare benefit for these items are the responsibility of the patient. However, if a service was provided out of hospital, any out-of-pocket costs will count towards the Medicare safety net for that patient. The out-of-pocket costs for mental health services which are not Medicare eligible do not count towards the Medicare safety net.

### **Eligible patients**

Items 80100 to 80171 (inclusive) apply to people with an assessed mental disorder and where the patient is referred by a GP or medical practitioner who is managing the patient under a GP Mental Health Treatment Plan (GP items 2700, 2701, 2715, 2717 or medical practitioner items 272, 276, 281, 282) under a referred psychiatrist assessment and management plan (item 291) or Health Care Home shared care plan; or from an eligible psychiatrist or paediatrician.

The conditions classified as mental disorders for the purposes of these services are informed by the World Health Organisation, 1996, Diagnostic and Management Guidelines for Mental Disorders in Primary Care: ICD-10 Chapter V Primary Care Version. For the purposes of these items, dementia, delirium, tobacco use disorder and mental retardation are not regarded as a mental disorder.

### **Checking patient eligibility for focussed psychological strategies – allied mental health services**

Patients seeking Medicare rebates for focussed psychological strategies – allied mental health services will need to have a referral from a GP, medical practitioner, psychiatrist or paediatrician. If there is any doubt about a patient's eligibility, the Department of Human Services will be able to confirm whether a GP Mental Health Treatment Plan, Health Care Home shared care plan and/or a psychiatrist assessment and management plan is in place and claimed; or an eligible psychiatric or paediatric service has been claimed, as well as the number of allied mental health services already claimed by the patient during the calendar year.

Allied mental health professionals can call the Department of Human Services on 132 150 to check this information, while unsure patients can seek clarification by calling 132 011.

The patient will not be eligible if they have not been appropriately referred and a relevant Medicare service provided to them. If the referring service has not yet been claimed, the Department of Human Services will not be aware of the patient's eligibility. In this case the allied mental health professional should, with the patient's permission, contact the referring practitioner to ensure the relevant service has been provided to the patient.

### **Publicly funded services**

Focussed psychological strategies (FPS) services items 80100 to 80171 do not apply for services that are provided by any other Commonwealth or state funded services or provided to an admitted patient of a hospital. However, where an exemption under subsection 19(2) of the *Health Insurance Act 1973* has been granted to an Aboriginal Community Controlled Health Service or state/territory clinic, the FPS services items apply for services that are provided by eligible allied mental health professionals salaried by, or contracted to, the service as long as all requirements of the items are met, including registration with the Department of Human Services. These services must be direct billed (that is, the Medicare rebate is accepted as full payment for services).

### **Private health insurance**

Patients need to decide if they will use Medicare or their private health insurance ancillary cover to pay for these services. Patients cannot use their private health insurance ancillary cover to 'top up' the Medicare rebate paid for the services.

## **REFERRAL REQUIREMENTS (GPs, MEDICAL PRACTITIONERS, PSYCHIATRISTS OR PAEDIATRICIANS TO ALLIED MENTAL HEALTH PROFESSIONALS)**

### **Referrals**

Patients must be referred for focussed psychological strategies – allied mental health services by either a GP or medical practitioner managing the patient under a GP Mental Health Treatment Plan (GP items 2700, 2701, 2715, 2717 or medical practitioner items 272, 276, 281, 282), a Health Care Home shared care plan or referred by a medical practitioner (including a general practitioner, but not a specialist or consultant physician) who is managing the patient under a referred psychiatrist assessment and management plan (item 291); or on referral from a psychiatrist or a paediatrician.

Referrals from psychiatrists and paediatricians must be made from eligible Medicare services. For specialist psychiatrists and paediatricians these services include any of the specialist attendance items 104 through 109. For consultant physician psychiatrists the relevant eligible Medicare services cover any of the consultant psychiatrist items 293 through 370; while for consultant physician paediatricians the eligible services are consultant physician attendance items 110 through 133.

Referring practitioners are not required to use a specific form to refer patients for these services. The referral may be a letter or note to an eligible allied mental health professional signed and dated by the referring practitioner.

The allied mental health professional must be in receipt of the referral at the first allied mental health consultation. It is required that the allied health professional retain the referral for 24 months from the date the service was rendered (for the Department of Human Services auditing purposes).

### **Referral validity**

Medicare benefits are available for up to 10 individual and/or 10 group psychological therapy services and/or focussed psychological strategies services per patient per calendar year.

Referrals should be provided, as required, for an initial course of treatment (a maximum of six services but may be less depending on the referral and the patient's clinical need) to a maximum of 10 services per calendar year. For the purposes of these services, a course of treatment will consist of the number of services stated in the patient's referral (up to a maximum of six in any one referral).

If a patient has not used all of their psychological therapy services and/or focussed psychological strategies services under a referral in a calendar year, it is not necessary to obtain a new referral for the "unused" services. However, any "unused" services received from 1 January in the following year under that referral will count as part of the total of 10 services for which the patient is eligible in that calendar year.

When patients have used all of their referred services they will need to obtain a new referral from the referring practitioner if they are eligible for further services. Where the patient's care is being managed by a GP or medical practitioner, the GP/medical practitioner may choose to use this visit to undertake a review of the patient's GP Mental Health Treatment Plan, Home Health Care shared care plan and/or psychiatrist assessment and management plan.

It is not necessary to have a new GP Mental Health Treatment Plan, Home Health Care shared care plan and/or psychiatrist assessment and management plan prepared each calendar year in order to access a new referral(s) for eligible psychological therapy services and/or focussed psychological strategies services. Patients continue to be eligible for rebates for psychological therapy services and/or focussed psychological strategies services while they are being managed under a GP Mental Health Treatment Plan, Home Health Care shared care plan and/or a psychiatrist assessment and management plan as long as the need for eligible services continues to be recommended in their plan.

### **Health Care Home shared care plan**

A Health Care Home shared care plan means a written plan that is prepared for a patient enrolled at a Health Care Home trial site; is prepared by a medical practitioner (including a general practitioner but not including a specialist

or consultant physician) who is leading the patient's care at the Health Care Home trial site; and includes: an outline of the patient's agreed current and long-term goals; the person or people responsible for each activity; arrangements to review the plan by a day mentioned in the plan; and if authorised by the patient, arrangements for the transfer of information between the medical practitioner and other health care providers supporting patient care about the patient's condition or conditions and treatment. Additionally, a Health Care Home shared care plan must include a record of the patient's agreement to mental health services; an outline of assessment of the patient's mental disorder, including the mental health formulation and diagnosis or provisional diagnosis; and if appropriate, a plan for one or more of crisis intervention and relapse prevention.

## **ALLIED MENTAL HEALTH PROFESSIONAL ELIGIBILITY**

### **Eligible allied health professionals**

A person is an allied health professional in relation to the provision of a FPS service if the person meets one of the following requirements:

- m. the person is a psychologist who holds general registration in the health profession of psychology under the applicable law in force in the State or Territory in which the service is provided;
- n. the person is a member of the Australian Association of Social Workers (AASW) and certified by AASW as the meeting the standards for mental health set out in the document published by AASW titled 'Practice Standards for Mental Health Social Workers 2014' as in force on 25 September 2014;
- o. the person:
  - a. is an occupational therapist who is registered as a person who may provide that kind of service under the applicable law in force in the State or Territory in which the service is provided; and
  - b. is accredited by Occupational Therapy Australia as:
    - i. having a minimum of two years experience in mental health; and
    - ii. having undertaken to observe the standards set out in the document published by Occupational Therapy Australia's 'Australian Competency Standards for Occupational Therapists in Mental Health' as in force on 1 November 2006.

### **Continuing professional development (CPD) for Occupational Therapists and Social Workers providing focussed psychological strategies (FPS) services**

Occupational Therapists and Social Workers providing FPS services are required to have completed 10 hours FPS CPD.

A CPD year for the purposes of these items is from 1 July to 30 June annually.

Part-time allied mental health professionals are required to have 10 hours of FPS related CPD, the same as full-time allied mental health professionals.

Occupational Therapists and Social Workers who are registered during the course of the CPD year, their obligation to undertake CPD will be on a pro-rata basis. The amount of units will be calculated from the 1st of the month immediately succeeding the month they obtained initial registration. The obligation will be one-twelfth of the yearly requirement for each month.

CPD activities must be relevant to delivering FPS services. Acceptable CPD activities where the content is related to FPS can include formal postgraduate education, workshops, seminars, lectures, journal reading, writing papers, receipt of supervision and peer consultation, and online training.

There is flexibility in the CPD activities that can be undertaken to meet individual professional needs and their practice/client base and client needs. For example, activities could also include assessment and treatment of specific disorders and client types such as youth, or different modalities and delivery such as working with groups.

## **Registering with the Department of Human Services**

Advice about registering with the Department of Human Services to provide focussed psychological strategies - allied mental health services using items 80100-80171 inclusive is available from the Department of Human Services provider inquiry line on 132 150.

### **Further information**

For further information about Medicare Benefits Schedule items, please go to the Department of Health's website at [www.health.gov.au/mbsonline](http://www.health.gov.au/mbsonline)

For providers, further information is also available for providers from the Department of Human Services provider inquiry line on 132 150.

The Department of Human Services (DHS) has developed a Health Practitioner Guideline to substantiate that a valid Allied Mental Health service has been provided (for allied health professionals) which is located on the DHS website.

## **MN.7.2 Telehealth Focussed Psychological Strategies Services**

These notes provide information on the telehealth focussed psychological strategies MBS video consultation items by psychologists, occupational therapists and social workers. A video consultation involves a single psychologist, occupational therapist or social worker attending a patient, or a group of 6 to 10 patients.

MBS item numbers 80101, 80111, 80126, 80136, 80151 and 80161 provide for attendance via videoconferencing by a psychologist, occupational therapist or social worker to an individual patient. MBS item numbers 80121, 80146 and 80171 provide for attendance via videoconferencing by a psychologist, occupational therapist or social worker to a group of 6 to 10 patients. The items are stand-alone items and do not have a derived fee.

These therapies are time limited, being deliverable in up to 10 planned sessions in a calendar year (including services to which items 80001, 80011, 80101, 80111, 80126, 80136, 80151 and 80161 apply).

Patients will also be eligible to claim up to 10 separate services within a calendar year for group therapy services involving 6-10 patients to which items 80021 (psychological therapy via video conference – clinical psychologist), 80121 (focussed psychological strategies via video conference – psychologist), 80146 (focussed psychological strategies via video conference – occupational therapist) and 80171 (focussed psychological strategies via video conference – social worker) apply. These group services are separate from the individual services and do not count towards the 10 individual services per calendar year maximum associated with those items.

### **Clinical indications**

The psychologist, occupational therapist or social worker must be satisfied that it is clinically appropriate to provide a video consultation to a patient, or a group of 6 to 10 patients.

### **Restrictions**

The MBS telehealth attendance items are not payable for services to an admitted hospital patient (this includes hospital in the home patients). Benefits are not payable for telephone or email consultations. In order to fulfil the item descriptor there must be a visual and audio link between the patient and the remote psychologist, occupational therapist or social worker. If the remote psychologist, occupational therapist or social worker is unable to establish both a video and audio link with the patient, a MBS rebate for a telehealth attendance is not payable.

### **Billing Requirements**

All video consultations provided by psychologists, occupational therapists or social workers must be separately billed. That is, only the relevant telehealth MBS consultation item is to be itemised on the account/bill/voucher. Any other service/item billed should be itemised on a separate account/bill/voucher. This will ensure the claim is accurately assessed as being a video consultation and paid accordingly.

Psychologists, occupational therapists or social workers should not use the notation 'telehealth', 'verbal consent' or 'Patient unable to sign' to overcome administrative difficulties to obtaining a patient signature for bulk-billed claims (for further information see [mbsonline.gov.au/telehealth](http://mbsonline.gov.au/telehealth)).

### **Eligible Geographical Areas**

Geographic eligibility for psychological telehealth services funded under Medicare (in Groups M6 and M7) is determined according to the Modified Monash Model (MMM) classifications. Telehealth Eligible Areas are those areas that are within MMM classifications 4 to 7. Patients and providers are able to check their eligibility using the Modified Monash Model locator on the Department of Health's website ([http://www.health.gov.au/internet/otd/publishing.nsf/Content/MMM\\_locator](http://www.health.gov.au/internet/otd/publishing.nsf/Content/MMM_locator)).

There is a requirement for the patient and psychologist, occupational therapist or social worker to be located a minimum of 15 kilometres apart at the time of the consultation. Minimum distance between psychologist, occupational therapist or social worker and patient video consultations are measured by the most direct (ie least distance) route by road. The patient or the psychologist, occupational therapist or social worker is not permitted to travel to an area outside the minimum 15 kilometres distance in order to claim a video consultation.

### **Record Keeping**

Participating telehealth psychologists, occupational therapists and social workers must keep contemporaneous notes of the consultation including documenting that the service was performed by video conference, the date, time and the people who participated.

Only clinical details recorded at the time of the attendance count towards the time of the consultation. It does not include information added at a later time, such as reports of investigations.

### **Extended Medicare Safety Net (EMSN)**

All telehealth consultations (with the exception of the participating optometrist telehealth items) are subject to EMSN caps. The EMSN caps for telehealth consultation items in Groups M6 and M7 are equal to 300% of the schedule fee (to a maximum of \$500).

### **Aftercare Rule**

Video consultations are subject to the same aftercare rules as psychologists, occupational therapists and social workers providing face-to-face consultations.

### **Multiple attendances on the same day**

In some situations a patient may receive a consultation via video conference and a face-to-face consultation by the same or different psychologist, occupational therapist or social worker on the same day.

Medicare benefits may be paid for more than one video consultation on a patient on the same day by the same psychologist, occupational therapist or social worker, provided the second (and any following) video consultations are not a continuation of the initial or earlier video consultations. Psychologists, occupational therapists and social workers will need to provide the times of each consultation on the patient's account or bulk-billing voucher.

### **Referrals**

The referral procedure for a video consultation is the same as for conventional face-to-face consultations.

### **Technical requirements**

In order to fulfil the item descriptor there must be a visual and audio link between the patient and the remote psychologist, occupational therapist or social worker. If the remote clinical psychologist is unable to establish both a video and audio link with the patient, a MBS rebate for a telehealth attendance is not payable.

Individual clinicians must be confident that the technology used is able to satisfy the item descriptor and that software and hardware used to deliver a videoconference meets the applicable laws for security and privacy.

### **MN.8.1 Pregnancy Support Counselling - Eligible Patients - (Items 81000 to 81010)**

Medicare benefits are available for non-directive pregnancy support counselling services provided to a person who is pregnant or who has been pregnant in the 12 months preceding the first service to which item 81000, 81005 or 81010 applies in relation to that pregnancy. Services can be provided either by an eligible GP or by an eligible psychologist, social worker or mental health nurse on referral from a GP.

The term 'GP' is used hereafter as a generic reference to medical practitioners (including a general practitioner, but not including a specialist or consultant physician).

The items may be used to address any pregnancy related issues for which non-directive counselling is appropriate.

### **MN.8.2 Pregnancy Support Counselling - Eligible Services - (Items 81000 to 81010)**

There are four MBS items for the provision of non-directive pregnancy support counselling services:

Item 4001 - services provided by an eligible GP;

Item 81000 - services provided by an eligible psychologist;

Item 81005 - services provided by an eligible social worker; and

Item 81010 - services provided by an eligible mental health nurse.

These notes relate to items 81000-81010. Each individual allied health professional must meet the provider eligibility requirements set out below and be registered with the Department of Human Services.

#### **Service length and type**

Non-directive pregnancy support counselling services provided by eligible psychologists, social workers and mental health nurses using items 81000-81010 inclusive must be of at least 30 minutes duration and provided to an individual patient. The allied health professional must personally attend the patient.

The service involves the psychologist, social worker or mental health nurse undertaking a safe, confidential process that helps the patient explore concerns they have about a current pregnancy or a pregnancy that occurred in the preceding 12 months. This includes providing, on request, unbiased, evidence-based information about all options and services available to the patient.

Non-directive counselling is a form of counselling that is based on the understanding that, in many situations, people can resolve their own problems without being provided with a solution by the counsellor. The counsellor's role is to encourage the person to express their feelings but not suggest what decision the person should make. By listening and reflecting back what the person reveals to them, the counsellor helps them to explore and understand their feelings. With this understanding, the person is able to make the decision that is best for them.

#### **Number of services per year**

Medicare benefits are available for up to three (3) eligible non-directive pregnancy support counselling services per patient, per pregnancy, provided using items 81000, 81005, 81010 and 4001.

Partners of eligible patients may attend each or any counselling session, however, only one fee applies to each service.

## **Out-of-pocket expenses and Medicare Safety Net**

Charges in excess of the Medicare benefit for these items are the responsibility of the patient. However, such out-of-pocket costs will count toward the Medicare safety net for that patient. Non-directive pregnancy support counselling services in excess of three (3) per pregnancy will not attract a Medicare benefit and the safety net arrangements will not apply to costs incurred by the patient for such services.

## **Publicly funded services**

Items 81000, 81005 and 81010 do not apply for services that are provided by any other Commonwealth or State funded services or provided to an admitted patient of a hospital.

However, where an exemption under subsection 19(2) of the *Health Insurance Act 1973* has been granted to an Aboriginal Community Controlled Health Service or State/Territory clinic, items 81000, 81005 and 81010 can be claimed for services provided by an eligible psychologist, social worker or mental health nurse salaried by or contracted to the service, where all requirements of the relevant item are met, including registration with the Department of Human Services. These services must be direct billed (that is, the Medicare rebate is accepted as full payment for services).

## **Private health insurance**

Patients need to decide if they will use Medicare or their private health insurance ancillary cover to pay for these services. Patients cannot use their private health insurance ancillary cover to 'top up' the Medicare rebate paid for the services.

## **MN.8.3 Pregnancy Support Counselling - Referral Requirements - (Items 81000 to 81010)**

Patients must be referred for non-directive pregnancy support counselling services by a GP or medical practitioner. GPs/medical practitioners are not required to use a specific form to refer patients for these services. The referral may be a letter or note to an eligible allied health professional signed and dated by the referring GP/medical practitioner.

Patients may be referred by a GP or medical practitioner to more than one eligible allied health professional for eligible non-directive pregnancy support counselling services (for example, where a patient does not wish to continue receiving services from the provider they were referred to in the first instance). However, Medicare benefits are only available for a maximum of three (3) non-directive pregnancy support counselling services to which items 792, 4001, 81000, 81005 and 81010 apply, per patient, per pregnancy.

Where the patient is unsure of the number of Medicare rebated non-directive pregnancy support counselling services they have already accessed, the patient may check with the Department of Human Services on 132 011. Alternatively, the psychologist, social worker or mental health nurse may check with the Department of Human Services.

The relevant allied health professional must be in receipt of the referral at the first non-directive pregnancy support counselling service and must retain the referral for 2 years from the date the service was rendered, for the Department of Human Services auditing purposes.

A copy of the referral is not required to accompany Medicare claims. However, referral details are required to be included on patients' itemised accounts/receipts or Medicare assignment of benefit forms.

## **Referral validity**

The referral is valid for up to three (3) non-directive pregnancy support counselling services, per patient, per pregnancy.

## **Subsequent Referrals**

A new referral is required where the patient seeks to access non-directive pregnancy support counselling in relation to a different pregnancy or where the patient wishes to be referred to a different allied health professional than the one they were referred to in the first instance.

### **MN.8.4 Pregnancy Support Counselling - Allied Health Professional Eligibility -(Items 81000 to 81010)**

#### **Eligible allied health professionals**

Items 81000, 81005 and 81010 can only be claimed for services provided by psychologists, social workers and mental health nurses who meet the following specific eligibility requirements, and are registered with the Department of Human Services.

To be eligible to provide services using MBS Item 81000, a psychologist must hold general registration in the health profession of psychology under the applicable law in force in the State or Territory in which the service is provided and be certified by the Australian Psychological Society as appropriately trained in non-directive pregnancy counselling.

To be eligible to provide services using MBS Item 81005, a social worker must be a 'Member' of the Australian Association of Social Workers (AASW), be certified by AASW either as meeting the standards for mental health set out in the document published by AASW titled 'Practice Standards for Mental Health Social Workers 2014' as in force on 25 September 2014 or as an Accredited Social Worker, and have completed appropriate non-directive pregnancy counselling training;

To be eligible to provide services using MBS Item 81010, a mental health nurse must be a 'Credentialled Mental Health Nurse' as certified by the Australian College of Mental Health Nurses, and have completed appropriate non-directive pregnancy counselling training.

#### **Registering with the Department of Human Services**

Advice about registering with the Department of Human Services to provide non-directive pregnancy support counselling services using items 81000-81010 inclusive is available from the Department of Human Services provider inquiry line on 132 150.

#### **Further information**

A copy of the Medicare Allied Health Supplement can be accessed from [www.health.gov.au/mbsonline](http://www.health.gov.au/mbsonline). The Supplement includes more information about Medicare, including how to make a claim from Medicare.

Further information is also available for providers from the Department of Human Services provider inquiry line on 132 150.

### **MN.9.1 Group Allied Health Services (Items 81100 to 81125) for People with Type 2 Diabetes - Eligible Patients**

MBS items (81100 to 81125) are available for group allied health services for patients with type 2 diabetes. These items apply to services provided by eligible diabetes educators, exercise physiologists and dietitians, on referral from a GP or medical practitioner.

Services available under these items are in addition to the five individual allied health services available to patients each calendar year (refer to items 10950 to 10970).

To be eligible for these services, the patient must have in place one of the following:

- a GP Management Plan (GPMP) (GP item 721 or medical practitioner item 229); OR

- for a resident of a residential aged care facility, the GP or medical practitioner must have contributed to, or contributed to a review of, a care plan prepared for them by the facility (GP item 731 or medical practitioner item 232). [Note: Generally, residents of an aged care facility rely on the facility for assistance to manage their type 2 diabetes. Therefore, the resident may not need to be referred for group allied health services under these items, as the self-management approach offered in group services may not be appropriate.]; OR
- a Health Care Home shared care plan.

Unlike the individual allied health services under items 10950 to 10970, there is no additional requirement for a Team Care Arrangement (GP item 723 or medical practitioner item 230) in order for the patient to be referred for group allied health services.

Once the patient has been referred by their GP or medical practitioner, a diabetes educator, exercise physiologist or dietitian will conduct an individual assessment (under items 81100, 81110 or 81120). A maximum of one (1) assessment service is available per calendar year. After assessment, the patient may receive up to eight (8) group services per calendar year from an eligible diabetes educator, exercise physiologist and/or dietitian (under items 81105, 81115 and 81125). A collaborative approach, where diabetes educators, exercise physiologists and dietitians work together to develop group service programs in their local area, is encouraged.

### **MN.9.2 Group Allied Health Services (Items 81100 to 81125) for People with Type 2 Diabetes - GP Referral Requirements**

Patients must be referred by their GP to an eligible allied health professional (diabetes educator, exercise physiologist or dietitian) who will undertake an individual assessment of their suitability for a group services program (under item 81100, 81110 or 81120).

When referring patients, **GPs** must use a referral form that has been issued by the Australian Government Department of Health or a Health Care Home shared care plan or a form that contains all the components of this form. The form issued by the department is available at <http://www.health.gov.au/mbsprimarycareitems> (click on the link for group allied health services).

GPs are also encouraged to provide a copy of the relevant part of the patient's care plan to the allied health professional.

#### **Health Care Home shared care plan**

A Health Care Home shared care plan means a written plan that is prepared for a patient enrolled at a Health Care Home trial site; is prepared by a medical practitioner (including a general practitioner but not including a specialist or consultant physician) who is leading the patient's care at the Health Care Home trial site; and includes: an outline of the patient's agreed current and long-term goals; the person or people responsible for each activity; arrangements to review the plan by a day mentioned in the plan; and if authorised by the patient, arrangements for the transfer of information between the medical practitioner and other health care providers supporting patient care about the patient's condition or conditions and treatment.

### **MN.9.3 Group Allied Health Services (Items 81100 to 81125) for People with Type 2 Diabetes - Eligible Allied Health Professionals**

Items 81100 to 81125 only apply to services provided by eligible diabetes educators, exercise physiologists and dietitians who are registered with the Department of Human Services. If providers are already registered with the Department of Human Services to use item 10951, 10953 or 10954, they do not need to register separately for items 81100 to 81125. Eligibility criteria are as follows:

**Diabetes educator:** must be a 'credentialed diabetes educator' (CDE) as credentialed by the Australian Diabetes Educators Association (ADEA).

**Exercise physiologist:** must be an 'accredited exercise physiologist' as accredited by Exercise and Sports Science Australia (ESSA).

**Dietitian:** must be an 'accredited practising dietitian' as recognised by the Dietitians Association of Australia (DAA).

The Department of Human Services registration forms may be obtained from the Department of Human Services on 132 150 or at the [Department of Human Services' website](#).

#### **MN.9.4 Assessment for Group Allied Health Services (Items 81100, 81110 and 81120) for People with Type 2 Diabetes**

An assessment service is provided by a diabetes educator (item 81100), an exercise physiologist (item 81110) or a dietitian (item 81120), on referral from a GP.

The purpose of this service is to undertake an individual assessment and determine the patient's suitability for a group services program. It involves taking a comprehensive patient history and identification of individual goals. This may also provide an opportunity to identify any patient who is likely to be unsuitable for group services.

#### **Number of services per year**

Patients are eligible for a maximum of one assessment for group services (item 81100 **or** 81110 **or** 81120) per calendar year. If more than one assessment service is provided in a calendar year, the subsequent service/s will not attract a Medicare rebate and the MBS Safety Net arrangements will not apply to costs incurred by the patient for the service/s.

If there is any doubt about a patient's eligibility for items 81100, 81110 or 81120, the allied health professional should contact the Department of Human Services to confirm the number of assessment services already claimed by the patient in the calendar year. Allied health professionals can call the Department of Human Services on 132 150 to check this information.

#### **Referral form**

The GP must refer the patient using the *Referral form for group allied health services under Medicare for patients with type 2 diabetes* or a Health Care Home shared care plan or a form that contains all the components of this form. The form issued by the department is available at <http://www.health.gov.au/mbsprimarycareitems> (click on the link for group allied health services).

The allied health professional undertaking the assessment service will need to complete Part B of this form, and the patient will then need to present this form to the provider/s of group services.

#### **Health Care Home shared care plan**

A Health Care Home shared care plan means a written plan that is prepared for a patient enrolled at a Health Care Home trial site; is prepared by a medical practitioner (including a general practitioner but not including a specialist or consultant physician) who is leading the patient's care at the Health Care Home trial site; and includes: an outline of the patient's agreed current and long-term goals; the person or people responsible for each activity; arrangements to review the plan by a day mentioned in the plan; and if authorised by the patient, arrangements for the transfer of information between the medical practitioner and other health care providers supporting patient care about the patient's condition or conditions and treatment.

#### **Length of service**

This service must be of at least 45 minutes duration and provided to an individual patient. The allied health professional must personally attend the patient.

## **Reporting requirements**

On completion of the assessment service, the allied health professional must provide a written report back to the referring GP outlining the assessment undertaken, whether the patient is suitable for group services and, if so, the nature of the group services to be delivered.

### **MN.9.5 Group Allied Health Services (Items 81105, 81115 and 81125) for People with Type 2 Diabetes - Service Requirements and Referral Forms**

These services are provided in a group setting to assist with the management of type 2 diabetes.

#### **Number of services per year**

Patients are eligible for up to eight group allied health services in total (items 81105, 81115 and 81125 inclusive) per calendar year. Each separate group service must be provided to the patient by only one type of allied health professional (i.e. by a diabetes educator, or by an exercise physiologist or by a dietitian). However, the overall group services program provided for the patient could be comprised of one type of service only (e.g. eight diabetes education services) or a combination of services (e.g. three diabetes education services, three dietitian services and two exercise physiology services). An eligible allied health professional with more than one Medicare provider number (e.g. for the provision of diabetes education and dietetics) may provide separate services under each of these provider numbers.

Group allied health service providers are strongly encouraged to deliver multidisciplinary group services programs that allow patients to benefit from a range of interventions designed to assist in the management of their type 2 diabetes.

Where a patient receives more than the limit of eight group services in a calendar year, the additional service/s will not attract a Medicare benefit and the MBS Safety Net arrangements will not apply to costs incurred by the patient for the service/s.

If there is any doubt about a patient's eligibility for group services, the allied health professional should contact the Department of Human Services to confirm the number of group services already claimed by the patient in the calendar year. Allied health professionals can call the Department of Human Services on 132 150 to check this information.

#### **Multiple services on the same day**

Where clinically relevant, up to two group services may be provided consecutively on the same day by the same allied health professional.

#### **Referral form**

The allied health professional/s undertaking the group services will need to receive the *Referral form for group allied health services under Medicare for patients with type 2 diabetes issued by the Department of Health* or the Health Care Home shared care plan or a form that contains all the components of this form, with Part B completed by the provider who has undertaken the assessment service. The form issued by the department is available at <http://www.health.gov.au/mbsprimarycareitems> (click on the link for group allied health services).

#### **Health Care Home shared care plan**

A Health Care Home shared care plan means a written plan that is prepared for a patient enrolled at a Health Care Home trial site; is prepared by a medical practitioner (including a general practitioner but not including a specialist or consultant physician) who is leading the patient's care at the Health Care Home trial site; and includes: an outline of the patient's agreed current and long-term goals; the person or people responsible for each activity; arrangements to review the plan by a day mentioned in the plan; and if authorised by the patient, arrangements for the transfer of information between the medical practitioner and other health care providers supporting patient care about the patient's condition or conditions and treatment.

### **Group size**

The service must be provided to a person who is part of a group of between two and 12 persons.

### **Length of service**

Each group service must be of at least 60 minutes duration.

### **Reporting requirements**

On completion of the group services program, each allied health professional must provide, or contribute to, a written report back to the referring GP in respect of each patient. The report should describe the group services provided for the patient and indicate the outcomes achieved. While each allied health professional is required to provide feedback to the GP in relation to the group services that they provide to the patient, allied health professionals involved in the provision of a multidisciplinary program are encouraged to combine feedback into a single report to the referring GP.

## **MN.9.6 Group Allied Health Services (Items 81100 to 81125) for People with Type 2 Diabetes - Additional Requirements**

Retention of Referral Form for the Department of Human Services Audit Purposes

It is recommended that Allied health professionals retain a copy of the referral form for 24 months from the date the service was rendered (for the Department of Human Services auditing purposes).

### **Publicly funded services**

Items 81100 - 81125 do not apply for services that are provided by any other Commonwealth or state-funded services or provided to an admitted patient of a hospital. However, where an exemption under subsection 19(2) of the *Health Insurance Act 1973* has been granted to an Aboriginal Community Controlled Health Service or a state/territory government health clinic, items 81100-81125 can be claimed for services provided by eligible allied health professionals salaried by, or contracted to, service or health clinic. All requirements of the relevant item must be met, including registration of the allied health professional with the Department of Human Services. These services must also be bulk billed.

### **Private health insurance**

Patients need to decide if they will use Medicare or their private health insurance ancillary cover to pay for these services. Patients cannot use their private health insurance ancillary cover to 'top up' the Medicare rebate paid.

### **Out-of-pocket expenses and Medicare Safety Net**

Allied health professionals are free to determine their own fees for the professional service. Charges in excess of the Medicare benefit for the allied health items are the responsibility of the patient. However, such out of pocket costs will count toward the Medicare Safety Net for that patient.

## **MN.9.7 Group Allied Health Services (Items 81100 to 81125) for People with Type 2 Diabetes - Further Information**

Further information about these items is available on the Department of Health's website at [www.health.gov.au/mbsprimarycareitems](http://www.health.gov.au/mbsprimarycareitems)

## **MN.10.1 Provision of Autism, Pervasive Developmental Disorder or Disability Services by Allied Health Professionals - (Items 82000 to 82035)**

**Eligible patients**

MBS items 82000 to 82035 provide Medicare-rebateable allied health services to children with autism or any other pervasive developmental disorder (PDD) through the Helping Children with Autism program, and to children with an eligible disability through the Better Start for Children with Disability program. Children with both autism/PDD and an eligible disability can access either program, but not both.

The conditions classified as PDD in 2008 for the purposes of these services were informed by the American Psychiatric Association: Diagnostic and Statistical Manual of Mental Disorders, Fourth Edition (DSM-IV-TR), Washington, DC, American Psychiatric Association, 2000.

'Eligible disabilities' for the purpose of these services means any of the following conditions:

- (a) sight impairment that results in vision of less than or equal to 6/18 vision or equivalent field loss in the better eye, with correction.
- (b) hearing impairment that results in:
  - (iii) a hearing loss of 40 decibels or greater in the better ear, across 4 frequencies; or
  - (iv) permanent conductive hearing loss and auditory neuropathy.
- (c) deafblindness
- (d) cerebral palsy
- (e) Down syndrome
- (f) Fragile X syndrome
- (g) Prader-Willi syndrome
- (h) Williams syndrome
- (i) Angelman syndrome
- (j) Kabuki syndrome
- (k) Smith-Magenis syndrome
- (l) CHARGE syndrome
- (m) Cri du Chat syndrome
- (n) Cornelia de Lange syndrome
- (o) microcephaly if a child has:
  - (iii) a head circumference less than the third percentile for age and sex; and
  - (iv) a functional level at or below 2 standard deviations below the mean for age on a standard developmental test, or an IQ score of less than 70 on a standardised test of intelligence.
- (p) Rett's disorder

"standard developmental test" refers to the Bayley Scales of Infant Development or the Griffiths Mental Development Scales; "standardised test of intelligence" means the Wechsler Intelligence Scale for Children (WISC) or the Wechsler Preschool and Primary Scale of Intelligence (WPPSI). It is up to the clinical judgement of the diagnosing practitioner if other tests are appropriate to be used.

## **Allied health services available under Medicare**

Items are available for **assessment/diagnosis** services, the results of which can contribute to development of a treatment and management plan by the referring medical practitioner, and for **treatment** services.

The **assessment/diagnosis** items (82000, 82005, 82010, 82030) can be accessed when:

- a child with autism/PDD is aged under 13 years and referred by an eligible consultant psychiatrist or paediatrician; or
- a child with an eligible disability is aged under 13 years and referred by a specialist, consultant physician or GP.

The **treatment** items (82015, 82020, 82025 and 82035) can be accessed when:

- A child with autism/PDD is aged under 15 years and a treatment and management plan has been put in place for them before their 13th birthday, and they have been referred by an eligible consultant psychiatrist or paediatrician.
- A child with an eligible disability is aged under 15 years and a treatment and management plan has been put in place for them before their 13th birthday, and they have been referred by a specialist, consultant physician or GP.

The allied health assessment and treatment services can be provided by eligible audiologists, occupational therapists, optometrists, orthoptists, physiotherapists, psychologists and speech pathologists.

### **Number of assessment services**

Medicare rebates are available for up to four services in total per eligible child, to assist with assessment and diagnosis and development of a treatment plan. The four services may consist of any combination of items 82000, 82005, 82010 and 82030. It is the responsibility of the referring practitioner to allocate these services in keeping with the child's individual needs and to refer the child to appropriate allied health professional(s) accordingly.

These services will not attract a Medicare rebate unless a referral has been made by a consultant psychiatrist (using items 296-370) or paediatrician (using items 110-131) for a child with autism/PDD, or by a specialist or consultant physician (using items 104-131 or 296-370 excluding item 359) or GP (using items 3-51) for a child with a disability.

### **Number of treatment services**

Medicare rebates are available for up to twenty allied health treatment services in total per eligible child. The twenty services may consist of any combination of items 82015, 82020, 82025 and 82035. It is the responsibility of the referring practitioner to allocate these services in keeping with the child's individual treatment needs and to refer the child to appropriate allied health professional(s) accordingly.

These services will not attract a Medicare rebate unless referral has been made by a consultant psychiatrist (using item 289) or paediatrician (using item 135) for children with autism/PDD, or by a specialist or consultant physician (using item 137) or a GP for disability (using item 139) for children with disability.

### **Service length and type**

Services under these items must be for the time period specified within the item descriptor. The allied health professional must personally attend the child.

A child may receive up to four Medicare eligible services from an allied health professional on the same day.

It is anticipated that professional attendances at places other than consulting rooms would be provided where treatment in other environments is necessary to achieve therapeutic outcomes.

It is also expected that participating allied health providers will deliver treatment under these items that is consistent with the autism/PDD or disability treatment plan prepared by the medical practitioner, and is in keeping with commonly established autism/PDD or disability interventions as practised by their profession and appropriate for the age and particular needs of the child being treated.

### **Eligible allied health professionals**

Allied health professionals providing services under these items must be registered with the Department of Human Services. To register with the Department of Human Services to provide these services, an allied health professional must meet the specific eligibility requirements detailed below:

- **Audiologist** must be either a 'Full Member' of the Audiological Society of Australia Inc (ASA), who holds a 'Certificate of Clinical Practice' issued by the ASA; or an 'Ordinary Member - Audiologist' or 'Fellow Audiologist' of the Australian College of Audiology (ACAud).
- **Occupational Therapist** must be registered with the Occupational Therapy Board of Australia.
- **Optometrist** must be registered as an optometrist or optician under a law of a State or an internal Territory that provides for the registration of optometrists or opticians, and be a participating optometrist.
- **Orthoptist** must be registered with the Australian Orthoptic Board and have a Certificate of Currency; and be a member of Orthoptics Australia.
- **Physiotherapist** must be registered with the Physiotherapy Board of Australia.
- **Psychologist** must hold General Registration with the Psychology Board of Australia.
- **Speech Pathologist** must be a 'Practising Member' of Speech Pathology Australia.

In addition to meeting the above mentioned credentialing requirements, it is expected that eligible providers will "self-select" for the autism/PDD and disability items (i.e. possess the skills and experience appropriate for provision of these services and be oriented to work with children with autism/PDD or disability).

### **Referral requirements**

An allied health professional wanting to provide any of the items 82000-82035 must be in receipt of a current referral provided by an eligible medical practitioner. Referrals are only valid when prerequisite MBS services have been provided.

An eligible allied health professional can provide assessment items (82000, 82005, 82010 and 82030) to a child under the Helping Children with Autism program when:

- the child has previously been provided with any MBS service covering items 110 through 131 inclusive by a consultant paediatrician; or
- the child has previously been provided with any MBS service covering items 296 through 370 (excluding item 359) inclusive by a consultant psychiatrist.

An eligible allied health professional can provide assessment items (82000, 82005, 82010 and 82030) to a child under the Better Start for Children with Disability program when:

- the child has previously been provided with any MBS service covering items 104 through 131 inclusive, or items 296 through 370 (excluding item 359) inclusive by a specialist or consultant physician; or
- the child has previously been provided with any MBS service covering items 3 through 51 by a GP.

An eligible allied health professional can provide treatment items (82015-82025 and 82035) to a child under the Helping Children with Autism program when:

- the child has previously been provided with a treatment plan (item 135) by a consultant paediatrician; or
- the child has previously been provided with a treatment plan (item 289) by a consultant psychiatrist.

An eligible allied health professional can provide treatment items (82015-82025 and 82035) to a child under the Better Start for Children with Disability program when:

- the child has previously been provided with a treatment plan (MBS item 137) by a specialist or consultant physician; or
- the child has previously been provided with a treatment plan (MBS item 139) by a GP.

If the referring service has not yet been claimed, the Department of Human Services (DHS) will not be aware of the child's eligibility and Medicare benefits cannot be paid. DHS will be able to confirm whether a relevant MBS service has been claimed and/or the number of allied health services already claimed by the child. Allied health professionals can call the DHS provider line on 132 150. Parents and carers can call the patient information line on 132 011.

It is recommended that allied health professionals retain the referral for 24 months from the date the service was rendered for Medicare auditing purposes.

Referring medical practitioners are not required to use a specific form to refer patients for these services. The referral may be a letter or note to an eligible allied health professional signed and dated by the referring practitioner.

### **Referral validity**

Medicare benefits are available for up to four allied health assessment and diagnosis services and up to twenty allied health treatment services per patient in total.

Patients will require a separate referral for each allied health professional they are referred to and they will also need new referrals for each new course of treatment.

A course of treatment for the allied health treatment services consists of the number of allied health services stated on the child's referral. This enables the referring practitioner to consider a report from the allied health professional(s) about the services provided to the child, and the need for further treatment.

Within the maximum service allocation of twenty services for the treatment items, the allied health professional(s) can provide one or more courses of treatment. Up to 4 services may be provided to the same child on the same day.

### **Reporting requirements**

A written report must be provided to the referring medical practitioner by the allied health professional(s) after having provided the assessment and diagnosis and development of a treatment plan service(s) to the child.

On completion of a course of treatment, the eligible audiologist, occupational therapist, optometrist, orthoptist, physiotherapist, psychologist and speech pathologist must provide a written report to the referring medical practitioner which includes information on:

- treatment provided;
- recommendations on future management of the child's disorder; and
- any advice provided to third parties (e.g. parents, schools).

A written report must also be provided to the referring medical practitioner at the completion of any subsequent course(s) of treatment provided to the child.

## **Further information**

For more information refer to the [MBS online website](#) or the [MBS Primary Care Items](#) information page.

### **MN.11.1 Follow-up Allied Health Services for people of Aboriginal or Torres Strait Islander descent (Items 81300 to 81360)**

#### **Eligible Patients**

A person who is of Aboriginal or Torres Strait Islander descent may be referred by their GP for follow-up allied health services under items 81300 to 81360 when the GP has undertaken a health assessment or a Health Care Home shared care plan and identified a need for follow-up allied health services.

These items are similar to the individual allied health items (items 10950 to 10970) available to patients who have a chronic or terminal medical condition and complex care needs and have a GP Management Plan and Team Care Arrangements or a Health Care Home shared care plan prepared by their GP. However items 81300 to 81360 provide an alternative referral pathway for Aboriginal or Torres Strait Islander people to access allied health services. If a patient meets the eligibility criteria for individual allied health services under the Chronic Disease Management items or the Health Care Home shared care plan and for follow-up allied health services, they can access both sets of services and are eligible for up to ten allied health services under Medicare per calendar year.

A practice nurse/Aboriginal and Torres Strait Islander health practitioner item (10987) is also available for Indigenous Australians who have received a health check. This item enables Aboriginal or Torres Strait Islander people to receive follow-up services from a practice nurse or Aboriginal and Torres Strait Islander health practitioner on behalf of a GP. More detail on this item is provided at explanatory note M.12.4 of the Medicare Benefits Schedule.

#### **Eligible Allied Health Services**

The following allied health professionals are eligible to provide services under these items:

- Aboriginal and Torres Strait Islander health practitioners
- Aboriginal Health Workers
- Audiologists
- Chiropractors
- Diabetes Educators
- Dietitians
- Exercise Physiologists
- Mental Health Workers
- Occupational Therapists
- Osteopaths
- Physiotherapists
- Podiatrists
- Psychologists
- Speech Pathologists

### **Publicly funded services**

Items 81300 to 81360 do not apply for services that are provided by any Commonwealth or state or territory government funded services or provided to an admitted patient of a hospital. However, where an exemption under subsection 19(2) of the Health Insurance Act 1973 has been granted to an Aboriginal Community Controlled Health Service or state/territory government health clinic, items 81300 to 81360 can be claimed for services provided by eligible allied health professionals salaried by, or contracted to, the service or health clinic. All requirements of the relevant item must be met, including registration of the allied health professional with the Department of Human Services. Medicare services provided under a subsection 19(2) exemption must be bulk billed (i.e. the Medicare rebate is accepted as full payment for services).

### **Number of services per year**

Medicare benefits are available for up to five follow-up allied health services per eligible patient, per calendar year. The five allied health services can be made up of one type of service (e.g. five physiotherapy services) or a combination of different types of services (e.g. one dietetic, two podiatry and two physiotherapy services).

The annual limit of five allied health services per patient under items 81300 to 81360 is in addition to the individual allied health services for patients with a chronic or terminal medical condition and complex care needs (items 10950 to 10970).

### **Checking patient eligibility for items 81300 to 81360**

If there is any doubt about a patient's eligibility, the Department of Human Services will be able to confirm the number of allied health services already claimed by the patient during the calendar year. Allied health professionals can call the Department of Human Services on 132 150 and patients can call the Department of Human Services on 132 011 or alternatively the Indigenous Access Line for the Department of Human Services on 1800 556 955.

### **Service length and type**

Services provided by eligible allied health professionals under these items must meet the specific requirements set out in the item descriptors. These requirements include that:

- the service is of at least 20 minutes duration;
- the service is provided to the person individually (i.e. not as part of a group service) and in person (i.e. the allied health professional must personally attend the patient);
- the person is not an admitted patient of a hospital;
- the allied health professional must provide a written report to the GP; and
- if the patient has private health insurance, he/she cannot use their private health insurance ancillary cover to 'top up' the Medicare rebate paid for these services.

### **Private health insurance**

Patients need to decide if they will use Medicare or their private health insurance ancillary cover to pay for these services. Patients cannot use their private health insurance ancillary cover to 'top up' the Medicare rebate paid for the services.

### **Reporting back to the GP**

Where an allied health professional provides a single service to the patient under a referral, the allied health professional must provide a written report back to the referring GP after that service.

Where an allied health professional provides multiple services to the same patient under a referral, the allied health professional must provide a written report back to the referring GP after the first and last service, or more often if clinically necessary. Written reports should include:

- any investigations, tests, and/or assessments carried out on the patient;
- any treatment provided; and
- future management of the patient's condition or problem.

Allied health professionals are required to retain the referral form 24 months.

### **Out-of-pocket expenses and Medicare safety net**

Allied health professionals can determine their own fees for the professional service, except where the service is provided under a subsection 19(2) exemption. Charges in excess of the Medicare benefit for the allied health items are the responsibility of the patient. However, such out-of-pocket costs will count toward the Medicare safety net for that patient. Allied health services in excess of five in a calendar year will not attract a Medicare benefit and the safety net arrangements will not apply to costs incurred by the patient for such services.

### **Referral Requirements**

#### **Referral form**

For Medicare benefits to be payable, the patient must be referred to an eligible allied health professional by their GP using a referral form that has been issued by the Australian Government Department of Health or a form that contains all the components of this form.

The form issued by the department is available at the [MBS Primary Care Items](#) information page (click on the link for follow-up allied health services).

GPs are encouraged to attach a copy of the relevant part of the patient's care plan to the referral form.

GPs may use one referral form to refer patients for single or multiple services of the same service type (e.g. five dietetic services). If referring a patient for single or multiple services of different service types (e.g. two dietetic services and three podiatry services), a separate referral form will be needed for each service type.

The patient will need to present the referral form to the allied health professional at the first consultation, unless the GP has previously provided it directly to the allied health professional.

Allied health professionals are required to retain the referral form for 2 years from the date the service was rendered (for the Department of Human Services auditing purposes). A copy of the referral form is not required to accompany Medicare claims, and allied health professionals do not need to attach a signed copy of the form to patients' itemised accounts/receipts or assignment of benefit forms.

Completed forms do not have to be sent to the Department of Health.

#### **Health Care Home shared care plan**

A Health Care Home shared care plan means a written plan that is prepared for a patient enrolled at a Health Care Home trial site; is prepared by a medical practitioner (including a general practitioner but not including a specialist or consultant physician) who is leading the patient's care at the Health Care Home trial site; and includes: an outline of the patient's agreed current and long-term goals; the person or people responsible for each activity; arrangements to review the plan by a day mentioned in the plan; and if authorised by the patient, arrangements for the transfer of information between the medical practitioner and other health care providers supporting patient care about the patient's condition or conditions and treatment.

## **Referral validity**

A referral is valid for the stated number of services. If all services are not used during the calendar year in which the patient was referred, the unused services can be used in the next calendar year. However, those services will be counted as part of the five rebates for allied health services available to the patient during that calendar year.

When patients have used all of their referred services they will need to obtain a new referral from their GP.

## **Allied health Professional Eligibility**

Items 81300 to 81360 can only be claimed for services provided by eligible allied health professionals who are registered with the Department of Human Services. Allied health professionals already registered with Medicare (e.g. for items 10950 to 10970) do not need to register again to claim these items.

Specific eligibility requirements for allied health professionals providing services under these items are:

**Aboriginal and Torres Strait Islander health practitioners** must be registered with the Aboriginal and Torres Strait Islander Health Practice Board of Australia. Aboriginal and Torres Strait Islander health practitioners may use any of the titles authorised by the Aboriginal and Torres Strait Islander Health Practice Board: Aboriginal health practitioners; Aboriginal and Torres Strait Islander health practitioners; or Torres Strait Islander health practitioners.

**Aboriginal health workers** in a State or Territory other than the Northern Territory must have been awarded either:

- a. a Certificate III in Aboriginal and/or Torres Strait Islander Primary Health Care (or an equivalent or higher qualification) by a registered training organisation; or
- b. a Certificate III in Aboriginal and Torres Strait Islander Health (or an equivalent or higher qualification) by a registered training organisation before 1 July 2012.

Note: Where individuals consider their qualification to be equivalent to or higher than the qualifications listed above, they will need to contact a registered training organisation in their State or Territory to have the qualification assessed as such before they can register with the Department of Human Services. In the Northern Territory, a practitioner must be registered with the Aboriginal and Torres Strait Islander Health Practice Board of Australia.

**Audiologists** must be either a 'Full Member' of the Audiological Society of Australia Inc (ASA), who holds a 'Certificate of Clinical Practice' issued by the ASA; or an 'Ordinary Member - Audiologist' or 'Fellow Audiologist' of the Australian College of Audiology (ACAud).

**Chiropractors** must be registered with the Chiropractic Board of Australia.

**Diabetes educators** must be a Credentialed Diabetes Educator (CDE) as credentialed by the Australian Diabetes Educators Association (ADEA).

**Dietitians** must be an 'Accredited Practising Dietitian' as recognised by the Dietitians Association of Australia (DAA).

**Exercise physiologists** must be an 'Accredited Exercise Physiologist' as accredited by Exercise and Sports Science Australia (ESSA).

**Mental health workers** can include services provided by members of five different allied health professional groups. 'Mental health workers' are drawn from the following:

- psychologists;
- mental health nurses;
- occupational therapists;

- social workers;
- Aboriginal and Torres Strait Islander health practitioners; and
- Aboriginal health workers.

**Psychologists, occupational therapists, Aboriginal and Torres Strait Islander health practitioners and Aboriginal health workers** are eligible in separate categories for these items.

**Mental health nurses** must be a credentialed mental health nurse, as certified by the Australian College of Mental Health Nurses.

Mental health nurses who were registered in the ACT or Tasmania prior to the introduction of the National Registration and Accreditation Scheme (NRAS) on 1 July 2010, will have until 31 December 2010 to be certified by the Australian College of Mental Health Nurses.

**Social workers** must be a 'Member' of the Australian Association of Social Workers (AASW); and be certified by AASW as meeting the standards for mental health set out in the document published by AASW titled 'Practice Standards for Mental Health Social Workers' as in force on 8 November 2008.

**Occupational therapists** must be registered with the Occupational Therapy Board of Australia.

**Osteopaths** must be registered with the Osteopathy Board of Australia.

**Physiotherapists** must be registered with the Physiotherapy Board of Australia.

**Podiatrists** must be registered with the Podiatry Board of Australia.

**Psychologists** must hold general registration in the health profession of psychology under the applicable law in force in the State or Territory in which the service is provided.

**Speech pathologists** must be a 'Practising Member' of Speech Pathology Australia.

#### **Registering with the Department of Human Services**

Provider registration forms may be obtained from the Department of Human Services on 132 150 or by visiting the [Department of Human Services](#) website and then searching for "allied health application".

#### **Further information**

Further information about these items, including a fact sheet and the referral form, is available on the Department of Health's [MBS Primary Care Items](#) information page. For providers, information is also available from the Department of Human Services provider inquiry line on 132 150. The Indigenous Access Line for the Department of Human Services on 1800 556 955 is also a useful source of information.

#### **MN.12.1 Immunisation services provided by an Aboriginal and Torres Strait Islander health practitioner - (Item 10988)**

Item 10988 can only be claimed by a medical practitioner where an immunisation is provided to a patient by an Aboriginal and Torres Strait Islander health practitioner on behalf of the medical practitioner.

Item 10988 can be claimed only once per patient visit, even if more than one vaccine is administered during the same patient visit.

An Aboriginal and Torres Strait Islander health practitioner means a person who has been registered as an Aboriginal and Torres Strait Islander health practitioner by the Aboriginal and Torres Strait Islander Health Practice Board of Australia and meets the Board's registration standards. The Aboriginal and Torres Strait Islander health

practitioner must be employed or retained by a general practice, or by a health service that has an exemption to claim Medicare benefits under subsection 19(2) of the Health Insurance Act 1973.

An Aboriginal and Torres Strait Islander health practitioner may use any of the titles authorised by the Aboriginal and Torres Strait Islander Health Practice Board: Aboriginal health practitioner; Aboriginal and Torres Strait Islander health practitioner; or Torres Strait Islander health practitioner.

The Aboriginal and Torres Strait Islander health practitioner must be appropriately qualified and trained to provide immunisations. This includes compliance with any territory requirements.

The medical practitioner under whose supervision the immunisation is provided retains responsibility for the health, safety and clinical outcomes of the patient.

Supervision may include distance supervision where the medical practitioner does not have to be physically present at the time that the service is provided by the Aboriginal and Torres Strait Islander health practitioner, but should be able to be contacted for advice if required.

The immunisation must be performed by the Aboriginal and Torres Strait Islander health practitioner in accordance with the current edition of the Australian Immunisation Handbook and the Central Australian Rural Practitioners Association (CARPA) Standard Treatment Manual.

Immunisation means the administration of a registered vaccine to a patient for any purpose other than as part of a mass immunisation of persons.

A registered vaccine means a vaccine that is included on the Australian Register of Therapeutic Goods. This includes all vaccines on the Australian Standard Vaccination Schedule and vaccines covered in the current edition of the Australian Immunisation Handbook. The following substances cannot be claimed under this item: vaccines used experimentally; homeopathic substances; immunotherapy for allergies (eg de-sensitisation preparations); and other substances that are not vaccines. There may also be territory limitations on the administration of some vaccines, such as those for tuberculosis, yellow fever and Q-fever.

All GPs whether vocationally registered or not are eligible to claim this item. District Medical Officers (DMOs) employed by the Northern Territory Department of Health and Community Services are also eligible to claim this item.

Where the medical practitioner provides a professional attendance to the patient (in addition to the immunisation service provided by the Aboriginal and Torres Strait Islander health practitioner), the medical practitioner may also claim for the professional attendance they provide to the patient.

Item 10991 can also be claimed in conjunction with item 10988 provided the conditions of both items are satisfied.

Related Items: 10988

### **MN.12.2 Wound management services provided by an Aboriginal and Torres Strait Islander health practitioner (item 10989)**

Item 10989 can only be claimed by a medical practitioner where wound management (other than normal aftercare) is provided to a patient by an Aboriginal and Torres Strait Islander health practitioner on behalf of the medical practitioner.

Item 10989 can be claimed only once per patient visit, even if more than one wound is treated during the same patient visit.

An Aboriginal and Torres Strait Islander health practitioner means a person who has been registered as an Aboriginal and Torres Strait Islander health practitioner by the Aboriginal and Torres Strait Islander Health Practice Board of Australia and meets the Board's registration standards. The Aboriginal and Torres Strait Islander health practitioner must be employed or 806 retained by a general practice, or by a health service that has an exemption to claim Medicare benefits under subsection 19(2) of the Health Insurance Act 1973.

An Aboriginal and Torres Strait Islander health practitioner may use any of the titles authorised by the Aboriginal and Torres Strait Islander Health Practice Board: Aboriginal health practitioner; Aboriginal and Torres Strait Islander health practitioner; or Torres Strait Islander health practitioner.

The Aboriginal and Torres Strait Islander health practitioner must be appropriately qualified and trained to treat wounds. This includes compliance with any territory requirements.

The medical practitioner under whose supervision the treatment is provided retains responsibility for the health, safety and clinical outcomes of the patient.

Supervision may include distance supervision where the medical practitioner does not have to be physically present at the time that the service is provided by the Aboriginal and Torres Strait Islander health practitioner, but should be able to be contacted for advice if required.

The medical practitioner must conduct an initial assessment of the patient (including under a distance supervision arrangement if the medical practitioner is not physically present) in order to give instruction in relation to the treatment of the wound.

Where an Aboriginal and Torres Strait Islander health practitioner provides ongoing wound management, the medical practitioner is not required to give instruction or see the patient during each subsequent visit.

**MN.12.3 Follow up service provided by a practice nurse or Aboriginal and Torres Strait Islander health practitioner, on behalf of a Medical Practitioner, for an Indigenous person who has received a health assessment (Item 10987)**

Item 10987 may be claimed by a medical practitioner, where a follow up service is provided by a practice nurse or Aboriginal and Torres Strait Islander health practitioner on behalf of that medical practitioner for an Indigenous person who has received a health check.

All GPs whether vocationally registered or not are eligible to claim this item. District Medical Officers (DMOs) employed by state/territory health Departments are also eligible to claim this item. The term 'GP' is used in these notes as a generic reference to medical practitioners able to claim this item.

Item 10987 does not apply for services that are provided by any other Commonwealth or State funded services. However, where an exemption under subsection 19(2) of the *Health Insurance Act 1973* has been granted to an Aboriginal Community Controlled Health Service or State/Territory Government Health clinic, item 10987 can be claimed for services provided by practice nurses or Aboriginal and Torres Strait Islander health practitioner salaried or contracted to, the Service or Health clinic. All requirements of the item must be met.

Item 10987 will assist Indigenous patients who have received a health check which has identified a need for follow up services which can be provided by a practice nurse or Aboriginal and Torres Strait Islander health practitioner between further consultations with the patient's GP.

Item 10987 may be used to provide:

- d. Examinations/interventions as indicated by the health check;
- e. Education regarding medication compliance and associated monitoring;
- f. Checks on clinical progress and service access;
- g. Education, monitoring and counselling activities and lifestyle advice;
- h. Taking a medical history; and
- i. Prevention advice for chronic conditions, and associated follow up.

Item 10987 may be claimed up to a maximum of 10 times per patient per calendar year.

Item 10987 may be accessed by an Indigenous patient who has received the Aboriginal and Torres Strait Islander Peoples Health Assessment (item 715), which is available to:

- a) children between the ages of 0 and 14 years;

- b) adults between the ages of 15 and 54 years; and
- c) older people over the age of 55 years.

The item can also be accessed by a child who has received a health check as part of the Northern Territory Emergency Response (NTER).

Patients whose condition is unstable/deteriorating should be referred to their GP for further treatment.

A practice nurse means a registered or enrolled nurse who is employed by, or whose services are otherwise retained by a general practice or by a health service that has an exemption to claim Medicare benefits under sub-section 19(2) of the *Health Insurance Act 1973*.

An Aboriginal and Torres Strait Islander health practitioner means a person who has been registered as an Aboriginal and Torres Strait Islander health practitioner by the Aboriginal and Torres Strait Islander Health Practice Board of Australia and meets the Board's registration standards. The Aboriginal and Torres Strait Islander health practitioner must be employed or retained by a general practice, or by a health service that has an exemption to claim Medicare benefits under subsection 19(2) of the *Health Insurance Act 1973*.

An Aboriginal and Torres Strait Islander health practitioner may use any of the titles authorised by the Aboriginal and Torres Strait Islander Health Practice Board: Aboriginal health practitioner; Aboriginal and Torres Strait Islander health practitioner; or Torres Strait Islander health practitioner.

In all cases, the GP under whose supervision the health check follow-up is being provided retains responsibility for the health, safety and clinical outcomes of the patient. The GP must be satisfied that the practice nurse or Aboriginal and Torres Strait Islander health practitioner is appropriately qualified and trained to provide the relevant follow up for the patient. GPs are advised to consult their insurer concerning indemnity coverage for services provided on their behalf.

General practices where nurses or Aboriginal and Torres Strait Islander health practitioners provide follow up for Indigenous people who have received a health check, should also have a written clinical risk management strategy covering issues like clinical roles, patient follow up and patient consent.

Continuing professional development is recommended for all nurses and an Aboriginal and Torres Strait Islander health practitioners providing follow up services for Indigenous people who have received a health check.

Supervision of the practice nurse/Aboriginal and Torres Strait Islander health practitioner by the GP at a distance is recognised as an acceptable form of supervision. This means that the claiming GP does not have to be physically present at the time the service is provided. However the GP should be able to be contacted if required.

Where the GP and practice nurse/Aboriginal and Torres Strait Islander health practitioner are at the same location, the GP is not required to be present while the health check follow up is undertaken. It is up to the GP to decide whether they need to see the patient. Where the GP has a consultation with the patient, then the GP is entitled to claim a Medicare item for the time and complexity of their personal attendance on the patient. The time the patient spends receiving a service from the practice nurse or Aboriginal and Torres Strait Islander health practitioner is itemised separately under item 10987 and should not be counted as part of the Medicare items claimed for time spent with the GP. Where the practice nurse or Aboriginal and Torres Strait Islander health practitioner provides another service (eg immunisation, cervical screening) on the same day, the GP is able to claim for all practice nurse/Aboriginal and Torres Strait Islander health practitioner services provided.

Item 10990 or 10991 (bulk billing incentives) can be claimed in conjunction with item 10987 provided the conditions of item 10990 or 10991 are satisfied.

#### **MN.12.4 Provision of monitoring and support for a person with a chronic disease by a practice nurse or Aboriginal and Torres Strait Islander health practitioner (item 10997)**

Item 10997 may be claimed by a medical practitioner, where a monitoring and support service for a person with a chronic disease care plan is provided by a practice nurse or Aboriginal and Torres Strait Islander health practitioner on behalf of that medical practitioner.

All GPs whether vocationally registered or not are eligible to claim this item. The term 'GP' is used in these notes as a generic reference to medical practitioners able to claim this item.

Item 10997 does not apply for services that are provided by any other Commonwealth or State funded services. However, where an exemption under subsection 19(2) of the Health Insurance Act 1973 has been granted to an Aboriginal Community Controlled Health Service or State/Territory Government health clinic, item 10997 can be claimed for services provided by practice nurses or Aboriginal and Torres Strait Islander health practitioners salaried by or contracted to, the Service or health clinic. All requirements of the item must be met.

Item 10997 will assist patients who require access to ongoing care, routine treatment and ongoing monitoring and support between the more structured reviews of the care plan by the patient's usual GP.

Item 10997 may be used to provide:

- d. checks on clinical progress;
- xi. monitoring medication compliance;
- self management advice, and;
- collection of information to support GP/medical practitioner reviews of Care Plans.

The services provided by the practice nurse or Aboriginal and Torres Strait Islander health practitioner should be consistent with the scope of the GP Management Plan, Team Care Arrangements, or Multidisciplinary Care Plan.

Item 10997 may be claimed up to a maximum of 5 times per patient per calendar year.

Item 10997 may only be accessed by a patient with a GP Management Plan, Team Care Arrangements or Multidisciplinary Care Plan (GP items 721, 723, 729, 731, 732 or medical practitioner items 229, 230, 231, 232, 233).

Patients whose condition is unstable/deteriorating should be referred to their GP or medical practitioner for further treatment.

A practice nurse means a registered or enrolled nurse or Nurse Practitioner who is employed by, or whose services are otherwise retained by a general practice.

An Aboriginal and Torres Strait Islander health practitioner means a person who has been registered as an Aboriginal and Torres Strait Islander health practitioner by the Aboriginal and Torres Strait Islander Health Practice Board of Australia and meets the Board's registration standards. The Aboriginal and Torres Strait Islander health practitioner must be employed or retained by a general practice, or by a health service that has an exemption to claim Medicare benefits under subsection 19(2) of the Health Insurance Act 1973.

An Aboriginal and Torres Strait Islander health practitioner may use any of the titles authorised by the Aboriginal and Torres Strait Islander Health Practice Board: Aboriginal health practitioner; Aboriginal and Torres Strait Islander health practitioner; or Torres Strait Islander health practitioner.

In all cases, the GP or medical practitioner under whose supervision the chronic disease monitoring and support is being provided retains responsibility for the health, safety and clinical outcomes of the patient. The GP or medical practitioner must be satisfied that the practice nurse is appropriately qualified and trained to provide chronic disease support and monitoring. GPs and medical practitioners are advised to consult their insurer concerning indemnity coverage for services performed on their behalf.

General practices where nurses or Aboriginal and Torres Strait Islander health practitioner provide chronic disease support and monitoring, should also have a written clinical risk management strategy covering issues like clinical roles, patient follow up and patient consent.

Continuing professional development is recommended for all nurses and Aboriginal and Torres Strait Islander health practitioners providing chronic disease monitoring and support.

Supervision by the GP or medical practitioner at a distance is recognised as an acceptable form of supervision. This means that the claiming GP or medical practitioner does not have to be physically present at the time the service is provided. However, the GP/medical practitioner should be able to be contacted if required.

Where the GP/medical practitioner and the practice nurse/ Aboriginal and Torres Strait Islander health practitioner are at the same location, the GP/medical practitioner is not required to be present while the chronic disease monitoring and support is undertaken. It is up to the GP/medical practitioner to decide whether they need to see the patient. Where the GP/medical practitioner has a consultation with the patient, then the GP/medical practitioner is entitled to claim a Medicare item for the time and complexity of their personal attendance on the patient. The time the patient spends receiving a service from the practice nurse or Aboriginal and Torres Strait Islander health practitioner is itemised separately under item 10997 and should not be counted as part of the Medicare item claimed for time spent with the GP/medical practitioner. Where the practice nurse or Aboriginal and Torres Strait Islander health practitioner provides another service (eg immunisation) on the same day, the GP/medical practitioner is able to claim for both practice nurse/ Aboriginal and Torres Strait Islander health practitioner items.

Item 10990 or 10991 (bulk billing incentives) can be claimed in conjunction with item 10997 provided the conditions of item 10990 or 10991 are satisfied (see explanatory note M.1).

### **MN.12.5 Telehealth Support Services by Health Professionals**

These notes provide information on the telehealth MBS attendance items for health professionals to provide clinical support to their patients during video consultations with a specialist, consultant physicians and psychiatrists under items 10945 to 10948 in Group A10 which are available for participating optometrists, items 82150, 82151 and 82152 in Group M13 which are available for participating midwives, items 82220 to 82225 in Group M14 for participating nurse practitioners and items 10983 and 10984 in Group M12 for practice nurses, Aboriginal and Torres Strait Islander health practitioners or Aboriginal health workers for services provided for and on behalf of a medical practitioner.

Telehealth patient-end support services can only be claimed where:

- a Medicare eligible specialist service is claimed;
- the service is rendered in Australia; and
- where this is necessary for the provision of the specialist service.

The above patient-end support services provide for attendances in various settings including eligible residential aged care services, eligible Aboriginal Medical Service or Aboriginal Community Controlled Health Service to which a 19(2) direction under the Health Insurance Act 1973 applies.

### **Clinical indications**

The specialist, consultant physician or psychiatrist must be satisfied that it is clinically appropriate to provide a video consultation to a patient. The decision to provide clinically relevant support to the patient is the responsibility of the specialist, consultant physician or psychiatrist.

Telehealth specialist services can be provided to patients when there is no patient-end support service provided.

## **Collaborative Consultation**

The practitioner, who provides assistance to the patient where this is necessary for the provision of the specialist service, may seek assistance from a health professional (e.g. a practice nurse, Aboriginal and Torres Strait Islander health practitioner or Aboriginal health worker) but only one item is billable for the patient-end support service. The practitioner must be present during part or all of the consultation in order to bill an appropriate time-tiered MBS item. Any time spent by another health professional called to assist with the consultation may not be counted against the overall time taken to complete the video consultation.

## **Restrictions**

The MBS telehealth attendance items are not payable for services to an admitted hospital patient (this includes hospital in the home patients). Benefits are not payable for telephone or email consultations. In order to fulfill the item descriptor there must be a visual and audio link between the patient and the remote practitioner. If the remote practitioner is unable to establish both a video and audio link with the patient, a MBS rebate for a telehealth attendance is not payable.

## **Eligible Geographical Areas**

Geographic eligibility for telehealth services funded under Medicare are determined according to the Australian Standard Geographical Classification Remoteness Area (ASGC-RA) classifications. Telehealth Eligible Areas are areas that are outside a Major City (RA1) according to ASGC-RA (RA2-5). Patients and providers are able to check their eligibility by following [the links on the MBS Online website](#).

There is a requirement for the patient and specialist to be located a minimum of 15km apart at the time of the consultation. Minimum distance between specialist and patient video consultations are measured by the most direct (ie least distance) route by road. The patient or the specialist is not permitted to travel to an area outside the minimum 15 km distance in order to claim a video conference.

This rule will not apply to specialist video consultation with patients who are a care recipient in a residential care service; or at an Aboriginal Medical Service or an Aboriginal Community Controlled Health Service for which a direction, made under subsection 19(2) of the Health Insurance Act 1973, as these patients are to receive telehealth services anywhere in Australia.

Telehealth Eligible Service Areas are defined at the [MBS Online website](#).

## **Record Keeping**

Participating telehealth practitioners must keep contemporaneous notes of the consultation including documenting that the service was performed by video conference, the date, time and the people who participated.

Only clinical details recorded at the time of the attendance count towards the time of the consultation. It does not include information added at a later time, such as reports of investigations.

## **Multiple attendances on the same day**

In some situations a patient may receive a telehealth consultation and a face to face consultation by the same or different practitioner on the same day.

Medicare benefits may be paid for more than one video consultation on a patient on the same day by the same practitioner, provided the second (and any following) video consultations are not a continuation of the initial or earlier video consultations. Practitioners will need to provide the times of each consultation on the patient's account or bulk billing voucher.

## **Aftercare Rule**

Video consultations are subject to the same aftercare rules as face to face consultations.

## **Referrals**

The referral procedure for a video consultation is the same as for conventional face-to-face consultations.

## **Technical requirements**

In order to fulfill the item descriptor there must be a visual and audio link between the patient and the remote practitioner. If the remote practitioner is unable to establish both a video and audio link with the patient, a MBS rebate for a telehealth attendance is not payable.

Individual clinicians must be confident that the technology used is able to satisfy the item descriptor and that software and hardware used to deliver a video conference meets the applicable laws for security and privacy.

## **Bulk billing**

Bulk bill incentive items 10990 or 10991 may be billed in conjunction with the MBS medical practitioner telehealth items 812, 827, 829, 867, 868, 869, 873, 876, 881, 885, 892 or GP items 2100, 2122, 2125, 2126, 2137, 2138, 2143, 2147, 2179, 2195, 2199 and 2220.

## **Duration of attendance**

The practitioner attending at the patient end of the video consultation does not need to be present for the entire consultation, only as long as is clinically relevant - this can be established in consultation with the specialist. The MBS fee payable for the supporting practitioner will be determined by the total time spent assisting the patient. This time does not need to be continuous.

## **Aboriginal health workers**

For the purpose of items 10983 and 10984 an Aboriginal health worker means a person who:

- a) holds a Certificate III in Aboriginal or Torres Strait Islander Health Worker Primary Health Care (Clinical) or other appropriate qualifications; or
- b) is registered, and holds a current registration issued by a State or Territory regulatory authority, as an Aboriginal health worker; and
- c) is employed by, or whose services are otherwise retained by a medical practitioner or their practice. This includes health service in relation to which a direction made under subsection 19(2) of the Act applies.

## **Aboriginal and Torres Strait Islander health practitioners**

For the purpose of items 10983 and 10984 an Aboriginal and Torres Strait Islander health practitioner means a person who has been registered as an Aboriginal and Torres Strait Islander health practitioner by the Aboriginal and Torres Strait Islander Health Practice Board of Australia and meets the Board's registration standards. The Aboriginal and Torres Strait Islander health practitioner must be employed or retained by a general practice, or by a health service that has an exemption to claim Medicare benefits under subsection 19(2) of the Health Insurance Act 1973.

An Aboriginal and Torres Strait Islander health practitioner may use any of the titles authorised by the Aboriginal and Torres Strait Islander Health Practice Board: Aboriginal health practitioner; Aboriginal and Torres Strait Islander health practitioner; or Torres Strait Islander health practitioner.

## **Practice Nurse**

For the purpose of items 10983 and 10984 a practice nurse means a registered or enrolled nurse who is employed by, or whose services are otherwise retained by a medical practitioner or their practice. This includes a health service in relation to which a direction made under subsection 19(2) of the Health Insurance Act 1973 applies.

### **MN.13.1 Maternity Services by Participating Midwives - Overview**

As at 1 November 2010, Medicare benefits are payable for antenatal, intrapartum and postnatal care for the first 6 weeks after the delivery, provided by eligible privately practising midwives. Eligible midwives can also request certain pathology and diagnostic imaging services for their patients and refer patients to obstetricians and paediatricians, as the clinical need arises. Each service that attracts a Medicare benefit is identified in the Medicare Benefits Schedule (MBS) by an item number. Each item describes the service that the item covers.

### **MN.13.2 Participating Midwives**

To provide services under Medicare, the legislation requires that a midwife be a participating midwife. A participating midwife is an eligible midwife who provides services in a collaborative arrangement or collaborative arrangements with one or more medical practitioners, of a kind or kinds specified in the regulations.

For more details on collaborative arrangements required under the regulations see Point M.13.5.

### **MN.13.3 Eligible Midwives**

Under the legislation, to be an eligible midwife the midwife must be registered or authorised (however described) under State and Territory law to practice midwifery. The midwife must also demonstrate that he or she has the appropriate qualifications and experience to meet the registration standard developed by the Nursing and Midwifery Board of Australia.

Information regarding eligibility can be found on the Nursing and Midwifery Board of Australia (NMBA) site of the Australian Health Practitioner Regulatory Agency (AHPRA) website at:

<http://www.nursingmidwiferyboard.gov.au/>.

### **MN.13.4 Midwife Professional Indemnity Insurance**

Under National Law, which governs the National Registration and Accreditation Scheme (NRAS), it is a requirement for midwives to have appropriate professional indemnity insurance. All privately practising midwives who wish to provide private midwifery services in must have appropriate professional indemnity insurance from the date the State or Territory in which they were registered enacted National Law.

Further information about professional indemnity insurance for midwives can be found at:

<http://www.health.gov.au/internet/main/publishing.nsf/Content/Maternity+Services+Review-Q&A-PIMI>

### **MN.13.5 Collaborative Arrangements**

To provide Medicare rebate-able services an eligible midwife must have a collaborative arrangement in place that must provide for consultation, referral or transfer of care as clinical needs dictate, to ensure safe, high quality maternity care.

Under the legislation a collaborative arrangement can be with the following "specified" medical practitioners:

- an obstetrician;
- a medical practitioner who provides obstetric services; or
- a medical practitioner employed or engaged by a hospital authority and authorised by the hospital authority to participate in a collaborative arrangement.

The types of practitioners listed 1) and 2) are defined in the Regulations as "obstetric specified medical practitioners".

Collaborative arrangement can be established in the following ways:

- where the midwife:

- is employed or engaged by 1 or more obstetric specified medical practitioners or by an entity that employs or engages 1 or more obstetric specified medical practitioners; or
- has an agreement, in writing, with an entity, other than a hospital, that employs or engages one or more obstetric specified medical practitioners, OR
- receiving patients by referral in writing to the midwife for midwifery treatment from a specified medical practitioner, OR
- having a signed written agreement with one or more specified medical practitioners, OR
- having an arrangement with and acknowledged by at least one specified medical practitioner
  - an arrangement requires that the eligible midwife must record the following in the midwife's written records:-
    - The name of at least one specified medical practitioner who is, or will be, collaborating with the midwife in the patient's care (a named medical practitioner);
    - That the midwife has told the patient that the midwife will be providing midwifery services to the patient in collaboration with one or more specified medical practitioners;
    - Acknowledgement by a named medical practitioner that the practitioner will be collaborating in the patient's care;
    - Plans for the circumstances in which the midwife will do any of the following:
      - consult with an obstetric specified medical practitioner;
      - refer the patient to a specified medical practitioner;
      - transfer the patient's care to an obstetric specified medical practitioner.
  - The midwife must also record the following in the midwife's written records:
    - Any consultation or other communication between the midwife and an obstetric specified medical practitioner about the patient's care;
    - Any referral of the patient by the midwife to a specified medical practitioner;
    - Any transfer by the midwife of the patient's care to an obstetric specified medical practitioner;
    - When the midwife gives a copy of the hospital booking letter for the patient to a named medical practitioner - acknowledgement that the named medical practitioner has received the copy;
    - When the midwife gives a copy of the patient's maternity care plan prepared by the midwife to a named medical practitioner - acknowledgement that the named medical practitioner has received the copy;
    - If the midwife requests diagnostic imaging or pathology services for the patient - when the midwife gives the results of the services to a named medical practitioner
    - That the midwife has given a discharge summary at the end of the midwife's care for the patient to:
      - a named medical practitioner; and
      - the patient's usual general practitioner, OR
- In relation to a hospital, the midwife is:
  - credentialed to provide midwifery services after successfully completing a formal process to assess the midwife's competence, performance and professional suitability; and
  - given clinical privileges for a defined scope of clinical practice for the hospital; and
  - permitted to provide midwifery care to his or her own patients at the hospital.

The legislation requires that collaborative arrangements must be in place at the time the participating midwife provides the service.

- Being employed or engaged by a medical practice or an entity or having a written agreement with an entity  
An entity may refer to, for example, a community health centre or a medical practice. For a midwife to have a collaborative arrangement in these circumstances, that midwife must be employed or engaged by or have a written agreement with an entity that also employs or engages 1 or more obstetric specified medical practitioners.

The terms employ or engage covers both employees and contractors. This will cover an eligible midwife who is employed or engaged by a medical practice so long as that medical practice employs or engages at least one obstetrician or medical practitioner that provides obstetric services.

There must be at least one obstetric specified medical practitioner employed or engaged by the entity each time the midwife renders a service/performs treatment. However, there is no requirement that the consultation, referral or transfer of care must always be to the medical practitioner(s) employed/engaged by the entity.

- Referral from a medical practitioner

A participating midwife's patient will be able to access the MBS and PBS if a patient has been referred in writing to the midwife by a specified medical practitioner. The arrangement must provide for consultation, referral and transfer of care should the clinical need arise.

- Written agreement with a medical practitioner

A participating midwife's patient will be able to access the MBS and PBS if the nurse practitioner has a written agreement in place with one or more specified medical practitioners. The agreement must be signed by the nurse practitioner and doctor. The arrangement must provide for consultation, referral and transfer of care.

- Arrangement with, acknowledged by a medical practitioner

Evidence of 'acknowledgement' by an obstetrician/GP obstetrician for each woman for whom the midwife provides care is a requirement to ensure that the medical practitioner being named understands and accepts the collaborative arrangement.

The acknowledgement does not have to be obtained on an individual patient basis. This means that, for example, a midwife could obtain an acknowledgement from a specified medical practitioner that he or she will be the collaborating medical practitioner for some or all of the midwife's patients. Arrangements to collaborate could be obtained in a number of ways including signing of documents, email or fax confirmation, or verbal acknowledgement which the midwife documents in their written records.

The midwife is required to record in written records communications in regard to consultations, referral and transfer of the woman's care with the medical practitioner, including information that has been forwarded to the medical practitioner. The midwife is also required to send a copy of all pathology and diagnostic imaging results to a named medical practitioner and to record in the midwife's written records when this occurs (however, there is no requirement that the midwife consult with a medical practitioner in relation to every test result). The purpose of sharing records with the collaborating medical practitioner is to prevent duplication of services and to ensure continuity of care.

- Collaborative arrangement with a hospital

This type of collaborative arrangement applies where an eligible midwife is credentialed for a hospital, having successfully completed a formal assessment of his or her qualifications, skills, experience and professional standing. It is expected that the assessment would involve an appropriately qualified medical practitioner/s. The midwife is also required to have a defined scope of clinical practice at the hospital and be eligible to treat his or her own patients at the hospital. The hospital must employ or engage at least one obstetric specified medical practitioner. It is expected that the hospital will have a formal written agreement with such midwives, addressing consultation, referral and transfer of care, relevant clinical guidelines and locally determined policies.

### **MN.13.6 Provider Numbers**

To access the Medicare arrangements, eligible midwives will need to apply to the Department of Human Services for a provider number. A separate provider number is required for each location at which a midwife practices.

Advice about registering with the Department of Human Services to provide midwifery services using items 82100 to 82140 inclusive, is available from the Department of Human Services provider inquiry line on 132 150.

Medicare provider application forms for midwives can be downloaded from the following site:

[www.medicareaustralia.gov.au](http://www.medicareaustralia.gov.au)

### **MN.13.7 Schedule Fees and Medicare Benefits**

Each midwifery service is identified in the MBS by an item number. The fee set for any item in the MBS is known as the "Schedule fee". The Schedule fee and Medicare benefit for each service is listed in the item description.

There are two levels of benefit payable for midwifery services:

75% of the Schedule fee for midwifery services rendered to privately insured patients as part of an episode of hospital treatment (other than for public patients); or

85% of the Schedule fee for antenatal and postnatal services rendered to non-admitted patients.

### **MN.13.8 Safety Nets**

Where practitioners charge more than the Medicare benefit, the resultant out-of-pocket costs are the responsibility of the patient.

Assistance is provided to families and singles for out-of-pocket costs for out-of-hospital services through the "original" and "extended" Medicare safety nets:

- the original safety net provides that once the threshold is met, the Medicare benefit increases to 100 per cent of the Schedule fee. The threshold in 2019 is \$470.00; and
- under the Extended Medicare Safety Net (EMSN), once certain thresholds are met, Medicare reimburses 80 per cent of the out-of-pocket costs. However, where the item has an EMSN benefit cap, there is a maximum limit on the EMSN benefit that will be paid for that item.

In 2019, the annual EMSN threshold for concession cardholders and people who receive Family Tax Benefits (Part A) is \$680.70. For all other singles and families the annual threshold is \$2,133.00. These amounts are indexed by Consumer Price Index on 1 January each year.

### **MN.13.9 Safety Net Capping for Midwifery Items**

Midwifery services will be subject to a benefit limit or cap under the EMSN. This is in line with obstetric services which are also subject to a safety net cap. The caps that apply to midwifery services are outlined below:

| <b>Item</b> | <b>Maximum increase (\$)</b> |
|-------------|------------------------------|
| 82100       | 21.70                        |
| 82105       | 16.30                        |
| 82110       | 21.70                        |
| 82115       | 54.10                        |
| 82130       | 16.30                        |
| 82135       | 21.70                        |
| 82140       | 16.30                        |

### **MN.13.10 Where Medicare Benefits are not payable**

Medicare benefits are not available:

- a. for services listed in the MBS, where the service rendered does *not* meet the item description and associated requirements;
- b. where the midwifery service is *not* personally performed by the participating midwife;
- c. for MBS services that are time based, the inclusion of any time period in the consultation periods when the patient is *not* receiving active attention e.g. the time the provider may take to travel to the patient's home or where the patient is resting between blood pressure readings; and
- d. services provided where the patient is not in attendance, such as the issuing of repeat prescriptions;
- e. for telephone attendances;

f. group sessions; and

g. The issuing of repeat prescriptions, updating patient notes or telephone consultations.

The fee charged under Medicare must not include the cost of services that are not part of the MBS service being claimed. Medicare benefits are not payable for good or appliances associated with the service, such as bandages or other skin dressings

Unless the Minister otherwise directs, Medicare benefits are not payable where funding has already been provided under an arrangement with the Commonwealth, state or a local governing body.

### **MN.13.11 Billing of Patient**

Where the practitioner bills the patient for medical services rendered, the patient needs a properly itemised account/receipt to enable a claim to be made for Medicare benefits.

Under the provisions of the Health Insurance Act and Regulations, Medicare benefits are not payable in respect of a professional service unless there is recorded on the account setting out the fee for the service or on the receipt for the fee in respect of the service, the following particulars:-

- (a) Patient's name;
- (b) The date on which the professional service was rendered;
- (c) An item number or a description of the professional service sufficient to identify the item that relates to that service, including an indication where the service is rendered to a person while hospital treatment is provided in a hospital "admitted patient" immediately preceding the description of the service or an asterisk "\*" directly after an item number where used;
- (d) The name and practice address and provider number of the participating midwife who actually rendered the service; (where the participating midwife has more than one practice location recorded with the Department of Human Services, the provider number used should be that which is applicable to the practice location at or from which the service was given).

Only one original itemised account should be issued in respect of any one service and any duplicates of accounts or receipts should be clearly marked "duplicate" and should be issued only where the original has been lost. Duplicates should not be issued as a routine system for "accounts rendered".

### **MN.13.12 Assignment of Benefits (Direct-Billing) Arrangements**

Under the Health Insurance Act the Assignment of Benefit (direct-billing) facility for professional services is available to all persons in Australia who are eligible for benefit under the Medicare program. This facility is NOT confined to pensioners or people in special need.

If a participating midwife direct-bills, the participating midwife undertakes to accept the relevant Medicare benefit as full payment for the service. Additional charges for that service (irrespective of the purpose or title of the charge) cannot be raised against the patient. Under these arrangements:-

- The patient's Medicare card number must be quoted on all direct-bill forms for that patient.
- The basic forms provided are loose leaf to enable the patient details to be imprinted from the Medicare card.
- The forms include information required by Regulations under Subsection 19(6) of the Health Insurance Act.
- The practitioner must include the particulars relating to the professional service out on the assignment form before the patient signs the form and ensure that the patient to receive a copy of the form as soon as practicable after the patient signs it.

· Where a patient is unable to sign the assignment form the signature of the patient's parent, guardian or other responsible person (other than the practitioner, practitioner's staff, hospital proprietor, hospital staff, residential aged care facility proprietor or residential aged care facility staff) is acceptable. The reason the patient is unable to sign should also be stated.

The administration of the direct-billing arrangements under Medicare as well as the payment of Medicare benefits on patient claims is the responsibility of **the Department of Human Services**. Any enquiries in regard to these matters should therefore be directed to Medicare offices or enquiry points.

### **MN.13.13 Assignment of Benefit Forms**

Participating midwives wishing to direct-bill are required to use a specific form available from the Department of Human Services. This stationary is available from the Department of Human Services. Note that these forms are approved forms under the Health Insurance Act, and no other forms can be used to assign benefits without the approval of the Department of Human Services. Further information about direct-billing stationary can be obtained by telephoning **132150**.

### **MN.13.14 Time Limits Applicable to Lodgement of Claims for Assigned Benefits**

A time limit of two years applies to the lodgement of claims with Medicare under the direct-billing (assignment of benefit) arrangements. This means that Medicare benefits are not payable for any service where the service was rendered more than two years earlier than the date the claim was lodged with Medicare.

Provision exists whereby in certain circumstances (e.g. hardship cases), the Minister may waive the time limits. Special forms for this purpose are available, if required, from the processing centre to which assigned claims are directed.

### **MN.13.15 Overview of the Maternity Items**

Antenatal, intrapartum and postnatal care provided by participating midwives are covered by MBS items 82100, 82105, 82110, 82115, 82120, 82125, 82130, 82135, 82140. These items cover nine specific types of service that allow the participating midwife to:

- undertake an initial antenatal attendance of more than 40 minutes duration (item 82100)
- provide a short antenatal attendance of up to 40 minutes duration (item 82105)
- provide a long antenatal attendance of more than 40 minutes duration (item 82110);
- make an assessment of and prepare a maternity care plan for a woman across a pregnancy that has progressed beyond 20 weeks (item 82115);
- undertake management of a confinement for up to 12 hours, including delivery (item 82120);
- undertake management of a confinement in excess of 12 hours including delivery (item 82125);
- provide a short postnatal attendance of up to 40 minutes duration (item 82130);
- provide long postnatal attendance of at least 40 minutes duration (item 82135); and
- provide a comprehensive postnatal check to a woman six weeks after the birth of her baby (item 82140).

### **MN.13.16 Maternity Services Attracting Medicare Rebates**

Medicare Benefits are only payable for clinically relevant services. *Clinically relevant* in relation to midwifery care means a service generally accepted by the midwifery profession as necessary to the appropriate treatment of the patient's clinical condition.

Medicare benefits are only payable where the participating midwife provides care to not more than one patient on the one occasion.

## **Antenatal Care**

### **Eligible maternity care plan service**

There is one MBS item available for eligible midwife practitioners to undertake a comprehensive assessment of and prepare a written maternity care plan for a woman, who is not an admitted patient of a hospital, across a pregnancy that has progressed beyond 20 weeks. It is expected that the care plan would be agreed with the woman and detail such things as agreed expectation, health problems and care needs and appropriate referrals, medication and diagnostic tests.

### **Number of services**

Only one (1) midwifery care plan is payable in any pregnancy.

### **Antenatal Attendances**

Medicare benefits are payable for an antenatal service where a midwife provides a clinically relevant service in respect of a miscarriage. Medicare benefits are not payable for an antenatal attendance associated with the confinement. The confinement items 82120 and 82125 include all associated attendances.

Any clinically relevant indication that requires an antenatal attendance by a midwife on an admitted patient in hospital, but that is not associated with the confinement, will attract a Medicare benefit.

### **Number of services**

Only one (1) initial antenatal attendance under item 82100 is payable in any pregnancy.

There is no limit attached to long and short antenatal attendances by a participating midwife. However, only clinically relevant attendances should be itemised under Medicare and services provided by participating midwives will be subject to Medicare Audit and Professional Review Processes.

### **Management of Confinement**

The MBS includes two items for management of confinement by a participating midwife; 82120 for a confinement of up to 12 hours, and 82125 for a confinement where labour is in excess of 12 hours, and the woman's care has been transferred to another participating midwife.

Medicare benefits are payable under items 82120 and 82125 whether or not the participating midwife undertakes the delivery i.e. including where the woman's care is escalated to an obstetrician during labour or for the delivery.

Medicare benefits are only payable where the service is provided to a woman who is an admitted patient of a hospital, including a hospital birthing centre. For Medicare benefit purposes a confinement is taken to commence when the participating midwife attends a patient that is in labour and who has been admitted to the hospital for confinement and delivery. The time period for these items is the period for which the midwife is in exclusive and continuous attendance on the woman for labour, and delivery where performed.

Medicare benefits are only payable for management of confinement where the participating midwife undertaking the service has provided the patient's antenatal care or who is a member of a practice that provided the patient's antenatal care.

It is not intended that these items be claimed routinely by midwives who do not intend to undertake the delivery i.e. where the midwife has arranged beforehand for a medical practitioner to undertake the delivery. Where the midwife does not undertake the delivery it is because:

- care was transferred to a second midwife for management of labour which had exceeded 12 hours; or

· there was a clinical need to escalate care to an obstetrician or medical practitioner who provides obstetric services;  
or

· the patient's care was transferred from the first midwife to another participating midwife in exceptional circumstances.

### **Number of services**

Only one (1) confinement item 82120 is payable in any pregnancy, except where exceptional circumstances have required the patient's care to be transferred from the first midwife to another participating midwife. In these circumstances, both midwives may bill an item 82120 service.

Medicare rebates are only payable for (1) confinement item 82125.

### **Postnatal Care**

In addition to the long and short antenatal attendance items for postnatal care in the first 6 weeks post delivery the MBS provides for a 6 week postnatal check, after which the woman would be referred back to her usual GP.

### **Number of services**

Only one (1) postnatal check by a participating midwife is payable in any pregnancy.

There is no limit attached to long and short postnatal attendances by a participating midwife. However, only clinically relevant attendances should be itemised under Medicare and services provided by participating midwives will be subject to Medicare Audit and Professional Review Processes.

## **MN.13.17 Conditions Governing the Provision and Claiming of Items**

### **Service length and type**

Services under these items must be for the time period specified within the item descriptor.

Professional attendance for MBS items 82100, 82105, 82110, 82115, 82130, 82135, 82140 may be provided in an appropriate setting that includes but is not limited to: the woman's home, a midwifery group practice, a midwife practitioner's rooms or a medical practice.

## **MN.13.18 Referral Requirements**

A participating midwife will be able to refer women to specialist obstetricians and paediatricians as clinical services dictate.

This measure does not include referral by a midwife for allied health care. If a participating midwife refers a patient to an allied health practitioner, no benefits would be payable for that service.

Medicare benefits are not payable specifically for services provided by a lactation consultant at this time. Medicare benefits would be payable for breast feeding support provide as part of the postnatal care by the participating midwife.

A referral is valid for 12 months to cover the confinement (antenatal, birthing and postnatal care for 6 weeks post delivery). Should there be a new pregnancy in that period, a new referral will be required.

A new pregnancy represents a new episode of care.

A referral to a specialist must be in writing in the form of a letter or a note to the specialist and must be signed and dated by the referring midwife. The referral must contain any information relevant to the patient and the specialist must have received the referral on or prior to providing a specialist consultation.

If a specialist provides a consultation without a referral, the specialist's consultation would not attract Medicare benefits at the specialist rate.

There are exemptions from this requirement in an emergency if the specialist considers the patient's condition requires immediate attention without a referral. In that situation, the specialist is taken to be the referring practitioner.

If a referral is lost, stolen or destroyed, the midwife would need to provide a replacement referral as soon as is practicable after the service is provided.

If the woman is a privately admitted patient of a hospital a letter or note is not required. The referring midwife would make a notation in the woman's hospital, which he or she would sign, approving the referral.

A referral is not required to transfer a woman's care during the intra-partum period under items 16527 and 16528. The midwife would make a signed notation in the woman's clinical record approving the transfer of care.

A referral is not required to refer the woman back to her GP after the 6 week postnatal period. The midwife would provide a discharge summary to the GP outlining her maternity history and any relevant clinical issues, which would also be recorded on the patient's notes.

### **MN.13.19 Requesting Requirements** **Pathology Services**

#### ***Determination of Necessity of Service***

The participating midwife requesting a pathology service for a woman must determine that the pathology service is necessary.

#### ***Request for Service***

The service may only be provided in response to a request from the treating practitioner and the request must be in writing (or, if oral, confirmed in writing within fourteen days).

#### **Pathology Services approved for participating midwives**

## **Diagnostic Imaging Services**

### ***Determination of Necessity of Service***

The participating midwife requesting a diagnostic imaging service for a woman must determine that the diagnostic imaging service is necessary for the appropriate professional care of the patient.

### ***Request for Service***

The service may only be provided in response to a request from the treating practitioner, and the request must be in writing, signed and dated.

The request does not have to be in a particular form. However, legislation provides that a request must be in writing and contain sufficient information, in terms that are generally understood by the profession, to clearly identify the item/s of service requested. This includes, where relevant, noting on the request the clinical indication(s) for the requested service. The provision of additional relevant clinical information can often assist the service provider, and enhance the overall service provided to the patient.

It is not necessary that a written request for a diagnostic imaging service be addressed to a particular provider or that, if the request is addressed to a particular provider, the service must be rendered by that provider.

A single request may be used to order a number of diagnostic imaging services. However, all services provided under this request must be rendered within seven days after rendering the first service.

### **Ultrasound:**

### **MN.14.1 Participating Nurse Practitioners Services - Overview**

As at 1 November 2010, Medicare benefits are payable for services provided by privately practising participating nurse practitioners in collaboration with other health care providers. Participating nurse practitioners can also request certain pathology and diagnostic imaging services for their patients and refer patients to specialist, as the clinical need arises. The nurse practitioner services that attract a Medicare benefit are identified in the Medicare Benefits Schedule (MBS) by an item number and the each item describes the service requirements and schedule fee.

### **MN.14.2 Eligible Nurse Practitioners**

Under the legislation, to be an eligible nurse practitioner the nurse practitioner must be registered or authorised (however described) under State and Territory law. The nurse practitioner must also demonstrate that he or she has the appropriate qualifications and experience to meet the registration standard developed by the Nursing and Midwifery Board of Australia (NMBA).

This standard was developed for the purposes of the National Registration and Accreditation Scheme (NRAS), a single regulation and accreditation scheme for health professionals, including nurse practitioners. Additional information is available at the Australian Health Practitioners Regulation Agency (AHPRA) website at: <http://www.ahpra.gov.au/index.php>

### **MN.14.3 Provider Numbers**

To access the Medicare arrangements, eligible nurse practitioners will need to apply to the Department of Human Services for a provider number. A separate provider number is required for each location at which a nurse practitioner practices.

Advice about registering with the Department of Human Services to provide nurse practitioner services using items 82200 to 82215 inclusive, is available from the Department of Human Services provider inquiry line on 132 150.

Medicare provider application forms for nurse practitioners can be downloaded from [the Department of Human Services' website](#).

#### **MN.14.4 Participating Nurse Practitioners**

To provide services under Medicare, the legislation requires that a nurse practitioner be a participating nurse practitioner. A participating nurse practitioner is an eligible nurse practitioner who has a Medicare provider number and who provides Medicare services in a collaborative arrangement or collaborative arrangements with one or more medical practitioners, of a kind or kinds specified in the regulations.

#### **MN.14.5 Collaborative Arrangements**

Under the Medicare program collaboration is having arrangements in place with a medical practitioner/s to consult, refer or transfer care as clinical needs dictate, to ensure safe, high quality maternity care. Under Medicare a collaborative arrangement can be with any medical practitioner.

Collaborative arrangement can be established in the following ways:

- a) being employed or engaged by 1 or more specified medical practitioners or by an entity that employs or engages 1 or more specified medical practitioners; OR
- b) receiving patients by referral in writing to the nurse practitioner for treatment from a specified medical practitioner, OR
- c) having a signed written agreement with one or more specified medical practitioners, OR
- d) having an arrangement with and acknowledged by at least one specified medical practitioners. This includes keeping comprehensive notes on all instances of consultation, referral and transfer of care, diagnostic tests requested and the test results and providing the collaborating practitioner/s with those results.

The legislation requires that collaborative arrangements must be in place at the time the participating nurse practitioner provides the service. The legislation requires that for each kind of collaborative arrangement, at least one medical practitioner is needed; it is not possible for the nurse practitioner to have a collaborative arrangement with an entity such as a health service.

- a) Being employed or engaged by a medical practice or an entity

An entity may refer to a hospital or community health centre. For a nurse practitioner to have a collaborative arrangement in these circumstances, that nurse practitioner must be employed or engaged by an entity that also employs or engages 1 or more specified medical practitioners.

The terms employ or engage covers both employees and contractors. This will cover an eligible nurse practitioner who is employed or engaged by a medical practice so long as that medical practice employs or engages at least one medical practitioner.

There must be at least one specified medical practitioner employed or engaged by the entity each time the nurse practitioner renders a service/performs treatment. However, there is no requirement that the consultation, referral or transfer of care must always be to the medical practitioner(s) employed/engaged by the entity.

- b) Referral from a medical practitioner

A participating nurse practitioner's patient will be able to access the MBS and PBS if a patient has been referred in writing to the nurse practitioner by a specified medical practitioner. The arrangement must provide for consultation, referral and transfer of care should the clinical need arise.

c) Written agreement with a medical practitioner

A nurse practitioner's patient will be able to access the MBS and PBS if the nurse practitioner has a written agreement in place with one or more doctors. The agreement must be signed by the nurse practitioner and a doctor. The arrangement must deal with consultation, referral and transfer to a doctor.

d) Arrangement with, acknowledged by a medical practitioner.

Evidence of 'acknowledgement' by a medical practitioner for each patient for whom the nurse practitioner provides care is a requirement to ensure that the medical practitioner being named understands and accepts the collaborative arrangement.

The acknowledgement does not have to be obtained on an individual patient basis. This means that, for example, a nurse practitioner could obtain an acknowledgement from a specified medical practitioner that he or she will be the collaborating medical practitioner for some or all of the nurse practitioner's patients. Arrangements to collaborate could be obtained in a number of ways including signing of documents, email or fax confirmation, or verbal acknowledgement which the nurse practitioner documents in their written records.

The nurse practitioner is required to record in written records any communications in regard to consultations, referral and transfer of the patient's care with the medical practitioner, including information that has been forwarded to the medical practitioner. The nurse practitioner is also required to send a copy of all pathology and diagnostic imaging results to a named medical practitioner and to record in the nurse practitioner's written records when this occurs (however, there is no requirement that the nurse practitioner consult with a medical practitioner in relation to every test result). The purpose of sharing records with the collaborating medical practitioner is to prevent duplication of services and to ensure continuity of care.

Arrangements to collaborate could be obtained in a number of ways including signing of documents, email or fax confirmation, or verbal acknowledgement which the nurse practitioner documents in their written records.

#### **MN.14.6 Schedule Fees and Medicare Benefits**

Each nurse practitioner service is identified in the MBS by an item number. The fee set for any item in the MBS is known as the "Schedule fee". The Schedule fee and Medicare benefit for each service is listed in the item description. The Medicare benefit for nurse practitioner services rendered to non-admitted patients is 85% of the Schedule fee.

#### **MN.14.7 Where Medicare Benefits are not payable**

Medicare benefits are not available:

- a. where the service rendered does not meet the item description and associated requirements;
- b. where the nurse practitioner service is not personally performed by the participating nurse practitioner;
- c. for any time period in the consultation periods when the patient is not receiving active attention e.g. the time the provider may take to travel to the patient's home or where the patient is resting between blood pressure readings;
- d. services provided where the patient is not in attendance, such as the issuing of repeat prescriptions;
- e. for telephone attendances; and
- f. group sessions.

The fee charged under Medicare must not include the cost of services that are not part of the MBS service being claimed. Medicare benefits are not payable for good or appliances associated with the service, such as bandages or other skin dressings.

Unless the Minister otherwise directs, Medicare benefits are not payable where funding has already been provided under an arrangement with the Commonwealth, state or a local governing body.

#### **MN.14.8 Billing of the Patient**

Where the nurse practitioner bills the patient for medical services rendered, the patient needs a properly itemised account/receipt to enable a claim to be made for Medicare benefits.

Under the provisions of the Health Insurance Act and Regulations, Medicare benefits are not payable in respect of a professional service unless there is recorded on the account setting out the fee for the service or on the receipt for the fee in respect of the service, the following particulars:

- (a) Patient's name;
- (b) The date on which the professional service was rendered;
- (c) An item number or a description of the professional service sufficient to identify the item that relates to that service, including an indication where the service is rendered to a person while hospital treatment is provided in a hospital "admitted patient" immediately preceding the description of the service or an asterisk "\*" directly after an item number where used;
- (d) The name and practice address and provider number of the participating nurse practitioner who actually rendered the service; (where the participating nurse practitioner has more than one practice location recorded with the Department of Human Services, the provider number used should be that which is applicable to the practice location at or from which the service was given).

Only one original itemised account should be issued in respect of any one service and any duplicates of accounts or receipts should be clearly marked "duplicate" and should be issued only where the original has been lost. Duplicates should not be issued as a routine system for "accounts rendered".

#### **MN.14.9 Assignment of Benefits (Direct-Billing Arrangements)**

Under the Health Insurance Act the Assignment of Benefit (direct billing) facility for professional services is available to all persons in Australia who are eligible for benefit under the Medicare program. This facility is NOT confined to pensioners or people in special need.

If a participating nurse practitioner direct-bills, the participating nurse practitioner undertakes to accept the relevant Medicare benefit as full payment for the service. Additional charges for that service (irrespective of the purpose or title of the charge) cannot be raised against the patient.

Under these arrangements:

The patient's Medicare card number must be quoted on all direct bill forms for that patient.

The basic forms provided are loose leaf to enable the patient details to be imprinted from the Medicare card.

The forms include information required by Regulations under Subsection 19(6) of the Health Insurance Act.

The nurse practitioner must include the particulars relating to the professional service out on the assignment form before the patient signs the form and ensure that the patient to receive a copy of the form as soon as practicable after the patient signs it.

Where a patient is unable to sign the assignment form the signature of the patient's parent, guardian or other responsible person (other than the nurse practitioner, nurse practitioner's staff, hospital proprietor, hospital staff, residential aged care facility proprietor or residential aged care facility staff) is acceptable. The reason the patient is unable to sign should also be stated.

The administration of the direct billing arrangements under Medicare as well as the payment of Medicare benefits on patient claims is the responsibility of the Department of Human Services. Any enquiries in regard to these matters should therefore be directed to Medicare offices or enquiry points.

#### **MN.14.10 Assignment of Benefit Forms**

Participating nurse practitioners wishing to direct-bill are required to use a specific form available from the Department of Human Services. This stationary is available from the Department of Human Services. Note that these forms are approved forms under the Health Insurance Act, and no other forms can be used to assign benefits without the approval of the Department of Human Services. Further information about direct-billing stationary can be obtained by telephoning 132150.

#### **MN.14.11 Time Limits applicable to lodgement of claims for assigned benefits**

A time limit of two years applies to the lodgement of claims with Medicare under the direct billing (assignment of benefit) arrangements. This means that Medicare benefits are not payable for any service where the service was rendered more than two years earlier than the date the claim was lodged with Medicare.

Provision exists whereby in certain circumstances (e.g. hardship cases), the Minister may waive the time limits. Special forms for this purpose are available, if required, from the processing centre to which assigned claims are directed.

#### **MN.14.12 Overview of the Nurse Practitioner items**

Services provided by participating nurse practitioners are covered by MBS items 82200, 82205, 82210, 82215. These items cover four time-tiered specific types of service that allow the participating nurse practitioner to perform a:

professional attendance for an obvious problem, straight forward in nature, with limited examination and management required (82200)

professional attendance for a patient presenting with clinical signs and symptoms with an easily identifiable underlying cause following a short consultation lasting less than 20 minutes duration (item 82205)

professional attendance for a patient presenting with clinical signs and symptoms with no obvious underlying cause requiring a more detailed consultation lasting at least 20 minutes duration (item 82210);

professional attendance for a patient presenting with multiple clinical signs and symptoms with the possibility of multiple causes and outcomes requiring an extensive consultation of at least 40 minutes (item 82215);

#### **MN.14.13 Nurse Practitioner services attracting Medicare rebates**

Medicare Benefits are only payable for clinically relevant services. Clinically relevant in relation to nurse practitioner care means a service generally accepted by the nursing profession as necessary to the appropriate treatment of the patient's clinical condition.

Medicare benefits are only payable where the participating nurse practitioner provides care to not more than one patient on one occasion.

#### **MN.14.14 Conditions governing the provision and claiming of items**

Service length and type

Services under these items must be for the time period specified within the item descriptor.

Professional attendance for MBS items 82200, 82205, 82210, 82215, may be provided in an appropriate setting that includes but is not limited to: the patient's home, a nurse practitioner group practice, a nurse practitioner's rooms or a medical practice.

### **MN.14.15 Referral requirements**

A participating nurse practitioner will be able to refer private patients to a specialist and consultant physician as clinical services dictate.

This measure does not include referral by a nurse practitioner for allied health care. If a participating nurse practitioner refers a patient to an allied health practitioner, no benefits would be payable for that service provided by the allied health professional.

A referral given by a participating nurse practitioner is valid until 12 months after the first service given in accordance with the referral.

If the referral is lost, stolen or destroyed, the nurse practitioner would need to provide a replacement referral as soon as is practicable after the service is provided.

A referral to a specialist must be in writing in the form of a letter or a note to the specialist and must be signed and dated by the referring nurse practitioner. The referral must contain any information relevant to the patient and the specialist must have received the referral on or prior to providing a specialist consultation.

There are exemptions from this requirement in an emergency if the specialist considers the patient's condition requires immediate attention without a referral. In that situation, the specialist is taken to be the referring practitioner.

### **MN.14.16 Requesting requirements**

#### **Pathology Services**

##### **Determination of Necessity of Service**

The participating nurse practitioner requesting a pathology service for a patient must determine that the pathology service is necessary.

##### **Request for Service**

The service may only be provided in response to a request from the treating practitioner and the request must be in writing (or, if oral, confirmed in writing within fourteen days).

##### **Pathology Services approved for participating nurse practitioners**

Nurse practitioners may request MBS pathology items 65060 - 73810 (inclusive). Requesting pathology services must be within the nurse practitioner's scope of practice.

##### **Further information**

For further information about Medicare Benefits Schedule items, please go to the Department of Health's website at [www.health.gov.au/mbsonline](http://www.health.gov.au/mbsonline).

#### **Diagnostic Imaging Services**

##### **Determination of Necessity of Service**

The participating nurse practitioner requesting a diagnostic imaging service for a patient must determine that the diagnostic imaging service is necessary for the appropriate professional care of the patient.

##### **Request for Service**

The service may only be provided in response to a request from the treating nurse practitioner, and the request must be in writing, signed and dated. The legislation provides that a request must be in writing and contain sufficient information, in terms that are generally understood by the profession, to clearly identify the item/s of service

requested. This includes, where relevant, noting on the request the clinical indication(s) for the requested service. The provision of additional relevant clinical information can often assist the service provider, and enhance the overall service provided to the patient.

It is not necessary that a written request for a diagnostic imaging service be addressed to a particular provider or that, if the request is addressed to a particular provider, the service must be rendered by that provider.

A single request may be used to order a number of diagnostic imaging services. However, all services provided under this request must be rendered within seven days after rendering the first service.

### **Ultrasound:**

#### Subgroup 1: General Ultrasound

MBS item: 55036 (abdomen)

MBS items: 55070, 55076 (breast)

#### Subgroup 4: Urological

MBS item: 55600 (prostate)

#### Subgroup 5: Obstetric and Gynaecological

MBS item: 55768

#### Subgroup 6: Musculoskeletal

MBS items: 55800, 55804, 55808, 55812, 55816, 55820, 55824, 55828, 55832, 55836, 55840, 55844, 55848, 55850, 55852

### **X-ray:**

#### Subgroup 1: Radiographic examination of the extremities

MBS items: 57509, 57515, 57521

#### subgroup 6: Radiographic examination of the thoracic region

MBS items: 58503 - 58527 (inclusive)

### **MN.15.1 Brain Stem Evoked Response Audiometry - (Item 82300)**

Item 82300 can be claimed for the programming of a cochlear speech processor.

### **MN.15.2 Non-Determinate Audiometry - (Item 82306)**

This refers to audiometry covering those services, one or more, referred to in Items 82309-82318 when not performed under the conditions set out in paragraph M15.3.

### **MN.15.3 Conditions for Audiology Services - (Items 82309 to 82318)**

A service specified in Items 82309 to 82318 shall be taken to be a service for the purposes of payment of benefits if, and only if, it is rendered:

- (a) in conditions that allow the establishment of determinate thresholds;
- (b) in a sound attenuated environment with background noise conditions that comply with Australian Standard

AS/NZS 1269.3-2005; and

(c) using calibrated equipment that complies with Australian Standard AS IEC 60645.1-22002, ASIEC60645.2-2002 and AS IEC 60645.3-2002.

#### **MN.15.4 Oto-Acoustic Emission Audiometry - (Item 82332)**

Medicare benefits are not payable under Item 82332 for routine screening of infants. The equipment used to provide this service must be capable of displaying the recorded emission and not just a pass/fail indicator.

#### **MN.15.5 Provision of Diagnostic Audiology Services by Audiologists - (Items 82300 to 82332)** **OVERVIEW**

The diagnostic audiology services available through MBS items 82300 to 82332 enable an eligible audiologist to perform diagnostic tests upon written request from an Ear, Nose and Throat (ENT) specialist (a specialist in the specialty of otolaryngology head and neck surgery); or for some services, a written request from a neurologist (a specialist or consultant physician in the specialty of neurology).

These diagnostic audiology services assist ENT specialists and neurologists in their medical diagnosis and/or treatment and/or management of ear disease or related disorders. The new diagnostic audiology items supplement the existing Otolaryngology items for services delivered by, or on behalf of medical practitioners (MBS items 11300 to 11339, excluding 11304).

#### **Requesting arrangements**

Medicare benefits are payable only under the following circumstances:

- For items 82300 and 82306, the written request must be made by an eligible practitioner who is a specialist in the specialty of otolaryngology head and neck surgery;
- For items 82309 to 82332, the written request must be made by an eligible practitioner who is a specialist in the specialty of otolaryngology head and neck surgery or a specialist or consultant physician in the specialty of neurology.

The written request must be in writing and must contain:

- (a) the date of the request; and
- (b) the name of the eligible practitioner who requested the service and either the address of his or her place of practice or the provider number in respect of his or her place of practice; and
- (c) a description of the service which provides sufficient information to identify the service as relating to a particular item (but need not specify the item number).

Written requests should, where possible, note the clinical indication/s for the requested service/s.

A request may be for the performance of more than one diagnostic audiology service making up a single audiological assessment, but cannot be for more than one audiological assessment. This means that for Medicare benefits to be payable, any re-evaluation of the patient should be made at the discretion of the ENT specialist or neurologist through a separate request.

Audiologists do not have the discretion to self-determine diagnostic tests under items 82300 to 82332. If a written request is incomplete or requires clarification, the audiologist should contact the requesting ENT specialist or neurologist for further information. If an audiologist considers that additional tests may be necessary, the audiologist should contact the requesting ENT specialist or neurologist to discuss the need and if the requesting practitioner determines that additional tests are necessary, an amended or separate written request must be arranged.

It is recommended that audiologists retain the written request for 24 months from the date the service was rendered (for Medicare auditing purposes). A copy of the written request is not required to accompany Medicare claims or be attached to patients' itemised accounts/receipts or assignment of benefit forms.

### **Eligibility requirements for audiologists**

The diagnostic audiology items (82300 to 82332) can only be claimed by audiologists who are registered with the Department of Human Services. To be eligible to register with the Department of Human Services to provide these services, audiologists must meet the following requirements:

Audiologists must be either:

- a 'Full Member' of the Audiological Society of Australia Inc (ASA), who holds a 'Certificate of Clinical Practice' issued by the ASA; or
- an 'Ordinary Member - Audiologist' or 'Fellow Audiologist' of the Australian College of Audiology (ACAud).

### **Registering with the Department of Human Services**

Provider registration forms may be obtained from Medicare on 132 150 or at [www.humanservices.gov.au](http://www.humanservices.gov.au).

### **Changes to provider details**

Audiologists must notify the Department of Human Services in writing of all changes to mailing details to ensure that they continue to receive information about Medicare services.

### **Reporting requirements**

Where an audiologist provides diagnostic audiology service/s to the patient under a written request, they must provide a copy of the results of the service/s performed together with relevant written comments on those results to the requesting ENT specialist or neurologist. It is recommended that these be provided within 7 days of the date the service was performed.

### **Out-of-pocket expenses and Medicare Safety Net**

Audiologists can determine their own fees for the professional service. Charges in excess of the Medicare benefit are the responsibility of the patient. However, out-of-pocket costs will count toward the Medicare Safety Net for that patient.

### **Publicly funded services**

Items 82300 to 82332 do not apply for services that are provided by any Commonwealth or state funded services or provided to an admitted patient of a hospital. However, where an exemption under subsection 19(2) of the Health Insurance Act 1973 has been granted to an Aboriginal Community Controlled Health Service or state/territory government health clinic, items 82300 to 82332 can be claimed for services provided by audiologists salaried by, or contracted to, the service or health clinic. All requirements of the relevant item must be met, including registration of the audiologist with the Department of Human Services. Medicare services provided under a subsection 19(2) exemption must be bulk billed (i.e. the Medicare rebate is accepted as full payment for services).

### **Private health insurance**

Patients need to decide if they will use Medicare or their private health insurance ancillary cover to pay for these services. Patients cannot use their private health insurance ancillary cover to 'top up' the Medicare rebate paid for the services.

**MISCELLANEOUS SERVICES ITEMS**

patients are referred by a medical practitioner, as part of a GP Mental Health Treatment Plan or as part of a shared care plan; or referred by a medical practitioner (including a general practitioner, but not a specialist or consultant physician) who is managing the patient under a referred psychiatrist assessment and management plan; or referred by a specialist or consultant physician in the practice of his or her field of psychiatry or paediatrics.

These therapies are time limited, being deliverable in up to ten planned sessions in a calendar year (including services to which items 80020, 80021, 80120, 80121, 80145, 80146, 80170 and 80171 apply).

GROUP THERAPY with a group of 6 to 10 patients, EACH PATIENT

(See para MN.7.1 of explanatory notes to this Category)  
**Fee:** \$22.70      **Benefit:** 85% = \$19.30  
**Extended Medicare Safety Net Cap:** \$68.10

Professional attendance for the purpose of providing focussed psychological strategies services for an assessed mental disorder by a **social worker** registered with Medicare Australia as meeting the credentialing requirements for provision of this service, lasting for at least 60 minutes duration where the patients are referred by a medical practitioner, as part of a GP Mental Health Treatment Plan or as part of a shared care plan; or referred by a medical practitioner (including a general practitioner, but not a specialist or consultant physician) who is managing the patient under a referred psychiatrist assessment and management plan; or referred by a specialist or consultant physician in the practice of his or her field of psychiatry or paediatrics if:

- the attendance is by video conference; and
- the patient is not an admitted patient; and
- the patient is located within a telehealth eligible area; and
- the patient is, at the time of the attendance, at least 15 kilometres by road from the social worker.

Group focussed psychological strategies delivered by video conference are time limited, being deliverable in up to ten planned sessions in a calendar year (including services to which items 80021, 80121, 80146 and 80171 apply).

Group focussed psychological strategies delivered by video conference time limits include the maximum ten planned sessions in a calendar year services to which items 80020, 80120, 80145 and 80170 apply.

GROUP THERAPY with a group of 6 to 10 patients, EACH PATIENT

(See para MN.7.2 of explanatory notes to this Category)  
**Fee:** \$22.70      **Benefit:** 85% = \$19.30  
**Extended Medicare Safety Net Cap:** \$68.10

80171

**M8. PREGNANCY SUPPORT COUNSELLING**

**Group M8. Pregnancy Support Counselling**

Provision of a non-directive pregnancy support counselling service to a person who is currently pregnant or who has been pregnant in the preceding 12 months, by an eligible psychologist, where the patient is referred to the psychologist by a medical practitioner (including a general practitioner, but not a specialist or consultant physician), and lasting at least 30 minutes. The service may be used to address any pregnancy related issues for which non-directive counselling is appropriate.
